In the past, many aircraft operators have incorrectly used the listing in § 91.33 as the sole standard for determining whether or not their aircraft met the requirements for the operation being conducted. With these new rules, the FAA provides a regulatory basis for the operation of these aircraft with inoperative instruments and equipment, when those instruments and equipment are not essential for the safe operation of the flight. These rules permit operation of aircraft with inoperative instruments and equipment within the framework of a controlled program of maintenance inspections, repairs, and parts replacements. It is imperative that the owner/operator exercise prudent judgment and at each required inspection, have any inoperative instrument or item of equipment inspected or repaired, as appropriate. In this good faith effort, the FAA has decided to conform §§ 43.11, 91.30, and 91.165 to the operational practices and procedures that the aviation public has requested.

Sections Affected

As a result of comments from the public and additional FAA review of Notice No. 81–14A, the FAA rearranged and renumbered some of the rules in this Final Rule document as compared to the proposed rules contained in Notice No. 14A (52 FR 47680; December 15, 1987). The following comparison table shows these differences:

COMPARISON BETWEEN THE PROPOSED RULES AND THE FINAL RULES

Notice No. 81–14A	Final rule
§ 43.11(b)	§ 43.11(b)
§ 91.30(a)	§ 91.30(a)
§ 91.30(c)	§ 91.30(c)
§ 91.30(d)	§ 91.30(d)
§ 91.30(d)(1)	§ 91.30(d)(1) (i) and (ii)
§ 91.30(d)(2)	§ 91.30(d)(2)
§ 91.30(d)(3)	§ 91.30(d)(3)
§ 91.30(d)(4)	§ 91.30(d)(4)
§ 91.165(a)	§ 91.165(a)
§ 91.165(b)	§ 91.165(c)
§ 91.165(c)	§ 91.165(b)
§ 91.165(d)	§ 91.165(d)

Section 91.30(d) permits rotorcraft, nonturbine-powered airplanes, gliders, and lighter-than-air aircraft, for which master MEL's and approved MEL's have not been developed, to be operated with inoperative instruments and equipment. Additionally, operators of small rotorcraft, nonturbine-powered small airplanes, gliders, and lighter-than-air aircraft, for which master MEL's and approved MEL's have been developed, may elect to operate in accordance with an approved MEL or in accordance with the provisions of § 91.30(d).

The pilot-in-command, owner, or operator will be required to identify the inoperative instruments or equipment, consult the aircraft's approved flight manual or owner's handbook, and review § 91.30(d)(2). After the pilot-in-command ensures that an inoperative instrument or equipment is not required, the aircraft may depart, provided—

(1) The inoperative instrument or item of equipment is deactivated or removed, the cockpit control of the affected instrument or item of equipment is placarded with the word "Inoperative," and the discrepancy is recorded in the aircraft's maintenance records in accordance with § 43.9 of this chapter. If the inoperative instrument or item of equipment is being removed from the aircraft or if deactivation requires maintenance, a certificated and appropriately rated maintenance person will be required to accomplish the removal and maintenance task; and

(2) At the next required inspection, the inoperative instrument or item of equipment is repaired, replaced, removed, or inspected, as appropriate.

Section 91.165 has been revised by rewording and rearranging the current text into separate paragraphs and by adding procedures for returning an aircraft to service with inoperative instruments and equipment. The revision establishes a requirement for owners and operators to have any inoperative instrument or item of equipment repaired, replaced, removed, or inspected, as appropriate. Also, this revision will ensure that after the aircraft has been inspected, and if maintenance is being deferred, the owner/operator of that aircraft is aware and responsible for ensuring that maintenance persons have made the appropriate entries in the aircraft's maintenance records and properly placarded the inoperative instruments or equipment "Inoperative."

When repair of inoperative instruments and equipment is deferred after an inspection, a maintenance person will make a determination that the inoperative instruments and equipment will not affect the intended function of any other operable instruments and equipment. An entry will then be made in the aircraft maintenance records in accordance with § 43.11. A maintenance person will place a placard that meets the aircraft's airworthiness certification regulation (e.g., §§ 23.1541, 27.1541, etc.) on the inoperative instrument or cockpit control of the inoperative item of equipment.

A new sentence has been added to § 43.11(b) to provide for an aircraft to be returned to service with inoperative instruments and items of equipment. The person approving the aircraft for return to service after any annual, 100-hour, progressive, or unscheduled inspection will be required to placard any inoperative instruments and equipment, and shall make an entry in the aircraft's maintenance records describing the deficiencies. Subsequent inspections will require reevaluating the instrument/equipment and updating the entry in the aircraft records.

Discussion of Comments to Notice No. 81–14

Sixty-five comments were received in response to Notice No. 81–14 (46 FR 52278; October 26, 1981), representing the views of manufacturers, associations, and individual operators. Generally, the comments favored rulemaking to provide relief for Part 91 operators to permit, under appropriate circumstances, operations with inoperative instruments and equipment. However, many commenters who favored rulemaking, strongly disagreed with the proposals contained in Notice No. 81–14. Therefore, the FAA withdrew the proposals.

The commenters were concerned with the operating limitations statements that were perceived as unnecessarily burdensome and time-consuming for

both industry and the FAA, without commensurate improvement in safety. The FAA agreed and the proposal has been withdrawn.

Concerning the proposal to develop an MEL in the FAA Approved Airplane or Rotorcraft Flight Manual, the FAA agreed with the comments that further evaluation of the means required to implement the procedure is necessary before this proposal can be adopted. Accordingly, the FAA has withdrawn the proposal to include MEL's in FAA Approved Airplane or Rotorcraft Flight Manuals.

Notice No. 81–14 proposed adding a new paragraph (g) to § 91.33 to permit operators of general aviation aircraft (for which a master MEL has not been developed) to be operated with inoperative instruments and equipment. After further consideration on how best to approach this matter, it was decided that proposed paragraph (g) should not be in § 91.33. Therefore, the FAA has withdrawn the proposal to add a new paragraph (g) to § 91.33.

In an effort to standardize and simplify the regulatory procedures applicable to operations with inoperative instruments or equipment, the FAA proposed to consolidate the MEL requirements contained in Parts 121, 125, and 135 into a single regulation under Part 91. The FAA has determined that this proposal should be addressed through separate rulemaking, and therefore, the proposal has been withdrawn.

The National Business Aircraft Association (NBAA) and 19 other commenters supported the proposal to allow Part 91 operators to use an approved MEL. However, the commenters suggested the master MEL's were developed for air carriers and include references to equipment (such as flight data and voice recorders) that may not be applicable to private operators. Commenters suggested these references should be eliminated from the master MEL. A master MEL originates when an aircraft is type certificated, and the master MEL is developed for the aircraft type, regardless of the aircraft's intended use. Any operator (air carrier or private) may use the master MEL as a guide to develop an MEL for a specific aircraft with specified operational requirements. Although private operators may not have the same instrument or equipment requirements as air carriers, the FAA does not agree that instruments and equipment should be eliminated from the master MEL.

Discussion of Comments to SNPRM No. 81–14A

One hundred seventy-four comments were received in response to Notice No. 81–14A (52 FR 47680), representing the views of manufacturers, associations, and individuals. One hundred and two commenters favored the proposals contained in Notice No. 81–14A, six were against, and sixty-six appeared to not understand that the proposals provided relief from the current rules.

The six commenters opposed to the proposals of Notice No. 81–14A, objected to the proposal on the grounds that they believe the current rule (i.e., § 91.33) is adequated in ensuring that an aircraft is operated with the proper instruments and equipment. Although many pilots believe the provisions of § 91.33 are the only requirements for determining whether or not an instrument or an item of equipment is needed for an aircraft to be considered airworthy for flight, they are not correct. Though many of the required instruments and equipment are covered by § 91.33, there are additional requirements. Some of these requirements are covered in an aircraft's applicable airworthiness certification regulations. Also, there are added requirements contained in an aircraft equipment list, kinds of operations equipment list, or aircraft flight manual. In addition, there are other instruments and equipment requirements listed in Part 91 (e.g., §§ 91.24, 91.90, etc.). Also, there are airworthiness directives (AD) that require certain instruments and equipment to be operational. As an example, AD 82–06–10 requires that a Cessna 210 have two operational vacuum pumps prior to entering IFR conditions. Considering these numerous airworthiness requirements, the FAA has determined that rules, as proposed in Notice No. 81–14A are needed to ensure that aircraft are properly equipped for flight. Therefore, the rules proposed in Notice No. 81–14A remain unchanged.

One commenter believes there must be a safety requirement shown to justify establishing new rules. The commenter suggested that present and past accident rates do not justify issuing new rules. The FAA does not use accident and incident data as the sole basis for proposing or establishing new rules. The FAA agrees that past accident and incident records show a minimal number of accidents and incidents caused by inoperative instruments and equipment, but the purpose of these new rules is to clarify the language in the existing rules to provide greater flexibility to Part 91 operators. Therefore, the rules as proposed in Notice No. 81–14A remain unchanged.

Several commenters suggested that the FAA expand the provisions of § 91.30(d) to include turbine-powered airplanes.

The FAA decided not to include the turbine-powered airplanes because operators of some of these aircraft may already use an MEL. This relief was granted to operators of multiengine turbine-powered airplanes when the FAA reinstated § 91.30 on December 13, 1985 (Amdt. No. 91–192; 50 FR 51188). In addition, the FAA decided to hold operators of these airplanes to a higher standard of safety, since these airplanes are more complex, are frequently involved in transporting a larger number of passengers, and operate more often in complex, high density airspace. Therefore, the rules as proposed in Notice No. 81–14A remain unchanged.

Several commenters suggested that the FAA expand the provisions of § 91.30 to include aircraft that are operated under Part 135. Currently, the FAA is working on a separate MEL rulemaking project to address aircraft operating under Part 135. Therefore, the rules as proposed in Notice No. 81–14A remain unchanged.

One commenter suggested that gliders be included in § 91.30(d). The FAA's intent in proposing the rules contained in Notice No. 81–14A was to provide a realistic approach to the inoperative instruments and equipment issue in response to the concerns of the general aviation community. Therefore, the FAA has clarified § 91.30(d) to specifically identify gliders and ligher-than-air aircraft as falling within the applicability of this rule.

Several commenters objected to the placarding requirements of §§ 43.11(b), 91.30(d)(3), and 91.165(d). The placarding requirement is a very simple procedure that will require a pilot or mechanic to place a placard on the inoperative instrument or cockpit control of an item of equipment marking it "Inoperative." This procedure can be as simple as writing the word "Inoperative" on a piece of masking tape or piece of paper and attaching it to the instrument or cockpit control. The purpose of the placarding requirement is to provide an additional safeguard for future users and maintenance personnel for ensuring they are aware of a discrepancy. Therefore, the rules as proposed in Notice No. 81–14A remain unchanged.

A few commenters requested clarification on who could placard

inoperative instruments or cockpit controls of inoperative equipment. Placards required by § 91.30 are operational in nature, and may be installed by certificated and appropriately rated pilots, or by persons certificated and appropriately rated to perform maintenance on the aircraft. At the first and each succeeding required inspection, placards required by § 91.165 may be installed only by the following certificated and rated persons: (1) The holder of a mechanic certificate; (2) The holder of a repairman certificate when performing those maintenance services for a certificated repair station; (3) Persons working under the supervision of a holder of a mechanic or repairman certificate; (4) The holder of a repair station certificate; (5) The manufacturer of the aircraft who holds a manufacturer's maintenance facility certificate. After further review of these comments, the FAA has revised and rewritten § 91.30(d)(3). The phrase "by a person authorized in § 43.3 of this chapter" has been deleted. The purpose of this change is to alleviate the confusion of who can placard inoperative instruments and cockpit controls.

One commenter questioned whether the kinds of aircraft provided for in these new rules would also be covered if the aircraft were operated in accordance with Parts 133, 137, or 141. Aircraft operated under these parts must comply with the operational and maintenance rules of Part 91, in addition to the rules of Parts 133, 137, or 141. Therefore, these aircraft are also covered by the provisions of these new rules.

One commenter questioned whether an individual who has an approved MEL could alternate between complying with the MEL or the provisions of § 91.30(d). The FAA intended § 91.30(d) to require any person having an approved MEL to use that MEL. If a person has an approved MEL and elects to operate under the provisions of § 91.30(d), then that person will be required to surrender the MEL and Letter of Authorization to the Flight Standards District Office having jurisdiction. Therefore, § 91.30 (c) and (d) have been rewritten to clarify this matter. One commenter pointed out an incorrect reference in the text of § 43.11(b). The commenter's question regarded a reference to "§ 135.41(a)(1)." This was a typographical error, and the reference should have been "§ 135.411(a)(1)." Therefore, § 43.11(b) has been revised to reflect this change.

A few commenters requested clarification of the term "deactivated" in § 91.30(d)(3)(ii). Depending on the specific instrument or item of equipment, the term "deactivated" may mean a process as simple as the pilot pulling a circuit breaker to the "open" or "off" position, or as complex as rendering instruments or equipment totally inoperable by complex maintenance tasks requiring a certificated and appropriately rated maintenance person to perform the deactivation. For example, the procedures for "deactivating" certain models of gasoline cabin heaters are to disconnect and cap off fuel supply lines at their sources, disconnect all electrical lines at their sources, and disconnect the electrical ignition. In other instances, deactivation may be accomplished by a certificated and appropriately rated pilot, provided the maintenance tasks required to "deactivate" an instrument or item of equipment are preventive maintenance as prescribed in paragraph (c) of Appendix A, Part 43. When these tasks are not preventive maintenance, "deactivation" must be accomplished by a certificated and appropriately rated maintenance person. After further review of these comments, the FAA has revised and rewritten § 91.30(d)(3). The phrase "by a person authorized in § 43.3 of this chapter" has been deleted. The purpose of this change is to alleviate the confusion of who can deactivate inoperative instruments and equipment.

One commenter requested clarification concerning the length of time an inoperative instrument or item of equipment could remain inoperative after deactivation or removal. Sections 91.29 (b) and 91.30(d)(4) require a person to determine whether an aircraft with inoperative instruments and equipment is in condition for safe operation. In addition, § 91.165(c) requires at every required inspection thereafter, the owner/operator of the aircraft to have any inoperative instrument and equipment reevaluated to ensure the discrepancy will not affect the operation of any other installed instrument or equipment. Therefore, the FAA believes compliance with §§ 91.29(b), 91.30(d)(4), and 91.165(c) will provide adequate safeguards without having to impose time limits on the repair or replacement of inoperative instruments and equipment.

Several commenters requested clarification of the phrase "next required inspection" contained in § 91.165(c). The phrase "next required inspections", as contained in § 91.165(c), are those inspections required to be conducted by:

(1) Section 91.169(a)(1), (b), or (d);

(2) An inspection program selected under the provisions of § 91.169 (e) and (f);

(3) Section 135.411(a)(1); or

(4) Inspections and maintenance programs selected under the provisions of Part 125. A few commenters requested advice on whether it would be better for them to operate under an MEL or the provisions of § 91.30(d). An MEL provides a precise list of instruments, equipment, and both operational and maintenance procedures that permit an aircraft to be operated with inoperative instruments and equipment. Under the MEL concept, those instruments and equipment not covered in the approved MEL would be required to be operative at all times regardless of the operation being conducted. The new § 91.30(d) requires only those instruments and equipment listed in § 91.30(d)(2) to be operative. Those instruments and equipment not listed in § 91.30(d)(2) would be permitted to be inoperative.

However, in comparing the two methods, certain instruments and equipment permitted to be inoperative by an MEL would not be permitted to be inoperative by § 91.30(d)(2). As an example, the master MEL for the Cessna 310, 320, 335, and 340 airplanes allow for the fuel quantity indicators of these airplanes to be inoperative. If these same airplanes were operating in accordance with § 91.30(d), these indicators will be required to be operative. However, the master MEL for these airplanes require that specific operational and maintenance procedures be developed to provide an equivalent level of safety.

The FAA believes that individuals must evaluate their own circumstances and situations and make their own decisions. Persons who lease their aircraft to multiple users may want strict, well defined procedures for renters to follow and may elect to obtain an approved MEL. Whereas, a person who is the only user of an aircraft may find the process of obtaining an approved MEL to be burdensome and unnecessary, and may elect to operate under § 91.30(d). Each person electing to obtain an MEL and a Letter of Authorization for an aircraft must ensure that others using that aircraft know the MEL discrepancy and logging procedures.

The term "multiengine" referenced in the proposed § 91.30(d)(1) has been deleted from the final rule, because the FAA is developing master MEL's for single engine aircraft. This deletion allows operators of single engine aircraft to use the MEL concept if desired. Therefore, § 91.30(d)(1)(i) and (ii) have been revised to reflect this change.

One commenter suggested that the removal of certain kinds of avionics

equipment be added to the list of items classified as preventive maintenance in Part 43. The FAA recognizes that in some instances this may be appropriate. However, the FAA has determined there is not sufficient data on which to base a decision that any and all such removals can be safely classified as preventive maintenance. Therefore, the rules as proposed in Notice No. 81–14A remain unchanged.

One commenter questioned the use of upper case letters for the phrase "Type Certificate Data" contained in text of § 91.30(d)(2)(i). The commenter stated that the use of upper case letters is misleading and would imply there is a document by that name. Subsequently, the FAA has determined that type certificate data information is not readily available to pilots, and the airworthiness certification regulations already cover this information. Therefore, the phrase, "Type Certificate Data" has been deleted, and § 91.30(d)(2)(i) has been revised to reflect this change.

Two commenters point out that some aircraft manufacturers have not made "aircraft equipment lists" or "kinds of operation equipment lists" available to aircraft owners. The commenters recommend the phrase "if available" be added to § 91.30(d)(2)(ii). The commenters did not provide any specific examples to support their claim, and the FAA is not aware of any aircraft not having an Aircraft Equipment List, a Kinds of Operation Equipment List, or some other acceptable equipment list. The rules (i.e., §§ 23.1583(h), 25.1583(e), 25.1525, 27.29, 27.1525, 27.1583(e), 29.29, 29.1525, and 29.1583(e)) contained in the aircraft certification regulations require an aircraft manufacturer to make information available on the kinds of operation in which an aircraft may or may not be used. Any installed equipment that affects any operating limitation must be listed and identified as to the operational function. Therefore, the rules as proposed in Notice No. 81–14A remain unchanged.

Fairchild Industries proposed an alternative to these new rules. Fairchild Industries petitioned the FAA to amend §§ 91.30 and 135.179 to require the FAA and aircraft manufacturers to establish a list of required instruments and equipment to be included in each airplane and rotorcraft flight manual. This list would be used by a pilot to determine what instruments and equipment are required to begin and/or continue a flight. The FAA has determined this petition has merit and will give it further consideration. However, since the petition is outside the scope of Notice Nos. 81–14 and 81–14A, the rules as proposed in Notice No. 81–14A remain unchanged.

Several commenters incorrectly believed that proposed § 91.30(d) would require an aircraft's instruments and equipment to be operative at all times. Operators complying with § 91.30(d) may operate aircraft with certain instruments and equipment inoperative. Persons who elect to operate their aircraft in accordance with § 91.30(d) will not have to go through the process of developing an MEL and getting it approved. The FAA sent a copy of Notice No. 81–14A and a letter explaining these new rules to every commenter who had this misunderstanding of § 91.30(d).

Regulatory Evaluation

Regulatory Evaluation Summary

The FAA conducted a regulatory evaluation of this final rule, which is included in the regulatory docket. The FAA determined that this final rule is consistent with the objective of Executive Order 12291 as part of the President's regulatory reform program to reduce regulatory burdens on the public.

Benefits

Implementing these rules enhances the flexibility of a regulatory requirement necessary for safety, provides greater operational flexibility to general aviation operators, and reduces the administrative workload for the FAA.

These amendments provide relief to Part 91 operators of rotorcraft and nonturbine-powered airplanes (not being utilized in an air carrier operation) from current rules that absolutely prohibit operation of these aircraft with inoperative instruments or items of equipment. These aircraft will be permitted to operate with inoperative instruments and equipment that are not needed for a particular type of operation (e.g., night lighting equipment would not be required to be operable during day VFR operations) pursuant to § 91.30.

These revisions to §§ 91.30, 91.165, and 43.11 provide cost savings to Part 91 operators by reducing aircraft downtime and eliminating the cost to repair the inoperative instrument or item of equipment not needed for a particular type of operation.

Costs

Part 91 operators of rotorcraft, gliders, nonturbine-powered airplanes, and lighter-than-air aircraft who use § 91.30 to operate with inoperative instruments or items of equipment, will incur negligible costs as a result of the placarding requirements. These additional costs result from having a person, who is returning an aircraft to service after completion of a required inspection, determine that the inoperative instrument or equipment does not affect the intended function of any operable instrument or equipment or the airworthiness of the aircraft, and then placard the inoperative instrument and/or cockpit control of an item of equipment. Placarding an inoperative instrument or item of equipment may be as simple as writing the word "Inoperative" on piece of masking tape and placing the tape on the instrument or cockpit control. Therefore, these revised rules impose only negligible costs, satisfy the airworthiness requirements of the maintenance rules, increase operational flexibility, and reduce costs by allowing an aircraft to be operated with certain inoperative instruments and equipment.

This rule imposes no new requirements on Part 91 operators of aircraft for which master MEL's have been developed. Finally, this rule imposes no new requirements on the Federal Government (FAA). Based on the aforementioned discussion of the benefit and cost aspects of the proposed rule, the FAA finds these revised rules to be cost effective.

International Trade Impact Statement

This rule will not influence or affect international trade involving aviation products or services. Furthermore, no comments on Notice Nos. 81–14 and 81–14A concerning international trade were received. Therefore, the FAA certifies that this rule will not eliminate existing or create additional barriers to the sale of foreign aviation products or services in the United States and will not eliminate existing or create additional barriers to the sale of U.S. aviation products and services in foreign countries.

Regulatory Flexibility Determination

The Regulatory Flexibility Act (RFA) of 1980 was enacted by Congress to ensure that small entities are not disproportionately affected by Government regulations. The RFA requires agencies to review rules which may have a "significant economic impact on a substantial number of small entities."

These revised rules will impose negligible costs, as a result of the new requirement to placard inoperative instruments and equipment, on some operators of general aviation rotorcraft, gliders, non-turbine powered airplanes, and lighter-than-air aircraft.

Therefore, the FAA certifies that these revised rules will not have a significant economic impact on a substantial number of small entities.

Comments Received on NPRM

Twenty-eight comments concerning the regulatory evaluation were received in response to Notice Nos. 81–14 and 81–14A. These comments do not affect the regulatory evaluation of this final rule and are discussed above in the section titled "Discussion of Comments to Notice No. 81–14" and "Discussion of Comments to SNPRM No. 81–14A" of this document.

Paperwork Reduction Act

Information collection requirements contained in §§ 43.11 and 91.30 have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB Control Nos. 2121–0020 and 2120–0522, respectively.

Federalism Implications

These revised rules will be enacted under the authority of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1301, et seq.). This statute preempts State law regulating aviation safety. Therefore, in accordance with Executive Order No. 12612, these revised rules do not have federalism implication warranting the preparation of a federalism assessment.

Conclusion

Amendment Nos. 43–30 and 91–206 permit rotorcraft, gliders, nonturbine/powered airplanes, and lighter-than-air aircraft, to be operated with certain instruments and equipment inoperative that are not essential for the safe operation of the aircraft. As was previously stated in the Regulatory Evaluation section of this document, unnecessary maintenance and operational costs may be required by the current rules in Part 91. Operators of these types of aircraft will benefit from the relief permitted by Amendment Nos. 43–30 and 91–206, and the additional costs are minimal. Accordingly, the FAA has determined that these amendments do not involve a rule change that is major under Executive Order 12291 or significant under Department of Transportation Policies and Procedures (44 FR 11034; February 26, 1979). Although numerous small operators may be impacted by these amendments, the impact will be minimal since the costs of operating pursuant to § 91.30 do not exceed the FAA's criteria for "significant economic impact." For the reasons stated above, and in accordance with the Regulatory Flexibility Act, I certify that these amendments will not have a significant economic impact on a substantial number of small entities.

List of Subjects

14 CFR Part 43

Air carriers, Air transportation, Aircraft, Aviation safety, Safety, Maintenance, Preventive maintenance.

14 CFR Part 91

Aviation safety, Safety, Aircraft, Pilots, Airworthiness directives, Flight rules general, Visual flight rule, Instrument flight rules.

Adoption of the Amendment

Accordingly, Parts 43 and 91 of the Federal Aviation Regulations (14 CFR Parts 43 and 91) are amended as follows:

PART 43—MAINTENANCE, PREVENTIVE MAINTENANCE, REBUILDING, AND ALTERATION

1. The authority citation for Part 43 continues to read as follows:

Authority: 49 U.S.C. 1354, 1421 through 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983).

2. By amending § 43.11 by revising the title and paragraph (b) to read as follows:

§ 43.11 Content, form, and disposition of records for inspections conducted under Parts 91 and 125 and §§ 135.411(a)(1) and 135.419 of this chapter.

* * * * *

(b) *Listing of discrepancies and placards.* If the person performing any inspection required by Part 91 or 125 or § 135.411(a)(1) of this chapter finds that the aircraft is unairworthy or does not meet the applicable type certificate data, airworthiness directives, or other approved data upon which its airworthiness depends, that persons must give the owner or lessee a signed and dated list of those discrepancies. For those items permitted to be inoperative under § 91.30(d)(2), that person shall place a placard, that meets the aircraft's airworthiness certification regulations, on each inoperative instrument and the cockpit control of each item of inoperative equipment, marking it "Inoperative," and shall add the items to the signed and dated list of discrepancies given to the owner or lessee.

PART 91—GENERAL OPERATING AND FLIGHT RULES

3. The authority citation for Part 91 continues to read as follows:

Authority: 49 U.S.C. 1301(7), 1303, 1344, 1348, 1352 through 1355, 1401, 1421 through 1431, 1471, 1472, 1502, 1510, 1522, and 2121 through 2125; Articles 12, 29, 31, and 32(a) of the Convention on International Civil Aviation (61 Stat 1180); 42 U.S.C. 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983).

4. By amending § 91.30 by revising the title, the introductory text of paragraph (a), and paragraph (c); by redesignating paragraph (d) as (e); and by adding a new paragraph (d) to read as follows:

§ 91.30 Inoperative instruments and equipment.

(a) Except as provided in paragraphs (d) of this section, no person may takeoff an aircraft with inoperative instruments or equipment installed unless the following conditions are met:

* * * * *

(c) A person authorized to use an approved Minimum Equipment List issued for a specific aircraft under Part 121, 125, or 135 of this chapter shall use that Minimum Equipment List in connection with operations conducted with that aircraft under this part without additional approval requirements.

(d) Except for operations conducted in accordance with paragraphs (a) or (c) of this section, a person may takeoff an aircraft in operations conducted under this part with inoperative instruments and equipment without an approved Minimum Equipment List provided—

(1) The flight operation is conducted in a—

(i) Rotorcraft, nonturbine-powered airplane, glider, or lighter-than-air aircraft for which a Master Minimum Equipment List has not been developed; or

(ii) Small rotorcraft, nonturbine-powered small airplane, glider, or lighter-than-air aircraft for which a Master Minimum Equipment List has been developed; and

(2) The inoperative instruments and equipment are not—

(i) Part of the VFR-day type certification instruments and equipment prescribed in the applicable airworthiness regulations under which the aircraft was type certificated;

(ii) Indicated as required on the aircraft's equipment list, or on the Kinds of Operations Equipment List for the kind of flight operation being conducted;

(iii) Required by § 91.33 or any other rule of this part for the specific kind of flight operation being conducted; or

(iv) Required to be operational by an airworthiness directive; and

(3) The inoperative instruments and equipment are—

VOL

1988
UMI

(i) Removed from the aircraft, the cockpit control placarded, and the maintenance recorded in accordance with § 43.9 of this chapter; or

(ii) Deactivated and placarded "Inoperative." If deactivation of the inoperative instrument or equipment involves maintenance, it must be accomplished and recorded in accordance with Part 43 of this chapter; and

(4) A determination is made by a pilot, who is certificated and appropriately rated under Part 61, or by a person, who is certificated and appropriately rated to perform maintenance on the aircraft, that the inoperative instrument or equipment does not constitute a hazard to the aircraft.

An aircraft with inoperative instruments or equipment as provided in paragraph (d) of this section is considered to be in a properly altered condition acceptable to the Administrator.

* * * * * *

5. By revising § 91.165 to read as follows:

§ 91.165 Maintenance required.

Each owner or operator of an aircraft—

(a) Shall have that aircraft inspected as prescribed in Subpart C of this part and shall between required inspections, except as provided in paragraph (c) of this section, have discrepancies repaired as prescribed in Part 43 of this chapter;

(b) Shall ensure that maintenance personnel make appropriate entries in the aircraft maintenance records indicating the aircraft has been approved for return to service;

(c) Shall have any inoperative instrument or item of equipment, permitted to be inoperative by § 91.30(d)(2) of this part, repaired, replaced, removed, or inspected at the next required inspection; and

(d) When listed discrepancies include inoperative instruments or equipment, shall ensure that a placard has been installed as required by § 43.11 of this chapter.

Issued in Washington, DC, on December 8, 1988.

T. Allan McArtor,

Administrator.

Occupational Exposure to Formaldehyde; Stay of Hazard Communication Provisions

VOL 53 ISS 239 DE 13 1988 UMI

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H-225-C]

Occupational Exposure to Formaldehyde; Stay of Hazard Communication Provisions

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Administrative stay.

SUMMARY: On December 4, 1987, the Occupational Safety and Health Administration (OSHA) published a final rule in the **Federal Register** for occupational exposure to formaldehyde (29 CFR 1910.1048, 52 FR 46168). On February 2, 1988, the Office of Management and Budget (OMB), in accordance with its authority under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and (5 CFR Part 1320, approved the information collection requirements contained in the final rule with the exception of those contained in paragraphs (m)(1)(i) through (m)(4)(ii), concerning hazard communication. OSHA resubmitted its request for approval of paragraphs (m)(1)(i) through (m)(4)(ii), and on October 7, 1988, OMB approved paragraph (m)(1)(i) for one year and paragraphs (m)(1)(ii) through (m)(4)(ii) for three years. On November 8, 1988, OSHA announced that it intended to provide a sixty day start-up period from the date of OMB's approval, until December 6, 1988, before it would begin enforcing the newly approved hazard communication provisions (53 FR 45080). OSHA also announced that it would use this period to consider the petition filed by the Formaldehyde Institute and others for an administrative stay of these provisions and gave the public an opportunity to comment on whether to grant the petition and whether OSHA should initiate rulemaking to reconsider the hazard communication provisions contained in paragraph (m) of the formaldehyde standard.

OSHA has decided to administratively stay paragraphs (m)(1)(i) through (m)(4)(ii) of the formaldehyde standard for a period of nine months. During this period, OSHA will propose to revoke these paragraphs of the formaldehyde standard and to invite comments on the substitution of the full Hazard Communication Standard (29 CFR 1910.1200) or other equally protective alternatives commenters may submit. Pending completion of this rulemaking, affected employers must continue to comply with the provisions of OSHA's Hazard Communication Standard.

EFFECTIVE DATE: Administrative stay effective until September 13, 1989.

ADDRESS: Docket H-225C, the docket for the formaldehyde standard, containing the exhibits mentioned in this document is available at the OSHA Docket Office, Room N2634, Department of Labor, 200 Constitution Avenue NW., DC 20210. Telephone (202) 523-7894.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Occupational Safety and Health Administration, Office of Information and Consumer Affairs, U.S. Department of Labor, Room N-3647, 200 Constitution Avenue NW., Washington, DC 20210. Telephone (202) 523-8151.

SUPPLEMENTARY INFORMATION: OSHA published a final rule on formaldehyde on December 4, 1987 (52 FR 46168). On February 2, 1988, under the Paperwork Reduction Act, OMB approved all of the paperwork requirements of 29 CFR 1910.1048 with the exception of those contained in paragraphs (m)(1)(i) through (m)(4)(ii). OSHA subsequently informed the public of this fact and of the OMB clearance number (53 FR 6628, 3/2/88).

The disapproved paragraphs contained criteria for determining when the presence of formaldehyde constitutes a health hazard and prescribed information that must be included on hazard warning labels on containers of formaldehyde, and containers of certain formaldehyde-treated products as well as information to be included in the accompanying Material Safety Data Sheets (MSDSs).

On July 7, 1988, OSHA resubmitted its request for information collection approval of paragraphs (m)(1)(i) through (m)(4)(ii) of 29 CFR 1910.1048, with a more detailed justification (53 FR 26329, 7/12/88).

On October 7, 1988, OMB approved the information collection requirements in paragraph (m)(1)(i) for one year, until October 7, 1989. Paragraph (m)(1)(i) sets forth objective criteria that establish when formaldehyde constitutes a "health hazard" for purposes of triggering the labeling provisions and the requirements for availability of MSDSs. At the same time, paragraphs (m)(1)(ii) through (m)(4)(ii) were approved for three years, until October 7, 1991. These paragraphs prescribe the information to be included on hazard warning labels for formaldehyde and set forth procedures for developing, updating, and distributing MSDSs to accompany formaldehyde and formaldehyde-containing products.

OSHA subsequently announced it would begin enforcing these newly approved paragraphs on December 6, 1988, sixty days from the date of OMB's paperwork approval. This time was given so that the public could become familiar with these newly approved provisions (53 FR 45080, 11/8/88). OSHA also informed the public that it would consider, during this time, a petition filed by the Formaldehyde Institute and others for an administrative stay of the hazard communication provisions of the formaldehyde standard and requested public comment on whether it should administratively stay the hazard communication provisions of the formaldehyde standard. Specifically, the Agency sought public input concerning the appropriateness of the labeling requirement and the feasibility of measuring formaldehyde emissions at the 0.1 ppm level and whether the Agency should undertake additional rulemaking to reconsider the labeling requirements in the formaldehyde standard. Comments were to be received by November 29, 1988, so that the Agency could complete its consideration of the administrative stay petition by the December 6, 1988 effective date.

On November 22, 1988, OSHA extended the start-up date for compliance with the newly approved hazard communication provisions until December 20, 1988 (53 FR 47188). This extension was necessary to permit time for judicial consideration of the Formaldehyde Institute's motion for a judicial stay if the Agency decision on the administrative stay request did not render the motion for a judicial stay moot.

After thorough consideration of all of the material that has been received by OSHA since the promulgation of the formaldehyde standard (Docket H225-C, Exhibits 251-275), OSHA has decided for the reasons stated below that it is reasonable and appropriate to administratively stay paragraphs (m)(1)(i) through (m)(4)(ii) of the formaldehyde standard for a period of nine months. This will give the Agency time to propose to revoke these provisions, and to incorporate in full the provisions of OSHA's generic Hazard Communication Standard.

Background

The Hazard Communication Standard is a generic standard that is broadly scoped to ensure that the toxic effects of all chemicals are evaluated, and that information concerning health and safety hazards is transmitted to affected employers and employees. The standard

defines a chemical as posing a "health hazard" if it can cause an acute or chronic health effect. Health hazards include, *inter alia*, carcinogens, irritants, and sensitizers. The determination of whether a chemical constitutes a health hazard is based on the intrinsic characteristics of the chemical.

Because many chemicals that constitute "health hazards" are incorporated into materials or products in such a manner that individuals working with or using them will not be exposed to the chemical itself, the Hazard Communication Standard does not apply to "articles". The standard defines an "article" as "a manufactured item (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which does not release, or otherwise result in exposure to a hazardous chemical under normal conditions of use." Because of formaldehyde's unusual characteristic of "offgassing" from solids and resins used in apparel and wood products in particular, many formaldehyde-containing products would not be considered "articles" within the meaning of the Hazard Communication Standard.

During rulemaking on the formaldehyde standard, a number of participants requested that products that release small amounts of formaldehyde be granted a de minimis exemption from the labeling requirements of the standard (see, for example, Exhibits 139; 80–261, p. 85; 160; 170; 171; 201–12; 106; 110A; Tr. 5/5/86, pp. 145–157; 80–21; 80–54; 80–63; 80–78). In fact, this issue received more comment than any other provision in the proposed standard. Agreeing with the commenters that a de minimis exception was appropriate, in the final rule OSHA included a low level cut-off below which the hazard communication provisions of the formaldehyde standard would not apply.

In the final formaldehyde standard, labeling of containers, MSDSs, and training were required only for mixtures or solutions containing more than 0.1 percent formaldehyde or for materials capable of releasing formaldehyde into the air at concentrations reaching or exceeding 0.1 ppm under normal conditions of use.

The 0.1 percent composition element of the hazard communication exemption is analogous to the treatment of other carcinogens in the Hazard Communication Standard. However, the 0.1 ppm element in the de minimis exemption to the hazard communication provisions of the formaldehyde standard was a departure from the Hazard Communication Standard, which, with the arguable exception of the articles definition, does not base its labeling requirements on exposure levels.

Administrative Stay

Unfortunately OSHA's attempt at providing a de minimis exemption from the hazard communication requirements of the formaldehyde standard has been almost universally misunderstood and has resulted in widespread confusion (see, for example, Exhibits 251–4, pp. 24–25; 265–8; 265–11; 265–30). Others simply disagree with the cut-off which OSHA has chosen and have attacked OSHA's conclusions on the epidemiology of formaldehyde and the meaning of the risk assessment (Exhibits 251–4; 265–4; 265–17; 265–24; 265–32; 265–37).

OSHA does not find industry's substantive scientific arguments persuasive. After reviewing the evidence in the record, OSHA reaffirms its conclusions on the carcinogenicity of formaldehyde exposure.

However, on further reflection the Agency believes that by promulgating paragraphs (m)(1)(i) through (m)(4)(ii) in the formaldehyde standard, it failed to achieve its objective of providing substantially equivalent worker protection as the Hazard Communication Standard but with more objective criteria tailored to the properties of formaldehyde. Moreover, comments in the record question the wisdom of having separate hazard communication provisions in various substance specific standards (see, for example, Exhibits 77–2, Attach 2; 77–9; 77–16; 77–19A; 77–20; 77–21; Attach 1; 77–23; 77–24; 77–28; 80–26; 80–30; 80–58; 80–60; 80–64; 80–66; 80–67; 80–76; 80–78; 80–86; 80–261; 201–8; Tr. 5/13/86, p. 62). It might be simpler, less confusing, and therefore more effective to have one standard, OSHA's generic Hazard Communication Standard, control the information dissemination obligations of employers. In this way, employers would have one reference point and would not be confused by minor deviations to those requirements in substance specific standards.

For the reasons stated above, OSHA is administratively staying paragraphs (m)(1)(i) through (m)(4)(ii) of the formaldehyde standard. The Agency will propose to revoke these paragraphs shortly and invite comments on the substitution of the full Hazard Communication Standard or other equally protective alternatives commenters may submit. This action is consistent with the majority of comments received in response to its November 8 request for comments (see Exhibit 265). The effect of this administrative stay will be the continued implementation of the Hazard Communication Standard with respect to formaldehyde. Employers must comply with the provisions of OSHA's Hazard Communication Standard. Thus it is clear that there will be no diminution in worker safety or health during this interim period.

Authority and Signature

This document was prepared under the direction of John A. Pendergrass, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue, NW., Washington, DC 20210.

This action is taken pursuant to section 4(b), 6(b), and 8(c) of the Occupational Safety and Health Act of 1970 (84 Stat. 1593, 1597, 1599; 29 U.S.C. 653, 655, 657), Secretary of Labor's Order No. 9–83 (48 FR 35736) and 29 CFR Part 1911.

List of Subjects in 29 CFR Part 1910

Formaldehyde, Occupational Safety and Health, Chemicals, Cancer, Health, Risk assessment.

Therefore, § 1910.1048(m)(1)(i)–(m)(4)(ii) is stayed until Sept. 13, 1989.

Signed at Washington, DC, this 9th day of December 1988.

John A. Pendergrass,

Assistant Secretary of Labor for Occupational Safety and Health.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, and Los Angeles, CA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

VOL 53 ISS 240 DE 14 1988 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 26, at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

LOS ANGELES, CA

WHEN: January 12, at 9:00 a.m.
WHERE: Room 8544,
Federal Building,
300 N. Los Angeles St.,
Los Angeles, CA
RESERVATIONS: Call the Federal Information Center,
Los Angeles 213-894-3800

Rules and Regulations

Federal Register
Vol. 53, No. 240
Wednesday, December 14, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 13

Setoffs and Withholdings; Federal Claims Collection

AGENCY: Department of Agriculture (USDA).

ACTION: Final rule.

SUMMARY: This final rule amends 7 CFR Part 13, the provisions stating the conditions under which amounts approved by Agricultural Stabilization and Conservation county committees for disbursement to persons under programs administered by the Department of Agriculture, or any agency thereof, will be withheld or set off against debts of such persons owing to any department or agency of the United States. The intent of this rule is to extend the regulatory period of time allowed for setoff and withholding to ten years. This regulation would then allow a period of time similar to that allowed by the regulations issued under the Federal Claims Collection Act of 1966, as amended by the Debt Collection Act of 1982 (31 U.S.C. 3716). This rule also permits all agencies of the United States to submit administrative offset requests directly to the appropriate Agricultural Stabilization and Conservation Service State office. This rule adopts, unchanged, a proposed rule which was published in the Federal Register on July 13, 1988, at 53 FR 26443.

EFFECTIVE DATE: December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Paula Roney, Claims Specialist, (202) 382–0185.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed in conformance with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs and prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action does not constitute a review as to need, currency, clarity, and effectiveness of these regulations under Departmental Regulation 1512–1. No sunset review date has been set for this regulation because review is ongoing.

This action will not increase the federal paperwork burden for individuals, small businesses, and others and will not have a significant impact on a substantial number of small entities. Therefore this action is exempt from the provision of the Regulatory Flexibility Act and no Regulatory Flexibility Analysis was prepared.

The titles and numbers of the Federal Domestic Assistance Programs to which this final rule applies are: Commodity Loans and Purchases, 10.051; Cotton Production Stabilization, 10.052; Feed Grain Production Stabilization, 10.055; Storage Facilities and Equipment loans, 10.056; Wheat Production Stabilization, 10.058; Rice Production Stabilization, 10.065; Grain Reserve Program, 10.067; as listed in the Catalog of Federal Domestic Assistance.

This action will not have a significant impact specifically upon area and community development; therefore, review as established by Executive Order No. 12372 (July 14, 1982) was not used to assure that units of local government are informed of this action.

This action is not expected to have any significant impact on the quality of the human environment, health and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This final rule makes two changes in existing regulations.

First, the final rule amends 7 CFR Part 13 to extend the period of time in which the Government may exercise its right to administrative offset against amounts approved by Agricultural Stabilization and Conservation county committees for disbursement to persons under programs administered by the Department of Agriculture, or any agency thereof. These include amounts disbursed on behalf of the Commodity Credit Corporation (CCC).

Currently, regulations provide that setoff under 7 CFR Part 13 against a debt owed the Government is barred when no suit has been filed and the applicable statute of limitation for enforcing payment of such a debt expires prior to the date the amount becomes payable to the debtor. Although the period may vary, the statutory period for bringing a civil action on a claim is usually six years. The Debt Collection Act of 1982 amended the Federal Claims Collection Act of 1966 (31 U.S.C. 3716) (the Act) to allow a ten-year period during which a federal agency may collect a claim by administrative offset under setoff regulations. This ten-year period begins to run from the date a claim becomes due and payable and is not paid. This action allows a similar period for withholding and setoff under these regulations. The Act provides that nothing therein shall diminish the existing authority of the head of an agency to settle, compromise, or close claims. CCC has authority under section 4(k) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714) to make final and conclusive settlement and adjustment of any claims by or against it irrespective of the amount at issue. CCC is, therefore, not bound by the Federal Claims Collection Act. However, it is CCC policy that any action by CCC to collect a debt by administrative offset should be in conformity, to the extent feasible, with the Federal Claims Collection Standards promulgated under the Act.

This regulation is necessary to protect the financial integrity of many federal farm programs by ensuring the government will be able to collect debts incurred by program participants, including many with respect to which a civil action to enforce would be ineffectual, not sufficiently cost effective for the Government to pursue, or legally barred.

Second, the final rule amends 7 CFR Part 13 to permit all agencies of the United States to submit to the appropriate Agricultural Stabilization and Conservation Service (ASCS) State office all requests for administrative offset against amounts approved by

VOL 53 ISS 240 DE 14 1988 UMI

ASC county committees for disbursement to persons under programs administered by the Department of Agriculture, or any agency thereof.

Currently most federal agencies are required to submit requests for offset directly to the Administrator of ASCS. This regulation permits such requests to be made directly to the appropriate ASCS State office. This change will streamline the offset process and promote better cooperation between federal agencies.

No comments to the proposed rule published July 13, 1988 were received.

List of Subjects in 7 CFR Part 13

Setoffs and withholdings.

Accordingly, the regulations at 7 CFR Part 13 are amended to read as follows:

PART 13—[AMENDED]

1. The authority citation is revised to read as follows:

Authority: 15 U.S.C. 714b, 31 U.S.C. 3716.

2. 7 CFR 13.5 is amended by revising paragraph (b) to read as follows:

§ 13.5 Conditions under which setoff or withholding shall not be made.

Setoff or witholding shall not be made:

* * * * *

(b) If the claim has been outstanding for more than ten years, or legal action to enforce the debt is barred by an applicable statutory period of limitation, whichever is later. For purposes of this section, a claim is not outstanding until the debt underlying the claim became due and payable and was not paid.

* * * * *

3. 7 CFR 13.6 is amended by revising paragraph (c), removing paragraph (d), redesignating paragraphs (e) and (f) as paragraphs (d) and (e), respectively, and adding a new paragraph (e)(5) to read as follows:

§ 13.6 Requests for setoff.

* * * * *

(c) All requests for setoff and Notices of Levy from agencies of the United States other than those set out in paragraph (a) of this section shall be mailed or delivered to the appropriate ASCS State office.

* * * * *

(e) * * *

(5) Each request shall include a certification that all requirements of the law and the regulations for collection of the debt and for requesting offset have been complied with.

Singed at Washington, DC, on November 28, 1988.

Richard E. Lyng,

Secretary.

BILLING CODE 3410-05-M

Agricultural Marketing Service

7 CFR Part 971

Texas Lettuce; Expenses and Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule regarding Texas lettuce will authorize expenses and establish an assessment rate under Marketing Order 971 for the 1988–89 fiscal period. Authorization of this budget will allow the South Texas Lettuce Committee to incur expenses reasonable and necessary to administer the program. Funds for this program will be derived from assessments on handlers.

EFFECTIVE DATE: August 1, 1988 through July 31, 1989.

FOR FURTHER INFORMATION CONTACT: Todd A. Delello, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456, telephone 202–475–5610.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement No. 144 and Marketing Order No. 971 (7 CFR Part 971), both as amended, regulating the handling of lettuce grown in the Lower Rio Grande Valley of South Texas. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "nonmajor" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 10 handlers of Texas lettuce under this marketing order, and approximately 30 producers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

The marketing order requires that the assessment rate for a particular fiscal year shall apply to all assessable lettuce handled from the beginning of such year. An annual budget of expenses is prepared by the committee and submitted to the Department of Agriculture for approval. The members of the committee are handlers and producers of lettuce. They are familiar with the committee's needs and with the costs for goods, services and personnel in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing anticipated expenses by expected shipments of lettuce. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses. A recommended budget and rate of assessment is usually acted upon by the committee before the season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approval must be expedited so that the committee will have funds to pay its expenses.

The South Texas Lettuce Committee met on October 11, 1988, and unanimously recommended a 1988–89 budget of $34,305. The additional $942 over last season's budget of $33,363 will cover increases in the items of rent and utilities, insurance and bonds, and accounting and audit. The committee recommended an assessment rate of $0.05 per carton, the same as last year. This rate, when applied to anticipated shipments of 750,000 cartons, will yield $37,500 in assessment revenue. The surplus income of $3,195 will be added to the current program reserve of $42,000, resulting in an ending reserve of $45,195, an amount within the maximum

authorized under the order of three years' expenses.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be significantly offset by the benefits derived from the operation of the marketing order. Therefore, the Administrator of AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposed rule was published in the Federal Register (53 FR 45767, November 14, 1988). That document contained a proposal to add § 971.228 to establish expenses and an assessment rate for the South Texas Lettuce Committee. That rule provided that interested persons could file comments through November 25, 1988. No comments were received.

It is found that the specified expenses are reasonable and likely to be incurred and that such expenses and the specified assessment rate to cover such expenses will tend to effectuate the declared policy of the Act.

This action should be expedited because the committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis. In addition, handlers are aware of this action which was recommended by the committee at a public meeting. Therefore, the Secretary also finds that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register (5 U.S.C. 553).

List of Subjects in 7 CFR Part 971

Marketing agreements and orders, Lettuce (Texas).

For the reasons set forth in the preamble, 7 CFR Part 971 is amended as follows:

PART 971—LETTUCE GROWN IN LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 971 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 971.228 is added to read as follows:

Note: This section prescribes the annual expenses and assessment rate and will not be published in the Code of Federal Regulations.

§ 971.228 Expenses and assessment rate.

Expenses of $34,305 by the South Texas Lettuce Committee are authorized and an assessment rate of $0.05 per carton of lettuce is established for the fiscal period ending July 31, 1989. Unexpended funds may be carried over as a reserve.

Dated: December 9, 1988.

William J. Doyle,

Associate Deputy Director, Fruit and Vegetable Division.

7 CFR Part 989

1988–89 Expenses and Assessment Rate for Marketing Order 989 Raisins Produced From Grapes Grown in California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes an assessment rate under Marketing Order No. 989 for the 1988–89 fiscal year instituted under the marketing order for raisins produced from grapes grown in California. Authorization of this budget will allow the Raisin Administrative Committee (Committee) to incur reasonable and necessary expenses to administer the marketing order program. Funds for the program will be derived from assessments on handlers of California raisins.

EFFECTIVE DATE: August 1, 1988 through July 31, 1989.

FOR FURTHER INFORMATION CONTACT: Tom Jacobs, Marketing Specialist, Marketing Order Administration Branch, Room 2526, South Building, F&V, AMS, USDA, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 447–5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Order No. 989 (7 CFR Part 989), both as amended, regulating the handling of raisins produced from grapes grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained herein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are an estimated 23 handlers of California raisins subject to regulation under this marketing order, and approximately 5,000 producers of California raisins. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of raisins may be classified as small entities.

The marketing order requires that the assessment rate for a particular marketing year shall apply to all assessable raisins handled from the beginning of such year. An annual budget of expenses is prepared by the Committee and submitted to the U.S. Department of Agriculture (Department) for approval. The members of the Committee are handlers and producers of regulated raisins. They are familiar with the Committee's needs and with the costs for goods, services, and personnel in their local area, and are thus in a position to formulate an appropriate budget. The budget is formulated and discussed in public meetings, so that all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the Committee is derived by dividing anticipated expenses by expected shipments of assessable raisins. That rate is applied to actual shipments to produce sufficient income to pay the Committee's expected expenses. The budget of expenses and rate of assessment are usually recommended by the Committee shortly after the season starts. Expenses are incurred on a continuous basis; therefore, the budget of annual expenses and assessment rate approval must be expedited so that the Committee will have funds to meet its obligations.

While this action will impose some additional costs on handlers of California raisins, including small entities, the costs are in the form of uniform assessments on all handlers. Any costs to handlers are expected to be more than offset by benefits derived from the operation of the marketing

VOL

ISS
240
DE
14
1988
UMI

order. Therefore, the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposed rule detailing the recommended budget and assessment rate was published in the **Federal Register** on November 8, 1988 (53 FR 45100). In the proposed rule, interested persons were invited to submit written comments until November 18, 1988. No comments were received on this action.

After review, it is found that the specified expenses are reasonable and likely to be incurred and that such expenses and the specified assessment rate to cover such expenses will tend to effectuate the declared policy of the Act.

Because the Committee needs to have sufficient funds to pay its expenses, which are incurred on a continuous basis throughout the year, this action should be expedited. In addition, handlers are aware of this action which was recommended by the Committee at a public meeting. Therefore, the Secretary has also found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553). Therefore, this action will become effective upon publication in the **Federal Register**, and will apply to the entire 1988–89 marketing year.

List of subjects in 7 CFR Part 989

Marketing Agreement and Order, California, Raisins.

For the reasons set forth in the preamble, 7 CFR Part 989 is amended as follows:

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 989 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 989.339 is added to read as follows:

Note: This Section will not appear in the Code of Federal Regulations.

§ 989.339 Expenses and assessment rate.

Expenses of $435,000 by the Raisin Administrative Committee are authorized, and an assessment rate payable by each handler in accordance with § 989.80 of $1.50 per ton of assessable raisins is established for the crop year ending July 31, 1989. Any unexpended funds from that crop year shall be credited or refunded to the handler from whom collected.

Dated: December 9, 1988.

William J. Doyle,

Associate Deputy Director, Fruit and Vegetable Division.

[FR Doc. 88–28710 Filed 12–13–88; 8:45 am]

BILLING CODE 3410–02–M

Commodity Credit Corporation

7 CFR Part 1408

Setoff, Withholding and Stop Payment Policies

AGENCY: Commodity Credit Corporation (CCC), USDA.

ACTION: Final rule.

SUMMARY: This final rule amends 7 CFR Part 1408, which sets forth the policies of Commodity Credit Corporation (CCC) regarding the setoff of debts owing to CCC or other government agencies against amounts payable by CCC. The intent of this rule is to extend the regulatory period of time allowed for setoff and withholding to ten years. This regulation would then allow a period of time similar to that allowed by regulations issued under the Federal Claims Collection Act of 1966, as amended by the Debt Collection Act of 1982 (31 U.S.C. 3716). This rule adopts a proposed rule which was published in the **Federal Register** on July 11, 1988, at 53 FR 26081.

EFFECTIVE DATE: December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Paula Roney, Claims Specialist, (202) 382–0185.

SUPPLEMENTARY INFORMATION: This rule has been reviewed in conformance with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs and prices for consumers, individual industries, federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action does not constitute a review as to need, currency, clarity, and effectiveness of these regulations under Departmental Regulation 1512–1. No sunset review date has been set for this regulation because review is ongoing.

This action will not increase the federal paperwork burden for individuals, small businesses, and others and will not have a significant impact on a substantial number of small entities. Furthermore, CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking for this action. Therefore this action is exempt from the provision of the Regulatory Flexibility Act and no Regulatory Flexibility Analysis was prepared.

This action will not have a significant impact specifically upon area and community development; therefore, review as established by Executive Order 12372 (July 14, 1982) was not used to assure that units of local government are informed of this action.

This regulation amends 7 CFR Part 1408 to extend the period of time CCC may exercise its regulatory right to administrative offset against amounts otherwise payable.

Currently, regulations provide that setoff under 7 CFR Part 1408 against a debt owed the Government is barred when no suit has been filed and the applicable statute of limitation for enforcing payment of such a debt expires prior to the date the amount becomes payable to the debtor, except for certain debts due to an overcharge or loss or damage by a carrier. The statutory period for bringing a civil action on a claim is six years.

The Debt Collection Act of 1982 amended the Federal Claims Collection Act of 1966 (31 U.S.C. 3716) to provide a ten-year period of limitation on a federal agency to collect a claim by administrative offset. This ten-year period begins to run from the date the claim becomes outstanding. The Federal Claims Collection Act of 1966 and the Federal Claims Collection Standards (4 CFR Parts 101 through 105) promulgated thereunder by the Comptroller General and the Attorney General provide standards for the administrative collection of claims by the United States. The Act also provides that nothing therein shall diminish the existing authority of the head of an agency to settle, compromise, or close claims. CCC has authority under section 4(k) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714) to make final and conclusive settlement and adjustment of any claims by or against it irrespective of the amount at issue. CCC is, therefore, not bound by the Federal Claims Collection Act. However, it is CCC policy that any action by CCC to collect a debt by administrative offset should agree, to the extent feasible, with the Federal Claims Collection Standards.

This regulation is necessary to protect the financial integrity of many federal agricultural programs by ensuring the

Government will be able to collect debts owed to it, including many on which a civil action to enforce would be ineffectual, not sufficiently cost effective for the Government to pursue, or legally barred.

Two comments were received from farm organizations in response to the proposed rule published in the **Federal Register** on July 11, 1988 (53 FR 26081). Both comments expressed confusion on the scope of the proposed amendment due to an apparent contradiction between the introduction and the amendment itself on whether 7 CFR Part 1408 applies to debts owed to all government agencies or only to debts owed to CCC. No change was made in the final rule because it has been determined that when 7 CFR Part 1408 is read in its entirety it is clear that the regulation applies to debts due all federal agencies.

In addition, both comments conveyed concern regarding the possible detrimental effect on farmers if disaster payments are offset. This amendment does not change CCC's longstanding policy on setoff of debts due federal agencies against amounts payable by CCC, it merely extends the period of time allowed for setoff to ten years. The amendment will have no effect on whether or not disaster payments are offset.

List of Subjects in 7 CFR Part 1408

Setoff, Withholding and stop payment policies of Commodity Credit Corporation.

Accordingly the regulations at 7 CFR Part 1408 are amended as follows:

PART 1408—[AMENDED]

1. The authority citation is revised to read as follows:

Authority: 15 U.S.C. 714b.

2. 7 CFR 1408.4 is amended by revising paragraph (b)(3) to read as follows:

§ 1408.4 Setoff.

* * * * *

(b) * * *

(3) The claim has not been outstanding for more than ten years or legal action to enforce the debt has not been barred by an applicable period of limitation, whichever is later. For purposes of this section, a claim is not outstanding until the debt underlying the claim became due and payable and was not paid.

* * * * *

3. 7 CFR 1408.11 is amended by revising paragraph (a) to read as follows:

§ 1408.11 Conditions under which setoff, withholding, or stop payment actions will not be taken.

* * * * *

(a) If the claim has been outstanding for more than ten years or legal action to enforce the debt due CCC is barred by an applicable period of limitation, whichever is later. For purposes of this section, a claim is not outstanding until the debt underlying the claim became due and payable and was not paid.

* * * * *

Signed at Washington, DC, on December 9, 1988.

Vern Neppl,

Acting Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Food Safety and Inspection Service

9 CFR Part 318

[Docket No. 80-054F-E-3]

Production of Dry Cured or Country Ham Not Using Prescribed Methods To Destroy Trichinae

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Partial waiver of final rule—extension.

SUMMARY: On December 31, 1987, the Food Safety and Inspection Service (FSIS) published a notice announcing its intent to permit producers of dry cured or country ham not using the prescribed methods for destroying trichinae in pork to continue to use nonconforming methods until December 31, 1988. This waiver was provided to protect consumers and to permit dry cured or country ham producers to continue production while research concerning the effectiveness of current processing techniques was undertaken. Due to unavoidable delays in conducting the research, FSIS is extending that waiver until the rulemaking procedures on this matter are completed next year.

EFFECTIVE DATE: December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Bill Dennis, Director, Processed Products Inspection Division, Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-3840.

SUPPLEMENTARY INFORMATION:

Background

Prior to August 6, 1985, § 318.10(c)(3)(iv) of the Federal meat inspection regulations (9 CFR 318.10(c)(3)(iv)) provided two methods of destroying any possible live trichinae while processing dry salt cured hams, one of which may be used to manufacture country hams. These two methods have been in use for over 50 years. On February 7, 1985 (50 FR 5226), FSIS published a final rule, effective August 6, 1985, prescribing a third method for destroying live trichinae in dry salt cured hams and which could also be used for country hams. With the development and publication of the third method, FSIS believed it had addressed all dry curing methods currently in use. However, FSIS learned that many country ham producers use methods which still do not meet the requirements of any of the three prescribed methods. These procedures involve the use of ambient temperatures that may not meet the time/temperature requirements; involve a curing process that does not include a mid-cure re-exposure of the ham to salt (overhaul); or involve the washing of the ham before the required curing time is completed. For several years, the Agency has permitted the use of nonconforming processing methods since they were traditional, decades-old methods believed to be effective in destroying trichinae. In addition, the Department has not received any reports of trichinosis occurring from ingestion of any dry cured or country hams.

Because of the inability of certain producers to meet the August 6, 1985, effective date and since there were no reported cases of trichinosis from products not treated under the three prescribed methods, FSIS published a notice on June 18, 1985 (50 FR 25202), allowing producers of dry cured or country ham not using the prescribed methods to continue production until December 31, 1986, under the following conditions:

1. Any dry cured or country hams in processing prior to August 6, 1985, would be controlled under the previous two methods.

2. Dry cured ham producers using processing techniques not covered by the prescribed methods had to submit a description of their processes to FSIS by August 6, 1985. The description had to contain the following information:

a. The average and maximum ham weight;

b. The cure and the smoking times and temperatures and, if used, heating times and temperatures;

c. The amount of salt used and its application and, if applicable, how reapplied and/or replenished;

d. If and when hams are washed.

Dry cured and country ham producers were permitted to continue using their current processes until December 31, 1988, unless:

1. Upon initial review of the process, the Administrator determined that the method was not likely to prove effective; or

2. Data became available to substantiate ineffectiveness of the method.

In the notice, FSIS stated that research would be conducted between that time and December 31, 1988, to find one or more additional processing methods.

On January 2, 1987, FSIS published an extension of the waiver until December 31, 1987. The Agency stated that research was still under way due to unavoidable delays. Initially, a considerable amount of time had been consumed in developing a fully satisfactory protocol. Secondly, there had been problems in assembling experimental equipment. Thirdly, the experimenters experienced unexpected difficulties in conducting the experiment. Fourthly, there had been some difficulties with the interpretation and analysis of the test data. As a result, the experimenters did not submit a final report to the Agency until November 9, 1987.

On December 31, 1987, FSIS published an extension of the waiver for one year until December 31, 1988. The Agency stated that the experimental data from the research were complex, and were more indicative than conclusory. However, because of the importance of the indications for consumer health, using the experimental data coupled with other known data, the Agency decided a proposed rule could be developed and published by December 31, 1988.

The Agency has found that the 1-year extension on the waiver to December 31, 1988, was insufficient for accurate interpretation and analysis of the research data to be completed. However, the interpretation and analysis of the research data is now completed, and a proposed rule should be published in the early part of 1989, and further rulemaking procedures will be conducted in a timely fashion.

Because it is impossible to accurately estimate the time to complete the rulemaking, the Administrator is extending the waiver until next year.

Done at Washington, DC, on December 9, 1988.

Lester M. Crawford,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Part 302

[Docket No. 80219-7169]

Designation of Areas; Designation of Public Works Impact Program Areas

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Affirmation of interim rule.

SUMMARY: This rule adopts as final the Economic Development Administration's (EDA) interim regulations at 13 CFR 302.7–"Designation of public works impact program areas." This rule provides that under EDA's authorizing statute, Public Works Impact Program (PWIP) projects need not meet OEDP requirements. In addition, this amendment provides that in order to be designated under this Section, sufficient data establishing eligibility for designation must be available and must be specific to the area proposed for designation.

EFFECTIVE DATE: July 3, 1986.

FOR FURTHER INFORMATION CONTACT: James F. Marten, Deputy Chief Counsel, Economic Development Administration, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Room 7001, Washington, DC, (202) 377-5441.

SUPPLEMENTARY INFORMATION: EDA published an interim rule concerning designation of public works impact programs on July 3, 1986 (51 FR 24302), and allowed interested persons 60 days to comment. No comments were received. EDA is adopting as a final rule, 13 CFR Part 302, "Designation of Areas" § 302.7, "Designation of public works impact program areas."

Under Executive Order 12291 the Department must judge whether a regulation is "major" within the meaning of Section 1 of the Order and therefore subject to the requirement that a Regulatory Impact analysis be prepared. This regulation is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Accordingly, neither a preliminary nor final Regulatory Impact analysis has to be or will be prepared.

This rule exempt from all requirements of 5 U.S.C. 553 including notice and opportunity to comment and delayed effective date because it relates to public property, loans, grants, benefit and contracts.

No other law requires that notice and opportunity for comment be given for the rule.

Accordingly, the Department's General Counsel has determined and so certified to the Office of Management and Budget, that dispensing with notice and opportunity for comment is consistent with the Administrative Procedure Act (APA) and all other relevant laws.

Since notice and an opportunity for comment are not required to be given for this rule under section 553 of the APA (5 U.S.C. 553) or any other law, and sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a), (604(a)), no initial or final Regulatory Flexibility Analysis has been or will be prepared.

This rules does not contain a collection of information for purposes of the Paperwork Reduction Act (Pub. L. 96-511).

List of Subjects in 13 CFR Part 302

Community development.

Under authority of section 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3211); Sec. 1-105, Department of Commerce Organization Order 10-4, as amended (40 FR 56702 as amended), the interim regulation amending 13 CFR Part 302 which was published July 3, 1986 (51 FR 24302) is adopted as final without changes.

Date: November 30, 1988.

Stanley M. McGeehan,

Deputy Assistant Secretary for Economic Development.

[FR Doc. 88-28693 Filed 12-13-88; 8:45 am]

BILLING CODE 3510-24-M

13 CFR Part 302

[Docket No. 80991-8191]

Area Designation; Special Impact Areas

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Interim rule with request for comments.

SUMMARY: This amendment to EDA's rule at 13 CFR 302.8(a)(3) regarding designation of special impact areas removes reference to average

unemployment rates based upon the calendar year. Only the most recent 12-month annual average unemployment rates will now be used as a qualifier for designation as a Special Impact Area (SIA). This change is needed in order to assure that those receiving EDA designations do so on the basis of the most current unemployment date.

DATES: Effective date December 14, 1988. Comments must be received by February 13, 1988.

ADDRESS: Send comments to Joseph M. Levine, Chief Counsel, Economic Development Administration, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues NW., Room 7001, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: James F. Marten, Deputy Chief Counsel, Economic Development Administration, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues NW., Room 7001, Washington, DC 20230, (202) 377–5441.

SUPPLEMENTARY INFORMATION: This rule would amend the EDA regulation setting forth standards for the designation of redevelopment areas under the Public Works and Economic Development Act. EDA is deleting its 12-month annual average unemployment rate based upon the calendar year, for SIA designation. Under the current calendar year qualifier, it would be possible that an area's qualifying calendar year 1987 average rate could be used in support of its SIA designation as late as February 1989, regardless of a subsequently available, non-qualifying 12-month (non-calendar) rate. This could happen since 1988 calendar year average rates for areas will not be computed by state employment security agencies until February 1989, and EDA will not receive such data until March 1989. This change is needed in order to assure that those receiving EDA designations do so on the basis of the most current unemployment data. Applicants will no longer qualify under earlier higher unemployment rates when employment subsequently improves. EDA's mission is to help in areas of high unemployment. This change means that EDA will not designate areas no longer in need of EDA's assistance.

Under Executive Order 12291 the Department must judge whether a regulation is "major" within the meaning of section 1 of the order and therefore subject to the requirement that a Regulatory Impact Analysis be prepared. This regulation is not major because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investments, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Accordingly, neither a preliminary nor final Regulatory Impact Analysis has to be or will be prepared.

This rule is exempt from all requirements of 5 U.S.C. 553 including notice and opportunity to comment and delayed effective date, because it relates to public property, loans, grants, benefits and contracts.

No other law requires that notice and opportunity for comment be given for this rule.

Accordingly, the Department's General Counsel has determined and so certified to the Office of Management and Budget that dispensing with notice and opportunity for comment is consistent with the Administrative Procedure Act (APA) and all other relevant laws.

However, because the Department is interested in receiving comments from those who benefit from the amendment, this rule is being issued as interim final. Public comments on the interim rule are invited and should be sent to the address listed in the **"ADDRESS"** section above.

Since a notice and an opportunity for comment are not required for this rule under section 553 of the APA (5 U.S.C. 553) or any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a), 604(a)), no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act (Pub. L. 96–511).

This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 12612.

List of Subjects in 13 CFR Part 302

Community development.

For the reasons set out in the preamble, Title 13, Chapter III, Part 302 is amended as set forth below:

PART 302—DESIGNATION OF AREAS

1. The authority citation for Part 302 continues to read as follows:

Authority: Sec. 701 Pub. L. 89–136; 79 Stat. 570 (42 U.S.C. 3211); Sec. 1–105, Department of Commerce Organization Order 10–4, as amended (40 FR 5670, as amended).

2. Section 302.8 is amended by revising paragraph (a)(3) to read as follows:

§ 302.8 Designation of special impact areas.

* * * * *

(a) * * *

(3) An area of substantial unemployment, meaning one which (i) experienced an average unemployment rate at least 50 percent higher than the U.S. average unemployment rate for the most recent 12-month period for which data are available, or (ii) is currently experiencing an unemployment rate at least 100 percent higher than the U.S. average unemployment rate.

* * * * *

Date: November 14, 1988.

Orson G. Swindle III,

Assistant Secretary for Economic Development.

13 CFR Part 309

[Docket No. 51207–7179]

General Requirements for Financial Assistance; Unfair Competition Prohibitions

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Final rule.

SUMMARY: This rule adopts as final the Economic Development Administration's (EDA) interim regulations at 13 CFR 309.2—"Unfair Competition." This rule provides that under certain circumstances, EDA must conduct a study (verification and evaluation) of the capacity and demand for particular goods, materials, commodities, services or facilities, based upon specified information submitted by the applicant for financial assistance under PWEDA. EDA's verification and analysis is referred to as a "702 Study." These amendments revise the conditions under which EDA must conduct a "702 Study."

EFFECTIVE DATE: May 2, 1986.

FOR FURTHER INFORMATION CONTACT: James F. Marten, Deputy Chief Counsel, Economic Development Administration, U.S. Department of Commerce, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Room 7001, Washington, DC 20230, (202) 377–5441.

VOL 53 ISS 240 DE 14 1988 UMI

SUPPLEMENTARY INFORMATION: EDA published an interim rule concerning unfair competition prohibitions on May 2, 1986, (51 FR 16292), and allowed interested persons 60 days to comment. No comments were received, EDA is adopting as a final rule, 13 CFR Part 309, "General Requirements for Financial Assistance" § 309.2, "Unfair Competition Prohibitions".

Under Executive Order 12291 the Department must judge whether a regulation is "major" within the meaning of section 1 of the Order and therefore subject to the requirement that a Regulatory Impact Analysis be prepared. This regulation is not major because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Accordingly, neither a preliminary nor final Regulatory Impact Analysis has to be or will be prepared.

This final rule is exempt from all requirements of 5 U.S.C. 553 including notice and opportunity to comment and delayed effective date because it relates to public property, loans, grants, benefits and contracts.

No other law requires that notice and opportunity for comment be given for the rule.

Accordingly, the Department's General Counsel has determined and so certified to the Office of Management and Budget, that dispensing with notice and opportunity for comment is consistent with the Administrative Procedure Act (APA) and all other relevant laws.

Since notice and an opportunity for comment are not required to be given for this rule under section 553 of the APA (5 U.S.C. 553) or any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a), 604(a), no initial or final Regulatory Flexibility Analysis has been or will be prepared.

This rule does not contain a collection of information for purposes of the Paperwork Reduction Act (Pub. L. 96-511).

List of Subjects in 13 CFR Part 309

Community development, Grant programs—community development, Loan programs—community development, Penalties.

Under authority of section 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3211); 1-105, Department of Commerce Organization Order 10-4, as amended (40 FR 56702 as amended), the interim regulation amending 13 CFR Part 309 which was published May 2, 1986 (51 FR 16292) is adopted as final without changes.

Date: November 30, 1988.

BILLING CODE 3510-24-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 47 and 91

Aircraft Operation Outside U.S. Pending Receipt of Registration Certificate, Unauthorized by FAA; Legal Opinion

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of legal opinion.

SUMMARY: The Federal Aviation Administration Aircraft Registration Branch (Registry) has received many inquiries and comments from the public concerning the authority to operate an aircraft outside the territory of the United States before issuance by the Registry of a certificate of registration. This notice confirms to the aviation community the legal opinion of the FAA that operation of an aircraft outside the United States pending receipt of a certificate of registration is not authorized by the Federal Aviation Act or its implementing regulations.

FOR FURTHER INFORMATION CONTACT: Irene E. Howie, Assistant Chief Counsel, International Affairs and Legal Policy (AGC-7), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; Telephone (202) 267-3515.

SUPPLEMENTARY INFORMATION: Section 501(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1401(a)) (Act) requires registration as a condition to the operation of any applicable aircraft. That section further authorizes the Administrator, by regulation, to permit the operation of such aircraft without registration for a reasonable time after the transfer of ownership. The Federal Aviation Regulations (FARs) dealing with aircraft registration are found at 14 CFR Part 47. Section 47.31(b), which outlines the procedures for operation of the aircraft prior to its receipt of the certificate of registration, authorizes operation if the applicant carries the second duplicate copy ("pink slip") of the Aircraft Registration Application (AC Form 8050-1), in the aircraft. Operation with the pink slip is described in the regulation as temporary authority to operate *without registration* (14 CFR 47.31(b)).

Section 47.31(b) was adopted by the FAA in 1964 (29 FR 6485; May 19, 1964). The regulation required an individual who had applied for a certificate of registration to carry the duplicate copy of the application in the aircraft during aircraft operations. The regulation stated that the duplicate copy serves as "temporary authorization" to operate the aircraft for not more than 30 days after transmission of an application for a certificate of registration to the Registry. Based on comments received in response to the FAA's proposed rulemaking (Draft Release No. 61-25) (26 FR 10698; November 15, 1961), the FAA provided that the 30-day period for temporary authorization to operate an aircraft, under the authority of the duplicate copy of an application, could be extended for such additional time as the applicant may need to begin carrying the temporary or regular certificate of registration in the aircraft. The FAA noted that this extension "* * * alleviates situations in which, for example, an aircraft is abroad and it is physically impossible to comply with the 'carrying' requirement within the 30-day period."

In 1966, the FAA amended certain sections of Part 47 to implement amendments to the Federal Aviation Act of 1958 and to include revised form numbers related to aircraft registration that resulted from the new computer processing capability of the Registry (31 FR 4494; March 17, 1966). In the preamble of the revision, the FAA reaffirmed that "* * * an applicant would carry a duplicate copy of the Application for Aircraft Registration as temporary operating authority that is valid for no more than 30 days." The FAA provided for issuance of a letter of extension, serving as continuing authority to operate an aircraft, if the Registry could not issue the Certificate of Aircraft Registration within the 30-day period.

The FAA amended § 47.31(b) in 1968 to read as it does today (33 FR 11; January 3, 1968). The amendment extended the 30-day period during which aircraft operations were permitted under the authority of the pink slip to 90 days. Thus, an aircraft could be operated for 90 days before receipt of the Certificate of Registration, if the pink

slip, which evidenced submission of an application for registration and resulted in temporary authorization to operate, was carried in the aircraft. At the same time, the FAA added the phrase "without registration" to § 47.31(b). The preamble noted that § 47.31(b) was "clarified to reflect the fact that the temporary authority to operate an aircraft only authorizes operation 'without registration' " under section 501(a) of the Act; it does not constitute the fact of registration much less receipt of a *certificate* of registration.

Again, in 1972, the FAA reasserted that the duplicate copy of a Certificate of Aircraft Registration is "temporary authority" to operate an aircraft without the Certificate of Registration. This affirmation was contained in a document that clarified regulations regarding special identification numbers and revised airworthiness certificates (37 FR 25486; December 1, 1972). Prior to 1972, temporary authority to operate an aircraft after application for a special identification number was valid until the owner received from the Registry both a revised airworthiness certificate and a revised Certificate of Aircraft Registration, showing the special identification number. The 1972 revision to Part 47 eliminated the requirement to wait for a revised airworthiness certificate before the aircraft could be operated pursuant to the temporary authority of the pink slip. However, the rule required the duplicate copy of AC Form 8050–64 (Assignment of Special Registration Numbers) *and* the current Certificate of Aircraft Registration to be carried in the aircraft until a revised Certificate of Aircraft Registration was received.

As part of a notice of proposed rulemaking (NPRM) entitled "Revision of General Operating and Flight Rules" (Docket No. 18334; Notice No. 79–2C), the FAA proposed to amend § 91.27(a)(2) to provide that the temporary authority to operate an aircraft using the duplicate, pink-slip, copy of the Aircraft Registration Application is limited to aircraft operations solely within the United States (50 FR 11292; March 20, 1985). The FAA asserted that this limitation of the temporary authority to operate an aircraft without the Certificate of Aircraft Registration is necessary to comply with international treaty obligations and reflected current agency legal views and practice. The FAA received several comments in response to this proposal that strongly objected to the FAA's position regarding the proposal.

The commenters objected to the proposal because, in their view, it was a significant modification of previous policy and would have an adverse cost impact on the aviation industry. However, since at least 1982, the FAA has provided its legal opinion that a *Certificate of Aircraft Registration* must be carried in the aircraft during operations outside the territory of the United States. One of the commenters relied on the language from the 1964 preamble to the § 47.31(b) (quoted above) to claim that operation of an aircraft under the temporary authority of the pink slip is permitted outside the United States. Although this language in the preamble may fairly be read to permit aircraft operations outside the United States pursuant to the authority of the pink slip, similar language that would expressly permit these operations has never been included in the regulations. Ever since § 47.31(b) was adopted in 1964, the regulation has stated that the pink slip merely results in "temporary authority" or "temporary authorization" to operate an aircraft before the original Certificate of Aircraft Registration has been received and, thus, can be carried in the aircraft during operations. During the long history of amendments to Part 47, the FAA has not stated that the pink slip is a "temporary Certificate of Aircraft Registration" or that the pink slip is a form of, or replacement for, a Certificate of Aircraft Registration. The preamble to a rulemaking document is simply a statement of the basis and purpose of a rule and does not have the legal force and effect of a regulation. To the extent that the language in the 1964 preamble is inconsistent with the opinion stated herein, it is hereby refuted.

Domestic operation of aircraft under pink slip authority is permitted to facilitate transactions in aircraft. Aircraft operating under such authority may do so prior to any FAA evaluation of the information on the application for a Certificate of Aircraft Registration and the evidence of ownership submitted therewith. Because mere possession of a pink slip is not evidence that the applicant meets the requirements for eligibility for U.S. aircraft registration, such a form cannot be utilized outside of the United States to authorize aircraft operation.

Neither section 501 of the Act nor § 47.31(b) of the FARs contains language which explicitly limits the authority to operate the aircraft without registration to operations solely within the United States. However, section 1102(a) of the Act requires that the Administrator exercise his authority consistently with any treaty obligations of the United States. The United States is a party to the Convention on International Civil Aviation (Convention) (61 Stat. 1180; T.I.A.S. 1591; 15 U.N.T.S. 295). Article 29 of that Convention requires each civil aircraft of a Contracting State engaged in international air navigation to carry its certificate of registration.

Specifically, Article 29 states, in pertinent part:

> Every aircraft of a contracting state, engaged in international navigation, shall carry the following documents in conformity with the conditions prescribed in this Convention:
> (a) certificate of registration * * *.

The FAA must respect the Convention's use of the term "certificate" in Article 29 instead of the term "authority" when addressing the obligations of contracting states to carry certain documents when engaged in international air navigation.

Therefore, in order for the United States to comply with this treaty obligation, it must require every civil aircraft of its Registry when engaged in operations to, or from, the United States, as well as operations conducted wholly outside the United States, to carry its certificate of registration. Section 91.27(a)(2) of the FARs in consistent with this requirement, which states that every civil aircraft may be operated only if it carries a registration certificate issued to its owner. Since § 47.31(b) of the FARs states that operation of an aircraft conducted under the authority of the pink slip is operation *without registration*, and has stated so since 1968, the United States would be in violation of Article 29 of the Convention by authorizing operations outside of the United States under the authority of a pink slip.

As a result of the comments submitted in response to the proposal to amend Part 91, the FAA is aware of the concerns of the aviation community regarding the potential practical effect and economic impact of this opinion. However, the aviation community has always been able to transfer ownership and register their aircraft with minimal difficulty. In order to mitigate the potential hardship that could result from grounding an aircraft used in international operations, pending receipt of a registration certificate, the Registry will, upon request, telex a copy of the Certificate of Aircraft Registration to the individual whose name appears on the application as the registered owner of the aircraft. The telex copy is issued after confirmation of the information contained on an Aircraft Registration Application and determination of eligibility for registration. The telex,

VOL 53 ISS 240 DEC 14 1988 UMI

which reflects critical and verified information resulting from the evaluation by the Registry of an application for aircraft registration, may be used as a temporary Certificate of Aircraft Registration until the original certificate is forwarded for carriage in the aircraft.

This telex certificate will assist owners who submit an application for aircraft registration and who wish to operate the aircraft as soon as possible in international operations. Since the telex, by its terms, is a form of registration certificate, the aircraft may be operated in international air navigation consistent with Article 29 of the Convention. The Registry will telex this copy within a matter of days—often within 48 hours—to be kept in the aircraft until the original Certificate of Aircraft Registration (AC Form 8050–3) is forwarded to the registered owner.

In conclusion, both section 502 of the Act and § 47.31(b) of the FARs indicate that aircraft operations before issuance of the certificate of registration are operations without registration. Section 501 of the Act and § 47.31 of the FARs must be interpreted in a manner consistent with our international obligations as required by section 1102 of the Act. Accordingly, operations outside the United States of aircraft for which an application for registration has been submitted but a certificate of registration has not been issued are not authorized under United States law.

Issued in Washington, DC, on December 8, 1988.

Gregory S. Walden,

Chief Counsel.

BILLING CODE 4910–13–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 176

[Docket No. 87F–0152]

Indirect Food Additives; Paper and Paperboard Components

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of 2-propenoic acid, telomer with sodium 2-methyl-2-[(1-oxo-2-propenyl)amino]-1-propane sulfonate and sodium phosphinate as a deposit control additive in the manufacture of paper and paperboard in contact with food. This action is in response to a petition filed by Ciba-Geigy Corp.

DATES: Effective December 14, 1988; written objections and requests for a hearing by January 13, 1988.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gillian Robert-Baldo, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of June 12, 1987 (52 FR 22536), FDA announced that a food additive petition (FAP 7B3993) had been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) be amended to provide for the safe use of acrylic acid, telomer with sodium 2-acrylamido-2-methyl-1-propanesulfonate and sodium phosphinate as a deposit control additive in the manufacture of paper and paperboard in contact with food.

FDA has evaluated data in the petition and other relevant material. Based on this review, the agency finds that a more appropriate name for the additive is "2-propenoic acid, telomer with sodium 2-methyl-2-[(1-oxo-2-propenyl)amino]-1-propane sulfonate and sodium phosphinate" (CAS Reg. No. 110224–99–2]. The agency also concludes that the proposed food additive use is safe, and that 21 CFR 176.170(a)(5) should be revised as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. This action was considered under FDA's final rule implementing the National Environmental Policy Act (21 CFR Part 25).

Any person who will be adversely affected by this regulation may at any time on or before January 13, 1989 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging, Paper and paperboard.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR Part 176 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 176.170 is amended in paragraph (a)(5) by alphabetically adding a new entry in the table under the headings "List of Substances" and "Limitations" to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

BILLING CODE 4160-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[FRL-3491-5]

Redesignation of Areas for Air Quality Planning Purposes; Nebraska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This notice changes the attainment status designation for Lincoln, Nebraska (Lancaster County), relative to the carbon monoxide (CO) National Ambient Air Quality Standard (NAAQS). The current air quality status for the city of Lincoln is nonattainment of the CO standard. In this rulemaking, the EPA is approving the state's request to redesignate the area to attainment.

DATES: This action will become effective on February 13, 1989, unless notice is received by January 13, 1989, that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of the state submittal for this action are available for public inspection during normal business hours at: The Environmental Protection Agency, Region VII, Air Branch, 726 Minnesota Avenue, Kansas City, Kansas 66101; the Nebraska Department of Environmental Control, Air Quality Division, Box 94877, 301 Centennial Mall South, Lincoln, Nebraska 68509; and the Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Wayne A. Kaiser at (913) 236-2893; FTS 757-2893.

SUPPLEMENTARY INFORMATION: The 1977 Clean Air Act Amendments required, pursuant to section 107(d) of the act, that EPA publish a list of air quality control regions, or portions thereof, reflecting their attainment/nonattainment status for all criteria pollutants. Subsequently, on March 3, 1978, EPA designated over 400 areas as nonattainment for one or more primary or secondary NAAQS. At that time, the Lincoln, Nebraska, Lancaster County area was designated nonattainment for CO. An area is considered nonattainment for CO if the primary NAAQS for CO, which is set forth at 40 CFR 50.8, is violated; i.e., more than once in a year, CO concentrations exceed either: (1) The maximum allowable 8-hour concentration of 9 parts per million (ppm) of air, or (2) the maximum allowable 1-hour concentration of 35 ppm. The Lincoln nonattainment area comprises a relatively small portion of the city and is located in a shallow basin (Antelope Creek Basin). A major roadway, Capitol Parkway/Normal Boulevard, is located in the nonattainment area and runs parallel to the bed of the basin.

A revision to the State Implementation Plan (SIP) to meet the requirements of Part D and section 110 of the Clean Air Act was required for Lincoln and January 1979. The plan received from the state had a number of deficiencies which EPA asked the state to correct. In July 1979, a construction ban was imposed on the Lincoln nonattainment area for all stationary sources of CO. Although several deficiencies were corrected, the plan had not provided for attainment of the CO standard by the end of 1982 and was not approved.

In February 1984, the region requested that the Governor withdraw the inadequate CO plan, and prepare and submit a new plan to provide for attainment of the standard. In April 1984, the Governor withdrew the inadequate plan and submitted a new plan in April 1985. The Region reviewed the plan and found that it met the requirements of the Clean Air Act. The plan demonstrated attainment of the CO standard in the nonattainment area by the end of 1987 and showed continued compliance with the standard through 1991. On September 19, 1986, EPA approved the Nebraska SIP revision for CO in Lincoln.

There are no major stationary sources of CO in the city of Lincoln and no controllable minor stationary sources in the CO nonattainment area. The 1982 emission inventory indicates that 97 percent of the total CO emissions in the nonattainment area are generated by mobile sources. The state and city agencies believe that there was an accumulation of basin traffic-generated CO which built up during peak traffic hours and under very stable meteorological conditions became trapped in the basin area, causing high CO levels and occasional violations of the CO standards.

The city of Lincoln embarked on a program of transportation improvements about 1978 designed to improve traffic flow and thus decrease CO emissions from prolonged idling, traffic congestion, and delays. A program of computer-controlled synchronization of traffic signals in the Antelope Creek Basin was completed during 1982.

The Lincoln Transportation System provides for basic transportation needs through regularly scheduled public transit services covering 419.8 route miles and approximately 1,500,000 vehicle miles of bus service each year. Approximately 97 percent of the total population live, and 98 percent of those employed persons in Lincoln work, within one-quarter mile of a bus route. The 2005 Lincoln-Lancaster County Comprehensive Plan addresses long-range transit-related improvements including route expansion and bus replacement.

The city has operated a citywide carpool/vanpool program since 1976 to achieve a reduction in vehicle usage within the city. The City Planning Department estimates that ridesharing activities during 1984 resulted in a reduction of 1.2 million vehicle miles traveled (vmt) per month, or about two percent of total vmt, removing approximately 5,000 car trips from the streets each business day. Park and ride lots have been designated throughout the periphery of the city to promote carpooling and bus ridership. Bicycle storage facilities, maintained by the city and private interests, are located at the business center and activity centers throughout Lincoln. The city has promoted flexible working hours through technical assistance and consultation to individual employers. The SIP committed to an additional transportation control measure, the widening of Normal Boulevard by December 1, 1985, to further improve traffic flow and reduce CO levels. The

VOL 53 ISS 240 DE 14 1988 UMI

city completed this project on schedule. Although not a part of the SIP, Lincoln conducted a vehicle CO emission testing program through the winter of 1987–88. This was an effort to seek voluntary help from citizens in reducing CO.

All of the above measures, combined with the effects of the Federal Motor Vehicle Control Program, have resulted in reduced emissions of CO in the nonattainment area.

Although the SIP adequately demonstrated attainment of the CO standard in the nonattainment area by 1987, a hotspot modeling analysis by EPA indicated that an area outside the designated nonattainment area was likely to exceed the standard. Consequently, EPA requested that the state and local agencies locate a special purpose monitor (SPM) at the modeled hotspot located at 27th and "O" Streets. A CO monitor was subsequently installed in October 1985, at the nearest available location, although it was not the preferred location. Three exceedances of the CO standard of 9.0 ppm were recorded in January and February of 1986, with a second-high value of 9.9 ppm. Due to the problems with obtaining representative CO values, the monitor was relocated ½ block west of the initial location, to the originally preferred location, in May of 1986. No exceedances have been recorded at the SPM since the monitor was relocated. Also, no exceedances have been recorded at the other CO monitor in Lincoln. This improvement in ambient air quality is a demonstration of the effectiveness of the previously discussed SIP control measures.

On April 14, 1988, the state submitted a request to reclassify the CO nonattainment area in Lincoln to attainment. Included with this request was information which showed that there have been no exceedances of the CO standard at the SPM monitor, or at the other CO monitor in Lincoln, for the past eight quarters (the period April 1986 to March 1988). The state submission also provided documentation that Lincoln has complied with all control strategy provisions of the SIP, as previously noted.

EPA's policy relevant to CO redesignations is discussed in the following memoranda:

1. June 12, 1979, from Richard G. Rhoads, to Directors of Air and Hazardous Materials Division, Regions I–X, Subject: "Section 107 Redesignation Criteria".

2. April 21, 1983, from Sheldon Meyers, to Directors of Air Management Divisions, Subject: "Section 107 Designation Policy Summary."

3. December 23, 1983, from G.T. Helms, to Chiefs of Air Programs Branches, Regions I–X, Subject: "Section 107 Questions and Answers".

In summary, the policy specifies the following criteria must be met to justify a redesignation request for CO:

1. Generally, eight quarters of ambient air quality data showing no violations of the NAAQS are required to support a redesignation to attainment.

2. All available data relative to the attainment status of an area must be reviewed. These data must include the most recent eight consecutive quarters of quality assured, representative air quality data, plus evidence of an implemented control strategy that EPA has fully approved. Available modeling data must also be considered.

3. An attainment designation can be supported using the most recent four quarters of exceedance-free ambient data if an acceptable state-of-the-art modeling analysis is provided showing that actual, enforceable emission reductions are responsible for the observed air quality improvement.

The state request and supporting documentation adequately demonstrate that the necessary EPA policy criteria for redesignation have been met for the Lincoln CO nonattainment area.

The EPA proposed post-87 ozone and CO policy, as discussed in the **Federal Register** of November 24, 1987, and June 6, 1988, applies to nonattainment areas based on air quality data for the period January 1986 to December 1987. This would include the Lincoln CO nonattainment area since the last violation recorded was in February 1986. However, as discussed above, there are now eight quarters of data (April 1986 to March 1988) showing no violations of the NAAQS. EPA received two comment letters pertaining to the June 6, 1988, **Federal Register** notice which proposed to designate this area as nonattainment for CO. Both letters requested that EPA reconsider its decision based on these new data. Given this information and the state's request for redesignation, submitted on Aprill 12, 1988, EPA is approving the redesignation to attainment of the Lincoln, Nebraska, nonattainment area. In addition, based on substantial improvements in air quality for CO in Lincoln (Lancaster County), Nebraska, EPA has determined that the portion of the proposed rulemaking (53 FR 20722, June 6, 1988), that would designate this area as nonattainment for CO (i.e., retain the current designation) is no longer applicable. Today's action also withdraws that part of the June 6, 1988, notice that proposed to retain Lincoln as nonattainment for CO. This action effectively removes Lincoln (Lancaster County) from Table B of the June 6, 1988, notice of areas proposed to be designated nonattainment for CO.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective February 13, 1989, unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective February 13, 1989.

Final Action

EPA is taking final action to approve the state's request to redesignate the Lincoln CO nonattainment area to attainment.

Under 5 U.S.C. 605(b), I certify that redesignations do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 13, 1989. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2).)

BILLING CODE 6560–50–M

40 CFR Part 81

[FRL–3491–6]

Designation of Areas for Air Quality Planning Purposes; Ohio

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Final rule.

SUMMARY: USEPA is approving the redesignation of that part of Clark County, Ohio, which is currently designated as secondary nonattainment to attainment of the former secondary total suspended particulates (TSP) National Ambient Air Quality Standards (NAAQS). This action makes the entire county full attainment.

Today's action is in response to the Ohio Environmental Protection Agency's (OEPA) January 5, 1987, request for a revision to the attainment status for TSP in Clark County. Under the Clean Air Act (Act), area designations can be changed if sufficient data become available to warrant a redesignation.

EFFECTIVE DATE: This final rulemaking becomes effective on January 13, 1989.

ADDRESSES: Copies of the redesignation request and supporting air quality data are available at the following addresses:

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604.

Ohio Environmental Protection Agency, Office of Air Pollution Control, 1800 WaterMark Drive, P.O. Box 1049, Columbus, Ohio 43266–0149.

FOR FURTHER INFORMATION CONTACT: Maggie Greene, U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6029.

SUPPLEMENTARY INFORMATION: On October 5, 1978 (43 FR 46011), USEPA designated part of Clark County as secondary nonattainment for TSP. On January 5, 1987, the State of Ohio requested that USEPA redesignate that part of Clark County, which is currently secondary nonattainment, to full attainment of the former TSP NAAQS. Area designations are subject to revision whenever sufficient data becomes available to warrant a redesignation.

The primary TSP NAAQS was violated when, in a year, either: (1) The geometric mean value of TSP concentrations exceeds 75 micrograms per cubic meter of air (75 ug/m^3) (the annual primary standard); or (2) the 24-hour concentration of TSP exceeds 260 ug/m^3 more than once (the 24-hour standard). The secondary TSP NAAQS was violated when, in a year, the 24-hour concentration exceeds 150 ug/m^3 more than once.

USEPA revised the particulate matter standard on July 1, 1987, (52 FR 24634) and eliminated the TSP ambient air quality standards. The revised standard is expressed in terms of particulate matter with a nominal diameter of 10 micrometers or less (PM_{10}). The USEPA is, however, continuing to process redesignations of areas from nonattainment to attainment or unclassifiable for TSP in keeping with past policy because various regulatory provisions such as new source review and prevention of significant deterioration are keyed to the attainment status of areas. Authority to continue to process redesignations is contained in the July 1, 1987, notice (p. 24682, column 1) which describes USEPA's transition policy regarding TSP redesignations.

On October 29, 1987 (52 FR 41589), USEPA proposed to redesignate Clark County as full attainment for TSP. USEPA stipulated in the Notice of Proposed Rulemaking (NPR) that the State of Ohio must submit evidence, during the public comment period, showing that all the source shutdowns are permanent and irreversible. The State was also required to submit evidence showing that if these sources were to start up again, the sources would be required to undergo new source permit review, including Prevention of Significant Deterioration (PSD) review. The evidence submitted by the Ohio Environmental Protection Agency (OEPA) and the (Dayton) Regional Air Pollution Control Agency (RAPCA) fulfills the requirements specified in the NPR for redesignating Clark County to full attainment of the former NAAQS for TSP. (See the Notice of Proposed Rulemaking dated October 29, 1987 (52 FR 41589) for a detailed discussion of USEPA's TSP redesignation policy.)

USEPA has reviewed the most recent monitoring data (January 1986–September 1987) for this portion of Clark County. Current air quality was determined to be consistent with the proposed redesignation.

Additionally, USEPA reviewed the most recent information available to it to determine if any major sources in Clark County were not in compliance. No TSP sources in Clark County were found to be in violation. USEPA's redesignation policy requires that the State Implementation Plan (SIP) be fully implemented (i.e., no sources out of compliance).

Public Comments

Comments were submitted by OEPA and RAPCA in response to the October 29, 1987, NPR. These comments and USEPA's response are discussed below.

Comment: In the NPR, USEPA requested that OEPA submit evidence showing that the cited source shutdowns are permanent. USEPA specified that the evidence must be in the form of documentation showing that if these sources were to start up again, they would be required to undergo new source permit review, including PSD review.

In response to USEPA's request for documentation, OEPA submitted copies of Ohio's Air Permit System file which lists facilities and sources which have operating permits. This listing documents: The total removal of the Ohio Edison Rockaway Plant and the J&J Foundry, the revoked status of the coal-fired boilers at the Ohio Edison Mad River Plant, and the revoked status of all sources at the Wickham Piano Plate Company. OEPA also submitted relevant pages from the OEPA Emissions Inventory System (EIS) which documented the absence of the above-mentioned sources in the inventory.

RAPCA submitted a listing of the air permit-to-operate withdrawals within Clark County. This listing shows the permit withdrawal dates for Ohio Edison Rockaway, March 12, 1980; J&J Foundry, Inc., June 13, 1984; and Wickham Piano Plate Company, September 25, 1984. The Point Source Engineering Data Sheets for the Ohio Edison Mad River Plant document the shutdown of the coal-fired boilers in 1982 and removal from the EIS. RAPCA also submitted various newspaper clippings describing the permanent shutdowns of these sources.

USEPA's Response: For the following reasons USEPA believes that Ohio's and RAPCA's comments satisfy USEPA's concern that the start up of any

BEST COPY AVAILABLE

VOL 53 ISS 240 DE 14 1988 UMI

shutdown source be treated as a new source.

(1) USEPA's PSD program was delegated to Ohio on May 1, 1980. USEPA's policy under this program includes the requirement that a source which has been shutdown for 2 or more years or removed from the State emission inventory be considered a permanent source shutdown. If these sources were to start up in an attainment area they would be considered new sources.

(2) In addition, the PSD Program (40 CFR 52.21) allows only those emission reductions defined as contemporaneous (the period of the 5 years before construction of the new source) to be used for netting out of PSD review. The Ohio Edison Mad River Plant is the only facility still in existence. Netting could be possible at Mad River if the facility met the contemporaneous criterion. However, because the shutdown of the coal-fired boilers at Mad River occurred more than 5 years ago, the emission reductions would not be contemporaneous and could not be used in the calculation of net emissions for TSP. Therefore, based on the additional documentation submitted by the State, USEPA finds that all source shutdowns are permanent and irreversible.

Final Action

USEPA is approving the redesignation of part of Clark County, as described below, from secondary nonattainment of the former TSP NAAQS to attainment. The secondary TSP nonattainment area was:

The area south and east of the line determined by: Route 41 east from the Clark-Miami County Line east to Route 235, north to the Clark-Champaign County Line, and bounded by the north-south line determined by: State Road 72 south to Interstate 70, Interstate 70 west to Old Mill Road, south to Fairfield Pike, north-east to Cross Road, east to Route 68, south to Jackson Road, east to Mosier Road, south to Clark-Green County Line.

This action makes the entire County full attainment for the TSP NAAQS.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 13, 1989. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

BILLING CODE 6560–50–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office Of Human Development Services

45 CFR Part 1356

Title IV–E Adoption Assistance Program; Nonrecurring Expenses

AGENCY: Office of Human Development Services, HHS.

ACTION: Final rule.

SUMMARY: The Department is issuing this final rule in order to implement the changes made in the Adoption Assistance Program under Title IV–E of the Social Security Act by the Tax Reform Act of 1986 (Pub. L. 99–514).

This final rule requires States to reimburse the nonrecurring adoption expenses of parents who adopt children with special needs. Federal financial participation (FFP) is available at the matching rate of 50 percent for State expenditures up to $2,000 for each adoptive placement. States may set either a lower or a higher maximum and are thus not precluded from spending more or less than $2,000. However, Federal financial participation is limited to a 50 percent share of a $2,000 maximum State expenditure.

EFFECTIVE DATE: December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Beverly Stubbee, (202) 755–7447.

SUPPLEMENTARY INFORMATION:

I. Program Description

The Adoption Assistance and Child Welfare Act of 1980 (Pub. L. 96–272) was enacted on June 17, 1980. This legislation established Title IV–E (Federal Payments for Foster Care and Adoption Assistance) and made changes to Title IV–B (Child Welfare Services) of the Social Security Act (the Act). The purpose of this legislation was to strengthen the program of foster care for needy and dependent children, encourage the adoption of children with special needs, and improve child welfare services. Title IV–E replaced the Federally assisted foster care program previously in effect under Title IV–A, and created a new Federal adoption assistance program to provide Federal financial participation (FFP) in adoption assistance payments to encourage the adoption of children with special needs.

The Adoption Assistance Program under Title IV–E of the Act is designed to assist States in placing certain children with special needs in adoptive homes, thereby providing families and homes for more children and reducing States' foster care caseloads. Title IV–E Adoption Assistance is an open-ended entitlement program that reimburses States at the State's Federal medical assistance percentage for adoption assistance payments.

Currently, adoption assistance payments are being made for an average of 33,000 children monthly, at an estimated annual cost to the Federal Government of $62 million.

In order to be eligible for ongoing adoption assistance payments under Title IV–E, a child must be eligible for either Aid to Families with Dependent Children (AFDC), Title IV–E Foster Care or Supplemental Security Income for the Blind and Disabled (SSI) and meet the definition of "a child with special needs" according to section 473(c) of the Act. A child is considered a child with special needs only when the State has determined: (1) That the child cannot or should not be returned to the home of the parents; (2) that there exists with respect to the child a specific factor or condition (such as his ethnic background, age, or membership in a minority or sibling group, or the presence of factors such as medical conditions or physical, mental or emotional handicaps) because of which it is reasonable to conclude that the child cannot be placed with adoptive parents without providing assistance; and (3) that, except where it would be against the best interests of the child, a reasonable, but unsuccessful, effort has been made to place the child without providing adoption assistance.

The amendment to Title IV–E in the Tax Reform Act expanded FFP in adoption assistance to include payments made by States for nonrecurring expenses incurred in the adoption of any child with special needs, not just those receiving ongoing adoption assistance payments.

As long as the child meets all the requirements of section 473(c) and there is no violation of State or local laws; the nonrecurring expenses of a person who adopts a child with special needs (whether an independent adoption or an adoption facilitated by a public or private agency) must be reimbursed by the State agency responsible for the administration of Title IV–E.

II. Section 1711 of the Tax Reform Act of 1986

The Tax Reform Act of 1986 (Pub. L. 99–514) repealed section 222 of the Internal Revenue Code which permitted an itemized deduction of up to $1,500 of expenses incurred in the legal adoption of a child with special needs who was eligible for adoption assistance as provided under Title IV–E of the Social Security Act (the Act). Deductible expenses included reasonable and necessary adoption fees, court costs and attorney fees.

As an alternative to the repealed section 222 of the Internal Revenue Code, the Tax Reform Act of 1986 amended Title IV–E of the Act to require States to make payments for nonrecurring adoption expenses incurred by or on behalf of adopting parents in connection with the adoption of all children who meet the criteria for "special needs." The statute provides 50 percent Federal matching funds to States for the reimbursement to parents of nonrecurring expenses of adoption (as administrative costs of title IV–E).

III. Summary of Major Changes in the Final Rule

On April 14, 1988, the Department published a Notice of Proposed Rulemaking (NPRM) (53 FR 12346) to implement the amendments to the Title IV–E Adoption Assistance Program included in the Tax Reform Act of 1986 (Pub. L. 99–514).

The Department received 34 letters from individuals, national organizations, and State and local agencies in response to the NPRM. Of the 34 letters received by the Department, 20 were from State agencies, one from a local public agency, one from a private agency, ten from national and regional organizations and two from interested individuals. Following is a discussion of the changes made in the final rule as a result of these comments.

We have made two major changes in the final rule: First, the NPRM proposed that, for purposes of payment of nonrecurring expenses of adoption, the State must determine that the child is "a child with special needs" based on section 473 (c)(1) and (c)(2)(A), but did not need to meet the categorical eligibility requirements in sections 473 (a)(2) or (c)(2)(B). The exception to section 473(c)(2)(B) would have eliminated the requirement that a reasonable, but unsucessful effort be made to place the child with adoptive

VOL 53 ISS 240 DE 14 1988 UMI

parents without providing adoption assistance.

After further analysis, we have concluded that all the requirements of section 473(c) must be met. The State must make a determination that the child cannot or should not be returned to the home of the parents (section 473(c)(1)); that there exists a special factor or condition because of which it is reasonable to conclude that the child cannot be placed with adoptive parents without providing assistance (section 473(c)(2)(A)); and that, except where it would be against the best interests of the child, a reasonable, but unsuccessful, effort has been made to place the child without providing adoption assistance (section 473(c)(2)(B)).

Second, the NPRM proposed that, at State option, the nonrecurring expenses of adoption incurred in intercountry adoptions could be reimbursed. Upon re-examination, we have determined that this cannot be an optional provision. Payments are available to such families as long as the child meets the definition of "a child with special needs."

Clarification to questions from respondents also resulted in minor changes which:

- Specified State agency procedures, including notification of and cooperation with private agencies;
- Specified which State agency is responsible for the nonrecurring adoption expenses payment in interstate adoptions; and
- Clarified claims procedures in cases where the final decree of adoption was issued prior to or within six months of the effective date of the final rule.

IV. Section by Section Discussion of Comments and the Department's Response

A. General Comments

Of the 34 letters received by the Department, all of the commenters supported, in principle, the expansion of Federal support for nonrecurring expenses for the adoption of special needs children. There was disagreement from some commenters on the method for providing this benefit, i.e., as a reimbursement program to the families for actual costs rather than as an itemized tax deduction as had been previously available. On this point the law is clear; the tax deduction is no longer available. The new law requires the State agencies administering title IV–E adoption assistance programs to reimburse parents for allowable nonrecurring expenses for the adoption of children with special needs.

One commenter challenged the legislative history referenced in the preamble, stating that the Department failed to address a significant change made by Pub. L. 97–448 to the prior Internal Revenue Code provision (section 222) for claiming the tax deduction in the adoption of a child with special needs. In the commenter's opinion, that amendment had previously eliminated the requirement of categorical eligibility for AFDC, Title IV–E foster care or SSI as a criterion for taking a tax deduction for expenses of adoption of a child with special needs.

We reexamined the legislative history and statutory language and do not agree with the commenter's position. Moreover the comment regarding Pub. L. 97–448 and former Internal Review Code section 222 is irrelevant, since the current law, implemented by these regulations, clearly excludes such categorical eligibility as a criterion. Eligibility for Title IV–E adoption assistance is not a requirement for the reimbursement of the nonrecurring expenses of adoption of a child with special needs.

B. Section By Section Discussion

Section 1356.40

Comment: In § 1356.40, Adoption Assistance Program: Administrative requirements to implement section 473 of the Act, the NPRM proposed to amend two paragraphs in order to comport with statutory changes. There were no comments on the technical change proposed in paragraph (b)(1) of this section to rescind the phrase "* * * at the time of or prior to the interlocutory decree * * *" in relation to the timing of the adoption assistance agreement.

However, there were comments on paragraph (b)(3). There was a question about the requirement that the adoption assistance agreement specify the "nature" of the payment, services and assistance to be provided. Another commenter asked whether there must be a separate agreement for nonrecurring expenses or if the nonrecurring expenses provision could be a part of an adoption assistance agreement for payments or services. A third commenter was confused by the language of the regulation at paragraph (b)(3) and questioned whether it was the adoption assistance agreement which made the child eligible for assistance under Title XIX.

Response: In paragraph (b)(3), the requirement that the "nature" of the payment, services and assistance be specified was intended to reflect the fact that different types of assistance may be provided under different agreements. Thus, agreements may include provisions for ongoing payments only, for services only, for services and payments, for nonrecurring expenses only, or for payments, services, and nonrecurring expenses. As we discuss in the next section (§ 1356.41(a)), an agreement for nonrecurring expenses may be either a separate agreement or included in an agreement for ongoing adoption assistance.

Regarding the question about Title XIX eligibility, a child eligible under section 473(a)(2), for whom a Title IV–E adoption assistance agreement is in effect, is deemed to be a dependent child as defined in section 406 of the Act (AFDC) and, therefore, is eligible for medical assistance under Title XIX. Paragraph (b)(3), currently in effect, merely requires that the child's eligibility for Title XIX be stated in the adoption assistance agreement.

It is important to note that a child with special needs who is not eligible for ongoing adoption assistance and for whom the State makes payments for nonrecurring expenses only is not deemed to be a dependent child under section 406. Such a child, therefore, would not be eligible for Title XIX under the nonrecurring adoption expenses program. However, the child may be eligible to receive Title XIX benefits as a result of meeting eligibility criteria under one or more of the various categories of Title XIX.

Comment: One commenter, in response to paragraph (b)(4), suggested a change in the regulatory language, making clear that payments for adoption assistance can be made when parents of a child receiving adoption assistance payments move out of the country, e.g., to Canada.

Response: Title IV–E adoption assistance payments can be continued when a family moves out of the country. The law is clear that, once the child is eligible for adoption assistance payments, the parent can continue to receive assistance unless one of the conditions cited in section 473(a)(4) is present. These conditions are: (1) The child reaches the age of 18 or, at State option under certain circumstances, the age of 21; (2) the parent is no longer legally responsible for support of the child; or (3) the State determines that the child is no longer receiving support from the parent. Therefore, it was unnecessary to amend the regulatory language.

Sections 1356.41 (a) and (b)

Comment: Commenters to paragraph (a) asked whether the agreement for

nonrecurring expenses could be a part of an adoption agreement for ongoing assistance and services or whether it must be a separate document. The issue of when the agreement must be signed was also raised by commenters.

Response: We have made no changes to paragraph (a) of the NPRM; however, a new paragraph (b) was added to § 1356.41. This paragraph clarifies that the agreement concerning nonrecurring expenses may be a separate agreement or it may be included in the adoption assistance agreement for ongoing payments or services.

We have also clarified that, like an adoption agreement for ongoing payments or services, it must be signed prior to the final decree of adoption with two exceptions:

(1) Those cases in which the final decree of adoption was entered into on or after January 1, 1987 and within six months after the effective date of the final rule, or

(2) Those cases in which a final decree was entered into before January 1, 1987 but nonrecurring adoption expenses were paid after this date.

These exceptions are included to assure the eligibility of all cases which meet statutory and regulatory requirements for the period between the effective date of the statute, the effective date of these rules, and a six month period of time for State implementation. See also § 1356.41(e)(3).

Section 1356.41(c)

Comment: One commenter proposed that the final rule be clear that States be permitted to assess the parents' financial circumstances, including utilization of assistance from other sources, in determining the amount of reimbursement for nonrecurring expenses of adoption.

Response: Paragraph (b) in the NPRM is now paragraph (c) in the final rule. We believe that Congress intended to encourage the adoption of special needs children by expanding the reimbursement of nonrecurring expenses to parents who adopt any children with special needs, not just those who meet the categorical eligibility requirements of Title IV–E foster care. Accordingly, section 473 clearly provides that eligibility for nonrecurring expenses is related to the child and not the parents. If parents have nonrecurring expenses that are allowable, the reimbursement of these expenses must not depend on the income and resources of the parents. However, the statute does direct that the State agency take into consideration the circumstances of adopting parents and the needs of the child being adopted. We have interpreted this to mean that adopting parents cannot be reimbursed for out-of-pocket expenses that are otherwise paid, e.g., by employee benefits.

Accordingly, paragraph (c) in the final rule reflects this interpretation.

Section 1356.41(d)

Comment: Paragraph (c) of the NPRM proposed that the child need not meet the categorical eligibility requirements in sections 473(a)(2) or 473(c)(2)(B). Two commenters challenged the exception in the NPRM to the requirement at section 473(c) of the Act. That exception would have eliminated the requirement that a reasonable, but unsuccessful, effort be made to place the child with appropriate adoptive parents without providing adoption assistance.

Response: Paragraph (c) in the NPRM is now paragraph (d) in the final rule. Upon reexamination of this issue, we have concluded that there is no statutory basis for excluding any requirement of section 473(c) in determining whether a child is "a child with special needs." Therefore, the final rule makes clear that section 473(c) must be applied in its entirety. Specifically, paragraph (d) has been rewritten so that no exceptions to the requirements of section 473(c) are permitted in the State's determination of whether a child is "a child with special needs" as described in the Act.

In light of the statutory criteria that require efforts to place without adoption assistance, it is evident that all parents adopting special needs children in the future will need to make known their plans for adoption to the State agency prior to the final decree so that the State agency can document such efforts before the final decree of adoption is issued. This will require close cooperation between the State agency and private nonprofit adoption agencies in relation to special needs children adopted through these agencies. With respect to adoptions that become final between January 1, 1987 and six months following the effective date of these rules, the State agencies are encouraged to document the requirements of section 473 so that payments in eligible cases may be made.

Comment: Several commenters asked whether stepparent adoptions and independent adoptions could qualify for reimbursement of nonrecurring expenses.

Response: The intent of this program is to assist families in the adoption of children with special needs. One factor in determining whether the definition of "a child with special needs" is met is that the State has determined that the child cannot or should not be returned to the home of his parents (section 473(c)(1) of the Act). If the child is living with one parent, the child is not eligible. Thus, cases involving stepparent adoption are not eligible when there is a natural parent in the home. On the other hand, if the natural parent is not present (e.g., because of death, divorce or abandonment), then a case involving a stepparent may qualify if all other requirements are satisfied.

Independent adoptions, as long as they are not in violation of State or local laws, may also qualify if the child meets the statutory definition of "a child with special needs" and the State has entered into an agreement with the prospective adoptive parents prior to the final decree of adoption (with the exception as provided in § 1356.41(e)(3)).

Comment: One commenter asked that the final rule permit licensed private agencies to certify a child as "a child with special needs" based on State criteria.

Response: We have not adopted this suggestion. The State remains the responsible party for carrying out the requirements of the Act. However, the State may wish to enlist the assistance of private agencies in this regard. This is a State decision and does not require a Federal regulation though we encourage the State agencies to engage in cooperative efforts with private agencies.

Comment: There were a number of widely divergent comments on paragraph (d) of the NPRM which proposed to permit States the option of including children adopted from other countries in the nonrecurring expenses reimbursement program. State agencies unanimously protested the inclusion of intercountry adoptions, as did some private organizations. States were concerned that public pressure would effectively force them to include intercountry adoptions. The result, it was feared, would be a significant financial burden for States, particularly since the expenses associated with intercountry adoptions are usually much higher than those of domestic adoptions and generally reach (and often exceed) the maximum of $2,000. Two States that opposed the option estimated annual costs of $425,000 to $750,000 for intercountry adoptions alone.

States and other agencies that objected maintained that already limited funds would be even more limited for children who are citizens of this country. Some commenters thought that the Immigration and Naturalization Act and Federal regulations prohibited the use of public funds for children brought into this country for the purpose of adoption.

On the other hand, all individuals and some private organizations supported the option. Several commenters proposed that it be a requirement, and not an option, the intercountry adoptions and domestic adoptions be treated equally. One commenter stated that adopting parents are citizens who pay taxes which fund this program of reimbursement; therefore, prospective adopting parents should have the choice of whether they adopt a child with special needs from this country or a foreign country.

Response: In our reexamination of the statute and legislative history, we found that there was no basis for excluding reimbursement for intercountry adoptions based on the Immigration and Naturalization Act. We further concluded that exclusion of intercountry adoptions as a group cannot be a State option. That is, the statute provides no basis for excluding these cases if they otherwise satisfy the statutory requirements. However, we believe that many children brought to this country for the purpose of adoption may not meet the criteria in section 473(c) of the Act.

We want to emphasize that the State must make a determination of each child's eligibility and assure that the definition of "a child with special needs" as stated in section 473(c) of the Act is met. In addition to the fact that the State must determine that the child cannot or should not be returned to the home of the parent, the State must also determine that there exists, with respect to the child, a specific factor or condition because of which it is reasonable to conclude that the child cannot be placed with adoptive parents without providing assistance, and that a reasonable, but unsuccessful, effort has been made to place the child with appropriate adoptive parents without adoption assistance.

As no specific provision is needed for intercountry adoptions, we have deleted paragraph (d) of the NPRM.

Section 1356.41(e)

Comment: Paragraph (e) of the NPRM proposed that the State agency be required to notify all appropriate courts and all public and licensed private nonprofit adoption agencies of the availability of funds for expenses incurred by or on behalf of families adopting children with special needs. There were several comments on paragraph (e). These comments indicated a need for greater clarity as to what was expected of the State agency in terms of notification to all affected parties. One commenter suggested that States notify all parties within 60 days of the publication of the final rule. Several commenters were concerned that prospective adoptive parents might not be aware of this benefit and wanted the final rule to reflect a process or procedure that would insure notification of affected parties, especially parents adopting through a private agency. Several commenters asked how the nonrecurring expenses incurred by parents for adoptions completed between January 1, 1987, and the effective date of the final rule were to be handled.

Response: We have added two new paragraphs to paragraph (e). New paragraph (e)(2) of the final rule clarifies the responsibility of the State agency on the matter of notice to all affected parties. No timeframe for notification was set in the final rule, but we expect that State agencies will immediately develop a process and procedures to meet the requirements for notification as described in the final rule.

A new paragraph (e)(3) was added in the final rule to address those cases in which (1) the final decree of adoption was entered into on or after January 1, 1987, and within six months after the effective date of the final rule; or (2) the final decree was entered into before January 1, 1987, but nonrecurring adoption expenses were paid after this date. Under paragraph (e)(3), parents in such cases may enter into an agreement with the State and file a claim within two years after the effective date of this final rule. This provision is included in order to assure that the benefit formerly available as a deduction under the Internal Revenue Code will be available to eligible persons.

In cases where the adoption becomes final more than six months after the effective date of the rule, the agreement for reimbursement of nonrecurring expenses must be signed on or before the date when the adoption becomes final. Claims must be filed within two years of the date of the final decree of adoption.

Section 1356.41(f)

Comment: More than half of the 34 commenters addressed the limitation of $2,000 set on nonrecurring expenses in paragraph (f) of the NPRM. In general, all States, with one exception, thought the $2,000 maximum was greater than a State would set as its limit. Some comments indicated confusion in the matter of whose expenses were being reimbursed under the nonrecurring expenses program.

For example, some commenters stated that costs of the State agency were greater than $2,000, apparently not realizing that the $2,000 is limited to the out-of-pocket expenses of the adoptive parents. Several commenters raised the issue of how sibling groups were to be considered in terms of the $2,000 maximum, i.e., as a unit or individually. Some commenters suggested indexing the $2,000 figure, and several other commenters questioned Federal authority to set a limit.

Response: Paragraph (f) of the NPRM has been designated paragraph (f)(1) of the final rule, and new paragraphs (f)(2) and (f)(3) have been added.

In regard to the issue of imposition of a Federal limit, legislative history reflects that the statutory amendment to Title IV–E was intended to replace the Internal Revenue Code deduction which imposed a limit of $1,500. The NPRM proposed a similar limitation on Federal reimbursement in order to control the flow of Federal dollars. Without a clear indication from Congress that it intended this provision to be open-ended, we believe we are carrying out congressional intent in setting a Federal limit on the amount to be reimbursed by Federal matching funds.

The proposed $2,000 maximum for each adoptive placement was based on information published in a survey of 120 private adoption agencies. As we had no other source of data on costs that are borne by adoptive parents who adopt through public agencies or independently, we specifically asked for comments from the public on the dollar limit being proposed. We requested discussion and information on expenses incurred by families in the adoption of children with special needs and asked for comments on the adequacy of the proposed limitations.

Some commenters described the costs to their agency, but the variation in how the information was submitted did not permit any reliable conclusions to be drawn about either the costs to the families or the adequacy of the $2,000 limitation. Most descriptions from State agencies about the costs of adoption reflected a misunderstanding that State administrative costs of adoption were at issue, e.g., placement and supervision costs and the adoption study. These costs are not borne by the family but are administrative costs of the public agency and, thus, are not appropriate for reimbursement under the nonrecurring expenses provision. Therefore, no change was made to modify the $2,000 limit since we received no new information to persuade us that a change was appropriate.

We did not accept the suggestion by several commenters that the maximum be linked to the Consumer Price Index. We believe that such a rule would be

burdensome for the States and administratively difficult to manage. Should the expenses to parents rise dramatically, the regulation may be revised accordingly.

New paragraph (f)(2) clarifies the conditions under which a State may set a maximum lower than $2,000 that is not overly restrictive and is reasonable and consistent with customary and usual charges for such services in that State.

New paragraph (f)(3) responds to the question of how sibling groups are considered in relation to the $2,000 limitation. Children in sibling groups are to be treated as individual adoptions, with the maximum limitation being applicable to each child and not to the group as a whole.

Section 1356.41(g)

Comment: Paragraph (g) of the NPRM proposed that payments for nonrecurring expenses be made either directly through the State agency or through another public or licensed nonprofit private agency. One commenter suggested that the final rule permit private nonprofit agencies, instead of the State agency, to enter into the agreement for reimbursement of nonrecurring expenses with those families with whom it has placed a child.

Response: The role suggested for the private agency is not a feasible one, as the ultimate responsibility for managing and administering this program is with the State agency. The law requires the State to enter into adoption assistance agreements with adoptive parents. However, the State is encouraged to enlist the aid of the private nonprofit agency in determining that the child meets the definition of "a child with special needs" in section 473(c). A State may include the private nonprofit agency, if it is appropriate, as a third party to the agreement.

Comment: Another commenter stated that the regulations should not require that parents first pay expenses and then be reimbursed by the State, but rather that a provision should be included permitting States to reimburse agencies which have incurred expenses on behalf of adopting parents.

Response: The specific procedures for implementing the reimbursement process are left to State discretion. Parents must enter into an agreement with the State before any expense is reimbursed. The State may decide to reimburse the parents or to pay allowable costs directly.

Comment: Several commenters questioned or asked for clarification of "costs incurred by or on behalf of" adoptive parents and wondered whether costs to the State agency could be claimed under the nonrecurring expenses claim.

Response: Only the one-time expenses of adoption for which parents are ultimately responsible, i.e., out-of-pocket costs, are considered to be nonrecurring expenses. The costs to the agency, either public or private nonprofit, or of an independent agent are not covered under this provision. If, for example, the costs of the adoption study and supervision are covered by a private nonprofit agency, then no reimbursement will be made. Only if the parents are billed and are ultimately liable to pay the charge does the expense qualify under this provision.

However, the State agency may claim the costs of administrative activities required for reimbursement of nonrecurring expenses, as well as the reimbursement itself, as administrative costs of title IV–E at the usual 50 percent reimbursement rate.

Section 1356.41(h)

Comment: Several commenters asked for clarification or direction on the matter of which State is responsible for the payment of nonrecurring expenses when a child is placed across State lines.

Response: New paragraph (h) clarifies that States which enter into agreements for ongoing State or Federal adoption assistance payments or services also have the responsibility for reimbursement of the adoptive parents for nonrecurring expenses. We believe this approach for adopting parents to be the most practical and least burdensome for the State agency, since the agency will have already developed a relationship with the adopting parents. In cases where there is no agreement for ongoing adoption assistance payments or services, we believe that it would be most reasonable for the State where the final decree of adoption is issued to reimburse parents for nonrecurring expenses.

Section 1356.41(i)

Comment: Paragraph (h) of the NPRM restated the statutory definition of the term "nonrecurring adoption expenses" and proposed to define the term "other expenses" as used in the statutory definition. There were a number of comments on this paragraph. Many questioned the language or suggested that the costs associated with making physical changes in order to permit the accommodation of a child's special needs within the family environment be included as allowable "other expenses." One commenter disagreed with the inclusion of food, lodging and transportation and suggested that States be permitted to make a case-by-case determination as to whether these types of costs are appropriate and necessary to "strengthen family life." The commenter suggested that the last sentence of this section end after the phrase "supervision of the placement prior to adoption." Other commenters responded in a similar vein and expressed reservations because they felt the proposed rule was too broad and the State would be subsidizing private agencies, attorneys and courts. One commenter suggested that payment of "other expenses" be optional. Another commenter asked whether the cost of family counseling during the period before the final adoption decree is issued would be considered as "other expense" allowable for reimbursement.

Response: Paragraph (h) of the NPRM is now paragraph (i) of the final rule. The language of this section has not been changed because the proposed language adequately described the reimbursable expenses. One-time costs associated with physical remodeling, renovation, and alternations of the adoptive parents' home or property are not expenses of the adoption process and thus, are not reimbursable.

In regard to the matter of family counseling prior to the final decree of adoption, we consider such services to be separate from the expenses of adoption and therefore not in the category of "other expenses" of adoption. The costs of such services for the child with special needs are the responsibility of the placing agency.

Finally, in response to the suggestion that the reimbursement of "other expenses" be an option, the law provides for the reimbursement of "other expenses." It would contravene the statute if reimbursement of such expenses were optional.

Section 1356.41(j)

Comment: Paragraph (i) in the NPRM, now paragraph (j) in the final rule, proposed to allow States until the close of the States' second general legislative sessions following publication of this final rule in order to comply with these new requirements. One commenter asked for clarification that the legislative session referred to in the proposed rule was the State session and not the Federal session.

Two commenters addressed the need to move quickly with implementation of this rule and not permit delays in the implementation based on State legislative sessions. Two commenters opposed the position that failure by the State agency to provide reimbursement

for expenses beginning with January 1, 1987 would result in noncompliance by the State with section 473 of the Act. Several commenters also asked for clarification of the State's ability to claim FFP for reimbursement of expenditures for nonrecurring expenses back to January 1, 1987.

Response: A minor change in paragraph (j) of the final rule clarifies that the legislative session referred to in the rule is that of the State government. We did not reduce the time in which the States must make legislative changes in order to meet the Federal requirements. We believe the final rule provides a balanced approach to meeting the needs of the State agencies and adoptive parents. On the one hand, States are permitted a reasonable period of time after the publication of the final rule to amend State statutes in order to conform to the Federal law. On the other hand, claims from parents must be paid if they meet the requirements of the law and regulation. States have two years from the date of their expenditures to claim FFP.

With respect to the issue of noncompliance, the rule simply clarifies what is already in the law. Section 471(a)(1) requires a State to have a plan "* * * which provides * * * for adoption assistance in accordance with section 473" and section 473 requires payment of nonrecurring expenses.

There were no comments on § 1356.41(j) of the NPRM (new paragraph (k) of the final rule) and § 1356.60, and they have not been changed.

IV. Impact Analysis

Executive Order 12606: The Family

Executive Order 12606 requires Federal agencies, in formulating and implementing policies and regulations, to assess the impact on family formation, maintenance and general well-being. We believe this rule will serve to strengthen and preserve family life and send a message of support and encouragement to all families who adopt children with special needs. This proposed regulation should have a significant positive impact in matters related to the family. Although no precise figures are available, as many as 20,000 families may receive reimbursement under this program for costs related to adopting special needs children.

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for major rules, which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more or certain other specified effects. Nothing in either the statute or the proposed rule is likely to create substantial costs. The Department has determined that these regulations are not major rules within the meaning of the Executive Order because they will not have an effect on the economy of $100 million or more or otherwise meet the threshold criteria.

Regulatory Flexibility Act

Consistent with the Regulatory Flexibility Act of 1980 (5 U.S.C. Ch. 5), the Department tries to anticipate and reduce the impact of rules and paperwork requirements on small businesses. For each rule with a "significant economic impact on a substantial number of small entities" an analysis is prepared describing the rule's impact on small entities. Small entities are defined in the Act to include small businesses, small nonprofit organizations, and small governmental entities.

The primary impact of these regulations is on the States, which are not "small entities" within the meaning of the Act. For these reasons, the Secretary certifies that these rules will not have a significant impact on a substantial number of small entities.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1980, Pub. L. 96–511, all Departments are required to submit to the Office of Management and Budget (OMB) for review and approval any reporting or recordkeeping requirements in a proposed or final rule.

As required by section 3504(h) of the Paperwork Reduction Act of 1980, we will submit a copy of this final rule to OMB for its review of the information collection requirements. However, we do not believe there are any new information collection requirements as State agencies administering the Title IV–E Adoption Assistance Program are already utilizing a format for adoption assistance agreements which may also be used with applicants for reimbursement of nonrecurring expenses of adoption.

List of Subjects in 45 CFR Part 1356

Adoption and foster care, Child welfare, Adoption assistance, Administrative costs, Nonrecurring expenses of adoption, Grant programs—social programs.

(Catalog of Federal Domestic Assistance Program No. 13.659 Adoption Assistance)

Date: November 9, 1988.

Sydney Olson,

Assistant Secretary for Human Development Services.

Approved: November 15, 1988.

Otis R. Bowen,

Secretary.

For the reasons set forth in the preamble, we are amending 45 CFR Part 1356 as follows:

PART 1356—REQUIREMENTS APPLICABLE TO TITLE IV-E

1. The authority citation for Part 1356 continues to read as follows:

Authority: Adoption Assistance and Child Welfare Act of 1980, Pub. L. 96–272 as amended, 42 U.S.C. 670 *et seq.*, 94 Stat. 501, 42 U.S.C. 620 *et seq.*, 94 Stat. 516 *et seq.*, section 1102 of the Social Security Act as amended, 42 U.S.C. 1302.

2. Section 1356.40 is amended by revising paragraphs (b) introductory text, (b)(1), (b)(3) and (b)(4) as follows:

§ 1356.40 Adoption assistance program: Administrative requirements to implement section 473 of the Act.

* * * * * *

(b) The adoption assistance agreement for payments pursuant to section 473(a)(2) must meet the requirements of section 475(3) of the Act and must:

(1) Be signed and in effect at the time of or prior to the final decree of adoption. A copy of the signed agreement must be given to each party; and

* * * * *

(3) Specify the nature and amount of any payment, services and assistance to be provided under such agreement and, for purposes of eligibility under title XIX of the Act, specify that the child is eligible for Medicaid services; and

(4) Specify, with respect to agreements entered into on or after October 1, 1983, that the agreement shall remain in effect regardless of the State of which the adoptive parents are residents at any given time.

* * * * *

§ 1356.40 [Amended]

3. Section 1356.40 is further amended by removing paragraph (c) and redesignating paragraphs (d), (e), (f) and (g), respectively as paragraphs (c), (d), (e), and (f).

4. A new § 1356.41 is added to read as follows:

§ 1356.41 Nonrecurring expenses of adoption.

(a) The amount of the payment made for nonrecurring expenses of adoption

shall be determined through agreement between the adopting parent(s) and the State agency administering the program. The agreement must indicate the nature and amount of the nonrecurring expenses to be paid.

(b) The agreement for nonrecurring expenses may be a separate document or a part of an agreement for either State or Federal adoption assistance payments or services. The agreement for nonrecurring expenses must be signed prior to the final decree of adoption, with two exceptions:

(1) Cases in which the final decree of adoption was entered into on or after January 1, 1987 and within six months after the effective date of the final rule; or

(2) Cases in which a final decree was entered into before January 1, 1987 but nonrecurring adoption expenses were paid after January 1, 1987.

(c) There must be no income eligibility requirement (means test) for adopting parents in determining whether payments for nonrecurring expenses of adoption shall be made. However, parents cannot be reimbursed for out-of-pocket expenses for which they have otherwise been reimbursed.

(d) For purposes of payment of nonrecurring expenses of adoption, the State must determine that the child is a "child with special needs" as defined in section 473(c) of the Act, and that the child has been placed for adoption in accordance with applicable State and local laws; the child need not meet the categorical eligibility requirements at section 473(a)(2).

(e)(1) The State agency must notify all appropriate courts and all public and licensed private nonprofit adoption agencies of the availability of funds for the nonrecurring expenses of adoption of children with special needs as well as where and how interested persons may apply for these funds. This information should routinely be made available to all persons who inquire about adoption services after the publication date of this final rule.

(2) The State agency must send a notice to all public and private nonprofit adoption agencies directing them to notify all their clients who adopted a special needs child between January 1, 1986 and six months following the effective date of this rule of the availability of reimbursement for nonrecurring expenses paid after January 1, 1987.

(3) For adoptions in which a final decree is entered between January 1, 1987 and six months after the effective date of this rule, or where a final decree was entered before January 1, 1987 but nonrecurring adoption expenses were paid after January 1, 1987, individuals who seek reimbursement must enter into an agreement with the State agency and file a claim with the State agency within two years of the effective date of this rule. For adoptions in which a final decree is entered more than six months after the effective date of this rule, the agreement must be signed at the time of or prior to the final decree of adoption. In such cases, claims must be filed with the State agency within two years of the date of the final decree of adoption.

(f)(1) Funds expended by the State under an adoption assistance agreement, with respect to nonrecurring adoption expenses incurred by or on behalf of parents who adopt a child with special needs, shall be considered an administrative expenditure of the title IV–E Adoption Assistance Program. Federal reimbursement is available at a 50 percent matching rate, for State expenditures up to $2,000, for any adoptive placement.

(2) States may set a reasonable lower maximum which must be based on reasonable charges, consistent with State and local practices, for special needs adoptions within the State. The basis for setting a lower maximum must be documented and available for public inspection.

(3) In cases where siblings are placed and adopted, either separately or as a unit, each child is treated as an individual with separate reimbursement for nonrecurring expenses up to the maximum amount allowable for each child.

(g) Federal financial participation for nonrecurring expenses of adoption is limited to costs incurred by or on behalf of adoptive parents that are not otherwise reimbursed from other sources. Payments for nonrecurring expenses shall be made either directly by the State agency or through another public or licensed nonprofit private agency.

(h) When the adoption of the child involves interstate placement, the State that enters into an adoption assistance agreement under section 473(a)(1)(B)(ii) of the Act or under a State subsidy program will be responsible for paying the nonrecurring adoption expenses of the child. In cases where there is interstate placement but no agreement for other Federal or State adoption assistance, the State in which the final adoption decree is issued will be responsible for reimbursement of nonrecurring expenses if the child meets the requirements of section 473(c).

(i) The term "nonrecurring adoption expenses" means reasonable and necessary adoption fees, court costs, attorney fees and other expenses which are directly related to the legal adoption of a child with special needs, which are not incurred in violation of State or Federal law, and which have not been reimbursed from other sources or other funds. "Other expenses which are directly related to the legal adoption of a child with special needs" means the costs of the adoption incurred by or on behalf of the parents and for which parents carry the ultimate liability for payment. Such costs may include the adoption study, including health and psychological examination, supervision of the placement prior to adoption, transportation and the reasonable costs of lodging and food for the child and/or the adoptive parents when necessary to complete the placement or adoption process.

(j) When State statutes must be amended in order to reimburse parents for nonrecurring expenses in the adoption of eligible children, legislation must be enacted before the close of the second general session following publication of the final rule and must apply retroactively to January 1, 1987. Failure to honor all eligible claims will be considered non-compliance by the State with Title IV–E of the Act.

(k) A State expenditure is considered made in the quarter during which the payment was made by a State agency to a private nonprofit agency, individual or vendor payee.

§ 1356.60 [Amended]

5. Section 1356.60 is amended by removing paragraph (c)(4) and redesignating paragraph (c)(5) as (c)(4).

[Docket No. 74–14; Notice 59]
RIN 2127—AC01

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petitions for reconsideration.

SUMMARY: On November 23, 1987, NHTSA published a final rule requiring light trucks and multipurpose passenger vehicles (MPVs) manufactured on or after September 1, 1991 and equipped

VOL
53
ISS
240
DE

1988
UMI

with manual lap/shoulder safety belts at the front outboard seats to comply with the injury criteria set forth in Standard No. 208 in a 30 mile per hour (mph) barrier crash test. In order to minimize the impacts of this new requirement on multistage manufacturers, this new requirement will apply only to vehicles with a gross vehicle weight rating of 8,500 pounds or less *and* an unloaded vehicle weight of 5,500 pounds or less. The rule also responded to the dummy positioning issues raised in petitions for reconsideration of the final rule adopting the Hybrid III test dummy.

NHTSA received five petitions for reconsideration of this rule. Some of those petitions sought changes to the Hybrid III dummy positioning procedures. Those positions are not addressed in this notice, since NHTSA has not finished its evaluation of those petitions. This notice responds only to those petitions seeking some modifications of the dynamic testing requirements.

Three petitioners asked for changes to the dynamic testing requirements for light trucks and MPVs, for two reasons. First, it was alleged that the dynamic testing requirements were not practicable or appropriate for a particular type of light truck or MPV called a "forward control vehicle." In the final rule, NHTSA explained that the available evidence showed that these requirements were both practicable and appropriate for forward control vehicles. The petitioner did not provide any new evidence to the contrary, nor did it refer to some evidence that the agency failed to consider in its determination set forth in the final rule. The additional evidence that has become available since the final rule shows that a 1988 forward control vehicle manufactured by Nissan complies fully with the dynamic testing requirements. Therefore, this notice reaffirms the agency's prior determination that these requirements are practicable and appropriate for forward control vehicles.

Second, it was alleged that the dynamic testing requirements will impose some burdens on multistage manufacturers, notwithstanding the agency's stated intent to minimize burdens on these manufacturers. To better achieve the stated intent, these petitioners suggested that the rule be amended to exempt entirely from the dynamic testing requirements any vehicles completed by multistage manufacturers. In response to these petitions, NHTSA has reexamined the burdens imposed on multistage manufacturers. The burdens faced by multistage manufacturers to certify compliance of their vehicles with the dynamic testing requirements are not significantly different than the burdens they face currently, when they must certify that their vehicles comply with other standards whose compliance is determined in a 30 mph barrier crash. These burdens have not been excessive, and are the least that could be required consistent with the certification requirements set forth in the law. Hence, this notice denies the petitions for changes to the dynamic testing requirements.

FOR FURTHER INFORMATION CONTACT: Dr. Richard L. Strombotne, Chief, Crashworthiness Division, NRM-12, NHTSA, 400 Seventh Street SW., Washington, DC 20590 (202-366-2264).

SUPPLEMENTARY INFORMATION:

Background

On April 12, 1985 (50 FR 14589), NHTSA published a notice proposing a number of amendments to Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208). Among the proposals was one that manual lap/shoulder belts at the front outboard seating positions of light trucks and multipurpose passenger vehicles (MPVs) comply with the dynamic testing requirements of Standard No. 208. Under those dynamic testing requirements, the level of protection afforded to vehicle occupants by the vehicles occupant protection system is measured by using test dummies and subjecting the vehicle to a 30 mile per hour frontal crash into a barrier.

On November 23, 1987 (52 FR 44898), the agency published a final rule adopting a dynamic testing requirement for light trucks and MPVs. The preamble to that rule explained in detail the agency's conclusion that there was a safety need to extend the dynamic testing requirements to these types of vehicles and that compliance with the dynamic testing requirements was feasible for these types of vehicles. The preamble also reflected the agency's decision to structure this rule so as to minimize the impact of the dynamic testing requirements on small businesses involved in the manufacture of light trucks and MPVs.

There is a specialized class of small businesses involved in the final stage manufacture of a vehicle manufactured in two or more stages, and/or in the conversion or alteration of new vehicles. Under NHTSA's regulations, a final stage manufacturer must certify that the completed vehicle conforms to all applicable safety standards. Additionally, a business that modifies or converts a new vehicle prior to its first sale to a consumer is a vehicle alterer under NHTSA's regulations. Alterers are required to certify that the altered vehicle continues to comply with all applicable Federal motor vehicle safety standards. Throughout the rest of this preamble, the term "final stage manufacturer" is used to refer to both final stage manufacturers and alterers. The overwhelming majority of final stage manufacturers do not have the engineering or financial resources to conduct dynamic testing of the vehicles they have completed. Accordingly, the agency sought to structure the final rule so that the impacts on these small businesses would be minimized to the extent possible.

NHTSA obtained information from the Truck Body and Equipment Association, which represents many final stage manufacturers, that 90-95 percent of the chassis used by its members involved in final stage manufacturing have a gross vehicle weight rating (GVWR) of greater than 8,500 pounds and would have an unloaded vehicle weight greater than 5,500 pounds when the vehicle is completed. To reduce the potential problems arising from the dynamic testing requirements for these small businesses, the agency limited the applicability of the dynamic testing requirements to vehicles with a GVWR of 8,500 pounds or less *and* an unloaded vehicle weight of 5,500 pounds or less. Additionally, the agency exempted certain types of trucks and MPVs from the dynamic testing requirements, regardless of the vehicle's GVWR and unloaded vehicle weight. The exempted types were motor homes, open-body type vehicles, walk-in van-type vehicles, vehicles designed exclusively to be sold to the U.S. Postal Service, and vehicles carrying chassis-mount campers.

For those vehicles produced by final stage manufacturers that were not exempted from the dynamic testing requirements, the final rule noted that those small businesses would still have available means to certify compliance that would not require the small business to conduct crash testing. First, the final stage manufacturer can stay within the limits set by the incomplete vehicle manufacturer. NHTSA's regulations require the manufacturers of truck or van chassis used by final stage manufacturers to provide information on what center of gravity, weight, and other limitations must be observed for the completed vehicle to comply with the safety standards. When the final stage manufacturer observes those limits, it simply states that fact on the certification label and the certification

of the vehicle's compliance with the safety standards is based on the incomplete vehicle manufacturer's certification. Thus, if the final stage manufacturer observes all of the limits specified by the incomplete vehicle manufacturer, the final stage manufacturer does not have to conduct any testing or analysis before certifying the vehicle complies with the safety standards, including the dynamic testing requirements.

Second, if the final stage manufacturer cannot stay within the incomplete vehicle manufacturer's limits for a given chassis, the final stage manufacturer may choose to use a heavier chassis to complete its vehicle. The heavier chassis would have given the final stage manufacturer greater flexibility in completing the vehicle, since it would have higher limits established by the incomplete vehicle manufacturer. It is also possible that the switch to a heavier chassis would result in the completed vehicle not being subject to the dynamic testing requirements, if the completed vehicle had an unloaded vehicle weight of more than 5,500 pounds or a GVWR of more than 8,500 pounds. By switching to a heavier chassis and staying within the incomplete vehicle manufacturer's limits for the heavier chassis, the final stage manufacturer would not have to conduct any additional testing or analysis before certifying that the completed vehicle conformed to all safety standards. The switch to a heavier chassis might offer other potential benefits as well, by reducing the possibility that chassis components, such as wheels, brakes, and axles, would be overloaded and fail during service.

If the final stage manufacturer chose not to remain within the incomplete vehicle manufacturer's specifications under either of these approaches, the final rule also permitted the final stage manufacturer to complete the vehicle outside of those limits. However, if a final stage manufacturer completes a vehicle outside of those limits, the final stage manufacturer can no longer rely on the incomplete vehicle manufacturer's specifications as the basis for certifying the completed vehicle. In such cases, the final stage manufacturer would have to conduct the necessary crash testing or engineering analysis to certify that the completed vehicle complies with applicable safety standards, including the dynamic testing requirement.

This final rule also responded to issues related to the positioning of the Hybrid III test dummy. These issues were originally raised in petitions for reconsideration of the final rule adopting the use of the Hybrid III test dummy (51 FR 26688; July 25, 1986). NHTSA decided to address the dummy positioning issues in the final rule establishing dynamic testing requirements for light trucks and MPVs, because the positioning procedures for the Hybrid III test dummy had to be established in order to use the Hybrid III dummy for testing light trucks and MPVs.

Petitions for Reconsideration

Five petitions for reconsideration of this rule were filed with the agency. Four of the petitioners were vehicle manufacturers (General Motors, Ford, Toyota, and Honda) and the fifth petitioner was a trade association representing some final stage manufacturers and alterers (National Truck Equipment Association). Some of the petitioners asked for reconsideration of the Hybrid III test dummy positioning procedures. The agency has not completed its evaluation of those petitions, so this notice does not address those petitions. NHTSA will soon publish a separate notice responding to the petitions for the Hybrid III test dummy. This notice addresses only those petitions seeking reconsideration of the dynamic testing requirements.

A. Forward Control Vehicles

General Motors asked that the dynamic testing requirements be "withdrawn" for a particular type of truck or MPV, the "forward control vehicle." A "forward control vehicle" is defined at 49 CFR 571.3 as a vehicle configuration in which more than half of the engine length is rearward of the foremost point of the windshield base and the steering wheel hub is in the forward quarter of the vehicle length. General Motors argued that, because of the configuration of forward control vehicles (the driver and passenger are closer to the front of the vehicle than in passenger cars and the engine is not as far in front of the occupant compartment as it is in passenger cars), these vehicles cannot fully rely on the crush of the forward part of the vehicle to dissipate crash energy, as passenger cars and conventional pickup trucks do. Because of this difference, General Motors alleged that the dynamic testing requirements were not "practicable," within the meaning of section 103(a) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1392(a); the Safety Act). Additionally, General Motors alleged that the dynamic testing requirements were not "appropriate for the particular type of motor vehicle for which it is prescribed" with respect to forward control vehicles, as required by section 103(f)(3) of the Safety Act (15 U.S.C. 1392(f)(3)).

General Motors had previously raised similar arguments in its comments on the proposed dynamic testing requirements. In response to those arguments, the preamble to the final rule set forth the following discussion:

> The agency recognizes that because of the smaller amount of frontal crush space available in forward control and forward control type vehicles, it is more difficult to provide occupant crash protection in frontal crashes of those vehicles. However, there is information showing that those vehicles can be designed to meet the peformance requirements of Standard No. 208. In its NCAP program, the agency has tested a 1984 Toyota Van, which is a forward control vehicle, in a 35 mph barrier impact test. In that test, which is a more severe test than the 30 mph barrier impact test used in Standard No. 208, both the driver and the passenger test dummies did not exceed the HIC and chest acceleration limits set in the standard. The femur loads for the driver did exceed the limit in Standard No. 208, but the passenger's loads were well below the limit. NHTSA believes that with the longer leadtime provided by this notice, manufacturers can adopt appropriate changes to enable forward control and forward control type vehicles to meet the performance requirements of Standard No. 208. Therefore, the agency has decided not to exempt forward control or forward control type vehicles from the dynamic test requirement. 52 FR 44902.

General Motors argued that this discussion showed that no forward control vehicles had met or exceeded all of the performance requirements of Standard No. 208 in an NCAP test, and that absent data showing that some design of forward control vehicle complies with all performance requirements of Standard No. 208, the agency cannot establish that the dynamic testing requirements are "practicable" for forward control vehicles. Stated otherwise, General Motors argued that the statutory requirements that standards be "practicable" means that:

1. Some manufacturer's forward control vehicles must already comply with all aspects of the dynamic testing requirements, or

2. The design and technology for complying with the dynamic testing requirements in forward control vehicles must already be incorporated in forward control vehicles, as an established industry practice.

NHTSA rejects this interpretation of the term "practicable," as used in the Safety Act. General Motors' suggested interpretation of "practicable" has already been considered and rejected by the courts. *See Chrysler Corporation* v.

Department of Transportation, 472 F.2d 659 (6th Cir. 1972). The court held that "the [NHTSA] is empowered to issue safety standards which require improvements in existing technology or which require the development of new technology, and it is not limited to issuing standards based solely on devices already fully developed." 472 F.2d at 673. The court further explained this holding as follows:

> We do not intend to suggest that the Agency might impose standards so demanding as to require a manufacturer to perform the impossible, or impose standards so imperative as to put a manufacturer out of business. But it is clear from the Act and its legislative history that the Agency may issue standards requiring future levels of motor vehicle performance which manufacturers could not meet unless they diverted more of their resources to producing additional safety technology than they might otherwise do. 472 F.2d at 672–673.

NHTSA agrees with General Motors' assertion that most forward control vehicle designs must be modified to comply with the dynamic testing requirements. The fact that few, if any, current designs of forward control vehicles would comply with the dynamic testing requirements does *not*, however, establish that those requirements are not practicable, within the meaning of the Safety Act. Instead, to determine whether a change to the safety standards is practicable, the agency must determine whether the manufacturers could make changes to, or incorporate new technology on, their forward control vehicles so that those vehicles could comply with the dynamic testing requirements. Such a determination requires the agency to make a technical evaluation of the available evidence.

In this case, the evidence available at the time of the final rule showed that few current designs of forward control vehicles would comply with the dynamic testing requirements, but that one forward control vehicle, the 1984 Toyota Van, could comply with the dynamic testing requirements without any major design changes and without incorporating any radically new or different technology. This fact suggested that it would be possible for other manufacturers to adopt appropriate changes to the designs of their forward control vehicles to enable those vehicles to comply with the dynamic testing requirements, without requiring the manufacturers to develop or incorporate any radically new or different occupant protection technology. Accordingly, the agency concluded that it would be practicable for forward control vehicles manufactured on or after September 1, 1991 to comply with the dynamic testing requirements.

NHTSA notes that additional evidence that the dynamic testing requirements are practicable for forward control vehicles became available after the final rule was published. As part of its 1988 New Car Assessment Program (NCAP) testing, the agency subjected a 1988 Nissan XE Van to a 35 mph barrier crash test. This is a much more severe test than the 30 mph barrier crash test conducted to determine if a vehicle complies with the dynamic testing requirements in Standard No. 208. Notwithstanding the 36 percent higher crash forces, the Nissan XE Van, which is a forward control vehicle, exceeded *all* of the Standard No. 208 performance requirements in this NCAP test. This reinforces NHTSA's previous conclusion that the dynamic testing requirements are practicable for forward control vehicles.

General Motor's assertion that the Toyota Van is not representative of all forward control vehicles, because of its engine location, misses the point. NHTSA agrees with the implication that a different combination of changes and occupant protection technologies may be needed in forward control vehicles with different engine locations, or with other differences from the Toyota and Nissan Vans. However, NHTSA was not suggesting that all vehicle manufacturers should simply copy what Toyota did for its 1984 van or what Nissan did for its 1988 van. Rather, NHTSA was expressing its conclusion that the vehicle manufacturers could incorporate appropriate occupant protection technologies and any necessary production changes to their own particular designs of forward control vehicles to allow those vehicles to comply with the dynamic testing requirements within the timeframe specified in the final rule.

NHTSA notes that General Motors did not provide *any* data in its petition or in its earlier submissions to show that it had made good faith efforts to design its forward control vehicles to comply with the dynamic testing requirements, but was unable to do so. Hence, there is *no* evidence available to the agency showing that dynamic testing requirements will not be practicable for forward control vehicles. Absent some such evidence, NHTSA has no basis for changing its determination, which is based on actual crash test data, that these requirements are practicable.

The agency would review its determination of practicability if some available evidence appears to show that the dynamic testing requirements are not practicable for forward control vehicles. For instance, if General Motors or any other manufacturer can show that it has made specific changes to its forward control vehicles and, in spite of those changes, the vehicles still do not comply with the dynamic testing requirements, NHTSA would carefully evaluate this submission. The 1991 effective date for dynamic testing of forward control vehicles allows both the agency and the manufacturers sufficient time to gather additional evidence about the practicability of the dynamic testing requirements for forward control vehicles. Additionally, the 1991 effective date would allow the agency to make appropriate changes to the requirements for forward control vehicles, if that additional evidence shows it is not practicable for forward control vehicles to comply with these dynamic testing requirements. To repeat, there simply is no such evidence presented in General Motors' petition or otherwise available to the agency at this time.

In its petition, General Motors stated that it was "especially concerned" that NHTSA gave the impression that the agency believes a longer leadtime is an alternative to an agency determination of practicability. The agency did not intend to give this impression, and did not follow such a course of action in connection with this rule. Instead, NHTSA expressly found that the dynamic testing requirements were practicable for forward control vehicles, as explained above. NHTSA also found that additional leadtime was necessary for the manufacturers to incorporate appropriate changes to their forward control vehicles, to avoid imposing undue hardships or unnecessary additional costs on the manufacturers. This authority is expressly granted to NHTSA by section 103(c) of the Safety Act (15 U..C. 1392(c)), and is consistent with the legislative intent of the Safety Act; *see* S. Rep. No. 1301, 89th Cong., 2d Sess., at 7 (1966).

General Motors' final argument was that the dynamic testing requirements were not appropriate for the particular vehicle type (forward control vehicles). This argument was expressed as follows: "Given the uncertainties that exist, a *possible* result of the agency rulemaking *may be* the demise of the forward control configuration" (NHTSA Docket No. 74–14–N53–022, at 3; emphases added). The agency's response to this argument is similar to its response to General Motors' practicability argument. At this time, both the Nissan and the Toyota Van show that it is possible for vehicles to retain their forward control configuration and comply with the

dynamic testing requirements. No data are available that substantiate General Motors' speculation about the demise of forward control vehicles, and the experience of the Toyota and Nissan vans refutes that speculation. Based on the available data, NHTSA reaffirms its previous determination that dynamic testing requirements are appropriate for forward control vehicles. Accordingly, the General Motors' petition for reconsideration is denied.

B. Impacts on Final Stage Manufacturers

Two petitioners asked that the dynamic testing requirements be modified to further reduce the burdens on final-stage manufacturers and alterers. The National Truck Equipment Association (NTEA) argued that the dynamic testing requirements were not "reasonable" or "practicable," within the meaning of the Safety Act, for vehicles that were manufactured in two or more stages. The bases for these assertions were that:

1. Such vehicles are not used primarily for personal or family transportation; and

2. The small businesses that produce these vehicles do not have the economic or technological expertise to conduct dynamic testing.

Even assuming that the vehicles in question are not used primarily for personal or family transportation purposes, this fact *by itself* does not have some special significance under the Safety Act. Section 103 of the Safety Act sets forth a number of criteria a safety standard must satisfy when it applies to a group of vehicles. These criteria include determinations of whether the standard "is reasonable, practicable, and appropriate for the particular type of motor vehicle for which it is prescribed," and whether the standard "meets the need for motor vehicle safety."

Certainly the fact that a vehicle carries special work-related equipment, such as a "cherry-picker" basket, could result in particular requirements in safety standards not being reasonable, practicable, or appropriate for that vehicle type. It is also possible that the special equipment or the vehicle's size might indicate that particular requirements of a standard need not apply to that vehicle to meet the need for safety for that vehicle. Additionally, a vehicle's intended use for some particular work-related purpose, such as plowing snow or as a delivery van, might make it unreasonable or impracticable to apply requirements of standards that apply to vehicles intended to be used primarily for family or personal transportation purposes.

It is not clear if NTEA was making such an assertion with respect to the dynamic testing requirements, since its petition did not identify any particular vehicle type, such as fire trucks, cherry-pickers, or ambulances, for which the dynamic testing requirements were not reasonable or practicable. The failure to identify any particular vehicle type for which dynamic testing is not reasonable and practicable gives the agency no basis on which to modify the requirements of the final rule. In connection with the final rule, NHTSA determined that the dynamic testing requirements satisfied all statutory criteria for trucks and MPVs with a GVWR of 8,500 pounds or less and an unloaded vehicle weight of 5,500 pounds or less, except for convertibles, open-body type vehicles, walk-in van-type trucks, motor homes, vehicles designed to be exclusively sold to the U.S. Postal Service, and vehicles carrying chassis-mount campers. NTEA has not provided any data demonstrating that these determinations were erroneous, so NHTSA reaffirms those determinations on the basis of the available evidence.

It is possible that NTEA was asserting that it is not reasonable or practicable to require vehicles to comply with dynamic testing requirements if they are used for work-related purposes, instead of personal or family transportation purposes, regardless of any particular characteristics of the vehicle. If this is what NTEA meant, NHTSA disagrees. Since the dynamic testing requirements satisfy the statutory criteria for subject vehicles regardless of whether the vehicle is used for work-related purposes or personal transportation purposes, there is no basis in the Safety Act to permit a worker on the job to receive a lesser level of crash protection than is reasonable, practicable, and appropriate for the vehicle in which the worker is performing his or her job. Similarly, the need for motor vehicle safety does not diminish on the job. Therefore, NHTSA does not believe that the fact that vehicles are used extensively or solely for work-related purposes, by itself, suggests that the dynamic testing requirements are not reasonable and practicable for such vehicles.

With respect to NTEA's other basis for asserting that the dynamic testing requirements were not reasonable and practicable for vehicles completed by final stage manufacturers, NHTSA stated in the preamble to the final rule that it agrees with NTEA's assertion that most final stage manufacturers and alterers do not have the resources to conduct dynamic testing of their completed vehicles. However, that preamble also noted that these small manufacturers had several means whereby they would not need to conduct crash testing or engineering analyses to certify that their completed vehicles complied with the dynamic testing requirements.

The final stage manufacturer need not conduct any crash testing or engineering analyses if it completes its vehicles within the limits specified by the incomplete vehicle manufacturer. When the vehicle is completed within those limits, the final stage manufacturer simply states that fact in its certification of the vehicle. When a final stage manufacturer is unable to complete the vehicle within the specifications established by the incomplete vehicle manufacturer, the final stage manufacturer can build the vehicle on a heavier chassis, and remain within the limits specified for that heavier chassis. Again, the final stage manufacturer would not have to conduct any dynamic testing or engineering analyses prior to certifying the vehicle complies with the safety standards. Finally, if a final stage manufacturer chooses to complete a vehicle outside of the specifications established by the incomplete vehicle manufacturer, the final stage manufacturer must conduct the necessary crash testing or engineering analysis to show that the completed vehicle complies with the dynamic testing requirement.

The availability of these alternatives allowed the rule to strike a proper balance between two statutory goals. First, the alternatives assure the public that the enhanced safety protection of vehicles that are certified as complying with dynamic testing requirements will be provided in *all* vehicles subject to those requirements. Second, the alternatives minimize the burdens imposed by the newly-established dynamic testing requirements on multistage manufacturers, most of which are small businesses.

However, NTEA asserted that these alternatives were not sufficiently helpful to final stage manufacturers. With respect to the alternative of completing the vehicle within the specifications established by the incomplete vehicle manufacturer, NTEA asserted that this course of action might not be realistic, because "the customization demanded by the market often makes it impossible to stay within the boundaries of the incomplete vehicle manufacturer." With respect to the possibility of using a heavier chassis and remaining within the specifications established for the

heavier chassis, NTEA asserted that the contracts offered for bidding by final stage manufacturers often include the desired GVWR of the completed vehicle in the specifications, and that final stage manufacturers that use a heavier chassis would be unlikely to be awarded the contract. Finally, with respect to the possibility of the final stage manufacturers conducting engineering analysis or testing, NTEA asserted that this wasn't really a viable option because the agency has acknowledged that most final stage manufacturers do not have the engineering or financial resources to conduct the necessary testing or engineering analysis.

The agency did not suggest that the dynamic testing requirements would not impose *any* additional burdens on these small businesses. Rather, NHTSA said that it was "limiting the effects of this rule on small businesses *to the extent possible.*" 52 FR 44898; November 23, 1987 (emphasis added). Section 114 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1403) clearly requires *every* manufacturer, including every final stage manufacturer, to certify that each of its vehicles conforms to all applicable Federal motor vehicle safety standards. Because of this statutory provisions, final stage manufacturers will experience some additional burden to certify compliance with the dynamic testing requirements. NHTSA has no authority to exempt small businesses from the statutorily-imposed requirement to certify compliance with the dynamic testing requirements.

The final rule did, however, exercise the agency's authority to minimize the burdens imposed on small businesses by the dynamic testing requirements, so that those burdens will not be significant. To achieve this end, the final rule established limits on the GVWR and the unloaded vehicle weight of vehicles subject to the dynamic testing requirements. The agency determined that there was a lesser safety need for these heavier vehicles to comply with the dynamic testing requirements. Because of the lesser safety need for dynamic testing of these heavier vehicles, NHTSA exercised its authority to establish the weight limits and avoid any certification problems for the overwhelming majority of the vehicles manufactured by these small businesses.

Those vehicles completed by these small businesses within the weight limits established in the final rule will be subject to the dynamic testing requirements. The safety need for compliance with the dynamic testing requirements in these vehicles is identical to the safety need for the same size vehicles manufactured by the larger manufacturers. Since the dynamic testing requirements also satisfy all other criteria in the Safety Act for vehicles produced by these small manufacturers that are within the established weight limits, NHTSA has no basis for exempting these vhicles from the dynamic testing requirements.

The dynamic testing requirements are not the first or only instance where final stage manufacturers generally do not have the resources necessary to certify that their vehicles comply with the requirements of a safety standard. Only final stage manufacturers that have the necessary resources to conduct 30 mph barrier crash test or engineering analyses of that condition could certify that their completed vehicles complied with the windshield mounting and windshield zone intrusion standards (Standard Nos. 212 and 219, respectively), or the fuel system integrity standard (Standard No. 301). Additionally, only those final stage manufacturers that have the necessary resources to conduct brake testing could certify that their completed vehicles complied with the braking standards (Standard No. 105 for hydraulic brake systems and Standard No. 121 for air brake systems). Notwithstanding the fact that to this agency's knowledge few, if any, of the final stage manufacturers have the necessary financial and technical resources to certify that their completed vehicles comply with these standards, the Safety Act expressly requires them to so certify.

Absent some action by NHTSA, this statutory requirement could have imposed an unreasonably large burden on final stage manufacturers or required them to do something that was beyond their capabilities. To avoid such a result, the agency incorporated additional provisions in its certification regulations (49 CFR Parts 567 and 568). Those provisions require the incomplete vehicle manufacturers (companies such as Chrysler, Ford, and General Motors) to certify the compliance of their incomplete vehicles, and require the final stage manufacturers to certify the compliance of the components they mount on the vehicle and the effect of the mounting, to thus obtain effective certification of the completed vehicle without imposing unreasonable burdens on either incomplete or final stage manufacturers.

With respect to the brake standards and the standards where compliance is evaluated in a 30 mph barrier crash test, the agency's certification regulations require the incomplete vehicle manufacturer to either:

1. Certify that the completed vehicle will comply with these standards *if* it is completed within specifications established by the incomplete vehicle manufacturer; or

2. State that conformity with these standards is not substantially affected by the design of the incomplete vehicle.

When the incomplete vehicle manufacturer follows the first course of action listed above, it provides specifications that generally establish some limits on the parameters of the completed vehicle, such as its weight, height of center of gravity, and so forth. When the vehicle is completed within the incomplete vehicle manufacturer's specifications, the final stage manufacturer need only so state on its certification label and the responsibility for the vehicle's conformity with the standards rests entirely on the incomplete vehicle manufacturer.

However, when the final stage manufacturer chooses to complete the vehicle outside of the specifications established by the incomplete vehicle manufacturer, the final stage manufacturer must assume the responsibility for the vehicle's conformity with the safety standards. This means that the final stage manufacturer cannot rely upon the incomplete vehicle manufacturer's specifications as the basis for certifying that the completed vehicle conforms with applicable safety standards. Instead, the final stage manufacturer must conduct its own testing or engineering analysis as the basis for certifying that the completed vehicle conforms with the safety standards.

As noted in the final rule, very few final stage manufacturers and alterers have the technical and financial resources necessary to conduct testing or engineering analyses. Absent the resources necessary to conduct such testing or engineering analyses, the final stage manufacturer *cannot* legally complete its vehicles outside the incomplete vehicle manufacturer's specifications. Thus, even before the dynamic testing requirements apply to final stage manufacturers' completed vehicles, very few of those manufacturers could legally complete vehicles outside the specifications established by the incomplete vehicle manufacturers, because the vast majority of final stage manufacturers lack the resources needed to assume responsibility for the certification of the completed vehicle. NHTSA believes the dynamic testing requirements will have a minimal impact on these final stage

VOL 53 ISS 240 DE 14 1988 UMI

manufacturers, since they are obliged to complete all of their vehicles within the limits established by the incomplete vehicle manufacturer in any case. These manufacturers can simply continue their current practice of completing their vehicles within the limits established by the incomplete vehicle manufacturer.

The small percentage of these small businesses that have the necessary resources to conduct crash testing and brake testing or engineering analyses were the only final stage manufacturers that could complete vehicles outside of the incomplete vehicle manufacturer's specifications prior to the establishment of the dynamic testing requirements. These final stage manufacturers can evaluate compliance with the dynamic testing requirements during the engineering analyses or crash testing they now conduct to evaluate the compliance of their completed vehicles with Standard Nos. 212, 219, and 301. If they conduct crash testing at present, the only change would be that the final stage manufacturers would now have to use instrumented test dummies, instead of the non-instrumented test dummies they currently use. Instrumented test dummies will increase the cost of a crash test by about $8,500 for each dynamic test conducted by these small businesses. This sum should not add a significant burden on these small businesses, considering the costs of the engineering analyses or crash testing they currently conduct.

When the incomplete vehicle manufacturer follows the second course of action listed above; i.e., states that conformance to a particular safety standard is not substantially affected by the design of the incomplete vehicle, the final stage manufacturer is responsible for certifying that the completed vehicle conforms to that safety standard. In this case, the final stage manufacturer is required by the Safety Act to exercise due care in certifying that the completed vehicle complies with the applicable safety standard. Any final stage manufacturer that has the necessary resources to do so may conduct the necessary testing or engineering analysis, and certify that the vehicles it completes from this manufacturer's incomplete vehicles comply with the applicable safety standards. On the other hand, if the final stage manufacturer lacks the financial or engineering resources to conduct the appropriate testing or engineering analyses to exercise due care in its certification, it cannot purchase any incomplete vehicles from manufacturers that state that conformance is not substantially affected by the design of the incomplete vehicle. Instead, these smaller final stage manufacturers must purchase their incomplete vehicles from those incomplete vehicle manufacturers that certify the completed vehicle will comply with the standard when completed within specifications.

Accordingly, the NTEA petition is denied. NHTSA concludes again that the vast majority of final stage manufacturers lack the financial and engineering resources necessary to establish due care in certifying that a completed vehicle complies with applicable safety standards. Because of this lack of resources, the vast majority of final stage manufacturers cannot legally complete a vehicle outside of the specifications established by the incomplete vehicle manufacturer. Hence, NTEA's point about the need to go outside the incomplete vehicle manufacturer's specifications to respond to the market demand for customization is not directly relevant to this decision, because the vast majority of final stage manufacturers are obligated to remain within the incomplete vehicle manufacturer's specifications *before* the dynamic testing requirements apply to these vehicles. For those few manufacturers that could exceed the incomplete vehicle manufacturer's specifications, they can continue to conduct their own engineering analyses or dynamic testing. It will cost more to conduct those analyses or test, but the higher costs will not be significant relative to these manufacturers' existing programs for certifying their vehicles.

Toyota also asked for reconsideration of the dynamic testing requirements as they applied to vehicles manufactured in more than one stage. In its petition, Toyota stated that it would have to impose stringent limitations on vehicle weight, weight distribution, and center of gravity height in order that its crash tests might be representative of the results of crash tests of the vehicles as completed or altered. Ford had raised a similar point in its comments on the proposal to require dynamic testing of light trucks and MPVs. Toyota asserted that these stringent limitations would put its incomplete vehicles at a competitive disadvantage compared to those incomplete vehicles that would not be subject to the dynamic testing requirements because of their GVWR or unloaded vehicle weight when completed.

With regard to Toyota's first point, Toyota's assertion that it will have to impose "stringent limitations on vehicle weight, weight distribution, and center of gravity height" for its incomplete vehicles subject to the dynamic testing requirements is simply speculation at this point. At this time, there is no indication that the incomplete vehicle manufacturers will have to include limits on specifications in addition to the limits currently set for such specifications as vehicle weight, weight distribution, and center of gravity height. Further, there is no evidence that the specifications established by the incomplete vehicle manufacturers for vehicles subject to the dynamic testing requirements will necessarily be more stringent than the specifications established at the present. Neither Toyota nor any other incomplete vehicle manufacturer can establish *unreasonably* stringent limitations for its incomplete vehicles, since the final stage manufacturers would then purchase their incomplete vehicles from other manufacturers, who would presumably establish more realistic limitations for their incomplete vehicles.

These determinations were made by the agency after considering the evidence available at this time. Neither Toyota nor any other incomplete vehicle manufacturer has submitted *any* testing or engineering analyses it has conducted to determine what additional limitations it will have to impose on its incomplete vehicles subject to the dynamic testing requirements. Until such evidence becomes available, however, the agency has no basis for changing the requirements established after considering the currently available evidence.

Toyota's assertion that final stage manufacturers and alterers may substitute the heavier incomplete vehicles not subject to the dynamic testing requirements for incomplete vehicles subject to the dynamic testing requirements is not in accord with NTEA's assertion that, in many instances, final stage manufacturers and alterers cannot use heavier chassis for their vehicles. Additionally, as noted in the final rule, 90 to 95 percent of the incomplete vehicles used in final stage manufacturing exceed the weight limits established for dynamic testing. Presumably, the final stage manufacturers have some compelling market-based reason for using the less heavy incomplete vehicles for 5 to 10 percent of their vehicles. Those market-based reasons for using lighter vehicles for 5 to 10 percent of final stage manufacturer production will not cease to exist because of the dynamic testing requirements. Hence, NHTSA has no reason to believe that the market share for incomplete vehicles in the weight range now subject to dynamic testing will decrease.

Toyota also asserted that NHTSA recognized the problems that the dynamic testing requirements would impose on vehicles like motor homes and vehicles carrying chassis-mount campers, so it exempted these types of vehicles from the dynamic testing requirements. According to Toyota, other "virtually-identical" vehicles would experience the same problems, yet not be exempted from the dynamic testing requirements. As an example, Toyota asserted that a plumber's or electrician's truck is "not unlike" a vehicle with a chassis-mount camper, yet the plumber's or electrician's truck is subject to the dynamic testing requirements, while the vehicle with a chassis-mount camper is not. Additionally, Toyota stated that half of its incomplete vehicles are motor homes after they are completed vehicles. Toyota alleged that the exclusion of motor homes from the dynamic testing requirements means that those final stage manufacturers that complete Toyota's incomplete vehicles into motor homes will not be subject to the dynamic testing requirements, while those final stage manufacturers that complete the identical incomplete vehicle into a different type of vehicle will be subject to the dynamic testing requirements.

NHTSA does not find this argument persuasive. In developing the final rule, NHTSA sought to determine whether compliance with the dynamic testing requirements would impose unreasonable burdens on any types of vehicles, and to exempt any such vehicle types from the dynamic testing requirements. In the case of those types of light trucks and MPVs that were not exempted from the dynamic testing requirements, NHTSA was not suggesting that compliance with the dynamic testing requirements would not impose *any* additional burdens. Rather, the agency found that the additional burdens were reasonable. NHTSA does not doubt that some non-exempted vehicles will face problems similar to those that would be faced if a type of exempted vehicle had to comply with the dynamic testing requirements. The difference is that the problems can be overcome with reasonable efforts in the case of non-exempted vehicle types, while reasonable efforts would not overcome similar problems for the exempted vehicle types. Toyota's petition did not set forth any basis for the agency to change its conclusion that the dynamic testing requirements would impose *reasonable* burdens on the subject light trucks and MPVs.

After considering these petitions, the agency has concluded that they have not presented any basis on which to change the dynamic testing requirements for light trucks and MPVs. These petitions are, therefore, denied. The dynamic testing requirements set forth in the November 23, 1987 final rule will apply to all subject light trucks and MPVs manufactured on or after September 1, 1991.

Issued on December 9, 1988.

Diane K. Steed,

Administrator.

Proposed Rules

Federal Register
Vol. 53, No. 240
Wednesday, December 14, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 919

[Docket No. FV-89-002]

Peaches Grown In Mesa County, Co; Proposal Redefining Producer Representation Districts

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would redefine the districts into which the production area (Mesa County, Colorado) under the marketing order for Colorado peaches is divided. This proposal is needed to balance peach production between the five districts in order to provide equitable producer representation on the Administrative Committee.

DATES: Comments must be received on or before December 29, 1988.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085–S, Washington, DC 20090–6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Patrick Packnett, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone 202–475–3862.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Agreement No. 88 and Marketing Order No. 919 (7 CFR Part 919), regulating the handling of peaches grown in Mesa County, Colorado. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities action on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 52 handlers of peaches regulated under this marketing order, and approximately 245 producers in the regulated area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the peach handlers and producers in Mesa County, Colorado may be classified as small entities.

The production area is divided into five districts for the purpose of producer representation on the Administrative Committee (committee). The committee consists of nine members. Five members, one for each district, represent producers. Three members represent cooperative handlers. There is also an independent handler member.

Paragraph (1) of § 919.32 of the order authorizes the committee, with the approval of the Secretary, to redefine the districts into which the production area is divided and to reapportion the representation of any district on the committee. Any such changes should reflect, insofar as practicable, shifts in peach production within the districts and the production area. Changes in the district boundaries were made in 1976 (41 FR 43709), and the districts are currently specified in § 919.111 of the rules and regulations issued under the order.

The committee unanimously recommended that the district boundaries once again be changed to correct imbalances in the distribution of production between the five districts. According to the committee, the boundary changes are needed to reflect shifts in peach production within the production area. These shifts are a result of the replacement of large areas that were once productive peach orchards with ranches and housing developments and of increased production in other areas. The proposed boundary changes also reflect expected production shifts as nonbearing acreage begins production within the next two years. It is desirable to have the districts as equal as possible in production potential because each district is represented by one producer member on the committee.

To accomplish a balance in production between districts, the proposal would increase District No. 1 by adding an area known as Rapid Creek that would be deleted from District No. 2. District No. 4 would be expanded by the addition of approximately 250 acres of production to be removed from District No. 3. In addition, the boundaries of District No. 5 would be clarified to show that the area known as Redlands has been, and would continue to be, a part of District No. 5

The proposed boundaries would evenly distribute production between the five districts with approximately 20 percent of the total production in each area. This is intended to provide equitable producer representation on the committee and would not impose any additional cost on producers or handlers.

Based on the above, the Administrator of AMS has determined that this proposed action would not have a significant economic impact on a substantial number of small entities.

It is found and determined that a comment period of less than 30 days is appropriate because this proposed action needs to be effective in time to permit the nomination of members and

VOL 53 ISS 240 DE 14 1988 UMI

alternates for terms of office beginning January 1, 1989.

List of Subjects in 7 CFR Part 919

Marketing agreements and orders, Peaches, Colorado.

For the reasons set forth in the preamble, 7 CFR Part 919 is proposed to be amended as follows:

PART 919—PEACHES GROWN IN MESA COUNTY, COLORADO

1. The authority citation for 7 CFR Part 919 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 919.111 is revised to read as follows:

§ 919.111 Redefinition of districts.

The districts into which the production area is divided are redefined as follows:

(a) "District No. 1" shall include all that portion of Mesa County known as the Rapid Creek Area and that portion lying north of the Colorado River and east of 37.3 Road and an extension thereof to the Mesa County line. The Southern boundary is known as Sites Wash.

(b) "District No. 2" shall include all that portion of Mesa County lying south of the Colorado River, known as Vineland, on the floor of the valley and bounded by Sites Wash on the north.

(c) "District No. 3" shall include all that portion of Mesa County lying south of the Colorado River on the west of District No. 2, known as East Orchard Mesa, to the line designated as 35 Road.

(d) "District No. 4" shall include all that portion of Mesa County lying south of the Colorado River bounded on the west by the Gunnison River including that portion known as Whitewater and bounded on the east by 35 Road.

(e) "District No. 5" shall include all that portion of Mesa County west of 37.3 Road and an extension thereof to the Mesa County line, north of the Colorado River to the junction of the Colorado and the Gunnison Rivers, and all of the rest of Mesa County south of the Colorado River and west of the Gunnison River to include the area known as the Redlands.

December 9, 1988.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[FR Doc. 88–28709 Filed 12–13–88; 8:45 am]

BILLING CODE 3410–02–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 103

[Atty. Gen. Order No. 1306–88]

INS/Executive Office for Immigration Review Fee Schedule

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend the existing fee schedule of the Immigration and Naturalization Service and the Executive Office for Immigration Review. These changes are necessary to place the financial burden of providing special services and benefits which do not accrue to the public at large on the recipients of these special services and benefits. Charges have been adjusted to more nearly reflect the current recovery cost of providing these special services and benefits taking into account public policy and other pertinent facts.

DATE: Comments must be received on or before January 13, 1989.

ADDRESS: Please submit written comments, in triplicate, to Director, Policy Directives and Instructions, Immigration and Naturalization Service, Room 2011, 425 I Street, NW., Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT: Charles S. Thomason, Systems Accountant, Finance Branch, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633–4705. Gerald S. Hurwitz, Counsel to the Director, Executive Office for Immigration Review, 5203 Leesburg Pike, Falls Church, VA 22041, Telephone: (703) 756–6470.

SUPPLEMENTARY INFORMATION: The INS and EOIR have undertaken a study of their fee schedule as required under 31 U.S.C. 9701 and OMB Circular A–25. Under that law and the OMB Circular, it is required that a special service or benefit provided to or for any person by a Federal Agency be self-sustaining to the fullest extent possible. Charges are to be fair and equitable, taking into consideration direct and indirect cost to the Government, value to the recipient, public policy or interest served, and other pertinent facts. All services and benefits provided to the public by the INS and EOIR were reviewed for applicability of user charges. Costs which should be recovered from recipients of special services and benefits provided were identified in order to be fair and equitable to the taxpayers and the recipients of these special services and benefits.

The following proposed fee changes to the existing INS/EOIR fee schedule are based upon a study by the INS and EOIR of their policies and practices for user charges, a review of the costs and fees, and on the principle of user charges prescribed by the Congress in 31 U.S.C. 9701 and the implementing guidelines of the Office of Management and Budget in OMB Circular A–25.

1. Increase the fee from $50 to $75 for filing Form I–17, application for school approval, except in the case of a school or school system owned or operated as a public educational institution or system by the United States or a state or political subdivision thereof.

2. Increase the fee from $15 to $35 for filing Form I–90, application for Alien Registration Receipt Card (Form I–551) in lieu of an obsolete card or in lieu of one lost, multilated or destroyed, or in a changed name.

3. Increase the fee from $15 to $35 for filing Form I–102, application (Form I–102) for Arrival-Departure Record (Form I–94) or Crewman's Landing Permit (Form I–95), in lieu of one lost, mutilated, or destroyed.

4. Increase the fee from $35 to $50 for filing Form I–129B, petition to classify nonimmigrant as temporary worker or trainee under section 214(c) of the Act.

5. Increase the fee from $35 to $40 for filing Form I–129F, petition to classify nonimmigrant as fiancee or fiance under section 214(d) of the Act.

6. Increase the fee from $35 to $50 for filing Form I–129L, petition to employ intra-company transferee.

7. Increase the fee from $35 to $40 for filing Form I–130, petition to classify status of alien relative for issuance of immigrant visa under section 204(a) of the Act.

8. Increase the fee from $15 to $45 for filing Form I–131, application for issuance of reentry permit.

9. Increase the fee from $35 to $50 for filing Form I–140, petition to classify preference status of an alien on basis of profession or occupation under section 204(a) of the Act.

10. Increase the fee from $15 to $50 for filing Form I–193, application for waiver of passport and/or visa.

11. Increase the fee from $35 to $45 for filing Form I–212, application for permission to reapply for an excluded or deported alien, an alien who has fallen into distress and has been removed as an alien enemy, or an alien who has been removed at Government expense in lieu of deportation.

12. Increase the fee from $125 to $155 for filing Form I–246, application for stay of deportation under Part 243 of this Chapter.

13. Increase the fee from $50 to $110 for filing Form I–290B, appeal from any decision under the immigration laws in any type of proceeding over which the Board of Immigration Appeals does not have appellate jurisdiction. (The fee of $110 will be charged whenever an appeal is filed by or on behalf of two or more aliens and the aliens are covered by one decision).

14. Increase the fee from $50 to $60 for filing Form I–485, application on Form I–485 for permanent residence status or for creation of a record of lawful permanent residence.

15. Increase the fee from $15 to $35 for filing Form I–506, application for change of nonimmigrant classification under section 248 of the Act.

16. Increase the fee from $15 to $35 for filing Form I–538, application by a nonimmigrant student (F–1) for an extension of stay, a school transfer or permission to accept or continue employment or practical training.

17. Increase the fee from $15 to $35 for filing Form I–539, application for extension of stay of a nonimmigrant, other than one described in section 101(a)(15)(F) or 101(a)(15)(J) of the Act, and, upon a basis of reciprocity, a nonimmigrant described in section 101(a)(15)(A)(iii) or 101(a)(15)(G)(v) of the Act.

18. Increase the fee from $15 to $45 for filing Form I–570, application for issuance or extension of refugee travel document.

19. Increase the fee from $50 to $75 for filing Form I–600, petition to classify orphan as an immediate relative for issuance of immigrant visa under section 204(a) of the Act. (When more than one petition is submitted by the same petitioner on behalf of orphans who are brothers or sisters, only one fee of $75 will be required).

20. Increase the fee from $50 to $100 for filing Form I–600A, application for advance processing of orphan petition. (When more than one petition is submitted by the same petitioner on behalf of orphans who are brothers or sisters, only one fee of $100 will be required).

21. Increase the fee from $35 to $45 for filing Form I–601, application for waiver of ground of excludability under section 212(h) or (i) of the Act. (Only a single application and fee of $45 shall be required when the alien is applying simultaneously for a waiver under both sub-sections).

22. Increase the fee from $15 to $50 for filing Form N–410, motion for amendment of petition for naturalization when motion is for the convenience of the petitioner.

23. Increase the fee from $15 to $40 for filing Form N–455, application for transfer of petition for naturalization under section 335(i) of the Act, except when transfer is of a petition for naturalization filed under the Act of October 24, 1968, Pub. L. 90–633.

24. Increase the fee from $15 to $55 for filing Form N–470, application for section 316(b) or 317 of the Act benefits.

25. Increase the fee from $15 to $50 for filing Form N–565, application for a certificate of naturalization or declaration of intention in lieu of a certificate or declaration alleged to have been lost, mutilated, or destroyed; or for a certificate of citizenship in a changed name under section 343(b) or (d) of the Act.

26. Increase the fee from $15 to $50 for filing Form N–577, application for a special certificate of naturalization to obtain recognition as a citizen of the United States by a foreign state under section 343(c) of the Act.

27. Increase the fee from $15 to $50 for filing Form N–580, application for a certificate of naturalization or repatriation under section 343(a) of the Immigration and Nationality Act or the 12th subdivision of section 4 of the Act of June 29, 1906.

28. Increase the fee from $35 to $60 for filing Form N–600, application for certificate of citizenship under section 309(c) or section 341 of the Act.

29. Increase the fee from $35 to $60 for filing Form N–604, application for a certificate of citizenship (made on Form N–400) under section 341 of the Act.

30. Increase the fee from $50 to $110 for filing motion to reopen or reconsider any decision under the immigration laws in any type of proceeding over which the Board of Immigration Appeals does not have appellate jurisdiction. No fee shall be charged for a motion to reopen or reconsider a decision on an application for which no fee is chargeable. (The fee of $110 shall be charged whenever an appeal or motion is filed by or on behalf of two or more aliens and all such aliens are covered by one decision).

31. Increase the fee from $15 to $50 for filing Form N–300/315, for receiving and filing a declaration of intention.

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This rule would not be a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have federalism implications warranting the preparation of a Federal Assessment in accordance with E.O. 12612.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS: AVAILABILITY OF SERVICE RECORDS

1. The authority citation for Part 103 of Title 8 continues to read as follows:

Authority: 5 U.S.C. 522(a); 8 U.S.C. 1101, 1103, 1201, 1301–1305, 1351, 1443, 1454, 1455; 28 U.S.C. 1746; 7 U.S.C. 2243; 31 U.S.C. 9701; E.O. 12356, 3 CFR, 1982 Comp., p. 166.

2. In § 103.7, paragraph (b)(1) is amended as follows:

§ 103.7 [Amended]

1. Increase the fee for Form I–17 from "$50.00" to "$75.00".

2. Increase the fee for Form I–90 from "$15.00" to "$35.00".

3. Increase the fee for Form I–102 from "$15.00" to "$35.00".

4. Increase the fee for Form I–129B from "$35.00" to "$50.00".

5. Increase the fee for Form I–129F from "$35.00" to "$40.00".

6. Increase the fee for Form I–129L from "$35.00" to "$50.00".

7. Increase the fee for Form I–130 from "$35.00" to "$40.00".

8. Increase the fee for Form I–131 from "$15.00" to "$45.00".

9. Increase the fee for Form I–140 from "$35.00" to "$50.00".

10. Increase the fee for Form I–193 from "$15.00" to "$50.00".

11. Increase the fee for Form I–212 from "$35.00" to "$45.00".

12. Increase the fee for Form I–246 from "$125.00" to "$155.00".

13. Increase the fee for Form I–290B from "$50.00" to "$110.00".

14. Increase the fee for Form I–485 from "$50.00" to "$60.00".

15. Increase the fee for Form I–506 from "$15.00" to "$35.00".

16. Increase the fee for Form I–538 from "$15.00" to "$35.00".

17. Increase the fee for Form I–539 from "$15.00" to "$35.00".

18. Increase the fee for Form I–570 from "$15.00" to "$45.00".

19. Increase the fee for Form I–600 from "$50.00" to "$75.00".

20. Increase the fee for Form I–600A from "$50.00" to "$100.00".

21. Increase the fee for Form I–601 from "$35.00" to "$45.00".

22. Increase the fee for Form N–410 from "$15.00" to "$50.00".
23. Increase the fee for Form N–455 from "$15.00" to "$40.00".
24. Increase the fee for Form N–470 from "$15.00" to "$55.00".
25. Increase the fee for Form N–565 from "$15.00" to "$50.00".
26. Increase the fee for Form N–577 from "$15.00" to "$50.00".
27. Increase the fee for Form N–580 from "$15.00" to "$50.00".
28. Increase the fee for Form N–600 from "$35.00" to "$60.00".
29. Increase the fee for Form N–604 from "$35.00" to "$60.00".
30. Increase the fee for motion to reopen or reconsider any decision under the immigration laws in any type of proceeding over which the Board of Immigration Appeals does not have appellate jurisdiction from "$50.00" to "$110.00".
31. Increase the fee for Form N–300/315 from "$15.00" to "$50.00".

Dated: December 2, 1988.

Harold G. Christensen,

Acting Attorney General.

BILLING CODE 4410–01–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 100

[Docket No. PRM–100–2]

Public Interest Research Group et al.; Denial of Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission (NRC) is denying a petition for rulemaking filed by Louis J. Sirico, Jr., Esq. on behalf of the Public Interest Research Group, et al. The petitioner requested that the Commission amend its regulations to prohibit the construction of nuclear power reactors where the population in the surrounding area exceeds or will exceed specified numerical limits. The petition is being denied for the following reasons: (1) It would unnecessarily restrict NRC's regulatory siting policies and procedures by elevating population density criteria above other siting criteria such as environmental and ecological factors, and (2) it would not result in a substantial increase in overall protection of the public health and safety, as compared to the current siting criteria when combined with calculations of potential health effects. The NRC has carefully considered the issues raised in the petition, and has taken them into account in reaching a decision on the areas which fall within its jurisdiction.

ADDRESSES: Copies of the petition for rulemaking, the public comments received, and the NRC's letter to the petitioner are available for public inspection or copying in the NRC Public Document Room, 2120 L Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: John C. Stewart, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3618.

SUPPLEMENTARY INFORMATION:

I. Petition
II. Basis for Request
III. Public Comments on the Petition
IV. Staff Action on the Petition
V. Reasons for Denial

The Petition

By letter dated June 1, 1976, Mr. Louis J. Sirico, Jr., Esq., on behalf of the Public Interest Research Group and 25 other specified citizen groups, filed with the Nuclear Regulatory Commission a petition for rulemaking. The petitioners requested that the Commission amend its regulations of 10 CFR Part 100, "Reactor Site Criteria," to set numerical limits on allowable population density around nuclear power reactor sites. The amendments to 10 CFR 100.11(a) proposed by the petitioners would set 0.4 miles and 3 miles as the minimum distances for the outer boundries of the exclusion area and the low population zone, respectively. A new section of 10 CFR 100.12 proposed by the petitioners would set a maximum population density of 400 persons per square mile averaged over any radial distance out to a distance of 40 miles. The petitioners proposed that the Commission also deny Construction Permit Applications where, during the effective period of the plant's license, the maximum projected population density would exceed 800 persons per square mile averaged over any radial distance out to a distance of 40 miles. Additionally, the petitioners proposed that all population figures and projections include transit populations.

Basis for Request

The petitioners indicated that despite an official policy against building nuclear power reactors near cities, both the Nuclear Regulatory Commission (NRC), and its predecessor, the Atomic Energy Commission, have permitted utilities to build nuclear power reactors too close to metropolitan areas. It is the view of the petitioners that reliance on broad policy statements and regulatory guides in this matter are inadequate, and that current Commission policy should be incorporated into NRC regulations. The petitioners proposed criteria that would prohibit the construction of nuclear power plants where the population in the surrounding area exceeds or will exceed specified numerical limits.

Public Comments on the Petition

A notice of receipt of the petition for rulemaking was published in the **Federal Register** on July 1, 1976 (41 FR 27141). Interested persons were invited to submit written comments or suggestions concerning the petition by August 30, 1976. The NRC received 14 comments in response to the notice: 11 from public utilities, utility representative organizations, nuclear power plant vendors and industry representative organizations, and 3 from individuals. Twelve of the commenters (86%) opposed the petition. The main reasons cited by these commenters were: 1. The petition's proposal would result in a * * * "serious loss of regulatory flexibility * * *" because this would greatly reduce the number of suitable sites for nuclear power plants, especially in densely populated areas such as the State of New Jersey. The commenter stated that * * * "elevating population density criteria above these other concerns (ecological or environmental impacts) by a rigid and mechanical test (density criteria) cannot in every case work in the best interest of the public." 2. The petition's proposal * * * "has misjudged both the content and adequacy of the Nuclear Regulatory Commission's siting policies and practices. The NRC's regulations and siting practices when combined with the conservative accident calculational procedures they require are more than adequate to protect the health and safety of the public." 3. The petition's proposal established * * * "no factual basis for which the proposed amendments would further the public safety by establishing arbitrary values for minimum distances for exclusion area(s) and low population zones and on allowable population density." The two commenters supporting the petition's recommendation were from the petitioners themselves. The petitioner's chief concern was the * * * "fear that putting this plant (in Iowa) so close to so many people creates an unacceptable public health menace." The petitioner's position was that all future nuclear power plants should be sited in areas of low population density in order to better

protect the health and safety of the general population.

Staff Action

The response to the petition for rulemaking was delayed because of pending Commission action concerning population siting criteria. An NRC staff paper (SECY–78–624) was submitted to the Commission on December 4, 1978. In a memorandum to the Executive Director for Operations dated February 15, 1979, the Commission deferred action on the population density siting criteria issue pending submission of the Siting Policy Task Force report. The petitioners were notified of this deferral and that the petition would be considered in the context of the rulemaking on siting criteria.

Recent events, including the reactor accident at Chernobyl in the U.S.S.R., continued uncertainty over certain aspects of the accident source term work, and the lack of projected Construction Permit Applications have led the Commisson's Executive Director for Operations to conclude that the rulemaking on siting criteria should be terminated. Therefore, there is no reason to further delay action on this petition. However, the need for additional rulemakings or rule revisions will be considered in the context of a study on the readiness to resume licensing that is currently underway by the NRC staff. It is expected that the NRC staff will address the question of siting policy and criteria adequacy as part of this broad study.

Reasons for Denial

The NRC shares the petitioner's concern regarding siting future nuclear power plants in areas of low population density. As stated in NRC Regulatory Guide 4.7 * * * "Areas of low population density are preferred for nuclear power station sites. High population densities projected for any time during the lifetime of a station are considered during both the NRC staff review and public hearing phases of the licensing process. If the population density at the proposed site is not acceptably low, then the applicant will be required to give special attention to alternative sites with lower population densities." In addition, NRC Regulatory Guide 4.7 recommends a minimum exclusion distance of 0.4 miles and minimum distance of 3 miles for the outer boundary of the low population zone. Further, this Regulatory Guide indicates that transit population should be included in population density calculations for those sites where a significant number of people work, reside part-time, or engage in recreational activities, and are not permanent residents of the area.

However, the NRC's specific population density parameters for siting nuclear power plants differs from those indicated by the petitioners. The NRC's population density parameters are for no more than 500 persons per square mile averaged over any radial distance out to 30 miles, or the projected population density over the lifetime of the facility not to exceed 1,000 persons per square mile averaged over any radial distance out to 30 miles (Regulatory Guide 4.7). If this density siting requirement cannot be met, special attention should be given to the consideration of alternative sites with lower population densities. The petition's proposed criteria would limit existing permissible population density to 400 people per square mile within a 40-mile perimeter and limit maximum projected population density limited to 800 people per square mile.

At first glance, it might appear that the NRC's population density siting parameters and the population density siting parameters indicated by the petitioner are similar—500 vs. 400 per square miles averaged over any radial distance of 40 vs. 30 miles for the initial operation of the nuclear power plants. However, the real difference between the NRC's and the petitioner's population density siting requirements is regulatory flexibility. The NRC's siting requirements allow for the consideration of alternative sites with superior environmental parameters, e.g., suitable meteorological, natural resources and water temperature conditions or superior geophysical conditions, e.g., suitable geologic, hydrologic, and tectonic conditions if the population density parameters cannot be met. However, on the other hand, the petition's siting requirements would automatically eliminate any site from further consideration if specific population density criteria are not met regardless of any other mitigating factors.

The NRC believes the Regulatory Guide 4.7 adequately addresses population density siting considerations and that no new rulemaking as proposed by the petitioners is justified at this time. Also, the petitioner offers no basis for the specific numerical population density limits indicated in the petition. Therefore, the petition would not result in a substantial increase in the overall protection of the public health and safety, as compared to the current NRC siting criteria when combined with calculations of potential health effects.

However, the NRC staff is preparing to carry out an additional review of the Commission's present siting policy and criteria in light of its ongoing risk assessment activities and in view of a study by the NRC staff that is now underway to examine our readiness to resume licensing.

Dated at Rockville, Maryland, this 29th day of November, 1988.

For the Nuclear Regulatory Commission.

Victor Stello, Jr.,

Executive Director for Operations.

BILLING CODE 7590–01–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

14 CFR Part 398

[Docket No. 45995; Notice 88–18]

RIN 2105–AB43

Essential Air Service; Reductions

AGENCY: Office of the Secretary, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Transportation is preparing temporary regulations to implement Essential Air Service (EAS) program reductions for Fiscal Year (FY) 1989. EAS assists certain small communities in receiving scheduled air service. The Department may obligate EAS subsidy payments for FY 1989 only within levels permitted by the 1989 DOT and Related Agencies Appropriations Act (Pub. L. 100–457), and the amount of subsidy necessary to support all currently guaranteed EAS exceeds those levels. This Notice of Proposed Rulemaking contains four principal alternatives for reducing EAS subsidies to the appropriated amounts.

DATE: Comments should be received by January 3, 1989.

ADDRESS: Comments should be addressed to the Documentary Services Division, Attention: Docket Section, Room 4107, Docket No. 45995, Department of Transportation, C–55, Washington, DC 20590. Persons requesting acknowledgment that their comments have been received should include a self-addressed stamped postcard. Comments received will be available for public inspection and copying at the above address from 9 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

Dann, Office of the General Counsel (202) 366–9154.

SUPPLEMENTARY INFORMATION: A comment period of only 20 days is being provided for this Notice of Proposed Rulemaking (NPRM). Normally a comment period of up to 60 days or more is provided. However, an abbreviated comment period is essential. Final rulemaking is needed as soon as possible in order to minimize the impact of the reductions in service that will be needed. If the Department were to continue to expend funds at present levels for an extended period, the service subject to elimination would be substantially greater.

The Department anticipates that the Final Rule will be published in the **Federal Register** on or before *January 30, 1989*, and that it will be made effective on or before *March 1, 1989*. This will allow for a 20 day period for public comment, about a 20 day period to analyze comments, about 10 days to process and publish the Final Rule, and a 30 day period after publication of the Final Rule so that air carriers can adjust schedules to accommodate the withdrawal of subsidy support for services.

Providing an opportunity for public comment in this rulemaking, even though only a brief comment period is possible, is important. Four alternatives are being proposed; however, combinations of these alternatives, or other alternatives, may be preferable choices for adoption in the Final Rule. Public comments on the impact that is likely to result from each of the various alternatives, including any that are proposed by commenters, are needed to assist the Department in making final determinations. The Department's principal goal in this rulemaking is to minimize, to the extent practicable, the inconvenience and disruption to small communities and airline passengers that the Final Rule may cause.

To assure that potentially affected communities receive timely notice of this NPRM, the Department is providing copies to communities that now receive subsidized EAS and to carriers that are providing such service. Copies are also being provided by direct mail to other persons and organizations that may have an interest in this NPRM. The Department regrets, in advance, that some interested persons and organizations may not immediately receive notice of this NPRM owing to the total number of direct mailings anticipated, the expedited nature of the effort, and the holiday period in which the mailings and subsequent comment period will occur.

What is EAS?

Essential Air Service (EAS) is a DOT program for subsidizing air service to generally smaller communities which would not otherwise receive scheduled air service. The Department, under this program, makes payments to air carriers for use in providing EAS to communities determined by the Department, using criteria mandated by statute, to be eligible for this service. Generally, carriers, unless they are subsidized, would not provide scheduled air service to certain EAS communities because these communities do not generate sufficient numbers of passengers at fares that cover carrier costs. The Department authorizes subsidy for a carrier to provide EAS only when no carrier is willing or able to provide the required level of service without subsidy support.

EAS Funding Shortfall Summarized

As discussed in more detail below, the Congress recently appropriated $25 million in EAS subsidies for FY 1989. This amount is $6.6 million less than the projected amount needed to support 1988 service levels, and approximately $19 million less than the full annual amount needed to support EAS at new levels authorized by the Congress. The reduced FY 1989 appropriation necessitates reductions in EAS subsidies, which will likely produce suspension of certain services and certain losses in airline revenues.

Background of the EAS Program

In 1978, when the Airline Deregulation Act (ADA) took effect, 746 communities in the United States and its territories were listed on air carrier certificates issued under section 401, Federal Aviation Act. Prior to deregulation, most of these communities were assured a minimum level of air service. In light of the ADA's provisions allowing air carriers to terminate service without prior Government approval, there was concern that communities that generated low traffic levels would lose service as carriers withdrew to larger, more lucrative markets. To address this concern, as part of the ADA the Congress added section 419 to the Federal Aviation Act, which ensured that these communities would continue to receive EAS for ten years, with Federal subsidy if needed.

Under this program, DOT determines the minimum level of EAS service that these communities require. DOT will provide subsidy to an air carrier, if necessary, to assure that this minimum level of service is provided. Of the approximately 550 communities for which EAS determinations have been issued, only about 150 communities receive service that is supported by EAS subsidy. No determinations are required for the approximately 200 cities which are technically guaranteed service by the ADA, but which have received service by two or more carriers since even the pre-ADA period, such as New York, Chicago, etc.

Extension of the EAS Program in Public Law 100–223

The ten year service period was scheduled to terminate on October 24, 1988. However, Congressional interest in ensuring continued service to these communities remained strong, and prior to the expiration date, legislation was enacted expanding the EAS program and extending it for ten additional years. *See* section 202 of the Airport and Airway Safety and Capacity Expansion Act of 1987 (December 30, 1987; Pub. L. 100–223).

In the 1987 legislation, Congress provided for a continuation of EAS guarantees, termed "Basic EAS". Under Basic EAS, any point was to be provided ten more years of basic service if it was (1) eligible for service under the earlier program, (2) actually receiving service during any part of Fiscal Year 1988, and (3) situated at least 45 miles from the nearest "hub" airport—now defined as an airport enplaning annually at least 0.25% of all enplanements in the United States. Certain other service upgrades were also mandated, such as general employment of aircraft having at least 15 passenger seats, and use of pressurized aircraft if the flight normally flies higher than 8,000 feet above sea level. Further, there was to be no more than one intermediate stop between the EAS point and the hub airport (or small hub or nonhub, as appropriate).

The 1987 legislation also established two forms of service enhancement, by which communities could receive more service than basic EAS by agreeing to a subsidy-sharing commitment or by risking loss of basic service if DOT-funded enhanced service failed to meet agreed levels of passenger usage. The new legislation also provided that any community not entitled to basic EAS might agree with DOT on a reasonable service level and receive service as a "new point" on a subsidy-sharing basis.

Proposed rulemakings to implement the 1987 legislation are currently under development. Subsequent legislation, however, has made the rulemaking proposals in this document of more immediate concern.

Fiscal Year 1989 Funding

On September 30, 1988, the Congress enacted the Department of Transportation and Related Agencies Appropriations Act, 1989 (Pub. L. 100–457). As explained in more detail below, limitations imposed by the 1989 Appropriations Act will require significant cutbacks in even Basic EAS.

The funding level required to maintain EAS at current service levels, which-in many cases is below the minimum guarantee for Basic EAS, is projected to be $31.6 million for FY 1989. See Table I for a breakdown of this projection. In FY 1988, actual subsidy expenditures totaled $28.4 million, and the Department has processed or is processing subsidy proposals received before October 1, 1988, for eighteen points that did not require subsidy support for the full 12 months of FY 1988. The changes we anticipate would increase net subsidy expenditures in FY 1989 by approximately $2.6 million over FY 1988 levels. These eighteen points do remain subject to evaluation for continuation of subsidy support under the alternatives being proposed below.

Another $0.6 million is expected to be required for compensation to be paid to carriers that have been "held-in" (*i.e.* compelled to continue providing service, perhaps at increased rates) after having filed notices to terminate service. These two changes thus result in a projected increase of $3.2 million over FY 1988 spending levels, for a total of $31.6 million for FY 1989. Funding required for the increased minimum service elements added in by Pub. L. 100–223 is estimated to be an additional $12 million annually. No estimates have been prepared for the enhanced or new points provisions of the 1987 legislation due to the uncertain nature of the ability or desire of communities to participate in these program elements.

In the Department's Appropriations Act for 1989, Congress appropriated only $25 million for EAS air carrier payments. Further, in section 333 of this Act, the Congress provided that:

> Notwithstanding any other provision of law, the Secretary of Transportation shall make payment of compensation under subsection 419 of the Federal Aviation Act of 1958, as amended, only to the extent and in the manner provided in appropriations Acts, at times and in a manner determined by the Secretary to be appropriate, and claim for such compensation shall not arise except in accordance with this provision.

Section 333 thus directs that funding for the EAS program for FY 1989 be within the limits of the $25 million appropriation, and further directs the Secretary to determine the manner in which subsidy amounts are to be adjusted in order to meet those limits. It also clarifies that carriers will have no legal basis to make a claim for compensation in excess of the appropriated funds made available for payments to air carriers.

The Department must adhere to the $25 million limitation imposed by the 1989 Appropriations Act. No Government official may authorize an expenditure or obligation exceeding the amount available in the appropriation established for such expenditure or obligation (see 31 U.S.C. 1341). Further, the legislative history of the 1989 Appropriations Act indicates that, while Congress expected that imroved EAS program procedures would produce some savings, it also anticipated that the funds appropriated for FY 1989 might be insufficient to maintain program service levels. See Senate Rept. No. 100–411, 100th Cong. 2nd Sess. (1988) at 12–13; H. R. Report No. 100–691, 100th Cong. 2nd Sess. (1988) at 10–11. It is thus noteworthy that the Senate added language, which became section 333 of the Appropriations Act, to "mak[e] it clear that [EAS] subsidies are subject to the availability of appropriations," Senate Report No. 100–411 at 13.

Because the 1989 Approporiations Act was enacted after Pub. L. 100–223, it represents a later and thus overriding expression of the will of Congress. Finally, it is noted that section 333 begins with the words "notwithstanding any other provision of law" to spetify that compliance with its provisions is required independent of any other expression of law. The Department must and will comply with this explicit Congressional direction.

Formulating a General Approach to Making the Required Reductions

It is the Department's legal obligation to pursue as much of the principal purpose of the 1987 legislation as the appropriation will permit. The Department views as that principal purpose the provision of safe, reliable scheduled passenger air service to provide the maximum public benefit at small communities and isolated areas.

In developing options for reducing subsidy expenditures, we would not propose to eliminate subsidy for any Alaskan, Hawaiian, or Pacific points. These points are highly dependent on subsidized EAS, as air service is often the only practical means of transportation available, and passenger volumes are low. In contrast, in the 48 contiguous States and Puerto Rico a more completely integrated highway system is in place, and often bus or train travel is or can be made available. The Department specifically requests comments on whether all Alaska, Hawaii, and Pacific points should be excluded from subsidy cuts on this basis, as well as on the extent to which other EAS communities, vulnerable to service eliminations, have characteristics similar to points in Alaska, Hawaii, and the Pacific.

The Department proposes to meet the requisite budget constraints by first postponing implementation of those aspects of the 1987 legislation that would increase subsidy support costs over those incurred under the expired ADA provisions, including higher service levels for Basic EAS, enhanced service, and service to new points. The higher service levels for Basic EAS are listed in Table I. Tentatively, the Department has determined that it would be difficult to justify extending subsidy at this time for service to new points, or establishing increased service guarantees or enhancements on existing service, when doing so would deprive present EAS points of subsidy support for service they have been using and have come to rely upon.

Summary of Alternative Proposals

Four alternatives are proposed in this NPRM which describe what the Department believes to be the primary approaches toward making required EAS program reductions. However, combinations of these alternatives, or other options, may indeed be more appropriate for adoption in a Final Rule. Comments are specifically requested concerning other options, or combinations of the four proposed alternatives, which may be preferable choices.

The following paragraphs briefly summarize the four proposed alternatives, which are more fully set forth under the caption "THE PROPOSED ALTERNATIVES". Each of the alternatives is intended to produce $6.6 million in savings over the last 7 months of FY 1989, and each discussion notes the number of communities that will be affected, assuming that subsidy reductions are implemented on March 1, 1989. If the subsidy reductions are not implemented until a later date, the number of points affected would be greater.

Alternative 1: Eliminate subsidy for air service to communities that are close to alternate air service.

This alternative would eliminate EAS subsidies to communities that are close to alternate air service as measured by highway distance. The relative availability of alternate service should minimize the inconvenience to the

traveling public associated with affected communities. Approximately 44 communities would be affected by this alternative.

Alternative 2: Eliminate subsidy for air service to more than one connecting airport and to certain communities close to alternate air service.

Fifteen communities currently receive subsidized air service to a second connecting airport. (Most EAS communities receiving subsidized service receive it to only one connecting airport and there is no legal requirement that service be guaranteed to more than one airport.) Under this proposed alternative, these 15 communities would lose subsidized air service to the second connecting airport. Eliminating second hubs would achieve a savings of $1.85 million, which is not sufficient by itself to achieve the total savings required. If combined with an approach similar to that taken in Alternative 1, however, it would require elimination of subsidy at only 31 rather than 44 communities with only one connecting airport.

Alternative 3: Eliminate subsidy for air service to communities with the highest annual subsidy requirements.

Of the approximately 150 communities currently receiving subsidy supported EAS, 33 in the 48 contiguous states and Puerto Rico received subsidies in FY 1988 at levels exceeding $250 thousand annually. By eliminating EAS subsidy to those communities with the largest subsidies, the least number of communities would be affected.

Alternative 4: Eliminate subsidy for air service to communities that historically have enplaned the fewest passengers.

Under this alternative, 53 communities (many of which are in remote locations) would lose subsidy supported EAS. The significant benefit of this approach, however, is that the fewest number of passengers historically utilizing EAS would be affected.

Communities Affected by Each Alternative

Table II, which accompanies this NPRM, lists the EAS communities in the 48 contiguous states and Puerto Rico which received subsidized service, including those communities potentially affected by one or more of the four proposed alternatives. For each EAS community, Table II also lists the nearest airport available to provide alternate service if EAS subsidy were eliminated, the hub classification of the alternative service airport, the miles between that airport and the EAS community, and the average number of daily enplanements at the EAS point during 1987. Also, the far right column lists one or more alternatives under which the affected EAS community would lose subsidized service.

Tentatively Rejected Alternatives

(1) Percentage Reduction in Subsidies

In each of the 4 alternatives proposed in this NPRM, certain EAS communities would lose all subsidy support for the remainder of FY 1989. The Department has considered and tentatively rejected an alternative under which all air carriers participating in the EAS program would have their subsidies reduced by approximately 39%. This is the percentage reduction that would be needed to keep subsidy expenditures within FY 1989 appropriation levels. The effect of this alternative would be to have an across-the-board cut in subsidy affecting all EAS communities.

This alternative was tentatively rejected principally because resulting percentage cuts in air service to most affected communities would be such that most servicing air carriers would be forced to drop service entirely. Communities currently receiving subsidy supported service typically receive a minimum level of air service consisting of two round trips per day, six days per week. Major reductions in service would make remaining flights inconvenient for many passengers (*e.g.*, a business traveler with a Tuesday morning appointment might have to fly out Monday morning and return on Wednesday afternoon). The result would likely be sharp declines in enplanements, as alternative means of communications and travel became relatively more desirable. Such reductions in enplanements, with corresponding losses of passenger revenues, would likely make the remaining air service even less cost-efficient.

Although a percentage reduction in subsidies, as an alternative, has been tentatively rejected, comments are specifically requested concerning whether individual EAS communities could effectively retain EAS service with subsidies reduced under such an approach.

(2) Obligate EAS Subsidy at FY 1988 Service Levels Until Gone

The Department also considered and tentatively rejected the alternative of subsidizing all EAS communities at FY 1988 service levels until FY 1989 appropriated funds run out.

This option would result in the elimination of all subsidized service during the coming summer, without regard to the needs of individual EAS communities for air service. This alternative would be highly disruptive both to communities relying on the service, and to air carriers who might be very reluctant to reinstitute service thereafter except at much higher subsidy rates.

Evaluation of Costs, Benefits, and Impacts

The most significant benefit associated with this rulemaking relates to the substantial savings being provided to our national economy. From an overall perspective, reductions in EAS subsidies that would be implemented by this rulemaking would represent an important contribution toward our nation's goal of achieving a balanced budget. The full cost of the EAS program is reflected in the data set out in TABLE I of this NPRM. The table lists the "Total Estimated FY 1989 Subsidy For Current Levels of Service" (*i.e.*, at FY 1988 service levels) in the amount of $31.6 million. The amount of reduction from current spending needed to stay within the FY 1989 appropriation of $25 million is thus $6.6 million.

Individual benefits in this rulemaking relate to the continued availability of EAS subsidies for use in or by as many communities and/or air passengers as possible. These benefits are expressed in qualitative terms as "advantages" for each of the alternatives proposed in this NPRM. The actual amount of these benefits cannot, as yet, be quantified. As stated previously, the principal goal in this rulemaking is to minimize the impact of the EAS reduction as much as practicable. To the extent that the Department is successful in achieving this goal, the individual benefits available in this rulemaking will be maximized.

The potential impacts to individual communities in this rulemaking are listed in TABLE II of this NPRM. The far right column in the table lists the "Alternative(s) Under Which Subsidy Would be Eliminated" with respect to individual EAS communities. Only communities in the 48 contiguous United States and Puerto Rico are listed. As indicated in the table some communities would not be affected under any of the alternatives proposed in this NPRM.

The specific amounts of subsidy projected for FY 1989 for the EAS communities listed in Table II are not included. The subsidy rates will be subject to negotiations with carriers in the coming months, and subsidy estimates are confidential prior to the conclusion of such negotiations. To assist commenters in the evaluation of the alternatives presented in this NPRM, however, the Department has included

Table III which lists *current* subsidy rates, i.e. those in effect as of December 1, 1988. These rates of course may vary substantially during FY 1989, and should be considered only as a general guide to the relative standing of communities receiving subsidy supported service.

It is also important to note that discontinuation of EAS subsidy need not result in discontinuation of air service. State or local governments may be able to offer sufficient substitute funds to maintain service, air fares might be increased, or carriers might agree to maintain service to affected communities (perhaps in restructured form). Combinations of these alternatives are of course possible as well. Comments from specific communities, local governments, and carriers concerning the possibility of their absorbing reductions in Federal subsidy are specifically requested.

The costs associated with this rulemaking relate mostly to alternate transportation time and costs needed to travel to alternate air service locations. Air travelers to and from affected EAS communities would likely suffer some additional inconveniences. Also, business costs in affected areas would likely increase, proportionate to the amount of existing business travel expenses, due to mileage costs and delays incurred by having to use and rely on alternate service airports. A means to measure the extent of delays and additional travel expenses that would result under each of the proposed alternatives is reflected in TABLE II. The fourth column of the table lists the "Miles Between EAS Community and Alternate Service Airport".

Air carriers servicing an EAS community that lost subsidized service would also be affected by individual altenatives proposed in this NPRM. Loss of routes could potentially result in lost revenues, jobs and business opportunities, as well as in increased costs to the extent that planes, equipment, and personnel dedicated to serving the community could not be readily transferred into other profitable service. These increased costs and potential losses cannot, as yet, be quantified. However, to the extent that individual communities or carriers elected to absorb subsidy reductions, these costs and potential losses might not materialize, and in any event would be minimized as much as possible in whichever approach is selected.

The Department anticipates that the benefits potentially achievable in this rulemaking (*i.e.*, the cost savings to our national economy, and continued availability of EAS subsidies to the maximum extent possible) would clearly outweigh the resulting costs to individual communities and air carriers.

Regulatory Flexibility Act

The Department certifies that each of the alternatives proposed in this NPRM, if adopted, would not have a significant economic impact on a substantial number of small entities.

There are two types of small entities that would be affected by this rulemaking: small air carriers and small local governments. Air carriers are businesses, which, to come under the Regulatory Flexibility Act as small business concerns, must be independently owned and operated and not dominant in their field of operation. The Department estimates that 16 of the approximately 30 carriers that potentially could be affected by this proposal are truly independent and not dominant in their field of operations. Most of these carriers provide nonsubsidized service in other markets, and would remain viable without the profits expected from EAS subsidies. Also, since under any of the four alternatives most EAS service would be continued, most carriers would continue to receive full subsidies on many (or all) of their EAS routes. Some, however, which receive the bulk of their profits from providing EAS service, would be impacted financially if an option were selected which eliminated most or all of their EAS routes. However, even in these latter situations it is anticipated that the carriers could remain viable by converting to charter operations, moving to other markets, etc.

Local governments would also be affected by this rulemaking, principally with respect to whether communities they serve would remain eligible to participate in the EAS program. This is a matter which is very largely determined by statute, *i.e.*, the 1989 Appropriations Act. EAS reductions are required as a consequence of the reduced FY 1989 appropriation in the 1989 Appropriations Act. These reductions will result in having certain existing EAS communities lose eligibility for EAS subsidy. However, the impact should not be significant. Loss of EAS service would result in certain increases in transportation time and costs to utilize alternate service airports but these costs are not anticipated to be excessive. The principal impact is anticipated to be the resulting inconvenience of having to utilize an alternate service airport.

Executive Order 12291, "Federal Regulation"

This NPRM is considered to be non-major under Executive Order 12291, "Federal Regulation". None of the proposed alternatives, if adopted, is anticipated to result in a substantial effect on the economy (*i.e.*, an effect of $100 million or more), or a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United Statea-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Executive Order 12612, "Federalism"

This NPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that it does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The EAS legislation sets forth the roles for the Federal, State, and local governments in carrying out the legislation, and this rulemaking merely reflects those roles.

DOT Regulatory Policies

This NPRM is considered to be significant under Department of Transportation "Regulatory Policies and Procedures" (44 FR 11034; February 28, 1979). This NPRM includes an evaluation of the relevant costs, benefits, and impacts, and related issues, which is required by DOT Regulatory Policies and Procedures. As explained in the evaluation, the principal benefits anticipated in this rulemaking are expected to outweigh the costs to individual communities and air carriers that would be affected by the Final Rule. Further, every effort is being made to minimize the economic impact that this rulemaking will have.

This NPRM is considered to be significant because of the substantial public interest that is anticipated.

Legal Authority

This proposed rulemaking is issued under the authority of section 204, Pub. L. 85–726 (49 U.S.C. 324—The Federal Aviation Act), section 202(b), Pub. L. 100–223 (49 U.S.C. 1389—the 1987 Legislation), and Pub. L. 100–457 (Department of Transportation and Related Agencies Appropriations Act, 1989).

List of Subjects in 14 CFR Part 398

Air transportation, Essential air service.

VOL 53 ISS 240 DEC 14 1988 UMI

The Proposed Alternatives

In accordance with the foregoing, the following proposed alternatives, as set forth below, are being considered for adoption, singly or in combination, as a Final Rule to apply to allocation of EAS appropriated funds for FY 1989. The selected alternative will be published as a temporary Final Rule in 14 CFR Part 398.

Issued in Washington, DC, on December 7, 1988.

Mimi W. Dawson,

Deputy Secretary of Transportation.

Alternative 1

Eliminate Subsidy for Air Service to Communities that are Close to Alternative Air Service

This alternative reflects the rationale that justification for subsidized air service should be a function, at least in part, of isolation from other air service. There are two primary factors that determine the reasonableness of ground access to the affected community: The surface transportation distance between the affected community and alternative air service, and the volume of air service available at the alternate airport.

In order to rank subsidized EAS communities by their relative accessibility to alternative air service, we have assumed that a person would travel an extra 10 miles to a small hub airport compared to a nonhub airport and an extra 20 miles to a medium or large hub airport compared to a small hub airport. (A large hub airport annually enplanes 1.0% or more of the total annual enplanements in the United States. A medium hub airport enplanes between 0.25% and 0.999% of the total enplanements; a small hub airport enplanes between 0.05% and 0.249%; and a nonhub enplanes less than 0.05%.) The Department projects that subsidized air service at 44 communities that appear to be closest to alternative air service would need to be eliminated in order to stay within the appropriation for the FY 1989 EAS program. The communities that would lose subsidized air service are indicated by a "1" in the last column of Table II. As worked out with actual travel distances involved here, communities that are more than 83 miles from a large or medium hub airport, more than 62 miles from a small hub airport or more than 54 miles from a nonhub airport would retain subsidized air service.

We have utilized road miles as the measure of distance between EAS points and alternate air service. In doing so, we recognize that the connecting highways range from interstate highways to secondary or lesser roads, and that terrain and weather conditions also contribute to highly varying travel times. Comments are specifically requested concerning individual communities potentially affected by this alternative which would not have adequate surface transportation to alternate airports.

Advantages: (1) The eligible points losing subsidized air service would be those having the most reasonable access to nearby air service, resulting in the least inconvenience to the traveling public.

(2) Nearly two-thirds of the communities that would lose subsidized air service enplane fewer than 10 passengers per day.

Disadvantages: (1) Some points with relatively high traffic levels or low subsidy requirements would lose subsidized air service.

(2) A total of 44 communities would lose subsidized air service.

Alternative 2

Eliminate Subsidy for Air Service to Second Hubs; also Eliminate Subsidy for Air Service to Communities Close to Alternative Air Service

There are 15 communities receiving subsidized air service to a second hub in addition to receiving air service to a first hub. At 8 of these communities, air service to the first hub is provided without subsidy support. At 7, air service to both the first and second hubs is subsidized. (The "second hub" may be an air service center that is classified by the FAA as a small hub or nonhub.) While there is no legal requirement for second hub service it has been defined as essential for some communities because of especially strong business, political or other ties the point has traditionally had with the second hub.

This alternative would eliminate subsidy for second-hub air service, saving an estimated $1.85 million over the last seven months of FY 1989. In order to stay within the appropriation for the EAS program, subsidy for air service to 31 of the 44 communities noted under Alternative 1 would still need to be eliminated. As worked out with the actual travel distances involved here, communities more than 71 miles from a large or medium hub, more than 53 miles from a small hub, or more than 42 miles from a nonhub would retain subsidized air service. The points that would lose subsidy for second-hub air service are indicated by a "2A" in the last column of Table II and the close-in communities that would lose subsidy for all service are indicated by a "2B".

Advantages: (1) More than one-half of the communities that would lose subsidy support for air service to a second hub currently receive a higher level of air service to another hub without subsidy support.

(2) Fewer points would lose all air service than under Alternative 1. (The 15 communities that would lose subsidized service to a second hub would retain service to a first hub.)

Disadvantages: (1) Some points with relatively high traffic levels or low subsidy requirements would lose subsidized air service.

(2) 46 communities would lose subsidized air service (15 would lose subsidy support for service to a second hub, and 31 would lose subsidy support for all service).

Alternative 3

Eliminate Subsidy for Air Serivce to Communities with the Highest Annual Subsidy Requirements

This alternative would eliminate subsidy for air service to communities where subsidy requirements are expected to be the greatest. The rationale underlying this approach is that by eliminating subsidy for air service to those communities absorbing the highest amounts of subsidy, fewer communities overall would lose subsidized air service. We project that subsidized air service at 33 communities would need to be eliminated in order to stay within the appropriation for the EAS program. Under this projection, subsidized air service that exceeds $250,000 annually would be curtailed. The points that would lose subsidized air service under this alternative are indicated by a "3" in the last column of Table II.

Advantages: (1) The fewest number of communities would lose subsidized air service compared to the other alternatives.

(2) This alternative would eliminate subsidy for air service at communities that would be among those having the least chance of attracting self-sufficient air service, in view of the relatively large amounts of subsidy they require.

Disadvantages: (1) 33 communities would lose subsidized air service under this alternative.

(2) Some of the 33 communities losing all subsidized air service under this alternative enplane a substantial number of passengers on a daily basis, or are in locations that are relatively remote from alternate air service.

Alternative 4

Eliminate Subsidy for Air Service to Communities that Historically Have Enplaned the Fewest Passengers

The underlying rationale for this alternative is to minimize the number of passengers inconvenienced by eliminating subsidized air service at communities that historically have enplaned the fewest passengers. In order to stay within the appropriation for the EAS program, subsidy for air service at 53 communities would be eliminated. The 53 communities are those that did not generate more than an average of 20 enplanements per day in any calender year since 1975. The communities that would lose subsidized air service under this alternative are indicated by a "4" in the last column of Table II.

Advantages: (1) This alternative would affect the fewest number of passengers that historically have benefited from the program.

(2) This alternative would eliminate subsidy for air service at communities that would be among those having the least chance of attracting self-sufficient air service, in view of the historically low level of trafffic that they have generated.

Disadvantages: (1) This alternative does not consider whether potentially affected communities have reasonable access to the national air transportation system.

(2) 53 communities would lose subsidized air service. One-third of these communities are over 100 miles from the closest alternative air service.

TABLE I.—ESTIMATES OF SUBSIDY NEED FOR THE ESSENTIAL AIR SERVICE PROGRAM

[Dollars in millions]

Fiscal year 1988 subsidy expenditures	$28.4
Increase over fiscal year 1988 due to 18 additional points not subsidized throughout fiscal year 1988 [1]	+2.9
Decrease from fiscal year 1988 due to three points coming off subsidy [2]	−.3
Subtotal	$31.0
Additional hold-in subsidy over fiscal year 1988 levels	+.6
Total estimated fiscal year 1989 subsidy for current levels of service	31.6
Annual cost of higher service levels under new basic EAS requirements:	
Larger minimum aircraft size	2.8
Pressurized aircraft	1.7
Reduction of intermediate stops	2.6
Load factor-related service increases	0.9
Changes in hubs	1.5
Increased hold-in compensation/emphasis on code-sharing arrangements	2.5
Total	12.0

[1] Battle Creek and Santa Fe did not receive scheduled air service throughout FY 1988; Terre Haute, Owensboro, Ft. Leonard Wood, Clovis, New Bedford, Iron Mountain, Ironwood, Benton Harbor, Elkhart, Vernal, Lewiston, Fairmont, Cortez, Alamosa, Rota (Northern Mananas) and Lake Minchumina (Alaska) received subsidy-free air service for all or part of FY 1988 but are likely to require subsidy to maintain air service throughout FY 1989.

[2] We anticipate that Athens, Winston-Salem and Cape Newenham (Alaska) will not require subsidy to maintain air service in FY 1989.

BILLING CODE 4910-62-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 301

[IA-42-88]

Disclosure of Return Information to the Bureau of the Census

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to the regulations on Procedure and Administration to authorize the disclosure of three additional items of return information to the Bureau of the Census for use in certain statistical programs and to delete the authority to disclose those items of return information which the Bureau no longer needs. The proposed regulations will provide guidance to Internal Revenue Service personnel responsible for disclosing the information.

DATES: Written comments and requests for a public hearing must be delivered by January 13, 1989. The amendments to the regulations are proposed to be effective as of the date on which the Treasury decision adopting them is published in the **Federal Register**.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention CC:CORP:T:R (IA-42-88), Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Paul Winkler of the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, Attention: CC:CORP:T:R, (202) 566-3294 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the regulations on Procedure and Administration (26 CFR Part 301) under section 6103(j)(1) of the Internal Revenue Code of 1986. Under section 6103(j)(1), upon written request from the Secretary of Commerce, the Internal Revenue Service is to furnish such tax return information as may be prescribed by Treasury regulations to the Bureau of the Census for statutorily authorized statistical activities. Section 301.6103(j)(1)-1 of the regulations currently provides an itemized description of the return information authorized to be disclosed for this purpose.

Periodically, the disclosure regulations are amended to reflect the changing statistical needs of the Bureau of the Census for tax information, and these proposed regulations would update those regulations.

Explanation of Provisions

The request by the Secretary of Commerce for amendment of the regulations indicates that the Bureau of the Census needs the following three new data items from returns of individual taxpayers for use in its statutorily authorized postcensal population and per capita income estimates programs: (1) The type of tax return filed (i.e., Form 1040, Form 1040A, etc.); (2) whether the taxpayer itemized deductions for federal income tax purposes; and (3) whether the taxpayer received Social Security benefits. The Bureau needs this information to help them determine whether a taxpayer is over 65 years of age.

These proposed regulations would amend § 301.6103(j)(1)-1 of the present regulations to add the above items to the list of disclosable tax return information. In addition, the proposed regulations would delete from the list certain items of return information which the Bureau of Census no longer needs.

Special Analyses

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Although this document is notice of proposed rulemaking that solicits public comments, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably a signed original and seven copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is David White of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing these regulations on matters of both substance and style.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Bankruptcy, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift, Income taxes, Investigations, Law enforcement, Penalties, Pensions, Statistics, Taxes, Disclosure of information, Filing requirements.

Accordingly, Title 26, Part 301 of the Code of Federal Regulations is proposed to be amended as follows:

PART 301—[AMENDED]

Paragraph 1. The authority for Part 301 continues to read in part:

VOL 53 ISS 240 DE 14 1988 UMI

Authority: 26 U.S.C. 7805. * * * Section 301.6103(j) (1)–1 also issued under 26 U.S.C. 6103(j).

Par. 2. Section 301.6103(j)(1)–1 is amended by revising paragraph (b)(1) to read as follows:

§ 301.6103(j)(1)–1. Disclosures of return information to officers and employees of the Department of Commerce for certain statistical purposes and related activities.

* * * * *

(b) *Disclosure of return information to officers and employees of the Bureau of the Census.* (1) Officers or employees of the Service will disclose the following return information reflected on returns of an individual taxpayer to officers and employees of the Bureau of the Census for purposes of, but only to the extent necessary in, conducting and preparing, as authorized by chapter 5 of Title 13, United States Code, intercensal estimates of population and per capita income for all geographic areas included in the general revenue sharing program and demographic statistics programs, censuses and related program evaluation—

(i) Taxpayer identity information (as defined in section 6103(b)(6) of the Code), validity code with respect to the taxpayer identifying number (as described in section 6109), and taxpayer identifying number of spouse, if reported;

(ii) District office and service center codes;

(iii) Marital status;

(iv) Numbers and classifications of reported exemptions;

(v) Adjusted gross income;

(vi) Wage and salary income;

(vii) Dividend income;

(viii) Interest income;

(iv) Gross rent and royalty income;

(x) Type of tax return filed;

(xi) Residence information from the revenue sharing question;

(xii) Code indicators for Form 1040; Schedules C, D, E, F, and SE;

(xiii) Julian date relative to filing;

(xiv) Whether deductions were itemized; and

(xv) Social Security benefits.

* * * * *

Approved: November 2, 1988.

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 906

Colorado Permanent Regulatory Program; Public Comment Period and Opportunity for Public Hearing on Proposed Amendment

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing the receipt of a proposed amendment to the Colorado permanent regulatory program (hereinafter referred to as the Colorado program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment pertains to historic properties. The amendment is intended to revise the State program to be consistent with the corresponding Federal regulations.

This notice sets forth the times and locations that the Colorado program and the proposed amendment to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m., m.s.t. January 13, 1989. If requested, a public hearing on the proposed amendments will be held on January 9, 1989, at the location shown under "**ADDRESSES.**" Requests to present oral testimony at the hearing must be received on or before 4:00 p.m. m.s.t. on December 29, 1988.

ADDRESSES: Written comments should be mailed or hand-delivered to Mr. Robert H. Hagen at the address listed below. If a public hearing is requested, it will be held at the office of the Colorado Mined Land Reclamation Division. Copies of the Colorado program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the OSMRE offices and the office of the Colorado Mined Land Reclamation Division listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays. Each requestor may receive, free of charge, one copy of the proposed amendment by contacting the OSMRE Albuquerque Field Office.

Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, NM 87102, Telephone: (505) 766–1486;

Office of Surface Mining Reclamation and Enforcement, Administrative Record Office, Room 5215, 1100 "L" Street, NW., Washington, DC 20240, Telephone: (202) 343–5492; and

Colorado Mined Land Reclamation Division, 423, Centennial Building, 1313 Sherman Street, Denver, CO 80203, Telephone: (303) 866–3567.

FOR FURTHER INFORMATION CONTACT: Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, NM 87102, Telephone: (505) 766–1486.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Interior conditionally approved the Colorado program on December 15, 1980. Information regarding the general background of the Colorado program including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Colorado program can be found in the December 15, 1980, **Federal Register**, (45 FR 82173). Subsequent actions taken with regard to Colorado's program and program amendments can be found at 30 CFR 906.15.

II. Proposed Amendment

By letter dated October 14, 1988, Colorado submitted the proposed amendment on historic properties (Administrative Record No. CO–406) to its permanent regulatory program under SMCRA. This amendment is in response to OSMRE's 30 CFR Part 732 letter on historic properties dated June 9, 1987 (Administrative Record No. CO–342).

Colorado proposes to add Rule 2.05.6(4)(b) to provide the Mined Land Reclamation Division (MLRD) with the authority to require that permit applicants protect places listed on or eligible for listing on the National Register of Historical Places, as determined by the State Historic Preservation Officer (SHPO).

Colorado Rules 2.07.6(2)(e) and 2.10.3(1)(g) include permit application and permit approval requirements concerning places listed on the National Register of Historic Places. Colorado proposes to amend these rules to make the requirements applicable to places eligible for listing on the National Register of Historic Places, as determined by the SHPO.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is now seeking comment on whether the amendment proposed by Colorado satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Colorado program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATES**" or at locations other than the Albuquerque Field Office will not necessarily be considered in the final rulemaking, or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed at "**FOR FURTHER INFORMATION CONTACT**" by 4:00 p.m. m.s.t. on December 29, 1988. The time of day of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested, as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to commend have been heard. Persons in the audience who have not been scheduled to comment, and who wish to do so, will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under "**ADDRESSES.**" A written summary of each meeting will be made a part of the Administrative Record.

BILLING CODE 4310-05-M

---

30 CFR Part 931

New Mexico Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Reopening and extension of public comment period.

SUMMARY: OSMRE is reopening the period for review and public comment on the substantive adequacy of program amendments submitted by the State of New Mexico to modify the New Mexico permanent regulatory program (hereinafter referred to as the New Mexico program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments pertain to coal mine waste. If approved, the amendments will become part of the State's permanent regulatory program. The amendments are intended to revise the State program to be consistent with the corresponding Federal regulations.

This notice sets forth the times and locations that the New Mexico program and the proposed amendments to that program are available for public inspection, and the comment period during which interested persons may submit written comments on the proposed amendments.

DATE: Written comments not received on or before 4:00 p.m., m.s.t. December 29, 1988, will not necessarily be considered in the Director's decision to approve or disapprove the amendments.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. Robert H. Hagen at the address listed below.

Copies of the New Mexico program, the proposed amendments to the program, supporting information in the Administrative Record, and all written comments received in response to this notice will be available for review at the OSMRE offices and the office of the State Regulatory Authority listed below, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendments by contacting the OSMRE Albuquerque Field Office listed under **ADDRESSES.**

Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, NM 87102, Telephone: (505) 766-1486

Office of Surface Mining Reclamation and Enforcement, Room 5215, 1100 L Street, NW., Washington, DC 20240 Telephone: (202) 343-5492

New Mexico Energy and Minerals Department, Mining and Minerals Division, 525 Camino de los Marquez, Santa Fe, NM 87501, Telephone: (505) 827-5970

FOR FURTHER INFORMATION CONTACT: Mr. Robert H. Hagen, Director, Albuquerque Field Office, (505) 766-1486.

SUPPLEMENTARY INFORMATION:

I. Background

Information regarding the general background for New Mexico, including the Secretary's findings, the disposition of comments, and detailed explanation of the conditions of approval of the New Mexico program can be found in the December 31, 1980, **Federal Register** (45 FR 86459).

Subsequent actions taken with regard to the New Mexico program and program amendments can be found at 30 CFR 931.15 and 931.16.

II. Proposed Amendments

By letter dated April 21, 1988, New Mexico submitted proposed amendments (Administrative Record No. NM-405) to the New Mexico program for OSMRE's review and approval. OSMRE published a **Federal Register** notice (53 FR 23415) announcing receipt of the proposed amendments to the New Mexico program on June 22, 1988 and invited public comment on the adequacy of the proposed amendments. The public comment period ended on July 22, 1988. The public hearing scheduled for July 18, 1988 was not held because no one requested an opportunity to testify.

After reviewing the proposed amendments and all comments received, OSMRE notified New Mexico by letter dated September 26, 1988 (Administrative Record No. NM-446), of several provisions in its proposal that appeared to be inconsistent with the Federal regulations. By letter dated

VOL 53 ISS 240 DE 14 1988 UMI

October 20, 1988 (Administrative Record No. NM–452), New Mexico provided clarification of the amendment contents. These proposed changes at Coal Surface Mining Commission Rule 80–1, Sections 20–71, 20–81, 20–83, 20–85, and 20–92 all pertain to coal mine waste. These revisions are summarized below:

(1) New Mexico proposes to amend Section 20–71(b) to require certification of fills by a qualified registered professional engineer. The section did not previously require that the engineer be "qualified."

(2) New Mexico proposes to amend Section 20–81 to add a new subsection (a) to require that coal processing waste banks meet the design and maintenance requirements of 30 CFR 77.214 and 77.215.

(3) New Mexico proposes to amend Section 20–83(b) and 20–92(b) to clarify that drainage diversions associated with coal waste banks must be designed to carry peak runoff from a 100–year, 6–hour precipitation event.

(4) New Mexico proposes to amend Section 20–85 to delete subsections (b) and (c). Subsection (b) and (c) contain coal processing waste bank design requirements which are being revised and included under Section 20–81.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSMRE is now seeking comment on whether the amendments and supporting information proposed by New Mexico satisfy the applicable program approval criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the New Mexico program.

Written comments on the issues proposed in this rulemaking should be specific, pertain only to the issues proposed, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the OSMRE Albuquerque Field Office will not necessarily be considered and included in the Administrative Record for this proposed rulemaking.

BILLING CODE 4310–05–M

30 CFR Part 934

North Dakota Permanent Regulatory Program; Public Comment Period and Opportunity for Public Hearing on Proposed Amendments

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing the receipt of proposed amendments to the North Dakota permanent regulatory program (hereinafter referred to as the North Dakota program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment contains changes to North Dakota Administrative Code (NDAC) Article 69–05.2 in response to the OSMRE's letters of February 3, 1986 and June 9, 1987 that were issued in accordance with 30 CFR Part 732.

The amendment also contains extensive editorial changes intended to reduce the volume of the regulations and to improve clarity without changing their effect.

This notice sets forth the times and locations that the North Dakota program and proposed amendments to that program are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendments, and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m., m.s.t. January 13, 1989. If requested, a public hearing on the proposed amendments will be held on January 9, 1989. Requests to present oral testimony at the hearing must be received on or before 4:00 p.m., m.s.t. on December 29, 1988.

ADDRESSES: Written comments should be mailed or hand-delivered to Mr. Jerry R. Ennis at the address listed below. Copies of the North Dakota program, the proposed amendments, and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requestor may receive, free of charge, one copy of the proposed amendment by contacting OSMRE's Casper Field Office.

Mr. Jerry Ennis, Director, Casper Field Office, Office of Surface Mining Reclamation and Enforcement, 100 E. B Street, Room 2128, Casper, Wyoming 82601–1918, Telephone: (307) 261–5776.

Office of Surface Mining Reclamation and Enforcement, Administrative Record Office, Room 5131, 1100 "L" Street, NW., Washington, DC 20240, Telephone: (202) 343–5492.

Edward J. Englerth, Director, Reclamation Division, North Dakota Public Service Commission, Bismarck, North Dakota 58505–0165, Telephone: (701) 224–4096.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry R. Ennis, Director, Casper Field Office, at the address or telephone number listed in "**ADDRESSES.**"

SUPPLEMENTARY INFORMATION:

I. Background

On December 15, 1980, the Secretary of the Interior approved the North Dakota program. Information regarding the general background on the North Dakota program, including the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the North Dakota program can be found in the December 15, 1980 **Federal Register** (45 FR 82246). Subsequent actions taken with regard to North Dakota's program and program amendments can be found at 30 CFR 934.14, 934.15, and 934.16.

II. Proposed Amendments

On November 3, 1988, North Dakota submitted to OSMRE proposed amendments to its permanent regulatory program under SMCRA. The purpose of these amendments were twofold. North Dakota proposes changes to NDAC Article 69–05.2 Surface Coal Mining and Reclamation Operations, in response to OSMRE's letters of February 3, 1986 and June 9, 1987 that were issued in accordance with 30 CFR Part 732. Also, North Dakota at its own initiative proposes to extensively edit Article 69–95.2 to reduce the volume of the regulations and to improve clarity without changing their effect.

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h)(10), OSMRE is now seeking comment on whether the amendments proposed by North Dakota satisfy the applicable program approval criteria of 30 CFR 732.15. If the amendments are deemed adequate, they will become part of the North Dakota program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the

commenter's recommendations. Comments received after the time indicated under **"DATES"** or at locations other than the Casper Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under **"FOR FURTHER INFORMATION CONTACT"** by 4:00 p.m., m.s.t. on December 29, 1988. Location and time of day of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to comment at a public hearing, the hearing will not be held. Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare the adequate and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and who wish to do so, will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting by contacting the person listed under **"FOR FURTHER INFORMATION CONTACT."** All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **"ADDRESSES."** A written summary of each meeting will be made a part of the Administrative Record.

BILLING CODE 4310–05–M

30 CFR Part 936

Surface Coal Mining and Reclamation Operations Under the Federal Lands Program; State-Federal Cooperative Agreements; Oklahoma

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) is proposing to adopt a cooperative agreement between the Department of the Interior and the State of Oklahoma for the regulation of surface coal mining and reclamation operations and certain coal exploration operations on Federal lands in Oklahoma. Such a cooperative agreement is provided for under section 523(c) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This proposed rule provides the proposed terms of the cooperative agreement and additional information on other issues.

DATES: OSMRE will accept written comments on the proposed rule until 4:30 p.m. c.s.t. on January 13, 1989.

Upon request, OSMRE will hold a public hearing on the proposed rule on January 3, 1989 beginning at 9:00 a.m. c.s.t. The public hearing will be held at the location shown under **"ADDRESSES"** below.

OSMRE will accept requests for a public hearing until 4:30 p.m. c.s.t. on December 29, 1988. If no person has contacted OSMRE by that date to express an interest in testifying at the hearing, it will be canceled. If only one person requests an opportunity to speak at the public hearing, a public meeting, rather than a hearing, may be held and the results of the meeting included in the Administrative Record.

ADDRESSES: Written comments should be mailed to the Office of Surface Mining Reclamation and Enforcement, Tulsa Field Office, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135, or hand-delivered to the same address.

If requested, a public hearing will be held at the Tulsa Field Office of the Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550.

Requests for a public hearing should be made by contacting the individual listed under **"FOR FURTHER INFORMATION CONTACT."**

Copies of the proposed agreement and the related information required under 30 CFR Part 745 are available for inspection Monday through Friday, 8:30 a.m. to 4 p.m. excluding holidays, at the following addresses:

Oklahoma Department of Mines, 4040 N. Lincoln, Suite 107 Oklahoma City, Oklahoma 73105; Telephone: (405) 521–3859.

Office of Surface Mining Reclamation and Enforcement Western Field Operations, 1020 15th Street—Brooks Tower Denver, Colorado 80202; Telephone: (303) 844–2459.

Office of Surface Mining Reclamation and Enforcement Administrative Record Room 5131, 1100 L. Street, NW., Washington, DC 20240.

Office of Surface Mining Reclamation and Enforcement Tulsa Field Office, 5100 E. Skelly Drive, Suite 550 Tulsa, Oklahoma 74135; Telephone: (918) 581–6430.

FOR FURTHER INFORMATION CONTACT: Mr. James H. Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135; Telephone: (918) 581–6430.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures
II. Background
III. State of Oklahoma's Application
IV. Summary of the Terms of the Proposed Cooperative Agreement
V. Procedural Matters

I. Public Comment Procedures

A. Written Comments

Written comments on the proposed agreement should be specific, should be confined to issues pertinent to the agreement, and should explain the reason for any recommended change. Where practicable, commenters should submit five copies of their comments (see **"ADDRESSES"**). Comments received after the close of the comment period (see **"DATES"**) may not be considered or included in the Administrative Record for the final rule.

B. Public Hearing

The hearing will begin at 9:00 a.m. and continue until all persons then in attendance wishing to testify have been heard. The hearing will be transcribed by a court reporter.

To assist the court reporter and to ensure an accurate record, OSMRE requests that persons who testify give the reporter a written copy of their testimony. To assist OSMRE in preparing appropriate questions to clarify issues, OSMRE also requests that persons planning to testify submit an

VOL 53 ISS 240 DE 14 1988 UMI

advance copy of their testimony to the OSMRE address for submission of written comments (see "**ADDRESSES**").

Persons interested in attending the hearing but not testifying should contact the individual isted under "**FOR FURTHER INFORMATION CONTACT**" prior to the scheduled hearing date to see if the hearing has been cancelled.

C. Public Meetings

Representatives of OSMRE will be available to meet during the comment period at the request of members of the public to receive recommendations and comments concerning the proposed cooperative agreement. Persons wishing to schedule or attend such meetings, should contact the individual listed under "**FOR FURTHER INFORMATION CONTACT.**" OSMRE representatives will be available for these meetings between 9 a.m. and 4 p.m., c.s.t., Monday through Friday, excluding holidays. All such meetings will be open to the public. Notices of such meetings and where they will be held will be posted in advance in the Tulsa Field Office of the Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135.

D. Contacts With State Representatives

The Department has previously announced (45 FR 58378, September 3, 1980) its intention to follow the "Guidelines for Contacts with Employees and Officials During Consideration of State Permanent Regulatory Programs: published at 44 FR 54444 (September 19, 1979), during the process of developing cooperative agreements with the States. As written, the guidelines apply only to the State program review and decision process under SMCRA. However, the Department believes that the guidelines should also be applied in the development of State-Federal permanent program cooperative agreements because of the interrelationship between each cooperative agreement and the approved State program. The need to preserve the ability of the Department and the State to work together through the stages of the cooperative agreement and the right of the public to be informed and to have the opportunity to comment meaningfully on issues raised are principally applicable to permanent program cooperative agreement rulemakings.

This decision requires that minor changes in the guidelines be made to clarify their applicability to cooperative agreement rulemakings. Accordingly, revised guidelines for contacts with Department employees and officials during permanent program cooperative agreement rulemakings are given below. See the notice of September 19, 1979, 44 FR 54444, for a full discussion of the guidelines and supporting principles. The September 19, 1979, guidelines remain fully applicable to the State program review process.

1. Upon request the Department will meet with any member of the public through the end of the public comment period. Notices of scheduled meetings will be posted in a public place. The meetings will be open.

2. The Department will meet the State representatives or have telephone conversation with them, upon the initiative of either party, up to the point of the Secretary's decision to enter into a permanent program cooperative agreement with a State. These meetings will be open to the public unless the Department decides an executive session is appropriate. Advance notice of scheduled meetings will be posted in a public place. Notice of the executive session will be posted in a public place.

3. The Department will keep a summary record of all meetings and discussions, whether in person or by telephone, on a proposed cooperative agreement. This record will include a summary of the discussion and a list of all written information OSMRE receives. All such records along with all written communications relating to the cooperative agreement shall be made available to the public.

4. In those instances where the Department has conducted meetings or discussions with a State after the close of the public comment period, the Department will include summaries of the meetings in the record and, if necessary to assume an effective opportunity for public participation, provide an opportunity for the public to review the record of such meetings and discussions and to comment on them before a decision is made to enter into a permanent program cooperative agreement.

II. Background

The Oklahoma program was conditionally approved on January 19, 1981 [46 FR 4910]. Information on the general background, revisions, modifications, and amendments to the proposed permanent program submission as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Oklahoma program can be found in the January 19, 1981, **Federal Register** (46 FR 4910), in the May 4, 1983, **Federal Register** (48 FR 20050), and in the August 28, 1984, **Federal Register** (49 FR 34002). Subsequent actions on conditions of approval and program amendments are identified at 30 CFR 936.10 and 936.15.

III. State of Oklahoma's Application

The purpose of this proposed rulemaking is to adopt a permanent program cooperative agreement between the Department of the Interior and the State of Oklahoma which will give Oklahoma primacy in the administration of its approved permanent regulatory progam on Federal lands in the State.

Section 523(c) of SMCRA, 30 U.S.C 1201 *et seq.*, and the implementing regulations at 30 CFR Part 745, allow a State and the Secretary of the Interior to enter into a permanent program cooperative agreement if the State has an approved State program for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands. Permanent program cooperative agreements are authorized by the first sentence of section 523(c), which provides that, "Any State with an approved State program may elect to enter into a cooperative agreement with the Secretary to provide for State regulation of surface coal mining and reclamation operations on Federal lands within the State, provided the Secretary determines in writing that such State has the necessary personnel and funding to fully implement such a cooperative agreement in accordance with the provision of this Act." 30 U.S.C. 1273(c).

On September 21, 1988, Henry Bellmon, Governor of Oklahoma, requested that a permanent program cooperative agreement be entered into between the Secretary of the Interior and the Governor of Oklahoma.

Section 745.11(b) (1) through (8) of OSMRE's regulations require that certain information be submitted with a request for a permanent program cooperative agreement, if the information has not previously been submitted in the State program. Much of the information relating to the budget, staffing, organization, and duties of the State regulatory authority, the Oklahoma Department of Mines (ODM), was described in Oklahoma's Proposed Permanent Coal Program Text. See 30 CFR 745.11(b). In addition, the State of Oklahoma submitted a written certification from the General Counsel of ODM that no State statutory, regulatory or other legal constraint exists which would limit the capability of the ODM to comply fully with section 523(c) of SMCRA, as implemented by 30 CFR Part 745. See 30 CFR 745.11(b)(3).

IV. Summary of the Terms of the Proposed Cooperative Agreement

A summary of the proposed cooperative agreement appears below. OSMRE emphasizes that the proposed cooperative agreement may be subject to further change as a result of public comment and/or further discussion with the State of Oklahoma.

The nature and extent of the Secretary's ability to delegate authority for surface coal mining operations on Federal lands to States through cooperative agreements was a subject of a Federal District Court opinion in *In Re: Permanent Surface Mining regulation Litigation II,* Civil Action No. 79–1144 (D.D.C. July 6, 1984). The Oklahoma cooperative agreement proposed here is consistent with that opinion and delegates the Secretary's authority under SMCRA which is required to be covered under the Federal lands program and retains the Secretary's non-delegable responsibilities under the Mineral Leasing Act.

Although OSMRE has not yet amended the scope of the Federal lands program, 30 CFR Subchapter D, to be consistent with the District Court decision, this agreement encompasses the salient features of that decision. If changes to the Federal lands program are adopted which are not covered by this agreement, OSMRE and the Secretary will promptly initiate the steps necessary to conform the agreement.

A. Article I: Introduction, Purposes and Responsible Agencies

Paragraph A of Article I would set forth the legal authority for the Oklahoma Cooperative Agreement (Agreement), which is provided by section 523(c) of the Surface Mining Control and Reclamation Act (SMCRA). This paragraph would state that the Agreement provides for State regulation of surface coal mining and reclamation operations in Oklahoma on Federal lands. Paragraph B would set out the purposes of the Agreement.

Paragraph C would name the Oklahoma Mining Commission as the agency responsible for administering the Agreement on behalf of the Governor of Oklahoma (Governor), and the Office of Surface Mining Reclamation and Enforcement (OSMRE) as the agency responsible for administering the Agreement on behalf of the Secretary of the Department of the Interior (Secretary).

B. Article II: Effective Date

Article II would provide that after it has been signed by the Secretary and the Governor, the Agreement would become effective 30 days after publication as a final rule in the **Federal Register**. It would remain in effect until terminated as provided in Article XI.

C. Article III: Definitions

Article III would provide that any terms and phrases used in the Agreement have the same meanings as set forth in the Federal and State Acts, regulations promulgated pursuant to those Acts, 30 CFR Parts 700, 701, 740, and the approved State program (Program). Defining terms and phrases in this manner would ensure consistency between applicable regulations and the Agreement. Where there are conflicts in definitions, those included in the Program would apply.

D. Article IV: Applicability

Paragraph A of Article IV would state that the laws, regulations, terms, and conditions of Oklahoma's approved State program are applicable to Federal lands in Oklahoma except as otherwise stated in the Agreement, SMCRA, 30 CFR 740.4, 740.11(a), 745.13, and other applicable laws, Executive Orders, or regulations. This provision is consistent with the Federal lands program, which made the Oklahoma State program Federal law on all Federal lands in Oklahoma.

The reference to the Oklahoma State Program is intended to encompass the approval of that State program on January 19, 1981, and any amendments thereto which are approved in accordance with 30 CFR 732.17. Excluded from the scope of the Agreement are the authorities and responsibilities reserved to the Secretary pursuant to the Act, 30 CFR 740.4, 745.13, and other applicable laws, Executive Orders, or regulations.

Paragraph B would state that four existing Federal permits are not affected by this agreement, and that one previously submitted permit application would continue to be reviewed by OSMRE and would be transferred to ODM after OSMRE approves the application.

Paragraph C would state that appealable Orders or decisions would be appealed to ODM or OSMRE as appropriate in accordance with that agency's established appeal procedures.

E. Article V: General Requirements

Article V would mutually bind the Governor and the Secretary to the provisions of the Agreement.

Paragraph A would require that ODM continue to have authority under State law to carry out the Agreement.

Paragraph B (Funds) would provide that upon application for funds the State shall be reimbursed by OSMRE pursuant to section 705(c) of the Act if the necessary funds have been appropriated to OSMRE by Congress. Section 705(c) of SMCRA provides that a State with a cooperative agreement may receive an increase in its annual grant for the development, administration and enforcement of a State program on Federal lands by an amount which the Secretary determines is approximately equal to the amount the Federal government would otherwise have expended to regulate surface coal mining and reclamation operations on the Federal lands within the State. See 30 U.S.C. 1285(c). The reference in section 705(c) to section 523(d) is obviously a typographical error; the correct reference is section 523(c). The regulations implementing section 705(c) appear at 30 CFR 735.16 through 735.26.

If, when requested by the State adequate funds have not been appropriated, OSMRE and ODM would meet and decide on appropriate measures to ensure that mining operations are regulated in accordance with the Program.

Paragraph C of Article V would require the State to make annual reports to OSMRE with respect to compliance with this Agreement. Paragraph C would also provide for a general exchange of information developed under the Agreement, unless such an exchange is prohibited by Federal law. Final evaluation reports prepared by OSMRE on State administration and enforcement of this Agreement would be provided to ODM. The Agreement would require that ODM's comments on the report be appended before being sent to Congress and other interested parties.

Paragraph D would require ODM to maintain the necessary personnel to fully implement this Agreement.

Paragraph E would require that ODM avail itself of the facilities necessary to carry out the requirements of the Agreement. This provision would ensure that the State has access to and would utilize any resources necessary to conduct the inspections, investigations, studies, tests, and analyses required to fulfill the requirements of this Agreement.

Paragraph F of Article V concerns permit application fees and civil penalties. Permit fees would be determined according to section 745.1 of the State Act, section 771.25 of the State regulations, and the applicable provisions of the State program and Federal law. Any permit fees collected by the State that would be attributable

VOL 53 ISS 240 DE 14 1988 UMI

to the Federal lands covered by this agreement would be considered program income. The State would retain all permit fees from operations on Federal lands and deposit them with the State Treasurer. The State would report the amount of these fees in the financial status report required under 30 CFR 735.26. Civil penalties or fines collected by the State would not be considered program income.

F. Article VI: Review of a Permit Application Package

Paragraphs A through C of Article VI would generally describe the procedures that the State and OSMRE would follow in the review and analysis of permit application packages (PAP) for operations on Federal lands.

"Permit application package" is a term adopted by OSMRE in the Federal lands program (48 FR 6912, February 16, 1983). It is the material submitted by an applicant proposing to mine on Federal lands, including applications for permit revisions and renewals. OSMRE adopted the term because there are requirements for mining on Federal lands in addition to those required by a permit application under the approved State program for non-Federal lands. For example, operations on Federal lands may be subject to requirements of the Federal land management agency under Federal laws other than SMCRA. The package concept allows for such information to be included with the permit application required by the approved State program. See the definition of "permit application package" under 30 CFR 740.5.

Under paragraph A, an applicant proposing to conduct surface coal mining and reclamation operations on Federal lands would be required by ODM and the Secretary to submit a PAP in an appropriate number of copies to ODM. ODM will furnish OSMRE and other Federal agencies with the appropriate number of copies of the PAP.

The PAP would be in the form required by ODM and include any supplemental information required by OSMRE, the Federal land management agency and other agencies with jurisdiction or responsibility over Federal lands affected by the operations proposed in the PAP. At a minimum, the PAP would be required to satisfy the requirements of 30 CFR Part 740 and must include the information necessary for ODM to make a determination of compliance with the approved State program and for OSMRE and appropriate Federal agencies to make determinations of compliance with applicable requirements of SMCRA, the Federal lands program, other Federal laws, Executive Orders, and regulations for which they are responsible.

The Agreement would also specify that for any outstanding or pending applications of Federal lands being processed by OSMRE prior to the effective date of this Agreement, OSMRE will maintain sole permit decision responsibility. After the final decision, all further responsibilities shall pass to ODM pursuant to the terms of this Agreement.

Paragraph B of Article VI discusses review procedures for PAP's where leased Federal coal is involved and consequently, where the Secretary must make a decision on a mining plan. The Agreement would not address Federal lands where leased Federal coal is not involved because no such areas are known to exist in Oklahoma.

Under paragraph B.1, ODM would assume the responsibilities listed in 30 CFR 740.4(c)(1),(2),(3),(4),(6), and (7), to the extent authorized.

ODM would, to the extent authorized, take on the delegable responsibilities for review and approval, disapproval or conditional approval of permit applications, revisions or renewals thereof, and applications for transfer, sale and assignment of such permits under 30 CFR 740.4(c)(1). OSMRE would assist ODM in this review, upon request, to the extent possible. The Secretary retains those responsibilities that cannot be delegated to ODM including those under the Federal lands program, the Mineral Leasing Act of 1920 (MLA), The National Environmental Policy Act of 1969 (NEPA), this agreement, and other applicable Federal laws. The Secretary would consider the information in the PAP and, where appropriate, make decisions required by SMCRA, MLA, NEPA, and other Federal laws. The Secretary would carry out his responsibilities in a timely manner and avoid, to the extent possible, duplication of those responsibilities delegated to the State in this Agreement and the Program.

Responsibilities and decisions which can be delegated to the State under other applicable Federal laws may be specified in working agreements between OSMRE and ODM, with concurrence of any Federal agency involved, and without amendment to this Agreement.

Paragraph B.2., would designate ODM as the primary contact for applicants in matters regarding review of the PAP. As such, ODM would inform the applicant of all joint State-Federal determinations. On matters concerned exclusively with 43 CFR Part 3480, Subparts 3480 through 3487, the Bureau of Land Management (BLM) would be the primary contact with the applicant, and would provide ODM with documentation on its decisions. ODM would provide OSMRE with copies of correspondence with the applicant and any information received from the applicant regarding the PAP. OSMRE would provide ODM with copies of all correspondence with the applicant which may have a bearing on the PAP.

OSMRE would not ordinarily contact the applicant regarding the PAP, although OSMRE would not be prevented from doing so.

The Secretary would reserve the right to act independently of ODM to carry out departmental responsibilities under law other than SMCRA or provisions of SMCRA not covered by the Program, and in instances of disagreement over SMCRA and the Federal lands program.

ODM would consult with and obtain the consent of the Federal land management agency concerning post-mining land use and protection of non-coal resources, and would consult with and obtain the consent of BLM with respect to development, production, and recovery of mineral resources where operations involve leased Federal coal.

ODM would also obtain the comments and determinations of other Federal agencies with jurisdiction or responsibility over Federal lands affected by the operations proposed in the PAP. ODM would request that all Federal agencies submit their findings or any requests for additional data to ODM, and, when necessary, to OSMRE within 45 days of receiving the PAP.

The review of the PAP will be conducted to ensure timely identification, communication, and resolution of issues relating to statutory requirements of Federal agencies. ODM will request that other agencies also inform OSMRE of their analyses and conclusions.

Under paragraph B.3., ODM would take on the responsibilities under 30 CFR 740.4(c)(2), (3), and (4). ODM would prepare documentation to comply with NEPA under 30 CFR 740.4(c)(7), but OSMRE would retain the non-delegable responsibilities under 30 CFR 740.4(c)(7)(i) through (vii).

OSMRE would assist the State in carrying out its responsibilities by coordinating resolution of conflicts between ODM and other Federal agencies in a timely manner. OSMRE would further assist by helping to schedule joint meetings, upon request.

OSMRE would exercise its responsibilities in a timely manner and would provide ODM with a work product within 50 days of receiving the

State's request for assistance in reviewing the permit application unless a different time is agreed upon by OSMRE and ODM.

Paragraph B.4. would describe the procedures that OSMRE and ODM would follow in reviewing the PAP. OSMRE and ODM would coordinate their activities and exchange information during the review process. The State would review the PAP to ensure compliance with the Program and State law and regulations, while OSMRE would review the PAP to ensure compliance with the non-delegable responsibilities of SMCRA and other Federal laws and regulations. OSMRE and ODM would plan and schedule PAP review and each would choose a project leader, who would serve as the primary point of contact during the review process. OSMRE would provide the State with its review comments within 50 days of receiving the PAP.

ODM would prepare a State decision package indicating whether the PAP complies with the Program. The review and finalization of the State's decision package would be conducted in accordance with procedures agreed upon by ODM and OSMRE for processing PAP's.

ODM could issue a SMCRA permit before the necessary Secretarial approval of the mining plan. However, ODM must advise the operator that Secretarial approval of the mining plan must be obtained before the operator begins mining operations on the Federal lease. The permit issued by the State would be required to include the terms and conditions required by the lease and those required by other applicable Federal laws and regulations.

After making its decision, ODM would notify the applicant, the Federal land management agency, and any agency with jurisdiction or responsibility over Federal lands affected by operations proposed in the PAP. A copy of the permit and written findings would be submitted to OSMRE.

OSMRE would provide technical assistance to ODM upon request, if available resources allow.

Paragraph C of Article VI addresses review procedures for permit revisions or renewals.

Paragraph C.1. would assign to ODM the authority to review, approve or disapprove permit revisions or renewals not constituting modifications of a mining plan pursuant to 30 CFR 746.18. ODM must consult with OSMRE on whether any permit revision or renewal constitutes a mining plan modification. OSMRE would inform ODM within 30 days of receiving a copy of the permit revision or renewal as to such a decision. Where approval of a mining plan modification is required. OSMRE and ODM would follow the procedures outlined in paragraphs B.1. through B.4 of this Article.

Under paragraph C.2., OSMRE may establish criteria consistent with 30 CFR 746.18 to determine which permit revisions or renewals clearly do not constitute mining plan modifications. Those revisions or renewals meeting the criteria may be approved by ODM prior to contacting OSMRE.

Under paragraph C.3., permit revisions or renewals not constituting mining plan modifications or meeting the criteria outlined in paragraph C.2. would be reviewed and approved or disapproved by ODM.

G. Article VII: Inspections

Paragraphs A and B would state that ODM would conduct inspections on lands covered by this Agreement and prepare and file State inspection reports in accordance with the Program.

Paragraph C would designate ODM as the point of contact and primary inspection authority in dealing with the operator. However, the Secretary would retain the right to conduct inspections of surface coal mining and reclamation operations on Federal lands without prior notice to ODM for the purpose of evaluating the manner in which the Agreement is being carried out and ensuring that performance and reclamation standards are being met.

Paragraph D would state that when OSMRE intends to conduct an inspection under 30 CFR 842.11, ODM will ordinarily be given reasonable notice of such an inspection to provide an opportunity for State inspectors to join in the inspection. Citizen complaints not involving an imminent harm to the public or the environment will be referred to ODM for action.

Article VII would preserve OSMRE's obligation and authority to conduct inspection pursuant to 30 CFR Parts 842 and 843.

The right of Federal and State agencies to conduct inspections for purposes outside the scope of the proposed cooperative agreement would not be affected.

H. Article VIII: Enforcement

Article VIII would set forth the enforcement obligations and authorities of OSMRE and ODM.

Under paragraph A, ODM would have primary enforcement authority on Federal lands in accordance with the requirements of the Agreement and the Program. Enforcement authority given to the Secretary under other laws and orders would be reserved by the Secretary.

Under paragraph B, ODM would have primary responsibility for enforcement during joint inspections with OSMRE. Paragraph B would also include a requirement that ODM notify OSMRE prior to suspending or revoking a permit.

Paragraph C would preserve OSMRE's authority to take enforcement action to comply with 30 CFR Parts 843 and 845, where OSMRE conducted an inspection or where, during a joint inspection with ODM, the two could not agree on the appropriateness of a particular enforcement action. Such action would be based upon SMCRA or the substantive provisions contained in the Program, or both, but would use the Federal procedures and penalty system.

Paragraph D would provide that OSMRE and ODM notify each other of all violations of applicable regulations and all actions taken on the violations.

Paragraph E would provide that personnel of ODM and the Department of the Interior, including OSMRE, be mutually available to serve as witnesses in enforcement actions taken by either party.

Paragraph F would specify that this Agreement would not limit the Secretary's authority to enforce Federal laws other than SMCRA.

I. Article IX: Bonds

Under paragraph A, ODM and the Secretary would require each operator conducting operations of Federal lands to sumit a performance bond payable to both the State and OSMRE. All applicable State and Federal requirements must be fulfilled prior to releasing an operator from any obligation covered by the performance bond. If the agreement is terminated, paragraph A would require that the portion of the bond covering Federal lands reverts to being payable solely to the United States. ODM would advise OSMRE of annual adjustments to the performance bond pursuant to the Program.

Paragraph B would state that a performance bond shall be released by the State after OSMRE concurs with the release.

Paragraph C would state that forfeiture of performance bonds would be in accordance with the Program and subject to OSMRE concurrence.

Paragraph D clarifies that the performance bond does not meet the requirement for a Federal lease bond under 43 CFR Part 3474, or for the lessee protection bond required in certain circumstances by section 715 of SMCRA.

VOL 53 ISS 240 DE 14 1988 UMI

J. Article X: Designating Land Areas Unsuitable for All or Certain Types of Surface Coal Mining and Reclamation Operations and Activities and Valid Existing Rights and Compatibility Determinations

Paragraph A.1. of Article X would reserve to the Secretary authority to designate Federal lands as unsuitable for surface coal mining operations.

Paragraph A.2. states that ODM and OSMRE will notify each other of any petition to designate lands as unsuitable that could impact adjacent Federal and non-Federal lands, and solicit and consider each other's views on a petition. OSMRE will coordinate with the Federal land management agency with jurisdiction over the area covered by the petition, and will solicit comments.

Paragraph B discusses valid existing rights (VER) determinations. OSMRE's definition of VER, which was published on September 14, 1983 (48 FR 41314), relied on a general "takings" standard.

In its March 22, 1985, decision, the District Court remanded this definition because the promulgation process violated the Administrative Procedure Act. On November 20, 1986, OSMRE published a suspension notice for the definition of VER pending further rulemaking. OSMRE has decided, for areas covered by sections 522(e)(1) and (2), to make VER determinations in Oklahoma using the VER definition contained in the State regulatory program in accordance with 30 CFR 740.11(a) and the suspension notice. Because the Oklahoma State program has a takings test, OSMRE will not process VER applications in Oklahoma within units of the national park system until a Federal rule is finalized.

Paragraph B.1. would state that OSMRE has responsibility for processing requests for VER determinations on Federal lands within the boundaries of areas where mining is prohibited by section 522(e)(1) of SMCRA. For private inholdings within section 522(e)(1) areas, ODM, with the consultation and concurrence of OSMRE, would determine whether operations on such lands would or would not affect the Federal interest (Federal lands as defined in section 701(4) of SMCRA). OSMRE would have the responsibility for processing requests for VER determinations on private inholdings within the boundaries of section 522(e)(1) areas where mining affects the Federal interest.

Under paragraph B.2., OSMRE would be responsible for processing requests for determinations of VER for proposed operations on Federal lands within the boundaries of any national forest, as identified in section 522(e)(2) of SMCRA. OSMRE would process compatibility determinations on Federal lands pursuant to section 522(e)(2) of SMCRA.

Under paragraph B.3., ODM would determine for Federal lands, whether the prohibitions of limitations of section 522 (e)(3) of SMCRA are applicable to proposed mining operations which would adversely affect any public park, or any historic property listed on the National Register of Historic Places in consultation with the State Historic Preservation Officer. ODM would also make the VER determination for such lands using the State program. Procedures would also be included for ODM to coordinate with any affected agency or agency with jurisdiction over the proposed operation.

Under paragraph B.4., ODM would process and make VER determinations on Federal lands, using the State program, for all areas limited or prohibited by sections 522(e) (4) and (5) of SMCRA as unsuitable for mining. For such operations on Federal lands, ODM would coordinate with the affected agency and agency with jurisdiction over the proposed operations.

K. Article XI: Termination of Cooperative Agreement

Article XI would specify that this cooperative agreement may be terminated as specified under 30 CFR 745.15.

L. Article XII: Reinstatement of Cooperative Agreement

Article XII would provide that, if terminated, the cooperative agreement may be reinstated under 30 CFR 745.16. That provision allows for reinstatement of a cooperative agreement upon application by the State after remedying the defects for which the agreement was terminated and the submission of evidence to the Secretary that the State can and will comply with all of the provisions of the agreement.

M. Article XIII: Amendment of Cooperative Agreement

Article XIII would provide that the cooperative agreement may be amended by mutual agreement of the Governor and Secretary in accordance with 30 CFR 745.14.

N. Article XIV: Changes in State or Federal Standards

Paragraph A of Article XIV would recognize that the Secretary or the Governor may, from time to time, promulgate new or revised performance or reclamation requirements, or enforcement and administration procedures. If it is determined to be necessary to keep the Agreement in force, the State would request necessary legislative action and either the State or OSMRE would change or revise its regulations or promulgate new regulations, as applicable. Such changes would be made in accordance with 30 CFR Part 732 for changes to the approved State program and section 501 of the Act for changes to the Federal lands program.

Paragraph B would require the State and OSMRE to provide each other with copies of changes in their respective laws and regulations.

O. Article XV: Changes in Personnel and Organization

Article XV would require ODM and OSMRE to advise each other of substantial changes in organization, funding, staff, or other changes which could affect the implementation of the Agreement.

P. Article XVI: Reservation of Rights

Article XVI would recognize that the Act, 30 CFR 45.13, and other legal authorities prohibit the Secretary from delegating certain authorities to the State. Article XVI would state that this Agreement would not be construed as waiving or preventing the assertion of any right in this Agreement that the State or the Secretary may have under laws other than SMCRA, or their regulations, including those listed in Appendix A of the Agreement.

V. Procedural Matters

1. E.O. 12291 and Regulatory Flexibility Act

On October 21, 1982, the Department of the Interior received from the Office of Management and Budget an exemption for Federal/State cooperative agreements from the requirements of sections 3 and 7 of Executive Order 12291.

The Department has reviewed this proposed agreement in light of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Having conducted this review, the Department has determined that this document will not have a significant economic effect on a substantial number of small entities because no significant departure from either the State or Federal requirements already in effect will occur and no new or additional information will be required by the proposed agreement.

2. Paperwork Reduction Act of 1980

There are recordkeeping and reporting requirements in the proposed Oklahoma Cooperative Agreement which are the

same as and required by the permanent program regulations. Those recordkeeping and reporting requirements needed clearance from the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and were assigned the following clearance numbers:

Location of Requirement and OMB Clearance No.

Article V.C. (Required by 30 CFR Part 745) 1029–0028
Article VI.A. (Required by 30 CFR Part 773) 1029–0041
Article VII.A. (Required by 30 CFR Part 840) 1029–0051
Article IX.A. (Required by 30 CFR Part 800) 1029–0043

3. National Environmental Policy Act

Proceedings relating to adoption of a permanent program cooperative agreement are part of the Secretary's implementation of the Federal lands program pursuant to section 523 of the Act. Such proceedings are exempt under section 702(d) of the Act from the requirements to prepare a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

4. Author

The author of this regulation is Mr. David R. Alleman, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135; Telephone: (918) 581–6430.

List of Subjects in 30 CFR Part 936

Intergovernmental relations, Surface mining, Underground mining.

For the reasons set forth herein, it is proposed to amend 30 CFR Part 936 as follows:

Dated: December 9, 1988.

James E. Cason,

Deputy Assistant Secretary, Land and Minerals Management.

PART 936—[AMENDED]

1. The authority citation for Part 936 is revised to read as follows:

Authority: 30 U.S.C. 1201 et seq., Public Law 95–87.

2. Section 936.30 is added to read as follows:

§ 936.30 State-Federal Cooperative Agreement.

The Governor of the State of Oklahoma and the Secretary of the Department of the Interior (Secretary) enter into a Cooperative Agreement (Agreement) to read as follows:

Article I: Introduction, Purpose, and Responsible Agencies

A. This Agreement is authorized by section 523(c) of the Surface Mining Control and Reclamation Act (Act), 30 U.S.C. 1273(c), which allows a State with a permanent regulatory program approved by the Secretary under 30 U.S.C. 1253, to elect to enter into an Agreement for the regulation and control of surface coal mining operations on Federal lands. This Agreement provides for State regulation consistent with the Act, the Federal lands program (30 CFR, Chapter VII, Subchapter D) and the Oklahoma State program (Program) for surface coal mining and reclamation operations on Federal lands.

B. The purposes of this Agreement are to (a) foster Federal-State cooperation on the regulation of surface coal mining (b) minimize intergovernmental overlap and duplication and (c) provide uniform and effective application of the Program on all non-Indian lands in Oklahoma in accordance with the Act and the Program.

C. The Oklahoma Mining Commission shall be responsible for administering this Agreement on behalf of the Governor. The Office of Surface Mining Reclamation and Enforcement (OSMRE) shall administer this Agreement on behalf of the Secretary.

Article II: Effective Date

After being signed by the Secretary and the Governor, this Agreement shall be effective upon publication in the Federal Register as a final rule. This Agreement shall remain in effect until terminated as provided in Article XI.

Article III: Definitions

The terms and phrases used in this Agreement which are defined in the Act, 30 CFR Parts 700, 701, 740, and §§ 740.4, 740.11(2), and the Program and the Oklahoma Coal Reclamation Act of 1979, and in the rules and regulations promulgated pursuant to those Acts, shall be given the meanings set forth in said definitions. Where there is conflict between the above-referenced State and Federal definitions, the definitions used in the approved State program will apply except in the case of a term which defines the Secretary's continuing responsibilities under the Act and other laws.

Article IV: Applicability

A. In accordance with the Federal lands program, the laws, regulations, terms and conditions of the Oklahoma Program are applicable to lands in Oklahoma except as otherwise stated in this Agreement, the Act, 30 CFR 740.4, 740.11(a), and 745.13, or other applicable Federal laws, Executive Orders, or regulations.

B. The following permits will not be transferred to the State by this Agreement and will remain under the jurisdiction of OSMRE: (1) CFI-Bokoshe (Federal Permit OK–0002), (2) Stigler No. 9 (Federal Permit OK–0009), (3) Bokoshe No. 10 (Federal Permit OK–0001), and (4) McCurtain No. 2 (Federal Permit OK–0002). Also, OSMRE will continue the permitting process initiated on Farrell-Cooper's Red Oak Federal Permit (OK–0010). When the permit package is approved by Western Field Operations, the documentation will be forwarded to the Oklahoma Department of Mines (ODM). ODM will then issue the permit and perform the inspections on this site.

C. Orders and decisions issued by the ODM in accordance with the Program that are appealable shall be appealed to the reviewing authority in accordance with the Program. Orders and decisions issued by the Department that are appealable shall be appealed to the Department of the Interior's Office of Hearings and Appeals.

Article V: General Requirements

The Governor and the Secretary affirm that they will comply with all the provisions of this Agreement.

A. *Authority of State Agency.* The ODM has and shall continue to have the authority under State law to carry out this Agreement.

B. *Funds.* Upon application by ODM and subject to appropriations, OSMRE will provide the State with the funds to defray the cost associated with carrying out its responsibilities under this Agreement as provided in section 705(c) of the Federal Act, the grant agreement, and 30 CFR 735.16. Such funds will cover the full cost incurred by ODM in carrying out those responsibilities, provided that such cost does not exceed the estimated cost the Federal government would have expended on such responsibilities in the absence of this Agreement; and provided that such State incurred cost per permitted acre of Federal lands does not exceed the per permitted acre cost for similar administration and enforcement activities of the Program on non-Federal and non-Indian lands during the same time period.

The ratio or cost split of Federal to non-Federal dollars allocated under this Agreement will be determined by OSMRE and ODM based on the projected cost for regulation of mines within Federal lands, in consideration of the relative amounts of Federal and non-Federal lands involved. The designation of mines based on Federal land will be prepared by ODM and submitted to OSMRE's Tulsa Field Office. OSMRE's Tulsa Field Office and OSMRE's Western Field Operations Office will work with ODM to estimate the amount the Federal government would have expended for regulation of Federal lands in Oklahoma in the absence of this Agreement.

OSMRE and the state will discuss the OSMRE Federal land cost estimate, the ODM prepared list of acres by mine, and the state overall cost estimate. After resolution of any issues, ODM will submit its grant application to OSMRE's Tulsa Field Office. The Federal lands/non-Federal lands ratio will be applied to the final eligible total state expenditures to arrive at the total Federal reimbursement due the state. This ratio or cost split will be agreed upon by July of the year preceding the applicable fiscal year in order to enable the State to budget funds for the Program.

The State may use the existing year's budget totals, adjusted for inflation and workload considerations in estimating the regulatory cost for the following grant year.

BEST COPY AVAILABLE

VOL 53 ISS 240 DE 14 1988 UMI

OSMRE will notify ODM as soon as possible if such projections are unrealistic.

If ODM applies for a grant but sufficient funds have not been appropriated to OSMRE, OSMRE and ODM will promptly meet to decide on appropriate measures that will insure that mining operations on Federal lands in Oklahoma are regulated in accordance with the Program.

Funds provided to ODM under this Agreement will be adjusted in accordance with Office of Management and Budget Circular A–102 Attachment E.

C. *Reports and Records.* ODM will make annual reports to OSMRE containing information with respect to compliance with the terms of this Agreement pursuant to 30 CFR 745.12(d).

ODM and OSMRE will exchange, upon request, except where prohibited by Federal or State law, information developed under this Agreement.

OSMRE will provide ODM with a copy of any final evaluation report prepared concerning State administration and enforcement of this Agreement. ODM comments on the report will be appended before transmission to the Congress or other interested parties.

D. *Personnel.* ODM shall have the necessary personnel to fully implement this Agreement in accordance with the provisions of the Act, Federal lands Program and the Program.

E. *Equipment and Laboratories.* ODM will assure the Federal lands program and the Program itself access to equipment, laboratories, and facilities with which all inspections, investigations, studies, tests, and analysis can be performed which are necessary to carry out the requirements of the Agreement.

F. *Permit Application Fees and Civil Penalties.* The amount of the fee accompanying an application for a permit for operations on Federal land in Oklahoma shall be determined in accordance with section 745.1 of the Oklahoma Coal Reclamation Act of 1979, section 771.25 of the State regulations and the applicable provisions of the Program and Federal law. All permit fees and civil penalties collected from operations on Federal Lands will be retained by the State and shall be deposited with the State Treasurer in the Oklahoma Department of Mines Revolving Fund. Permit fees will be considered Program income and will be reported in an account for use in reclaiming abandoned mine sites. The financial status report submitted pursuant to 309 CFR 735.26 shall include the amount of fees collected and attributable to Federal lands during the prior State fiscal year.

Article VI: Review of Permit Application Package

A. Submission of Permit Application Package

ODM and the Secretary require an applicant proposing to conduct surface coal mining and reclamation operations and activities on Federal lands to submit a permit application package (PAP) with an appropriate number of copies to ODM. ODM will furnish OSMRE and other Federal agencies with an appropriate number of copies of the PAP. The PAP will be in the form required by ODM and will include any supplemental information required by OSMRE and the Federal land management agency. Where section 522(e)(3) of the Act applies, ODM will work with the agency with jurisdiction over the publicly owned park, including units of the national park system, or place included in the National Register of Historic Places (NRHP) to determine what supplemental information will be required.

At a minimum, the PAP will satisfy the requirements of 30 CFR Part 740 and include the information necessary for ODM to make a determination of compliance with the Program and for OSMRE and the appropriate Federal agencies to make determinations of compliance with applicable requirements of the Act, the Federal lands program, and other Federal laws, Executive Orders, and the regulations for which they are responsible.

B. Review Procedures Where Leased Federal Coal Is Involved

1. ODM will assume the responsibilities listed in 30 CFR 740.4(c) (1), (2), (3), (4), (6), and (7) to the extent authorized.

In accordance with 30 CFR 740.4(c)(1), ODM will assume primary responsibility for the analysis, review, and approval or disapproval of the permit application component of the PAP for surface coal mining and reclamation operations and activities in Oklahoma where a mining plan is required. OSMRE will, at the request of the State, assist to the extent possible in this analysis and review.

The Secretary will concurrently carry out his responsibilities that cannot be delegated to ODM under the Federal lands program, the Mineral Leasing Act (MLA), the National Environmental Policy Act (NEPA), this Agreement, and other applicable Federal laws. The Secretary will carry out these responsibilities in a timely manner and will avoid, to the extent possible, duplication of the responsibilities of the state as set forth in this Agreement and the Program. The Secretary will consider the information in the PAP and where appropriate, make decisions required by the Act, MLA, NEPA, and other Federal laws.

Responsibilities and decisions which can be delegated to the State under other applicable Federal laws may be specified in working Agreements between OSMRE and ODM with concurrence of any Federal agency involved, and without amendment to this Agreement.

2. ODM will be the primary point of contact for applicants regarding the review of the PAP for compliance with the Program and State laws and regulations. On matters concerned exclusively with regulations under 43 CFR Part 3480, Subparts 3480 through 3487, the Bureau of Land Management (BLM) will be the primary point of contact with the applicant. ODM will send to OSMRE copies of any correspondence with the applicant and any information received from the applicant regarding the PAP. OSMRE will send to ODM copies of all OSMRE correspondence which may have a bearing on the PAP. OSMRE will request additional information from the applicant through ODM. Copies of OSMRE's request will be sent to the operator by OSMRE to help expedite the permit review process. The information will be submitted to OSMRE through ODM.

BLM will inform ODM of its actions and provide ODM with a copy of documentation on all decisions. ODM will be responsible for informing the applicant of all joint State-Federal determinations. Where necessary to make the determination to recommend that the Secretary approve the mining plan, OSMRE will consult with and obtain the concurrences of BLM, the Federal land management agency, and other Federal agencies as required.

The Secretary reserves the right to act independently of ODM to carry out his responsibilities under laws other than the Act or provisions of the Act not covered by the Program, and in instances of disagreement over the Act and the Federal lands program.

3. ODM will to the extent authorized, consult with the Federal land management agency and BLM pursuant to 30 CFR 740.4(c)(2) and (3), respectively. ODM will also be responsible for obtaining the comments and determinations of other Federal agencies with jurisdiction or responsibility over the Federal lands affected by the operations proposed in the PAP. ODM will request all Federal agencies to furnish their findings or any request for additional information to ODM within 45 days of the date of receipt of the PAP. OSMRE will assist ODM in obtaining this information upon request of ODM.

ODM will be responsible for approval and release of performance bonds under 30 CFR 740.4(c)(4).

ODM will prepare documentation to comply with the requirements of NEPA under 30 CFR 740.4(c)(7); however, OSMRE will retain the responsibility for the exceptions in 30 CFR 740.4(c)(4)(i)–(vii).

4. OSMRE will assist ODM in carrying out ODM's responsibilities by:

(a) Coordinating resolution of conflicts and difficulties between ODM and other Federal agencies in a timely manner;

(b) Assisting in scheduling joint meetings, upon request, between State and Federal agencies;

(c) Where OSMRE is assisting ODM in reviewing the PAP, furnishing to ODM the work product within 50 calendar days of receipt of the State's request for such assistance, unless a different time is agreed upon by OSMRE and ODM.

(d) Exercising its responsibilities in a timely manner, governed to the extent possible by the deadlines established in the Program.

(e) Assuming all responsibility for ensuring compliance with any Federal lessee protection bond requirement.

5. Review of the PAP: (a) OSMRE and ODM will coordinate with each other during the review process as needed. ODM will keep OSMRE informed of findings made during the review process which bear on the responsibilities of OSMRE or other Federal agencies. OSMRE will ensure that any information OSMRE receives which has a bearing on decisions regarding the PAP is promptly sent to ODM.

(b) ODM will review the PAP for compliance with the Program and State law and regulations.

(c) OSMRE will review the applicable portions of the PAP for compliance with the non-delegable responsibilities of the Act and for compliance with the requirements of other Federal laws, Executive Orders, and regulations.

(d) OSMRE and ODM will develop a work plan and schedule for PAP review and each will identify a person as the project leader. The project leaders will serve as the primary points of contact between OSMRE and ODM throughout the review process. Not later than 50 days after receipt of the PAP, unless a different time is agreed upon, OSMRE will furnish ODM with its review comments on the PAP and specify any requirements for additional data. To the extent practicable, ODM will provide OSMRE all available information that may aid OSMRE in preparing any findings.

(e) ODM will prepare a State decision package, including written findings and supporting documentation, indicating whether the PAP is in compliance with the Program. The review and finalization of the State decision package will be conducted in accordance with procedures for processing PAP's agreed upon by ODM and OSMRE.

(f) ODM may make a decision on approval or disapproval of the permit on Federal lands in accordance with the the Program prior to the necessary Secretarial decision on the mining plan, provided that ODM advises the operator on the permit that Secretarial approval of the mining plan must be obtained before the operator may conduct coal development or mining operators on the Federal lease. ODM will reserve the right to amend or rescind any requirements of the permit to conform with any terms or condictions imposed by the Secretary in the approval of the mining plan.

(g) The permit will include, as applicable, terms and conditions required by the lease issued pursuant to the MLA and by any other applicable Federal laws and regulations, including conditions imposed by the Federal land management agency relating to post-mining land use, and those of other affected agencies, and will conditioned on compliance with the requirements of the Federal land management agency with jurisdiction.

(h) In the case that valid existing rights (VER) are determined to exist on Federal lands under section 522(e)(3) of the Act where the proposed operation will adversely affect a unit of the National Park Service (NPS), ODM will work with the NPS to develop mutually agreed upon terms and conditions for incorporation into the permit to mitigate environmental impacts as set forth under Article X of this Agreement.

(i) After making its decision on the PAP, ODM will send a notice to the applicant, OSMRE, the Federal land management agency, and any agency with jurisdiction over the publicly owned park or historic place included in the NRHP affected by a decision under section 522(e)(3) of the Act. A copy of the written findings and the permit will also be submitted to OSMRE.

(j) OSMRE will provide technical assistance to ODM when requested, if available resources allow. OSMRE will have access to ODM files concerning operations on Federal lands.

C. Review Procedures for Permit Revisions or Renewals

1. Any permit revision or renewal for an operation on Federal lands will be reviewed and approved or disapproved by ODM after consultation with OSMRE on whether such revision or renewal constitutes a mining plan modification. OSMRE will inform ODM within 30 days or receiving a copy of a proposed revision or renewal, whether the permit revision or renewal constitutes a mining plan modification. Where approval of a mining plan modification is required, OSMRE and ODM will follow the review procedures where leased Federal coal is involved as outlined in this Agreement.

2. OSMRE may establish criteria to determine which permit revisions and renewals clearly do not constitute mining plan modications.

3. Permit revisions or renewals on Federal lands which are determined by OSMRE not to constitute mining plan modifications or that meet the criteria for not being mining plan modifications will be reviewed and approved by ODM.

Article VII: Inspections

A. ODM will conduct inspections on Federal lands in accordance with 30 CFR 740.4(c)(5) and prepare and file inspection reports in accordance with the Program.

B. ODM will, subsequent to conducting any inspection pursuant to 30 CFR 740.4(c)(5), and on a timely basis, file with OSMRE's Tulsa Field Office a legible copy of the completed State inspection report.

C. ODM will be the point of contact and primary inspection authority in dealing with the operator concerning operations and compliance with the requirements covered by the Agreement, except as described hereinafter. Nothing in this Agreement will prevent inspections by authorized Federal or State agencies for purposes other than those covered by this Agreement. The Department may conduct any inspections necessary to comply with 30 CFR Parts 842 and 843 and its obligations under laws other than the Act.

D. OSMRE will ordinarily give ODM reasonable notice of its intent to conduct an inspection under 30 CFR 842.11 in order to provide State inspectors with an opportunity to join in the inspection. When OSMRE is responding to a citizen complaint of an imminent danger to the public health and safety, or of significant, imminent environmental harm to land, air or water resources pursuant to 30 CFR 842.11(b)(1)(ii)(C), it will contact ODM no less than 24 hours prior to the Federal inspection, if practicable, to facilitate a joint Federal/State inspection. All citizen complaints which do not involve an imminent danger or significant, imminent environmental harm will be referred to ODM for action. The Secretary reserves the right to conduct inspections without prior notice to ODM to carry out his responsibilities under the Act.

Article VIII: Enforcement

A. ODM will have primary enforcement authority under the Act concerning compliance with the requirements of this Agreement and the Program is accordance with 30 CFR 740.4(c)(5). Enforcement authority given to the Secretary under other Federal laws and Executive orders including, but not limited to, those listed in Appendix A (attached) is reserved to the Secretary.

B. During any joint inspection by OSMRE and ODM, ODM will have primary responsibility for enforcement procedures including issuance of orders of cessation, notices of violation, and assessment of penalities. ODM will inform OSMRE prior to issuance of any decision to suspend or revoke a permit on Federal lands.

C. During any inspection made solely by OSMRE or any joint inspection where ODM and OSMRE fail to agree regarding the propriety of any particular enforcement action, OSMRE may take any enforcement action necessary to comply with 30 CFR Parts 843 and 845. Such enforcement action will be based on the standards in the Program, the Act, or both, and will be taken using the procedures and penalty system contained in 30 CFR Parts 843 and 845.

D. ODM and OSMRE will promptly notify each other of all violations of applicable, laws, regulations, orders, or approved mining permits subject to this Agreement, and of all actions taken with respect to such violations.

E. Personnel of ODM and OSMRE will be mutually available to serve as witness in enforcement actions taken by either party.

F. This Agreement does not affect or limit the Secretary's authority to enforce violations of Federal laws other than the Act.

Article IX: Bonds

A. ODM and the Secretary will require each operator who conducts operations on Federal lands to submit a single performance bond payable to Oklahoma and the United States Office of Surface Mining Reclamation and Enforcement to cover the operator's responsibilities under the Act and the Program. Such performance bond will be conditioned upon compliance with all requirements of the Act, the Program, State rules and regulations, and any other requirements imposed by the Department. Such bond will provide that if this Agreement is terminated, the portion of the bond covering the Federal lands will be payable only to the United States Office of Surface Mining Reclamation and Enforcement. ODM will advise OSMRE of annual adjustments to the performance bond made pursuant to the Program.

B. Prior to releasing the operator from any obligation under such bond, ODM will obtain the concurrence of OSMRE. OSMRE concurrence will include coordination with other Federal agencies having authority over the lands involved.

C. Performance bonds will be subject to forfeiture with the concurrence of OSMRE, in accordance with the procedures and requirements of the Program.

D. Submission of performance bond does not satisfy the requirements for a Federal lease bond required by 43 CFR Subpart 3474 or lessee protection bond required in addition to a performance bond, in certain circumstances, by section 715 of the Act.

Article X: Designating Land Areas Unsuitable for All or Certain Types of Surface Coal Mining and Reclamation Operations and Activities and Valid Existing Rights and Compatibility Determinations

A. Unsuitability Petitions

1. Authority to designate Federal lands as unsuitable for mining pursuant to a petition is reserved to the Secretary.

2. When either ODM and OSMRE receives a petition that could impact adjacent Federal or non-Federal lands pursuant to section 522(c) of the Act, the agency receiving the petition will notify the other of receipt and the anticipated schedule for reaching a decision, and rquest and fully consider data, information and recommendations of the other. OSMRE will coordinate with the Federal land management agency with jurisdiction over the petition area, and will solicit comments from the agency.

B. Valid Existing Rights and Compatibility Determinations

1. The following actions will be taken when requests for determination of valid existing rights (VER) pursuant to section 522(e) of the Act or for determinations of compatibility pursuant to section 522(e)(2) of the Act are received prior to or at the time of submission of a PAP that involves surface coal mining and reclamation operations and activities:

For Federal lands within the boundaries of any areas specified under section 522(e)(1) of the Act, OSMRE will determine whether VER exist for such areas.

For non-Federal lands within section 522(e)(1) areas ODM, with the consultation and concurrence of OSMRE, will determine whether operations on such lands will or will not affect Federal lands. For such non-Federal lands affecting Federal lands, OSMRE will make the VER determination.

Under section 522(e)(1), for non-Federal lands within the boundaries of the national park system, ODM, with the consultation and concurrence of OSMRE, will determine whether operations on such lands will or will not affect the Federal interest. For such non-Federal lands within the boundaries of the national park system which affect the Federal interest, OSMRE will make the VER determination.

2. For Federal lands within the boundaries of any national forest where proposed operations are prohibited or limited by section 522(e)(2) of the Act and 30 CFR 761.11(b), OSMRE will make the VER determination.

OSMRE will process requests for determinations of compatibility under section 522(e)(2) of the Act.

For Federal lands, ODM, with the consultation and concurrence of OSMRE, will determine whether any proposed operations will adversely affect units of the NPS with respect to the prohibitions or limitations of section 522(e)(3) of the Act. For such operations adversely affecting units of the NPS, ODM, with consultation and concurrence of OSMRE, will make the VER determination.

3. For Federal lands, ODM will determine whether any proposed operation will adversely affect all publicly owned parks other than those covered in the preceding paragraph and, in consultation with the State Historic Preservation Officer, places listed in the National Register of Historic Places (NRHP), with respect to the prohibitions or limitations of section 522(e)(3) of the Act.

4. For Federal lands other than those on which the proposed operation will adversely affect units of the NPS, ODM will make the VER determination for operations which are prohibited or limited by section 522(e)(3) of the Act. In the case that VER is determined to exist on Federal lands under section 522(e)(3) of the Act where a proposed operation will adversely affect a unit of the NPS, ODM will work with the NPS to develop mutually agreed upon terms and conditions for incorporation into the permit in order to mitigate environmental impacts.

In the case that VER is determined not to exist under section 522(e)(3) of the Act or 30 CFR 761.11(c), no surface coal mining operations and activities will be permitted unless jointly approved by ODM and the Federal, State or local agency with jurisdiction over the publicly owned park or place included in the NRHP.

ODM will process determinations of VER on Federal lands for all areas limited or prohibited by section 522(e)(4) and (5) of the Act as unsuitable for mining. For operations on Federal lands, ODM will coordinate with any affected agency or agency with jurisdiction over the proposed surface coal mining and reclamation operation.

Article XI: Termination of Cooperative Agreement

This Agreement may be terminated by the Governor or the Secretary under the provisions of 30 CFR 745.15.

Article XII: Reinstatement of Cooperative Agreement

If this Agreement has been terminated in whole or in part it may be reinstated under the provisions of 30 CFR 745.16.

Article XIII: Amendment of Cooperative Agreement

This Agreement may be amended by mutual agreement of the Governor and the Secretary in accordance with 30 CFR 745.14.

Article XIV: Changes in State or Federal Standards

A. The Department or the State may from time to time promulgate new or revised performance or reclamation requirements or enforcement and administration procedures. Each party will, if it determines it to be necessary to keep this Agreement in force, change or revise its regulations or request necessary legislative action. Such changes will be made under the procedures of 30 CFR Part 732 for changes to the Program and under the procedures of section 501 of the Act for changes to the Federal lands program.

B. ODM and the Department will provide each other with copies of any changes to their respective laws, rules regulations or standards pertaining to the enforcement and administration of this Agreement.

Article XV: Changes in Personnel and Organization

Each Party to this Agreement will notify the other, when necessary, of any changes in personnel, organization, and funding, or other changes that may affect the implementation of this Agreement to ensure coordination of responsibilities and facilitate cooperation.

Article XVI: Reservation of Rights

This Agreement will not be construed as waiving or preventing the assertion of any rights in this Agreement that the State or the Secretary may have under laws other than the Act or their regulations, including but not limited to those listed in Appendix A.

BILLING CODE 4310-05-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3491-4]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed rule.

SUMMARY: USEPA is proposing to disapprove a site-specific revision to the ozone portion of the Ohio State Implementation Plan (SIP) for the Wright-Patterson Air Force Base in Greene County, Ohio. The proposed revision request is in the form of a variance to operate the fillstand to load tanker trucks with JP-4 jet fuel at the Wright-Patterson Air Force Base without meeting the requirements of Ohio Administrative Code (OAC) rule 3745-21-07(E). The tanker trucks are used to transfer JP-4 from the fillstand to military aircraft. USEPA action is based upon a January 27, 1987, revision request that was submitted by the State. USEPA is proposing to disapprove it, because the State did not demonstrate that it is technically or economically infeasible to meet the existing SIP limit and that the relaxation will not jeopardize attainment and maintenance of the ozone standard.

DATE: Comments on this revision and on the proposed USEPA action must be received by January 13, 1989.

ADDRESSES: Copies of the SIP revision are available at the following addresses for review: (It is recommended that you telephone Anne E. Tenner, at (312) 886-6034, before visiting the Region V, office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604

Ohio Environmental Protection Agency, Office of Air Pollution Control, 1800 Water Mark Drive, P.O. Box 1049, Columbus, Ohio 43266-0149

Comments on this prposed rule should be addressed to: (Please submit an original and three copies, if possible.) Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Anne E. Tenner, (312) 886-6034.

SUPPLEMENTARY INFORMATION: On January 27, 1987, the Ohio Environmental Protection Agency (OEPA) submitted, as a revision to it's ozone SIP, a variance to relax the SIP requirements for a jet fuel fillstand at Wright-Patterson Air Force Base in Greene County, Ohio, from the requrements contained in Ohio Administrative Code (OAC) Rule 3745-21-07(E).

That rule is applicable to Wright-Patterson Air Force Base because volatile photochemically reactive organic materials are loaded from its loading facilities and the average daily loading at the fillstand has exceeded the 40,000 gallon per day exemption within the rule. This rule contains the following requirements.

No person shall load, in any one day, more than 40,000 gallons of any volatile photochemically reactive material into any tank truck, trailer, or railroad tank car from any loading facility unless the loading facility is equipped with a vapor collection and disposal system properly installed, in good working order, in operation, and consisting of one of the following:

(a) An adsorber system or condensation system which processes and recovers at least NINETY PERCENT by weight of all vapors and gases from the equipment being controlled; or

(b) A vapor handling system which directs all vapors to a fuel gas system; or

(c) Other equipment or means for purposes of air pollution control as may be acceptable to and approved by the DIRECTOR.

The Wright-Patterson Air Force Base applied for a variance to operate the fillstand without meeting the requirements of OAC Rule 3745-21-07(E). This variance would limit annual throughput to 25,000,000 gallons per year; allowing estimated emissions of 16 tons of uncontrolled Volatile Organic Compounds (VOC) per year.

The variance is requested on the basis that for this level of throughput, it is not economically reasonable (cost-effective) to install controls.

SIP Relaxation

The State has not claimed that complying with the existing SIP is technically infeasible, but has attempted to make a demonstration that complying with the existing SIP was not economically feasible.

However, USEPA cannot make a judgement on the economic feasibility of complying with the existing SIP because the State did not adequately document the costs used to determine the cost-effectiveness of complying with carbon adsorption or incineration. As explained in the Technical Support Document for this action, which is available in the Region V office, the OEPA needs to explain the basis for the cost estimates and, where possible, provide documentation of costs.

SIP Revision Policy

The July 29, 1983, USEPA memorandum from Sheldon Meyers, Director, Office of Air Quality Planning and Standards to the Director, Air and Waste Management Division, Regions II-IV, VI-VIII and X, requires for the revision to be approvable that the State must demonstrate that the revision will not interfere with the timely attainment and maintenance of the ozone standard and, where relevant, "reasonable further progress" (RFP) towards timely attainment.

The Wright-Patterson Air Force Base is located in Greene County, which is designated nonattainment for the pollutant ozone under section 107 of the act (40 CFR 81.336),[1] and which is part of the Dayton Air Quality Control Region (AQCR) for ozone.

Although the Dayton Air Quality Control Region (AQCR) is currently designated nonattainment for ozone, the OEPA believes the current air quality data demonstrates attainment; and therefore this SIP revision request, which would not result in an increase in actual emissions, will not interfere with attainment. Additionally, the State believes that this SIP revision would not interfere with attainment because uncontrolled emissions are 16 tons per year while there is a growth margin of 6410 tons for 1985.

However, USEPA does not believe that this analysis has adequately addressed the air quality effects of the relaxation. First, although the air quality data submitted by OEPA may indicate attainment of the ozone standard, the area is still designated nonattainment and is not expected to be redesignated to attainment in the near future.

Second, the State has failed to demonstrate that this SIP revision would

[1] Because of the proximity of Greene County to Dayton, Greene County emissions and emission reductions were included as an integral part of the greater Dayton ozone demonstration area SIP. USEPA approved Ohio's attainment demonstration for the greater Dayton area, including Greene County, on October 31, 1980 (45 FR 72122), because the State's plan for the area as a whole demonstrated the attainment and maintenance of the ozone standard there by December 31, 1982. Violations of the ozone standard were recorded in the Dayton area subsequent to 1982.

not interfere with the timely attainment of the ozone standard and, where relevant "reasonable further progress" (RFP) towards final attainment. This would generally be done by comparing the margin for attainment predicted by the approved ozone attainment demonstration and the increased emissions that would result under the proposed extension. However, if the State or USEPA believes that there has been a substantial change in the inventory since the ozone SIP was approved so that the margin of attainment has changed significantly, a revised demonstration in support of the revision request is required. Such a demonstration would be necessary in areas which purported to demonstrate attainment by 1982, but for which post-1982 monitoring data are indicating exceedances of the ozone standard. Because Wright-Patterson Air Force Base is located in such an area, a revised demonstration of attainment for the Dayton area would be required before the revision can be approved.

Because the State has not provided a revised demonstration of attainment for the Dayton area, USEPA cannot determine whether this revision will interfere with attainment or maintenance of the applicable standard or RFP toward attainment.

Proposed Action

USEPA is proposing to disapprove this SIP revision because the State has failed to adequately demonstrate (1) that it is technically or economically infeasible to meet the existing SIP limit, and (2) that the relaxation will not interfere with attainment and maintenance of the ozone standard or RFP toward attainment.

Under 5 U.S.C. 605(b), I certify that this SIP disapprovals will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709), because it applies to only one source, the U.S. Air Force.

Under Executive Order 12291, today's action is not "Major." It has been submitted to the Office of Management and Budget (OMB) for review.

Authority: 42 U.S.C. 7401–7642.

Dated: June 29, 1987.

Valdas V. Adamkus,

Regional Administrator.

Editorial note.—This document was received at the Office of the Federal Register on December 9, 1988.

40 CFR Part 180

[PP 8E3644/P466; FRL–3489–7]

Pesticide Tolerance for Fluorine Compounds

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the insecticidal fluorine compounds cryolite and synthetic cryolite (sodium aluminum fluoride) in or on the raw agricultural commodity kiwifruit. The proposed regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATES: Comments, identified by the document control number [PP 8E3644/P466], must be received on or before January 13, 1989.

ADDRESSES: By mail, submit written comments to: Public Docket and Freedom of Information Section, Field Operations Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716H, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 8E3644 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiement Station of California.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the insecticidal fluorine compounds cryolite and synthetic cryolite (sodium aluminum fluoride) in or on the raw agricultural commodity kiwifruit at 11.0 parts per million (ppm). The petition was revised to propose 15.0 ppm. The petitioner proposed that this use of cryolite on kiwifruit be limited to California based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include:

1. An acute oral rat study with a lethal dose (LD_{50}) of $\geq$5.0 grams (g)/kg.

2. Mutagenicity studies: Ames (negative), DNA repair (negative), and an in vivo cytogenetics study in the rat (negative).

3. A rat teratogenicity study with a NOEL for maternal and fetotoxicity at 300 mg/kg (highest dose tested).

4. A 90-day feeding study in rats and a 90-day feeding study in dogs, which did not establish NOEL levels for fluoride accumulation in the bone. Fluoride accumulation in the bone occurred at 50 ppm (2.5 mg/kg) in the rat study and 500 ppm (12.5 mg/kg) in the dog, the lowest doses tested. NOELs for other effects were established at 50 ppm (2.5 mg/kg) in the rat and 10,000 ppm (250 mg/kg) in the dog.

The Agency has requested that the registrants submit chronic feeding, ocogenicity, reproduction and metabolism (pharmacodynamic) studies for cryolite. The studies are to be submitted according a specified timeframe, with the last of the studies due by 1992. The metabolism study (in rats) is needed to accurately quantitate the amount of floride which should be bioavailable from cryolite. The Agency

expects that the metabolism study will provide the information necessary to establish an acceptable daily intake (ADI) for cryolite.

The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5–kg daily diet is calculated to be 0.054088 mg/kg/day; the current action is not considered significant since the tolerance will increase the TMRC by less than 0.002 percent. The Agency generally considers as significant an increase in the TMRC of greater than 1 percent.

The nature of the residues is adequately understood and an adequate analytical method, spectrophotometry, is available for enforcement purposes. Analytical enforcement methods are currently available in the *Pesticide Analytical Manual* (PAM) Volume II. There are presently no actions pending against the continued registration of this chemical.

Several amendments to 40 CFR 180.145 *Flourine compounds; tolerances for residues* have been made to standardize the commodity entries. The following commodity entries have been replaced with the corresponding entries: Beets (with and without tops) and beet greens alone are replaced with beets, roots and beets, tops; radishes (with or without tops) or radish tops are replaced with radish, roots and radish, tops; rutabaga (with and without tops) and rutabaga tops are replaced with rutabaga roots and rutabaga tops; turnip (with and without tops) or turnip greens are replaced with turnip, roots and turnip tops; and squash is replaced with winter squash. These are technical amendments that impose no new regulatory requirements.

Based on the above information considered by the Agency and the fact that kiwifruit is not considered to be a livestock feed commodity, the tolerance established by amending 40 CFR 180.145 would protect the public health. Therefore it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 8E3644/P466]. All written comments filed in response to this petition will be available in the Public Docket and Freedom of Information Section at the address given above from 8 a.m. to 4 p.m., Monday through Friday except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: November 30, 1988.

Anne E. Lindsay,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.145 is revised to read as follows:

§ 180.145 Fluorine compounds; tolerances for residues.

(a) Tolerances are established for combined residues of the insecticidal fluorine compounds cryolite and synthetic cryolite (sodium aluminum fluoride) in or on the following agricultural commodities:

Commodities	Parts per million
Apples	7
Apricots	7
Beans	7
Beets, roots	7
Beets, tops	7
Blackberries	7
Blueberries (huckleberries)	7
Boysenberries	7
Broccoli	7
Brussels sprouts	7
Cabbage	7
Carrots	7
Cauliflower	7
Citrus fruits	7
Collards	7
Corn	7
Cranberries	7
Cucumbers	7
Dewberries	7
Eggplant	7
Grapes	7
Kale	7
Kohlrabi	7
Lettuce	7
Loganberries	7
Melons	7
Mustard greens	7
Nectarines	7
Okra	7
Peaches	7
Peanuts	7
Pears	7
Peas	7
Peppers	7
Plums (fresh prunes)	7
Pumpkins	7
Quinces	7
Radish, roots	7
Radish, tops	7
Raspberries	7
Rutabaga, roots	7
Rutabaga, tops	7
Squash (winter)	7
Squash (summer)	7
Strawberries	7
Tomatoes	7
Turnip, roots	7
Turnip, tops	7
Youngberries	7

(b) Tolerances with regional registration, as defined in § 180.1(n), are established for the combined residues of the insecticidal fluorine compounds, cryolite and synthetic cryolite (sodium aluminum fluoride) in or on the following raw agricultural commodities:

Commodities	Parts per million
Kiwifruit	15

Pesticide Tolerance for Glyphosate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the herbicide glyphosate and its metabolite in or on the raw agricultural commodity

asparagus. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 8E3648/P473], must be received on or before January 13, 1989.

ADDRESS: By mail, submit written comments to: Public Docket and Freedom of Information Section, Field Operations Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. In person, bring comments to: Rm. 246, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:
By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Room 716C, CM#2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703) 557–1806.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 8E3648 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Stations of California, Florida, Michigan, and New York.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine), and its metabolite aminomethylphosphonic acid (AMPA) in or on the raw agricultural commodity asparagus at 0.5 part per million (ppm). This would require raising the already established tolerance for residues on asparagus from 0.2 ppm to 0.5 ppm.

The data submitted in the petition an other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include:

1. A three-generation rat reproduction study with a no-observed-effect level (NOEL) of 10 milligrams (mg) per kilogram (kg) per day.

2. A chronic feeding/oncogenicity study in rats with a systemic NOEL of 31 mg/kg/day, which was negative for oncogenic potential under the conditions of the study at all feeding levels tested (0, 3, 10, and 31 mg/kg/day). Although the rat study meets the requirement for a chronic feeding study, it does not satisfy guideline requirements for an oncogenicity study. There is no evidence that the highest dose tested (31 mg/kg/day) was a toxic or maximum tolerated dose (MTD).

3. A 1-year dog feeding study with a systemic NOEL of 500 mg/kg/day (highest dose tested).

4. A rat teratology study, negative for teratogenic effects at 3,500 mg/kg/day (highest dose tested), with maternal and developmental toxicity NOELs of 1,000 mg/kg/day.

5. A rabbit teratology study, negative for teratogenic effects at 350 mg/kg/day (highest dose tested), with a maternal NOEL of 175 mg/kg/day and a developmental toxicity NOEL of 350 mg/kg/day.

6. Mutagenicity studies as follows: Chromosomal aberration *in vitro* (no aberrations in Chinese hamster ovary cells were caused with or without S–9 activation); DNA repair in rat hepatocytes (negative); *in vivo* bone marrow cytogenic in rats (negative); rec-assay with *B. subtilis* (negative up to 2,000 micrograms of test material per disk); reverse mutation with *S. typhimurium* (negative); Ames test with *S. typhimurium* (negative); and a dominant-lethal test in mice (negative).

Additionally, a 2-year oncogenicity study in CD–1 mice has been completed and reviewed by the Agency. Feeding levels in this study were 1,000, 5,000 and 30,000 ppm (equivalent to 150, 750 and 4,500 mg/kg/day, respectively). The NOEL for non-neoplastic chronic effects was established at 5,000 ppm. In this study glyphosate produced an equivocal oncogenic response, possibly causing a slight increase in the incidence of renal tubular adenomas (a benign tumor of the kidney) in male mice at the highest dose tested (30,000 ppm). Because of the equivocal nature of the oncogenic response in mice and the lack of an acceptable oncogenicity study in rats, the Agency referred the issue to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Science Advisory Panel (SAP) for a "Weight-of-Evidence" recommendation. After receiving all available evidence, the SAP concluded that the oncogenic potential of glyphosate could not be determined from the available information and recommended that the mouse and/or rat studies be repeated to clarify unresolved questions. Subsequently, the Agency classified glyphosate as a "Category D Oncogen" (inadequate evidence of oncogenicity) and requested repeat oncogenicity studies in both mice and rats. The rat oncogenicity study is due in 1990 and a repeat mouse study in male mice is due in 1992.

Current Agency policy is to issue registrations for significant new uses of glyphosate on a case-by-case basis. Tolerances which change the theoretical maximum residue contribution (TMRC) for glyphosate by more than 1 percent are considered toxicologically significant. The TMRC from existing tolerances for a 1.5-kg daily diet is calculated to be 0.004987 mg/kg/day. The tolerance for asparagus will result in an increase in the TMRC of 0.000004 mg/kg/day (less than 0.1 percent).

The acceptable daily intake (ADI), based on the rat reproduction study NOEL of 10 mg/kg/day and using a 100-fold safety factor, is calculated to be 0.1 mg/kg of body weight (bw)/day. Published tolerances utilize 5.0 percent of the ADI; the current action represents an insignificant increase in the percent of the ADI utilized.

No secondary residues in meat, milk, poultry, or eggs are expected since asparagus is not considered a livestock feed commodity. The nature of the residues is adequately understood, and an adequate analytical method (gas chromatography using a flame photometric detector) is available for enforcement purposes. An analytical enforcement method is currently available in the *Pesticide Analytical Manual* (PAM), Vol. II. There are currently no actions pending against the continued registration of this chemical.

Based on the data and information considered, the Agency concludes that the tolerance proposed would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 8E3648/P473]. All written comments filed in response to this petition will be available in the Public Docket and Freedom of Information Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Pesticide Tolerance for Metolachlor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the herbicide metolachlor and its metabolites in or on the raw agricultural commodity cabbage. This proposed regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments, identified by the document control number [PP 8E3637/P472], must be received on or before January 13, 1989.

ADDRESSES: By mail, submit written comments to:

Public Docket and Freedom of Information Section, Field Operations Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Room 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–1806.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 8E3637 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Stations of Florida, Hawaii, Massachusetts, New York, North Carolina, Oklahoma, Oregon, Virginia, and Wisconsin.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for combined residues of the herbicide metolachlor (2-chloro-*N*-(2-ethyl-6-methylphenyl)-*N*-(2-methoxy-1-methylethyl)acetamide) and its metabolites, determined as the derivatives, 2-[(2-ethyl-6-methylphenyl)amino]-1-propanol and 4-(2-ethyl-6-methylphenyl)-2-hydroxy-5-methyl-3-morpholinone, each expressed as the parent compound in or on the raw agricultural commodity cabbage at 1.0 part per million (ppm).

The data submitted in the petition and all other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The data considered in support of the tolerance include:

1. A 90-day dog feeding study with a no-observed-effect level (NOEL) of 500 ppm (12.5 milligrams (mg)/kilogram (kg)).

2. A 6-month dog feeding study with a NOEL of 100 ppm (2.5 mg/kg).

3. A rat teratology study with no maternal, teratogenic, or fetotoxic effects at all levels tested (0, 60, 180, and 360 mg/kg/day).

4. A rabbit teratology study with a NOEL for maternal effects at 120 mg/kg and no teratogenic or fetotoxic effects at all levels tested (0, 36, 120, 360 mg/kg/day).

5. A 2-year oncogenicity study in mice with no observed oncogenic potential under the conditions of the study at 30, 1,000, and 3,000 ppm (highest dose level equivalent to 428 mg/kg) and a systemic NOEL of 1,000 ppm; and a repeated mouse oncogenicity study with no

observed oncogenic potential under the conditions of the study at the same dose levels as the original study.

6. A two-generation rat reproduction study with a reproductive NOEL of 300 ppm (15 mg/kg) and a lowest effect level (LEL) of 1,000 ppm (50 mg/kg).

7. Mutagenicity studies including: a mouse dominant-lethal study, negative for mutagenic effects; a mouse lymphoma mutation assay, not a mutagen in both presence and absence of metabolic activator; an Ames assay, negative for mutagenic effects; and a Chinese hamster micronucleus assay with no evidence of mutagenicity at dosage levels tested (0, 1,250, 2,500, and 5,000 mg/kg).

8. A 2-year chronic feeding/oncogenicity study (IBT validated) in the rat conducted at dietary doses of 0, 30, 300, and 3,000 ppm with a statistically significant increase in primary liver neoplasms in females at the high dose (3,000 ppm).

9. A repeated 2-year chronic feeding/oncogenicity study in the rat conducted at the same dietary doses as the original study with a systemic NOEL of 300 ppm (15 mg/kg), a systemic LEL of 3,000 ppm (testicular atrophy), and a statistically significant increased incidence of neoplastic liver nodules and proliferative hepatic lesions in females in the high-dose group (3,000 ppm).

The Agency has concluded that the available data constitute limited evidence for carcinogenicity of metolachlor. Metolachlor has been tentatively classified as a Category C carcinogen (limited evidence of carcinogenicity in animals) based on the following considerations:

1. The oncogenic responses observed in rats were confined to the high-dose females at one site (liver).

2. The proliferative liver lesions observed in rats were primarily benign (neoplastic nodules in 6 of 60 animals) rather than heptocellular carcinomas (1 of 60 animals). There was no apparent difference in the time-to-occurrence of the lesions (almost all liver tumors were observed at terminal sacrifice).

3. Metolachlor was not oncogenic to mice under the conditions of the 2-year mouse oncogenicity studies.

4. An Ames mutagenicity assay and a dominant-lethal study were negative for mutagenic effects.

Tolerances have previously been established for residues of metolachlor ranging from 0.02 ppm in meat, milk, poultry, and eggs to 30.0 ppm in peanut forage and hay. Based on the rat chronic feeding study with a NOEL of 300 ppm (15 mg/kg/day) for nononcogenic effects and using a 100-fold safety factor, the acceptable daily intake (ADI) is 0.15 mg/kg/day. The theoretical maximal residue contribution (TMRC) for existing tolerances is 0.001068 mg/kg/day. The proposed use will contribute an additional 0.000098 mg/kg/day (a 9.6-percent increase). Published tolerances utilize 0.71 percent of the ADI; the current action will utilize an additional 0.07 percent.

The nature of the residues is adequately understood and an adequate analytical method, gas-liquid chromatography with an electrolytic detector specific for nitrogen, is available for enforcement purposes. Analytical enforcement methods are currently available in the *Pesticide Analytical Manual* (PAM), Vol. II. There are currently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that cabbage is not considered an animal feed commodity, the tolerance established by amending 40 CFR 180.368 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, (PP 8E3637/P472). All written comments filed in response to this petition will be available in the Public Docket and Freedom of Information Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 28, 1988.

Anne E. Lindsay,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.368(a) is amended by adding and alphabetically inserting the entry for the raw agricultural commodity cabbage, to read as follows:

§ 180.368 Metolachlor; tolerances for residues.

(a) * * *

Commodities	Parts per million
* * * * *	
Cabbage	1.0
* * * * *

40 CFR Part 180

[PP 7E3464/P471; FRL-3489-6]

Pesticide Tolerance for Prometryn

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the herbicide prometryn in or on the raw agricultural commodity dill. The proposed regulation to establish a maximum permissible level for residues of the herbicide in or in the commodity was requested in a petition submitted by the Interregional Research Project No. 4. (IR-4).

DATES: Comments, identified by the document control number [PP 7E3464/P471), must be received on or before January 13, 1989.

ADDRESSES: By mail, submit written comments to:

Public Docket and Freedom of Information Section, Field Operations Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Room 246, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Room 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 7E3464 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Station of California.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide prometryn (2,4-bis(isopropylamino)-6-methylthio-*s*-triazine) in or on the raw agricultural commodity dill at 0.25 part per million (ppm). The petition was later amended to propose a tolerance of 0.3 ppm.

The petitioner proposed that this use of prometryn on dill be limited to use in California based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include:

1. An acute oral study in rats with an LD50 of 5,233 milligrams (mg)/killogram (kg). A second acute oral study in rats with LD 50's for male and female rats at 1,802 and 2,076 mg/kg, respectively.

2. A chronic feeding study in the dog with a no-observed-effect level (NOEL) of 3.75 mg/kg day.

3. A rabbit teratology study with maternal and developmental NOELs of 12 mg/kg/day.

4. A three-generation reproduction study in rats with no indications of toxicity or reproductive or teratogenic effects observed under the conditions of the study. A second reproduction study is needed, however, since the existing study in rats does not meet guideline requirements.

5. A chronic feeding study in rats using dietary doses of 2.5, 12.5, and 62.5 mg/kg/day which demonstrated no systemic or oncogenic effects under the conditions of the study. The rat feeding study does not meet guideline requirements, and a repeat chronic feeding/oncogenicity study in rats is needed.

Data currently lacking include a chronic feeding study in the rat, oncogenicity studies in two species, a reproduction study, a teratology study in a second species, a general metabolism study, and a battery of mutagenicity studies.

Although there are important data deficiencies for prometryn, the proposed use on dill will not result in a significant increase in dietary exposure to this pesticide. The provisional acceptable daily intake (PADI), based on the 2-year dog feeding study with an NOEL of 3.75 mg/kg/day and using a 1,000-fold safety factor, is calculated to be 0.004 mg/kg of body weight (bw)/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.000180 mg/kg/day; the current action will result in a negligible increase in the TMRC (<0.6 percent). Published tolerances utilize 4.5 percent of the PADI; the current action will utilize an additional 0.0006 percent.

The nature of the residues is adequately understood and an adequate analytical method, gas-liquid chromatography, is available in the *Pesticide Analytical Method* (PAM), Vol. II, for enforcement purposes. There are currently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that dill is not considered an animal feed commodity, the tolerance established by amending 40 CFR 180.222 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingedients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 7E3464/P471]. All written comments filed in response to this petition will be available in the Public Docket and Freedom of Information Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. FEDERAL MARITIME COMMISSION

46 CFR Part 572

[Docket No. 87-24]

Foreign-To-Foreign Agreements; Exemption

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule; withdrawal.

SUMMARY: The Federal Maritime Commission discontinues this rulemaking proceeding. The basis for this action is that the Commission is without jurisdiction to regulate agreements among ocean carriers governing foreign-to-foreign transportation. Such agreements no longer will be accepted for filing pursuant to section 5 of the Shipping Act of 1984.

DATE: This action is effective December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5740.

SUPPLEMENTARY INFORMATION:

Proceeding

The Federal Maritime Commission ("Commission" or "FMC") instituted this proceeding by Notice of Proposed Rulemaking published in the **Federal Register**. 52 FR 46501 (1987). The Commission therein proposed to amend its regulations to explicitly permit voluntary filing of carrier agreements governing ocean transportation wholly between foreign countries, "where the parties to the agreement deem it to have a direct, substantial and reasonably foreseeable effect on the commerce of the United States." *Id.* at 46505. This change would enable such "foreign-to-foreign" agreements, though not subject to the mandatory filing requirements of the Shipping Act of 1984 ("1984 Act"), to qualify for immunity from the U.S. antitrust laws.

The proposed rule also would exempt from the notice, waiting period and information requirements of the 1984 Act foreign-to-foreign agreements that are part of broader agreements covering contiguous U.S.-foreign trades. Such foreign-to-foreign agreements thus would be effective immediately upon filing.

Comments in general support of the proposed rule were filed by the Gulf-European Freight Association, the North Europe-U.S. Gulf Freight Association, the North Europe-U.S. Atlantic Conference and the U.S. Atlantic-North Europe Conference; the Pacific Coast European Conference and the North Europe-U.S. Pacific Freight Conference; Crowley Maritime Corporation; the Virginia Port Authority; the Transpacific Westbound Rate Agreement; Bermuda Container Line, Ltd.; the Port Authority of New York and New Jersey ("PANYNJ"); CAST (1983) Ltd. ("CAST") and Canada Maritime Limited ("CML"); and the Asia North America Eastbound Rate Agreement, The 8900 Lines, the Greece/United States Atlantic and Gulf Conference, the Mediterranean North Pacific Coast Freight Conference and the South Europe/U.S.A. Freight Conference ("ANERA et al.").

Comments in opposition to the proposed rule were filed by the Antitrust Division of the U.S. Department of Justice ("DOJ").

Background

Section 4(a) of the 1984 Act states that the statute applies to agreements to engage in any one of a catalogue of specified activities. 46 U.S.C. app. 1703(a). Section 5(a) requires that every agreement covered by section 4 must be filed with the Commission, but an exception is provided for "agreements related to transportation to be performed * * * between foreign countries * * *." *Id.* § 1704(a). Despite this exception, a limited number of agreements concerning foreign-to-foreign ocean transportation has been filed voluntarily with the Commission. Typically, these agreements are augmentations to existing FMC agreements covering a contiguous U.S.-foreign trade.[1]

The comments filed in response to the proposed rule by the carriers and ports confirm that such agreements are filed with the Commission, notwithstanding the dispensation provided by section 5(a), as a consequence of section 7(a)(3) of the 1984 Act.[2] That provision grants immunity from the antitrust laws to foreign-to-foreign transportation agreements, but withholds immunity from such agreements that have a "direct, substantial, and reasonably foreseeable effect on the commerce of the United States * * *." 46 U.S.C. app. 1706(a)(3). This phrase is a long-established test for determining U.S. antitrust subject-matter jurisdiction over anticompetitive activities that take place in foreign locations; if the effect of such activities manifests itself in U.S. commerce, the antitrust laws may be brought to bear regardless of where the acts took place or the nationality of the actor.[3] By filing their foreign-to-foreign agreements with the Commission voluntarily, the carriers are attempting to bring their concerted activities within the different immunity provided by section 7(a)(1) of the 1984 Act, which states that the antitrust laws do not apply to "any agreement that has been filed under section 5 of this Act and is effective * * *." *Id.* § 1706(a)(1).[4]

This practice puts at issue whether foreign-to-foreign agreements potentially ineligible for antitrust immunity under the standards of section 7(a)(3) may nevertheless obtain immunity through section 7(a)(1) if they are filed with the Commission, even though the Commission may not require that they be filed. This proceeding was intended to provide needed guidance to the industry and the Commission's staff by

[1] For example, a group of carriers providing service, pursuant to an effective agreement, at fixed rates between the U.S. Pacific Coast and Japan expand their services to include transportation between Vancouver and Japan, and file an amendment with the Commission stating that they will agree upon rates for that foreign-to-foreign service as well.

[2] *E.g.*, Comments of ANERA et al. at 4–8; Comments of CAST and CML at 1–3.

[3] *See United States v. Aluminum Co. of America*, 148 F.2d 416 (2d Cir. 1945). The standard was codified by the Foreign Trade Antitrust Improvements Act, 15 U.S.C. 6a (1982). DOJ also has indicated that, in certain situations, it will weigh considerations of international comity in determining whether to assert antitrust jurisdiction. *See U.S. Department of Justice, Antitrust Guidelines for International Operations*, 53 FR 21583, 21595–96 (1988), *amended*, 53 FR 22426 (1988). Obtaining *in personam* jurisdiction over the persons involved is a separate matter.

[4] *E.g.*, Comments of PANYNJ at 2–5.

providing a formal resolution of this question.

The Supplementary Information to the proposed rule examined possible grounds for Shipping Act jurisdiction over foreign-to-foreign agreements. The Commission noted that one of Congress' fundamental purposes in enacting the 1984 Act was to place severe limits on the application of the antitrust laws to ocean liner shipping, and that it appeared to be inconsistent with that purpose to permit any gaps in the antitrust immunities available under the new statute. The Commission further observed that section 5(a) does not prohibit filing on a voluntary basis and that *in personam* Shipping Act jurisdiction can be established without difficulty over a carrier serving a foreign-to-foreign trade if that carrier also serves a U.S. port. The Commission acknowledged that it is without power to require the tariff filing of rates established pursuant to foreign-to-foreign agreements, but noted case law holding that an agency's jurisdiction to immunize anticompetitive activity from the antitrust laws is not necessarily limited to the scope of its power to regulate rates. Finally, it was observed that accepting foreign-to-foreign agreements appeared to further the harmonization of U.S. laws with the laws and practices of foreign trading partners.

Under the proposed rule, foreign-to-foreign agreements that are filed as amendments to existing FMC agreements covering contiguous U.S.-foreign trades would be accepted and further would be exempted, pursuant to section 16 of the 1984 Act, 46 U.S.C. app. 1715, from the public notice, 45-day waiting period and information requirements otherwise imposed by section 6, *id.* section 1705. The Commission suggested that there appeared to be no need to delay the effectiveness of such filings in order to examine the question of jurisdiction because, where foreign-to-foreign operations are so closely proximate to and so immediately associated with U.S.-foreign operations, the foreign-to-foreign operations could be presumed to have the required "direct, substantial and reasonably foreseeable" effects on U.S. commerce. 52 FR at 46504.

The proposed exemption would not be available to other foreign-to-foreign agreements that do not adjoin a U.S.-foreign trade. However, such agreements still would be accepted for filing and they would be processed under the usual procedures. The Commission explained that the effect on U.S. commerce of such agreements is not likely to be readily apparent and that they "should therefore be reviewed on a case-by-case basis." 52 FR at 46504.[5]

Comments

A. Industry

In addition to supporting the theories suggested by the Commission with regard to its jurisdiction over foreign-to-foreign agreements, some of the comments filed by the carriers, carrier associations and ports urged amendments to the proposed regulations. CAST and CML took exception to a brief statement in the Notice indicating that the Commission might decline to accept jurisdiction over a particular non-contiguous agreement; they argued that the agency's powers are limited to rejecting under section 6(b), 46 U.S.C. app. 1705(b), an agreement that does not meet the content requirements of section 5, *id.* section 1704, or seeking to enjoin an agreement that threatens to harm competition in the manner specified by section 6(g), *id.* section 1705(g).

With regard to the Commission's proposal that foreign-to-foreign agreements may be filed "where the parties deem such an agreement to have" the requisite effects on commerce, CAST and CML expressed concern that compliance with this standard might estop the parties from thereafter asserting, as part of a defense against an antitrust suit, that their agreement in fact did *not* have such effects; they suggested that the language of the proposed regulation be amended to read "that where the parties believe that such an agreement may arguably have * * *." Comments of CAST and CML at 16.[6]

PANYNJ and CAST/CML opposed the proposed exemption for contiguous trade foreign-to-foreign agreements. They argued that the Commission should not permit agreements with putatively substantial effects on U.S. commerce to gain antitrust immunity without prior review of their impact on competition or compliance with the normative provisions of the 1984 Act. PANYNJ asserted that it competes with Montreal for cargo and that ocean carriers calling at both ports "could agree with Canadian carriers and others in the Canadian/European trade to maintain a fixed rate differential between New York/New Jersey and Montreal," to the former's detriment. Comments of PANYNJ at 9. Such an agreement, it was argued, should not be eligible for immediate effectiveness. PANYNJ concluded that the Commission had not made the showing required by section 16 of the 1984 Act that the proposed exemption will not be unjustly discriminatory, result in a substantial reduction in competition or be detrimental to commerce.

B. Department of Justice

DOJ opposed the proposed rule on the ground that it would be an unlawful extension of the Commission's jurisdiction and submitted detailed arguments in support of its position. Specific references to these arguments are provided in the discussion below. In particular, DOJ contended that carriers that are parties to a foreign-to-foreign agreement are not "ocean common carriers" within the Commission's jurisdiction for purposes of that agreement, even if they *are* within the Commission's jurisdiction for purposes of other operations that do take place within U.S. foreign commerce. DOJ also asserted that, had Congress wished carriers to be able to file agreements in foreign-to-foreign trades on a voluntary basis under the 1984 Act, it would have been as unequivocal on that subject as it was about the tariff and agreement filing provisions that are set forth in the statute. In that regard, DOJ cited longstanding case law holding that displacement of the antitrust laws, no matter how desirable as a matter of economic policy, must be done by express Congressional mandate and not by implication or inference.

Discussion

The issue of law raised by this rulemaking proceeding may be analyzed from three perspectives:

1. Can the section 7(a)(1) antitrust immunity available through section 5(a)'s mandatory filing requirement also be obtained through voluntary filing of an otherwise excepted agreement?

2. Did section 7(a)(3)'s preservation of antitrust jurisdiction over certain foreign-to-foreign agreements also create Shipping Act jurisdiction to immunize such agreements?

3. Is the fact that a carrier serves U.S ports and is thereby subject to FMC jurisdiction sufficient to permit the Commission to accept for filing that carrier's foreign-to-foreign agreements?

---

[5] The proposed exemption also would not apply to a new agreement that included both foreign-to-foreign and U.S.-foreign transportation within its scope. Such an agreement would be processed according to the usual procedures because it would not be practical to segregate the strictly foreign-to-foreign aspects of the agreement for treatment under the exemption, while the rest of the agreement received normal processing, including the statutory 45-day waiting period.

[6] The same argument was made by Bermuda Container Line.

Based on the comments filed, particularly those of DOJ, and an extensive re-examination of the relevant legislative history of the 1984 Act and other materials, the Commission finds, for the reasons set forth below, that each of these interrelated questions must be answered in the negative and accordingly withdraws the proposed rule.

A. Early Developments: Creation of a Foreign-to-Foreign Exception and Elimination of a Voluntary Filing Option

The legislative reports that accompanied the 1984 Act specifically acknowledged the foundation laid by previous Congresses, particularly in the forging of a broad consensus on the need for clarified antitrust immunity and revised agreement filing procedures. *E.g.*, S. Rep. No. 3, 98th Cong., 1st Sess. 13–14 (1983). Thus, the early efforts to reform the Shipping Act, 1916 ("1916 Act"), are relevant to whether adoption of this proposed rule would be consistent with Congressional intent, particularly since, as set forth below, the status of foreign-to-foreign agreements was specifically considered during this period.

In July, 1979, Senator Inouye, the Chairman of the Merchant Marine Subcommittee of the Senate Commerce Committee, introduced a package of three bills that together constitute the progenitor of the 1984 Act. One of his proposals, the "Shipping Reform Act of 1979" (S. 1463), excluded foreign-to-foreign agreements from the jurisdiction of the Shipping Act, but provided a voluntary filing option for U.S. carriers:

> Agreements * * * in regard to transportation or transportation services between foreign countries or places that do not involve import or export of the transported goods into or out of the United States, shall not be subject to this Act; except that any common carrier by water in foreign commerce that is a citizen or resident of the United States may elect to submit any such agreement to which it is a party, or any modification or cancellation thereof, to the Commission for approval and when approved by the Commission such agreement, modification or cancellation whether or not subject to the antitrust laws of the United States shall be afforded all the exceptions from the antitrust laws of the United States that are afforded to waterborne foreign commerce under section 15 of this Act.

Ocean Shipping Act of 1979, Hearings before the Subcommittee on Merchant Marine and Tourism of the Senate Committee on Commerce, Science, and Transportation, 96th Cong., 1st Sess. 35–36 (1979) ("1979 Hearings"). Both aspects of this provision are significant because section 15 of the 1916 Act, 46 U.S.C. 814 (1982), did not explicitly exclude foreign-to-foreign agreements from its coverage, nor did it provide any guidance as to whether parties to such agreements could submit their arrangement voluntarily to the Commission to avoid potential antitrust liability.

On September 18, 1979, the Deputy Assistant Attorney General in charge of DOJ's Antitrust Division testified in support of the foreign-to-foreign exclusion but opposed the "voluntary submission" option:

> A second proposal that deserves attention is that part of S. 1463 that would revise Section 15 to exclude from its scope agreements to be performed entirely in a foreign country or involving transportation between foreign countries if such transportation does not relate to United States imports or exports. United States citizens and residents, however, would be given the option of filing such agreements for the purpose of securing antitrust immunity. Insofar as these provisions would redefine the scope of the FMC's jurisdiction and clarify any existing uncertainties, we believe them well justified. However, we see no reason to enact that part of this provision that would give carriers the option of filing agreements that are otherwise beyond the scope of the FMC's geographical jurisdiction solely for the purpose of obtaining antitrust immunity. Although antitrust immunity would be unnecessary for most such arrangements because they would also be beyond the jurisdictional reach of the antitrust laws, in a few situations the antitrust laws would apply in cases where the Shipping Act would not. For example, it has been held that although the FMC might lack jurisdiction over such conduct, the antitrust laws would prohibit United States-flag carriers from fixing rates for carrying United States government-financed cargo between foreign ports. See *Pacific Seafarers, Inc.* v. *Pacific Far East Lines, Inc.*, 404 F.2d 804 (D.C. Cir 1968). We see no cause to immunize this type of conduct from the antitrust laws.

1979 Hearings at 89 (statement of Donald L. Flexner).

In February, 1980, the Senate Commerce Committee staff released for further comments a draft revision of the 1916 Act, combining Senator Inouye's original package of bills. Foreign-to-foreign agreements were excepted from mandatory filing, the "voluntary submission" procedure remained, and the antitrust immunities provision specifically applied to both mandatory and voluntary filings. 1979 Hearings at 489–90, 498. However, on March 14, 1980, the Consultative Shipping Group ("CSG") of major European shipping nations and Japan submitted comments strongly supporting the exclusion of foreign-to-foreign agreements, but arguing that voluntary filing would undercut the exclusion:

> [The bill] in effect establishes the principle that the FMC has no jurisdiction over non-U.S. agreements. CSG Governments very much support this and consider that the Section would do a lot to remove sources of conflict between the United States and its CSG trading partners. The option for a U.S. party to file such an agreement destroys the whole rationale * * *.

Id. at 580.[7] On March 21, the Council of Europen and Japanese National Shipowners's Associations ("CENSA") submitted proposed amendments to the draft bill. CENSA's approach was similar to CSG's in the voluntary filing was deleted in favor of more extensive and specific antitrust exemptions. *Id.* at 640–41, 652.

On April 18, 1980, the Senate Commerce Committee reported out S. 2585, the final version of the February staff draft. S. Rep. No. 656, 96th Cong., 2d Sess. (1980). The exception of foreign-to-foreign agreements from mandatory filing was preserved. *Id.* at 22. However, "voluntary submission" was eliminated and was never revived during the subsequent work by the 97th and 98th Congresses that eventually produced the 1984 Act. The antitrust immunity provision of S. 2585 no longer extended to voluntary filings. *Id.* at 27.

Although the 1980 Senate Report did not address the removal of voluntary filing, it is logical to attribute that result to the opposition voiced, not only by DOJ, but also by interests that might have been expected to support voluntary filing in some form, *i.e.*, the CSG Governments and CENSA. Those groups instead wished the legislation to establish that foreign-to-foreign agreements were subject to neither the antitrust laws *nor* the Shipping Act. CSG in particular opposed voluntary filing because it feared an erosion of the new jurisdictional barrier between the Shipping Act and foreign-to-foreign agreements. Adoption now by the Commission of this proposed rule—which, in effect, would allow a carrier to expand unilaterally the ordinary scope of the FMC's jurisdiction—would contravene Congress's apparent decision to accommodate the concerns of DOJ, CSG and CENSA.[8]

---

[7] The U.S. Department of State previously had expressed similar concerns. 1979 Hearings at 218.

[8] In *Notice of Inquiry Concerning Interpretation of Section 8(a) and Section 8(c) of the Shipping Act of 1984*, ——F.M.C.——, 24 S.R.R. 131 (1987), the Commission concluded that it was unable to resolve administratively whether it is lawful for an ocean common carrier to file voluntarily tariffs for commodities that are exempted from mandatory filing under the 1984 Act. Unlike voluntary agreement filing, there was a consistent FMC policy, dating to 1961, of permitting voluntary tariff filing, and carrier interests had pointed out areas in

Continued

B. Section 7(a)(3) and Shipping Act Jurisdiction

In January, 1981, at the start of the 97th Congress, Senator Inouye continued his reform effort by introducing S. 125, which was basically identical to the bill passed by the Senate in April, 1980. In August, 1981, Senators Gorton, Stennis, Kasten and Inouye introduced S. 1593 as a possible alternative to S. 125. Both bills continued to provide unqualified antitrust immunity for foreign-to-foreign agreements.

In September, 1981, Sea-Land testified before the Senate and urged that the antitrust immunities provision be expanded so as to apply clearly to a variety of foreign-to-foreign transactions:

> [The bill] states that the antitrust laws shall not apply to any agreement or activity that applies solely to transportation services between foreign countries. We strongly support the provision, but urge that the record make clear its specific applicability to the following:
>
> 1. Instances involving the relay or transshipment of foreign-to-foreign cargoes at U.S. ports.
>
> 2. Instances involving the movement of foreign-to-foreign cargoes across the U.S. in a landbridge operation.
>
> 3. Instances of moving cargoes between a contiguous nation and another foreign nation via the United States.
>
> 4. Instances involving the movement of all cargoes between foreign countries, including U.S. Government impelled cargoes.

Hearings on S. 1593 and S. 125 before the Subcommittee on Merchant Marine of the Senate Commerce on Commerce, Science and Transportation, 97th Cong., 1st Sess. 185 (1981) (statement of Peter J. Finnerty). In response to a question from Senator Gorton, Sea-Land indicated that, like CSG and CENSA, it believed that foreign-to-foreign activities should be outside the reach of the Shipping Act as well as the antitrust laws:

> *Question.* When you urge that antitrust immunity be clearly extended to the various examples of foreign-to-foreign commerce that pass through the U.S., do you suggest that these be or not be subject to filing of agreements and approval by the Commission?
>
> Answer. We do not believe these agreements should be filed with the Commission. Foreign-to-foreign commerce should neither be subject to the Shipping Act nor to the antitrust laws.
>
> *Id.* at 189.

Sea-Land's fourth category of activities that it wanted clearly immunized from the antitrust laws, *i.e.*, "the movement of all cargoes between foreign countries, including U.S. Government impelled cargoes," appears to have been calculated to reverse *Pacific Seafarers, Inc. v. Pacific Far East Line, Inc.*, 404 F.2d 804 (D.C. Cir. 1968), *cert. denied*, 393 U.S. 1093 (1969). In *Pacific Seafarers, Inc. v. Atlantic & Gulf American-Flag Berth Operators*, 8 F.M.C. 461 (1965), the Commission had found no 1916 Act jurisdiction over an alleged conspiracy among American-flag shipping lines to destroy the complainant's business of carrying cargo financed by the U.S. Agency for International Development between Taiwan and South Vietnam. The Commission emphasized that the trade in question did not "involve as one terminus any port in a State, district, territory or possession of the United States." *Id.* at 465. Three years later, however, in separate antitrust litigation, the U.S. Court of Appeals for the District of Columbia Circuit found jurisdiction on the same facts under the Sherman Act, holding that, at least for antitrust purposes, "the sale of American-flag shipping services to foreigners is itself a form of United States foreign trade * * *." 404 F.2d at 813.[9]

In its opposition to the proposed rule in this proceeding, DOJ emphasized the Commission's 1965 *Pacific Seafarers* holding and attributed to Congress an intent to confirm that decision in enacting the 1984 Act. DOJ Comments at 4–5, 11. Although no explicit confirmation of that thesis appears in the legislative history, the 1968 antitrust decision of the Court of Appeals was brought to Congress' attention early and often, both by interests wishing explicitly to preserve the decision as a salutary example of the antitrust laws' application to foreign-to-foreign conduct outside the reach of the Shipping Act, *e.g.*, DOJ testimony in 1979 Hearings at 89 (quoted above), and, as Sea-Land's more indirect 1981 testimony shows, by interests wishing to remove such activities from the antitrust laws while keeping them also outside the Shipping Act.

On May 25, 1982, the Senate Commerce Committee reported out S. 1593. Section 5 of the bill described the agreements required to be filed and continued to except "agreements related to transportation to be performed within or between foreign countries." The antitrust immunity provision (section 8) was expanded slightly in its application to foreign-to-foreign agreements. Although there was no direct reference to *Pacific Seafarers* or the other types of foreign-to-foreign services described by Sea-Land, the prrovision now broadly included "any agreement or activity that relates solely to ocean or through transportation services within or between foreign countries whether or not via the United States." The Senate Committee's analysis of section 8 stated:

> By operation of section 8, this proposed Shipping Act is made the sole governing law *over the regulated ocean transportation activities* of common carriers, conferences, marine terminal operators, and shippers' councils *operating in the U.S. foreign commerce*. The intent is to resolve the conflicts between the Shipping Act and the antitrust laws in the maritime sector in favor of Shipping Act jurisdiction. Only the standards, remedies and penalties of this legislation will apply. *Carriers operating in the U.S. foreign commerce* will no longer face a dual risk of being regulated under both the Shipping Act and the antitrust laws for their conference activities.
>
> * * * * *
>
> In addition, transportation service within or between foreign countries, terminal services in foreign countries, as well as the activities of foreign shippers' councils are exempted from the antitrust laws. This is done in furtherance of the policy objective of the bill to harmonize U.S. shipping regulation more closely with that of our trading partners.

S. Rep. No. 414, 97th Cong., 2d Sess. 34 (1982) (emphases added.)

The Commission interprets this discussion as evidence of an understanding on the part of the Senate Committee that: (1) The primary antitrust immunity available under the Shipping Act, *i.e.*, that applicable to agreements required to be filed with the Commission under section 5, would govern carriers operating in the foreign commerce of the United States and thus subject to Commission regulation; (2) that a conceptually separate antitrust immunity also was desirable for certain foreign activities, including foreign-to-foreign carriage covered by section 5's exception from mandatory filing; and (3) this latter immunity was not a *quid* exchanged by carriers and other maritime entities for a regulation *quo*; on the contrary, it was an apparent continuation of Congress' efforts two years previous to address the concerns of DOJ, CSG and CENSA by removing the designated foreign activities from both the antitrust laws and the Shipping Act.

It should be noted at this juncture that some of the commentators in the instant rulemaking view their activities under foreign-to-foreign agreements as not subject to Commission regulation. In

---

which business operations and shipper-carrier relationships would be disrupted by a change in this policy. Id. at 135.

[9] As the Commission pointed out in the Supplementary Information to the proposed rule, the Court of Appeals also expressed some uncertainty whether the Commission's 1916 Act decision had been correct. 404 F.2d at 810 n.16, 818–19.

supporting the proposed exemption for contiguous trade foreign agreements, ANERA *et al.* stated:

> Regulation of these agreements should be minimal because * * * these agreements will not be subject to the tariff-filing and most other requirements of the Act. Thus, the exemption should not affect the Commission's regulation of foreign-to-foreign agreements.

Comments of ANERA *et al.* at 8. DOJ argues in its opposition to the proposed rule that Congress meant to authorize the Commission to administer antitrust immunity only where the antitrust laws are replaced by regulatory oversight. DOJ Comments at 3–4, 15.

On June 16, 1982, the House Merchant Marine Committee reported out its version of the new Shipping Act. The bill contained provisions excluding foreign-to-foreign agreements from mandatory filing and granting them antitrust immunity, which were identical in all important respects to the Senate provision reported out three weeks earlier. The House Committee addressed certain foreign-to-foreign operations that do touch the United States and are not confined to foreign countries; it was the Committee's view that such operations nonetheless were not subject to regulation by the Commission:

> [The provision] would cover both landbridge and all-water services between foreign countries that transit or touch the United States. They ought not lose their antitrust exemption due to that contact. They are not subject to the 1916 Act today, and the risk of antitrust issues arising is currently present. U.S.-flag carriers ought not be inhibited from participating in such trades.

H.R. Rep. No. 611 (Part I), 97th Cong., 2d Sess. 37 (1982).

The 97th Congress ended before the revised Shipping Act could be enacted. However, the reform process was renewed immediately at the beginning of the 98th Congress, and the ensuing committee reports showed no change in the assumptions and understandings discussed above. On February 17, 1983, the Senate Commerce Committee reported out S. 504, the "Shipping Act of 1983." With respect to section 4 of the bill, entitled "Agreements Within Scope of Act," the Senate Report said:

> This is a jurisdictional section * * *. It describes those types of agreements that are to be subject to Commission jurisdiction. These activities and agreements are exempted from the antitrust laws by section 8.

S. Rep. No. 3, 98th Cong., 1st Sess. 21 (1983). With respect to section 8, "Exemption from Antitrust Laws," the Committee echoed its 1982 report:

> Section 8 extends antitrust immunity to agreements of ocean common carriers * * *, and to other activities regulated under provisions of the bill.
>
> * * * * *
>
> The intent of these provisions is to confer antitrust immunity on agreements and conduct properly submitted to the regulatory process of the act.

Id. at 29. There was no comment this time on section 8's separate immunity for foreign-to-foreign agreements, which continued to be excepted from mandatory filing.

On March 1, 1983, the Senate passed the new Shipping Act. On April 12, the House Merchant Marine Committee reported out H.R. 1878, and repeated almost verbatim from the 1982 report its statement that landbridge and all-water services between foreign countries "that transit or touch the United States" were not subject to the Shipping Act but nevertheless might fall within the reach of the antitrust laws, unless an immunity was provided. H.R. Rep. No. 53 (Part I), 98th Cong., 1st Sess. 33 (1983).

At this point, the relevant agreement filing and antitrust immunity provisions of the Senate and House bills, including the provisions excepting foreign-to-foreign agreements from mandatory filing while granting them unqualified immunity, were essentially unchanged from 1982. However, on July 1, 1983, the House Judiciary Committee reported out H.R. 1878 with some amendments reflecting its pro-antitrust point of view. The Committee in effect adopted the position first espoused by DOJ in 1979 that the *Pacific Seafarers* antitrust decision by the Court of Appeals should be preserved. Thus, the qualifying phrase was added to what became section 7(a)(3) of the 1984 Act, withholding immunity from foreign-to-foreign agreements that had certain effects on United States commerce. The Committee's intent was:

> * * * to ensure that although the antitrust laws generally will not apply to transportation services within or between foreign countries, they will apply if such activity has a "direct, substantial and reasonably foreseeable effect on the commerce of the United States." This language * * * assures that the antitrust laws will still apply in a factual setting comparable to that in *Pacific Seafarers, Inc. v. Pacific Far East Line* * * *. The Committee notes that because agreements involving transportation between two foreign countries need not be filed under this Act (section 4(a)), the only remedy available to a plaintiff injured in the context of *Pacific Seafarers* would likely be under the antitrust laws.

H.R. Rep. No. 53 (Part 2), 98th Cong, 1st Sess. 32–33 (1983).

On October 6, 1983, the House Merchant Marine and Judiciary Committee announced a compromise version of the legislation, which brought about the last relevant changes to the 1984 Act before it became law. Abandoning its previous efforts in support of unqualified antitrust immunity for foreign-to-foreign shipping operations of all types, the Merchant Marine Committee acquiesced to the revival of Pacific Seafarers antitrust jurisdiction:

> Consistent with the concerns set forth in the report of the Judiciary Committee, [section 7(a)(3)] leaves the antitrust laws in place for factual settings comparable to that in *Pacific Seafarers* * * *.

129 Cong. Rec. H8124, 8125 (daily ed. Oct. 6, 1983). In addition, the joint statement appears to indicate an understanding between the two Committees that only agreements *required* to be filed with the Commission are eligible for the separate immunity provided by section 7 (a) (1):

> The compromise * * * excludes from antitrust immunity agreements among common carriers to establish, operate, or maintain a marine terminal in the United States. Because no antitrust immunity would be conferred on such agreements, the compromise amendment also eliminates the requirement * * * that they be filed.

Id. While the Committees there were discussing a type of terminal agreement not involved in this proceeding, such agreements now are coupled with foreign-to-foreign agreements in section 5(a)'s exception to agreements that are required to be filed.

In sum, the legislative history provides no support for the proposition that, by preserving antitrust jurisdiction over foreign-to-foreign agreements with "direct, substantial and reasonably foreseeable" effects on U.S. commerce, Congress meant to expand simultaneously the reach of the Shipping Act to make available to parties to such agreements a way of immunizing themselves. On the contrary, both the House and the Senate were consistently aware that there were certain maritime activities that never had been regulated under the Shipping Act, but that nevertheless could be reached under the antitrust laws. The only question raised before Congress concerned the application of the antitrust laws to such activities, and there is no evidence of a suggestion from any quarter that the issue be resolved by trading antitrust jurisdiction for increased Shipping Act jurisdiction.

It also should be noted that incorporation of an "effects" jurisdiction test into the 1984 Act would have represented a fundamental change in established law. In administering section 15 of the 1916 Act, the

Commission several times rejected the argument that the applicability of the statute's filing requirements to agreements in U.S. foreign commerce should, like the antitrust laws, vary according to the commercial or competitive impact of such agreements. *Agreement No. 9955–1—A/S Billabong, et al.*, 18 F.M.C. 426, 460–62 (1975); *Investigation of Practices, Operations, Actions and Agreements—West Coast of Italy, Sicilian and Adriatic Ports/ North Atlantic Range Trade*, 10 F.M.C. 95, 112 (1966) ("[T]he Shipping Act itself specifically has extraterritorial application; it does not require demonstrable impact on our commerce."); *Unapproved Section 15 Agreements—Spanish/Portugese Trade*, 8 F.M.C. 596, 600–601 (1965) ("[I]n requiring the filing and approval of such agreements as a condition procedent to their lawfulness, Congress itself has determined that the agreements by their very nature have an 'effect' on our foreign commerce.") The jurisdictional reach of section 15, therefore, depended only on whether a particular agreement by its terms fell within one of the statute's categories. *Volkswagenwerk v. FMC*, 390 U.S. 261, 273–77 (1968). The precise nature and degree of an agreement's commercial impact was, in broad terms, relevant instead to the separate issue of approvability. *FMC v. Svenska Amerika Linien*, 390 U.S. 238 (1968); *Unapproved Section 15 Agreements—Spanish/Portugese Trade*, 8 F.M.C. at 601.

Despite its abolishment of pre-implementation approval, the 1984 Act preserves this distinction. Section 4, 46 U.S.C. app. 1703, continues to define the agreements subject to its jurisdiction by party and subject matter—in short, by an agreement's terminology. An agreement's actual commercial impact is now relevant, under section 6(g), to whether the Commission should seek an injunction against its implementation. If Congress had meant to create a deviation from this longstanding dichotomy, so as to allow FMC jurisdiction over foreign-to-foreign agreements to be determined by commercial effect, it could be expected to have spoken explicitly and precisely. Since it did not, it would be improper for the Commission to impute such an intent.

C. "Common Carrier" and Subject Matter Jurisdiction

As already indicated, any effort to offset the *Pacific Seafarers* amendment to section 7(a)(3) necessarily implicates the jurisdictional boundaries set out in section 4. According to section 4, the 1984 Act applies to particular concerted activities when those activities are engaged in by two or more "ocean common carriers." Section 3(6), 46 U.S.C. app. 1702(6), states in relevant part:

> "Common carrier" means a person holding itself out to the general public to provide transportation by water of passengers or cargo between the United States and a foreign country for compensation that—
> * * * * * *
> Utilizes, for all or part of that transportation, a vessel operating on the high seas or the Great Lakes between a port in the United States and a port in a foreign country * * *.

DOJ contends that carrier parties to foreign-to-foreign agreements are not "common carriers" insofar as those operations are concerned, and that the Commission may not exercise jurisdiction over such agreements even though it may be able to establish *in personam* jurisdiction over the agreements' parties. It argues that the proposed rule, if adopted, would contravene *Austasia Intermodal Lines, Ltd. v. FMC*, 580 F.2d 642 (D.C. Cir. 1978) ("*ACE*"). Austasia Intermodal Lines, Ltd., d/b/a Austasia Container Express ("ACE"), offered through transportation from Detroit to Australia. The service consisted of truck transport from Detroit to Windsor, Ontario, rail transport across Canada to Vancouver, B.C., and ocean transport from Vancouver to Australia. After an investigation, the Commission ordered ACE to cease its service until it complied with the 1916 Act's tariff filing requirements. The Court of Appeals reversed, holding that ACE was not a common carrier within the 1916 Act.[10] The court stated:

> According to the statute, a common carrier by water in foreign commerce is one that transports people or cargo by water between the United States and a foreign country; thus, by clear implication, a United States port is required somewhere along the route.

46 U.S.C. 801 (1982). As DOJ points out, the 1984 Act added the requirement that the covered transportation must utilize "a vessel operating * * * between a port in the United States and a port in a foreign country."

> As stated earlier, * * * the definition clearly requires that a carrier make use of a United States port at some point on its own route or a through route in which it participates. Therefore, because ACE ship[s] by land rather than by water out of the United States and then transport[s] cargo solely between foreign ports, we do not believe that [it falls] within the statutory definition on which the Commission's power to require tariff filing is based.

Id. at 646.

In the fall of 1981, the Senate Commerce Committee had before it S. 125 and S. 1593, the two "alternative" reform bills. S. 125 sought to undo *ACE* by defining "common carrier by water in foreign commerce" to include any carrier engaged in export or import commerce "whether or not its service operates through or originates or terminates at ports of the United States or its territories or possessions." (Section 102(5)). S. 1593 retained the traditional definition from the 1916 Act.

Subsequently, it was agreed that the *ACE* issue should be taken up separately from the general revision of the Shipping Act. When the Commerce Committee reported out S. 1593 on May 25, 1982, it not only left *ACE* undisturbed, but drew the following additional distinctions:

> [The definition of "common carrier"] applies only to the extent the passengers or cargo transported are loaded or discharged at a U.S. port. Thus, a liner carrier that accepts U.S.-origin intermodal cargo (or, for that matter, Canadian-origin cargo) at Halifax and calls at Boston for further loading en route to Rotterdam would be a "common carrier" for purposes of the bill only with respect to the Boston-Rotterdam leg of its voyage.

S. Rep. No. 414, 97th Cong., 2d Sess. 26 (1982).

On the same day, hearings were held in the Senate on S. 2414, which would have defined "common carrier by water in foreign commerce" to include:

> * * * a common carrier engaged in the ocean transportation of property originating in or destined to a United States point by way of a port in a nation contiguous to the United States * * *.

Canadian Cargo Diversion, Hearing before the Subcommittee on Merchant Marine of the Senate Committee on Commerce, Science and Transportation on S. 2414, 97th Cong., 2d Sess. 3–4 (1982). The Commission, which was essentially neutral on the legislation, described its jurisdictional impact as follows:

> [T]he legislation does not, nor could it, extend the scope of the Shipping Act to carriers providing transportation which takes place wholly outside the United States. For example, a carrier providing transportation from a port or point in Canada or Mexico to Europe or Asia cannot be subject to U.S. regulations, even if the cargo originated in the United States. A carrier, in order to be subject to regulation, must undertake to transport the cargo within the United States.

Id. at 18 (statement of C. Jonathan Benner, General Counsel).

---

[10] Section 1 of the 1916 Act defined a "common carrier by water in foreign commerce" as a common carrier * * * engaged in the transportation by water of passengers or property between the United States or any of its Districts, Territories, or possessions and a foreign country, whether in the import or export trade * * *.

The *ACE* bill died in committee, with no report issued. Consequently, on February 17, 1983, when the revised Shipping Act was reported out again in the new Congress, with "common carrier" defined as it is now by the 1984 Act, the Senate Commerce Committee repeated its comments from 1982:

> This definition applies only to the extent the passengers or cargo transported are loaded or discharged at a U.S. port. Thus, a liner carrier that accepts U.S.-origin intermodal cargo (or, for that matter, Canadian-origin cargo) at Halifax and calls at Boston for further loading en route to Rotterdam would be a "common carrier" for purposes of the bill only with respect to the Boston-Rotterdam leg of its voyage.

S. Rep. No. 3, 98th Cong., 1st Sess. 19 (1983).

The importance of *ACE* to this proceeding lies in the fact that, unlike the antitrust laws, the Shipping Act is industry-specific: it regulates only particular activities engaged in by particular entities. *ACE* established that the breadth of the Commission's power to require tariff filing is ultimately coextensive with the statutory definition of "common carrier": only persons meeting that definition must comply with the Shipping Act's tariff provisions. 580 F.2d at 646. Similarly, the definition of "common carrier" in section 3(6) and the employment of that term in section 4 circumscribes the agreements over which the Commission may exercise subject matter jurisdiction. *Compare Atchison, Topeka and Santa Fe Railway Co. v. United States,* 597 F.2d 593 (7th Cir. 1979). The bill to undo *ACE* would have broadened the operative definition only to the extent necessary to reach carriers actually accepting or releasing cargo within the United States, and there seems to have been a general assumption in 1982 that the Shipping Act could not be amended to encompass "contiguous" operations confined to Canada or Mexico (or, *a fortiori,* operations between more distant foreign nations). In light of that legislative history and the definitional distinctions repeatedly drawn by the Senate between U.S.-foreign and foreign-to-foreign legs *of the same voyage,* we conclude that section 4's subject matter jurisdiction applies only when the activities listed therein are engaged in by two or more persons "holding [themselves] out to the general public to provide transportation by water of passengers or cargo," 46 U.S.C. app. 1702(6), and, further, only to the extent that the transportation covered by the particular agreement is "between the United States and a foreign country * * *." *Id.*

Thus, persons who enter into agreements governing, in whole or in part, transportation between foreign ports are not "common carriers" to the extent of such concerted activities,[11] and the activities themselves are not "agreements" within the meaning of section 4.[12] Given the Commission's earlier conclusions against the concepts of voluntary filing and Shipping Act jurisdiction implied from section 7(a)(3), we conclude finally that to the extent concerted activities in ocean trades between foreign nations have "direct, substantial and reasonably foreseeable" effects on U.S. commerce, they are within the jurisdiction of the antitrust laws pursuant to section 7(a)(3) and are not eligible for the antitrust immunity offered by sections 4, 5(a) and 7(a)(1).[13] The issue whether such activities should be made eligible for Shipping Act immunity, for the policy reasons described in the Supplementary Information to the proposed rule, must be resolved by Congress in the first instance. The Commission intends to include this issue in the report it is preparing pursuant to section 18 of the Act, 46 U.S.C. app. 1717, for submission to Congress in 1989.

Conclusion

The Commission concludes that it is without jurisdiction to regulate agreements among ocean carriers regarding foreign-to-foreign transportation. Such agreements no longer will be accepted for filing under section 5 of the 1984 Act.

Therefore, it is ordered, that the proposed rule is withdrawn and this proceeding is discontinued.

By the Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 88-28754 Filed 12-13-88; 8:45 am]

BILLING CODE 6730-01-M

[11] The two Canadian commentators on the Commission's proposed rule, CAST and CML, regard themselves as presently removed from the Shipping Act:

> "Neither CAST nor CML presently provide transportation by water between a port in the United States and a port in a foreign country. In the future, however, either or both of these carriers could operate feeder services between one or more U.S. Great Lakes ports and, for example, Montreal for through shipment to and from Europe or provide line haul vessel calls at U.S. ports in connection with other trades in the foreign commerce of the United States. Thus either CAST or CML, or both, could become an 'ocean common carrier' under the Act." Comments of CAST and CML at 4.

[12] Under this analysis, section 5(a)'s exception for foreign-to-foreign agreements is, in theory, not strictly necessary.

[13] The precedents that lend support to FMC jurisdiction over some types of foreign-to-foreign transportation, *e.g., Trans-Pacific Freight Conference of Japan v. FMC,* 314 F.2d 928 (1963), precede both *ACE* and the repeated expressions of Congressional will in the legislative history of the 1984 Act that the new statute should be limited precisely to transportation between the United States and a foreign country. The Commission now is bound to treat an agreement that encompasses both U.S.-foreign and foreign-to-foreign carriage as separate agreements, with only the former subject to the Shipping Act. *Compare Trans-Pacific Freight Conference of Japan v. FMC,* 314 F.2d at 933–34 n.6; *Oranje Line v. Anchor Line Ltd.,* 5 F.M.B. 714, 727–29 (1959).

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1056

[Ex Parte No. MC-19 (Sub-No. 39)]

Motor Carriers; Refund of Tariff Charges on Shipments With Less Than Total Loss or Destruction

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rule making.

SUMMARY: The Commission proposes to revise its regulation at 49 CFR Part 1056 governing the practices of motor carriers of household goods to require the refunding of a pro rata portion of the freight charges to shippers on shipments with less than total loss or destruction in transit at the time corresponding loss and damage claims are processed. This proceeding was initiated in response to the results of a staff study by the Office of Compliance and Consumer Assistance that indicated movers were experiencing great difficulty in complying with the present rule at 49 CFR 1056.15(b) requiring them to deduct proportional freight charges at the time the household goods are delivered to the consumer. The staff study also indicated that, in regard to the movers included in the study, few refunds of such charges were made, either at delivery or later. Our proposal will eliminate the difficulties the moving industry has experienced in complying with the present rule while, at the same time, assuring that shippers will be refunded tariff charges for articles lost or destroyed in transit.

DATE: Comments are due on January 13, 1989.

ADDRESS: Send an original and 10 copies of comments referring Ex Parte No. MC-19 (Sub No. 39) to: Case Control Branch, Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Heber P. Hardy (202) 275-7148, or John W. Fristoe, (202) 275-7844. TDD for hearing impaired: (202) 275-1721.

SUPPLEMENTARY INFORMATION: The Commission's decision contains

additional information. To obtain a copy of the decision, write to the Office of the Secretary, Room 2215, Interstate Commerce Commission, 12th Street and Constitution Avenue NW., Washington, DC 20423, or call (202) 275–7428 (assistance for the hearing impaired is available through TDD Services at (202) 275–1721) or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters.

Energy and Environment

We preliminarily conclude that the proposed rules will not significantly affect the quality of the human environment or the conservation of energy resources.

Regulatory Flexibility

We certify that this action will not have a significant impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 1056

Moving of household goods.

Decided: December 2, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

Title 49, Chapter X, Part 1056 of the Code of Federal Regulations is proposed to be amended as follows:

PART 1056—TRANSPORTATION OF HOUSEHOLD GOODS IN INTERSTATE OR FOREIGN COMMERCE

1. The authority citation for Part 1056 would continue to read as follows:

Authority: 49 U.S.C. 10321, 11109, 11110, and 5 U.S.C. 553.

2. Section 1056.15(b) is proposed to be revised to read as follows:

§ 1056.15 Collection of freight charges on household goods shipments involving loss or destruction in transit.

* * * * *

(b) In the event that any portion, but less than all, of a shipment of household goods is lost or destroyed in transit, a motor common carrier of household goods in interstate or foreign commerce shall, at the time it disposes of claims for loss, damage, or injury to the articles in the shipment as provided in Part 1005 of this subchapter, refund that portion of its published freight charges (including any charges for accessorial or terminal services) corresponding to that portion of the shipment which is lost or destroyed in transit. To calculate the charges applicable to the shipment as delivered, the carrier shall multiply the percentage corresponding to the portion of the shipment delivered by the total charges (including accessorial and terminal charges) applicable to the shipment tendered by the shipper. If the charges computed in the manner set forth above exceed the charges otherwise applicable to the shipment as delivered, the lesser of those charges shall apply. The provisions of this subsection shall apply only to the transportation of household goods as defined in § 1056.1(b)(1) of these rules. Notwithstanding any other provisions of this subsection, a carrier shall collect, and the shipper shall be required to pay, that proportion of any accessorial or terminal services rendered which corresponds to the proportion of the shipment not lost or destroyed in transit and any specific valuation charge that may be due.

The provisions of this subsection shall not be applicable to the extent that any such loss or destruction is due to the act or omission of the shipper. Carriers shall determine, at their own expense, the proportion of the shipment not lost or destroyed in transit.

* * * * *

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Temporary Emergency Food Assistance Program; Announcement of Additional Commodities Available and Encouragement of Food Processing and Distribution by Eligible Recipient Agencies

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces the availability of additional commodities for donation under the Temporary Emergency Food Assistance Program and to soup kitchens and food banks as required by the Hunger Prevention Act of 1988. The Department is also soliciting applications from organizations capable of processing surplus agricultural commodities into end products suitable for distribution through the Temporary Emergency Food Assistance Program. The organizations must agree to process and package the commodities in household size containers and distribute the products at no cost to State agencies responsible for the administration of the Temporary Emergency Food Assistance Program.

EFFECTIVE DATE: December 14, 1988.

FOR FURTHER INFORMATION CONTACT: Susan Proden, Chief, Program Administration Branch, Food Distribution Division, on telephone (703) 756–3660 or write to the address at the end of this notice.

SUPPLEMENTARY INFORMATION: This action has been reviewed under Executive Order 12291 and has been classified "nonmajor" because it meets none of the criteria in the Executive Order for classification as a major rule. The action will not have an annual effect on the economy of $100 million or more; it will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action is not a rule as defined in the Regulatory Flexibility Act (5 U.S.C. 601–612) and thus is exempt from the provisions of that Act. The purpose of the action is to announce the availability of additional commodities for the Temporary Emergency Food Assistance Program and to solicit applications from agencies capable of processing surplus agricultural commodities into end products suitable for distribution through the Temporary Emergency Food Assistance Program.

Background and Need for Action

Availability of Commodities

Donations of commodities to needy households were initiated by President Reagan in 1981 as part of efforts to reduce huge stockpiles of government-owned commodities. These donations responded to concern over the costs to taxpayers of storing vast quantities of food, while at a time of high unemployment there were persons in need of food assistance. The Temporary Emergency Food Assistance Program was codified in the Temporary Emergency Food Assistance Act (TEFAA) of 1983 (7 U.S.C. 612c note). Foods made available for distribution under TEFAA were limited to amounts determined by the Secretary to be in excess of the quantities needed to carry out other programs, including Commodity Credit Corporation (CCC) sales obligations and domestic and foreign food assistance programs.

Since 1983, the supply of available commodities has been drastically reduced. These reductions are the result of changes in the agricultural price-support programs which have brought supply and demand into better balance, and accelerated donations and sales. On October 6, 1988, the Food and Nutrition Service (FNS) published a notice (53 FR 39324) announcing the types and amounts of commodities acquired by the CCC under its price support activities to be made available for distribution through the Temporary Emergency Food Assistance Program during Fiscal Year 1989. The commodities announced were flour, cornmeal and butter. The Department also announced that rice, cheese, nonfat dry milk and honey could not be distributed because there were no surpluses of these commodities.

Since the publication of that notice, supplies of honey have increased, and USDA anticipates that distribution of honey will resume this spring.

Sections 213 and 214 of the TEFAA, as added by section 104 of the Hunger Prevention Act of 1988 (Pub. L. 100–435, enacted on September 19, 1988), require the Secretary to spend $120 million in Fiscal Year 1989 to purchase, process, and distribute commodities for household consumption in addition to those otherwise provided under the temporary emergency program. Further, section 110 of the Hunger Prevention Act requires the Secretary to spend an additional $40 million in Fiscal Year 1989 to purchase, process and distribute commodities for soup kitchens and food banks. The October 6 notice noted that types and quantities of commodities to be purchased under both programs were not known at that time. Since that time, the Secretary has determined that the following additional commodities will be purchased for distribution to households through the Temporary Emergency Food Assistance Program during Fiscal Year 1989: Peanut butter, canned beans, canned pork, raisins and dried egg mix. The Secretary has also determined that the following commodities will be purchased in institutional size packages for distribution to soup kitchens and food banks: Canned pork, canned luncheon meat, dry beans, green split peas, lentils, dehydrated potatoes, canned pears, canned grapefruit juice, canned orange juice and canned sweet potatoes. The amounts to be purchased will depend on the price USDA must pay. The Department intends to have these commodities available for distribution to States beginning in January.

Processing Agreements

Section 220 of the Hunger Prevention Act requires the Secretary to solicit applications from organizations interested in processing surplus commodities into end products suitable for distribution to households through the Temporary Emergency Food Assistance Program and distribute such

products free of charge to State agencies administering the program. To receive commodities for processing, the organization must be an "eligible recipient agency" as defined in section 201A of the TEFAA. An eligible recipient agency is a public or nonprofit organization which administers certain feeding programs enumerated in the body of section 201A. The Secretary, however, can only solicit applications to the extent that CCC inventory levels permit. Section 220 also requires the Secretary to approve or disapprove any applications not later than 60 days of receipt and, if disapproved, to inform the applicants of the reasons for disapproval.

The commodities available for further processing at this time are wheat, corn and butter. In order for organizations to receive commodities for processing they must enter into agreements with the Department. The primary provisions which the Department intends to incorporate in any agreement under this section are as follows:

1. The organization must enter into processing contracts with food processors to convert and package donated commodities into end products, such as flour, suitable for distribution to households through the Temporary Emergency Food Assistance Program.

2. Title to the donated food and their end products will pass to the approved organization upon delivery to the organization.

3. The Department will *not* pay any transportation, storage, handling, or other warehouse charges or any processing fees which may accrue after title to the commodities is transferred to the organization.

4. The organization's agreement with food processors must include, at a minimum, the following provisions:

(a) Processors will meet certain minimum yield factors;

(b) The end product will be packaged and labeled according to guidelines established by the Department;

(c) The processor will maintain accurate and complete records pertaining to the receipt, disposal and inventory of the donated food and their end products;

(d) The processor will maintain an effective quality control system for the duration of the contract; and

(e) The processors will permit the Secretary of Agriculture, the Comptroller General of the United States or any other duly authorized representative to inspect and inventory the donated food and end products, inspect and audit all records, including financial records, pertaining to the processing and distribution of the donated food.

5. Once the commodities are processed, the organization will donate the end products, free of charge, only to State agencies that have entered into an agreement with USDA for the distribution of the products to needy households under the Temporary Emergency Food Assistance Program.

6. The organization will be strictly liable to the Department for any improper distribution, damage or loss of the donated food and its end products prior to its acceptance by the State agency.

7. The organization will maintain complete and accurate records pertaining to the donated food and end products and will be required to retain all records for a period of three years.

8. The organization will permit the Secretary of Agriculture, the Comptroller General of the United States or any other duly recognized representative to inspect and inventory the donated food and end products, inspect and audit all records, including financial records, pertaining to the processing and distribution of the donated food.

Organizations interested in participating in this program should direct their applications to Ms. Susan Proden, Chief, Program Administration Branch, Food Distribution Division, Food and Nutrition Service, USDA, Alexandria, Virginia 22302 or telephone (703) 756–3660. Applications must include assurances that the applicant will process commodities received into end products suitable for distribution under the Temporary Emergency Food Assistance Program, will package such products for individual household use, and will distribute such products to State agencies responsible for administering the program at no cost to the State.

Anna Kondratas,

Administrator.

December 8, 1988.

BILLING CODE 3410–30–M

Food Safety and Inspection Service

[Docket No. 86–020N]

Policy Change; Oversight of Custom Exempt Establishments

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice of policy change.

SUMMARY: The Food Safety and Inspection Service (FSIS) is changing its policy regarding the oversight of red meat custom exempt establishments in designated States, i.e., establishments that only conduct red meat custom exempt activities and are not subject to the routine inspection requirements of the Federal Meat Inspection Act (FMIA), by discontinuing the current quarterly reviews of such establishments. Instead, FSIS will vary the frequency of reviews of such establishments and FSIS will intensify its review efforts on those custom exempt red meat establishments with a history of noncompliance with the custom exempt requirements of the FMIA, as well as the adulteration and misbranding provisions of the Act. FSIS is not, however, changing its review process of custom exempt operations which are conducted at federally inspected establishments.

EFFECTIVE DATE: January 13, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Robert W. Gonter, Assistant Deputy Administrator, Compliance Program ((202) 447–7745) or Dr. Gerald R. Snyder, Director, Federal-State Relations ((202) 447–6313) Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

SUPPLEMENTARY INFORMATION:

Background

Section 23 of the FMIA (21 U.S.C. 623) provides that certain specified slaughtering and preparation operations, referred to herein as custom exempt activities that are conducted at establishments that conduct such operations for commerce, are not subject to the routine inspection requirements of Title I of the FMIA, provided the specified slaughtering and preparation operations meet the requirements set forth in section 23 of the FMIA and the regulations promulgated thereunder. These custom exempt activities may comprise the total business of an establishment, in which case the establishment is not subject to the routine inspection requirements of the FMIA, or these custom exempt activities may comprise only a portion of the total business of an establishment that also conducts operations which are subject to the routine inspection requirements of the FMIA. However, although these custom exempt activities are not subject to the routine inspection requirements of the FMIA, they are subject to the adulteration and misbranding provisions of the FMIA.

In particular, section 23(a) of the FMIA provides that the following custom operations conducted at an establishment for commerce are not subject to the routine inspection

BEST COPY AVAILABLE

requirements of the FMIA, if the establishment complies with the regulations promulgated under section 23(a) of the FMIA which provide, among other things, that custom-exempt activities must be conducted under sanitary conditions, that custom prepared product must be marked "Not For Sale", and that custom prepared product must be separated at all times from products prepared for sale:

1. The slaughtering by any person of animals of his own raising, and the preparation by him and transportation in commerce of the carcasses, parts thereof, meat and meat food products of such animals exclusively for use by him and members of his household and his nonpaying guest and employees;

2. The custom slaughter by any person, firm, or corporation of cattle, sheep, swine or goats delivered by the owner thereof for such slaughter, and the preparation by such slaughter and transportation in commerce of the carcasses, parts thereof, meat and meat food products of such animals, exclusively for use, in the household of such owner, by him and members of his household and his nonpaying guests and employees; and

3. The custom preparation by any person, firm, or corporation of carcasses, parts thereof, meat or meat food products, derived from the slaughter by any person of cattle, sheep, swine, or goats of his own raising, or from game animals, delivered by the owner thereof for such custom preparation, and transportation in commerce of such custom prepared articles, exclusively for use in the household of such owner, by him and members of his household and his nonpaying guest and employees.

The custom exempt provisions of section 23(a) of the FMIA (21 U.S.C. 623(a)) also apply to custom exempt activities conducted at establishments that conduct their operations solely within a designated State. A designated State is a State designated for Federal inspection either because it does not have or is not effectively enforcing an inspection program which imposes requirements at least equal to those of the FMIA. In nondesignated States, i.e., States that operate their own inspection program, custom exempt activities conducted at establishments that operate solely within that State are governed by the laws of the nondesignated State. However, such States must provide for State inspection programs that are at least equal to the Federal inspection program.

FSIS conducted an indepth study of its custom exempt activities in red meat custom exempt establishments and federally inspected establishments that conduct red meat custom exempt activities and, in February 1986, issued a report titled "Oversight of Custom Exempt Activities." [1] The study was conductd to assess the effectiveness and uniformity of present procedures utilized in regard to red meat custom exempt activities and to develop options and recommendations for improving the oversight of red meat custom exempt activities. As a result of this study, the Agency has concluded that the current practice of conducting quarterly reviews of red meat custom exempt establishments, referred to in the study as custom exempt plants, is an inefficient use of Agency resources. With rapidly escalating inspection costs and severe budget constraints, FSIS is compelled to make the most efficient use possible of its limited resources, while at the same time continuing to protect the health and welfare of consumers.

The Agency believes that red meat custom exempt establishments should be reviewed on a risk basis. That is, Agency resources should be allocated in such a manner that they are utilized to focus more frequently upon those red meat custom exempt establishments that present the greatest possible amount of potential risk to consumers in regard to violating the adulteration, misbranding, or custom exempt provisions of the FMIA. Therefore, FSIS is changing its policy with respect to the review of red meat custom exempt establishments. The current practice of conducting quarterly reviews of all such custom exempt establishments will be discontinued. The Agency is not, however, changing its manner of review of custom exempt operations conducted in federally inspected establishments. FSIS will continue to conduct periodic reviews of red meat custom exempt operations being conducted at federally inspected establishments, that operate in commerce or within designated States. These reviews of custom exempt operation being conducted at federally inspected establishments are part of the usual review process of these official establishments.

FSIS will institute an oversight program that will provide for reviews to be scheduled on the basis of a risk assessment of each red meat custom exempt establishment. The frequency of the reviews will be based on the establishment's history of compliance with the custom exemption, adulteration and misbranding provisions of the FMIA, prior reviews, and other information which may be available to FSIS on the establishment's activities. Based on this information, red meat custom exempt establishments will be assigned one of four risk categories. The number of reviews of each plant will range from a minimum of once a year to the maximum necessary, depending on the risk category of the establishment. By using a risk-based assessment of red meat custom exempt establishments, the Agency will be able to conduct more frequent reviews of those establishments with a history of noncompliance with the requirements for custom exempt establishments under the FMIA, as well as the adulteration and misbranding provisions of the Act.

Under section 301 of the FMIA, the Secretary of Agriculture is authorized, whenever he determines that it would effectuate the purposes of the FMIA, to cooperate with the appropriate State agencies in developing and administering State meat inspection programs that have requirements that are at least equal to those of the Federal meat inspection program. Under such cooperative agreements, the Federal Government is authorized to contribute up to 50 percent of the estimated total cost of the State program. States that are approved to participate in such a cooperative program maintain a State meat inspection program and as part of this program conduct reviews of State plants that are exempt from inspection under the State laws and regulations. Such reviews are conducted in a manner that is at least "equal to" reviews conducted under the Federal inspection program.

States with their own meat inspection program will continue their review of red meat custom exempt establishments and red meat custom exempt operations under the existing cooperative agreements with the Department. However, as such States are required to operate a meat inspection program that has requirements that are at least equal to those in the Federal meat inspection program a revised plan for reviews of custom exempt establishments, incorporating a risk-based approach rather than a uniform frequency of inspection, should be provided in their State Performance Plan and be approved by the Agency.

California and Minnesota, which do not operate State inspection programs, and are therefore designated States, presently are conducting compliance reviews of custom exempt establishments in those States under a cooperative agreement with FSIS in

[1] A copy of the study is on display with the FSIS Hearing Clerk, Policy Office, Room 3171, South Agriculture Building, U.S. Department of Agriculture, Washington, DC 20250. Upon request, a copy of the study will be provided free of charge.

accordance with the provisions of 7 U.S.C. 450. Under such a cooperative agreement, FSIS reimburses the States for the expenses of those reviews. These agreements will be revised to incorporate a risk-based approach to the reviews of red meat custom exempt establishments. FSIS desires to expand this concept into other States that can meet the requirements of 7 U.S.C. 450 for such agreements. FSIS encourages the Governors of any States who desire to enter into a cooperative agreement for conducting compliance reviews of red meat custom exempt establishments that distribute product solely within their borders to contact the appropriate FSIS regional office reviewing custom exempt establishments in their States.

Implementation of this alternate approach to determining the frequency of reviews of custom exempt establishments will not in any way relieve red meat custom exempt establishments of the responsibility to comply with currently applicable provisions of the FMIA and related regulations. The Agency intends to use all its available enforcement tools, where appropriate, to assure that custom exempt establishments and custom exempt operations conducted in federally inspected establishments comply with all of the applicable provisions of the FMIA. Such enforcement actions can include, under appropriate circumstances: The detention of animals and meat products; the retention of animals and meat products and their condemnations, the seizing and condemnation of animals and meat products pursuant to judicial procedure; the use of injunctions to, for example, prevent establishments from operating; the taking of criminal action against establishments, their operators and other persons responsibly connected to the establishment; and the loss of exempt status.

FSIS would also like to make it clear at this time that when custom exempt establishments that operate in commerce or within a designated State violate the provisions of section 23(a) of the FMIA, they lose their exempt status and can no longer produce product without inspection. Further, if a custom exempt operator knows that an animal or meat product is diseased or adulterated, he must, by law, refuse to prepare it.

Done at Washington, DC, on December 9, 1988.

Lester M. Crawford,

Administrator, Food Safety and Inspection Service.

BILLING CODE 3410-DM-M

DEPARTMENT OF COMMERCE

International Trade Administration

Export Trade Certificate of Review

AGENCY: Department of Commerce.

ACTION: Notice of application for an amendment to an Export Trade Certificate or Review.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an amendment to an Export Trade Certificate of Review. This noitice summarizes the amendment and requests comments relevant to whether the Certificate should be amended.

FOR FURTHER INFORMATION CONTACT: Thomas H. Stillman, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A Certificate of Review protects the holder and the members identified in the Certificate from state and federal government antitrust actions and from private, treble damage antitrust actions for the export conduct specified in the Certificate and carried out in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a Certificate should be issued. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 1223, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 86-A0003."

OETCA has received the following application for an amendment to Export Trade Certificate of Review #86-00003, which was issued on July 11, 1986 (51 FR 26031, July 18, 1986). A name change by the Certificate holder from "International Shippers Association" to "First International Shippers Association" was announced January 21, 1988 (53 FR 1656).

Applicant: First International Shippers Association ("FISA"), 821 Second Avenue, Suite 1400, Seattle, Washington 98104, contact: Peter A. Friedmann, legal counsel, Telphone: 202/467-5900.

Application #: 86-A0003.

Date Deemed Submitted: December 6, 1988.

Summary of the Application

FISA seeks to amend its certificate to:

1. Add each of the following companies as a new "Member" of the certificate: AJC International, Inc., Atlanta, GA; Bayshore Seafoods, Inc., Bellingham, WA; Carriage House Foods, Lyden, WA; Clouston Foods Pacific, Ltd., Seattle, WA; Copper River Fishermen's Cooperative, Seattle, WA; Diamond Fruit Growers, Inc., Hood River, OR; Duckwall-Pooley Fruit Co., Odell, OR; Golden Alaska Seafoods, Seattle, WA; Home Harbor Seafoods, Inc., Seattle, WA; George F. Joseph, Yakima, WA; Keet Seafoods, Inc., Seattle, WA; Northwest Fresh, Inc., Wenatchee, WA; Odyssey Enterprises, Inc., Seattle, WA; Ore-Ida Foods, Inc., Boise, Idaho; Pacific Alaska Seafood, Inc., Seattle, WA; Peter Pan Seafoods, Inc., Seattle, WA; Prevor Marketing International, Hunts Point, Bronx, NY; San Juan Seafoods, Inc., Bellingham, WA; SPI-SEA FOODS, Seattle, WA; Stemilt Growers, Inc., Wenatchee, WA, Washington Fish & Oyster Co. of CA., San Francisco, CA; Wenoka Sales, Wenatchee, WA; and Windjammer Seafoods, Inc., Seattle, Washington.

Date: December 8, 1988.

Thomas H. Stillman,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510–13–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

December 6, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–6828. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION: The Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of February 4, 1988 between the Governments of the United States and the People's Republic of China establishes limits for the 1989 agreement year. The limits for Categories 334, 335, 634, 635 and 847 are being reduced for carryforward used in 1988. The limits for Categories 330/630, 633, 643 and 870 are subject to change pending consultations with the Government of the People's Republic of China.

A copy of the agreement is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647–1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken in pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 6, 1988

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of February 4, 1988 between the Governments of the United States and the People's Republic of China; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile

VOL 53 ISS 240 DE 14 1988 UMI

products in the following categories, produced or manufactured in China and exported during the twelve-month period beginning on January 1, 1989 and extending through December 31, 1989, in excess of the following restraint limits:

369-D[7]	3,978,912 kilograms.
369-H[8]	3,959,635 kilograms.
369-L[9]	2,381,360 kilograms.
410	1,845,208 square meters of which not more than 1,479,132 square meters shall be of carded wool[10] and not more than 1,479,132 square meters shall be of combed wool[11].
433	21,715 dozen.
434	12,373 dozen.
435	22,725 dozen.
536	14,140 dozen.
438	24,745 dozen.
440	35,350 dozen of which not more than 20,200 dozen in men's shirts in Category 440pt.[12c].
442	39,390 dozen.
443	127,260 numbers.
444	189,193 numbers.
445/446	272,700 dozen.
447	73,472 dozen.
448	20,200 dozen.
607	2,569,601 kilograms.
611	4,392,177 square meters.
613	6,028,478 square meters.
614	9,473,323 square meters.
615	19,721,736 square meters.
617	13,779,379 square meters.
631	910,011 dozen pairs.
634	463,935 dozen.
635	484,620 dozen.
636	420,800 dozen.
638/639	2,142,000 dozen.
640	1,274,720 dozen.
641	1,095,120 dozen.
642	266,500 dozen.
645/646	740,050 dozen.
647	1,112,716 dozen.
648	1,071,309 dozen.
649	706,160 dozen.
650	92,997 dozen.
651	593,560 dozen.
652	2,024,880 dozen.
659-C[13]	335,545 kilograms.
659-H[14]	2,193,988 kilograms.
659-S[15]	500,383 kilograms.
669-P[16]	1,427,999 kilograms.
670-L[17]	12,265,138 kilograms.
831	395,544 dozen pairs.
833	21,425 dozen.
835	98,895 dozen.
840	384,707 dozen.
842	214,245 dozen.
845pt.[18]	2,158,800 dozen.
846pt.[19]	144,200 dozen.
847	993,988 dozen.
870	2,892,270 kilograms.
GROUP II	
330, 332, 349, 353, 354, 359-0[20], 431, 432, 439, 459, 630, 632, 633, 643, 644, 653, 654 and 659-0[21], as a group.	102, 325, 266 square meters equivalent.
SUBLEVELS UNDER GROUP II	
330/630	4,792,439 dozen.
633	37,513 dozen.
643	426,656 numbers.
GROUP III	
201, 220, 222-225, 227, 229, 362, 369-0[22], 400, 414, 464-469, 600, 603, 604-0[23], 606, 618-622, 624-627, 628, 629, 665, 666, 669-0[24] and 670-0[25], as a group.	275, 616, 104 square meters equivalent.
GROUP IV	
832, 834, 836-838, 839, 843, 844, 850-852, 858 and 859, as a group.	21,271,080 square meters equivalent.

[1] In Categories 338-S/339-S, only tariff numbers 6109.10.00.10, 6109.10.00.15, 6109.10.00.25, 6109.10.00.30, 6109.10.00.40, 6109.10.00.45, 6109.10.00.60 and 6109.10.00.65.

[2] In Category 340-Z, only tariff numbers 6205.20.20.15, 6205.20.20.20, 6205.20.20.50 and 6205.20.20.60.

[3] In Category 341-Y, only tariff numbers 6204.22.30.60, 6206.30.30.10 and 6206.30.30.30.

[4] In Category 359-C, only tariff numbers 6103.43.30.30, 6103.49.30.34, 6104.62.10.20, 6104.69.30.10, 6114.20.00.48, 6114.20.00.52, 6203.42.20.10, 6204.62.20.10, 6211.32.00.10 and 6211.43.00.10.

[5] In Category 359-V, only tariff numbers 6103.19.20.30, 6103.19.40.30, 6104.12.00.40, 6104.19.20.40, 6110.20.10.22, 6110.20.10.24, 6110.20.20.30, 6110.20.20.35, 6110.90.00.44, 6110.90.00.46, 6201.92.20.10, 6202.92.20.20, 6203.19.10.30, 6203.19.40.30, 6204.12.00.40, 6204.19.30.40, 6211.32.00.70 and 6211.42.00.70.

[6] In Category 360-P, only tariff numbers 6302.21.10.10, 6302.21.10.20, 6302.21.20.10, 6302.21.20.20, 6302.31.10.10, 6302.31.10.20, 6302.31.20.10, 6302.31.20.20.

[7] In Category 369-D, only tariff numbers 6302.60.00.10 and 6302.91.00.20.

[8] In Category 369-H, only tariff numbers 4202.22.40.20, 4202.22.45.00 and 4202.22.80.30.

[9] In Category 369-L, only tariff numbers 4202.12.40.00, 4202.12.80.20, 4202.12.80.60, 4202.92.15.00 and 4202.92.60.00.

[10] In Category 410 (carded wool), only tariff numbers 5111.11.10.00, 5111.11.60.30, 5111.11.60.60, 5111.19.20.00, 5111.19.60.20, 5111.19.60.40, 5111.19.60.60, 5111.19.60.80, 5111.20.60.00, 5111.30.60.00, 5111.90.30.00, 5111.90.60.00, 5212.11.10.10, 5212.12.10.10, 5212.13.10.10, 5212.14.10.10, 5212.15.10.10, 5212.21.10.10, 5212.22.10.10, 5212.23.10.10, 5212.24.10.10, 5212.25.10.10, 5311.00.20.00, 5407.91.05.10, 5407.92.05.10, 5407.93.05.10, 5407.94.05.10, 5408.31.05.10, 5408.32.05.10, 5408.33.05.10, 5408.34.05.10, 5515.13.05.10, 5515.22.05.10, 5515.92.05.10, 5516.31.05.10, 5516.32.05.10, 5516.33.05.10, 5516.34.05.10 and 6301.20.00.20.

[11] In Category 410 (combed wool), only tariff numbers 5007.10.60.30, 5007.90.60.30, 5112.11.00.30, 5112.11.00.60, 5112.19.60.10, 5112.19.60.20, 5112.19.60.30, 5112.19.60.40, 5112.19.60.50, 5112.19.60.60, 5112.20.00.00, 5112.30.00.00, 5112.90.30.00, 5112.90.60.10, 5112.90.60.90, 5212.11.10.20, 5212.12.10.20, 5212.13.10.20, 5212.14.10.20, 5212.15.10.20, 5212.21.10.20, 5212.22.10.20, 5212.23.10.20, 5212.24.10.20, 5212.25.10.20, 5309.21.20.00, 5309.29.20.00, 5407.91.05.20, 5407.92.05.20, 5407.93.05.20, 5407.94.05.20, 5408.31.05.20, 5408.32.05.20, 5408.33.05.20, 5408.34.05.20, 5515.13.05.20, 5515.22.05.20, 5515.92.05.20, 5516.31.05.20, 5516.32.05.20, 5516.33.05.20 and 5516.34.05.20.

[12] In Category 449pt., only tariff numbers 6203.21.00.30, 6203.23.00.30, 6205.10.10.00, 6205.10.20.10, 6205.10.20.20, 6205.30.15.10, 6205.30.15.20, 6205.90.20.20, 6205.90.40.20 and 6211.31.00.30.

[13] In Category 659-C, only tariff numbers 6103.23.00.55, 6103.43.20.20, 6103.49.20.00, 6103.49.30.38, 6104.63.10.20, 6104.69.10.00, 6104.69.30.14, 6114.30.30.40, 6114.30.30.50, 6203.43.20.10, 6203.49.10.10, 6204.63.15.10, 6204.69.10.10, 6211.33.00.10 and 6211.43.00.10.

[14] In Category 659-H, only tariff numbers 6502.00.90.30, 6504.00.90.15, 6504.00.90.60, 6505.90.50.60, 6505.90.60.60, 6505.90.70.60 and 6505.90.80.75.

[15] In Category 659-S, only tariff numbers 6112.31.00.10, 6112.31.00.20, 6112.41.00.10, 6112.41.00.20, 6112.41.00.30, 6112.41.00.40, 6211.11.10.10, 6211.11.10.20, 6211.12.10.10 and 6211.12.10.20.

[16] In Category 660-P, only tariff numbers 6305.31.00.10, 6305.31.00.20 and 6305.39.00.00.

[17] In Category 670-L, only tariff numbers 4202.12.80.30, 4202.12.80.70, 4202.92.30.20, 4202.92.30.30 and 4202.92.90.20.

[18] In Category 845pt., only tariff numbers 6103.29.20.74, 6104.29.20.72, 6110.90.00.24, 6110.90.00.42 and 6117.90.00.20.

[19] In Category 846pt., only tariff numbers 6103.29.20.68, 6104.29.20.68, 6110.90.00.20, 6110.90.00.38 and 6117.90.00.18.

[20] In Category 359-O, all tariff numbers except 6103.42.20.20, 6103.49.30.34, 6104.62.10.20, 6104.69.30.10, 6114.20.00.48, 6114.20.00.52, 6203.42.20.10, 6204.62.20.10, 6211.32.00.10 and 6211.42.00.10 in Category 359-C; and 6103.19.20.30, 6103.19.40.30, 6104.12.00.40, 6104.19.20.40, 6110.20.10.22, 6110.20.10.24, 6110.20.20.30, 6110.20.20.35, 6110.90.00.44, 6110.90.00.46, 6201.92.20.10, 6202.92.20.20, 6203.19.10.30, 6203.19.40.30, 6204.12.00.40, 6204.19.30.40, 6211.32.00.70 and 6211.42.00.70 in Category 359-V.

[21] In Category 659-O all tariff numbers except 6103.23.00.55, 6103.43.20.20, 6103.49.20.00, 6103.49.30.38, 6104.63.10.20, 6104.69.10.00, 6104.69.30.14, 6114.30.30.40, 6114.30.30.50, 6203.43.20.10, 6203.49.10.10, 6204.63.15.10, 6204.69.10.10, 6211.33.00.10 and 6211.43.00.10 in Category 659-C; 6502.00.90.30, 6504.00.90.15, 6504.00.90.60, 6505.90.50.60, 6505.90.60.60, 6505.90.70.60 and 6505.90.80.75 in Category 659-H; and 6112.31.00.10, 6112.31.00.20, 6112.41.00.10, 6112.41.00.20, 6112.41.00.30, 6112.41.00.40, 6211.11.10.10, 6211.11.10.20, 6211.12.10.10 and 6211.12.10.20 in Category 659-S.

[22] In Category 369-O, all tariff numbers except 6302.60.00.10 and 6302.91.00.20 in Category 369-D; 4202.22.40.20, 4202.22.45.00 and 4202.22.80.30 in Category 369-H; 4202.12.40.00, 4202.12.80.20, 4202.12.80.60, 4202.92.15.00 and 4202.92.60.00 in Category 369-L; and 6307.10.20.10 in Category 369-S.

[23] In Category 604-O, all tariff numbers except 5509.32.00.00.

[24] In Category 669-O, all tariff numbers except 6305.31.00.10, 6305.31.00.20 and 6305.39.00.00 in Category 669-P.

[25] In Category 670-O, all tariff numbers except 4202.22.40.30, 4202.22.80.50 and 4202.32.95.50.

Imports charged to these limits, except Categories 439 and 839, for the period January 1, 1988 through December 31, 1988, including the periods June 30, 1988 through December 31, 1988 (Categories 633, 643 and 870) and September 29 through December 31, 1988 (Categories 330/630), shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for these periods have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

You are directed to charge 5,000 dozen to Category 237 for overshipments of the previous unilateral restraint limit for Category 637. These charges are the result of an agreement in 1987 between the Governments of the United States and the People's Republic of China.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-28759 Filed 12-13-88; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

December 8, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566-6828. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854)

The current limits for certain cotton, wool and man-made fiber textile products in Group I are being adjusted for swing.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). Also see 53 FR 55, published on January 4, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 30, 1987, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textile products, produced or manufactured in China and exported during the period which began on January 1, 1988 and extends through December 31, 1988.

Effective on December 15, 1988, the directive of December 30, 1987 is being amended further to adjust the limits for cotton, wool and man-made fiber textile products in the following categories, as provided under the provisions of the current bilateral agreement between the Governments of the United States and the People's Republic of China:

Category:	*Adjusted 12-mo limit* [1]
218	11,550,000 square yards.
331	4,274,438 dozen pairs.
333	47,000 dozen.
336	136,500 dozen.
337	1,111,950 dozen.
338/339	2,074,800 dozen of which not more than 1,575,000 dozen shall be in Categories 338pt./339pt.[2]
340	668,000 dozen.
342	233,100 dozen.
345	110,250 dozen.
351	388,500 dozen.
352	1,502,550 dozen.
359-D [3]	1,333,500 pounds.
359-V [4]	1,446,548 pounds.
440	22,721 dozen.
443	132,300 numbers.
447	76,382 dozen.
607	5,342,857 pounds.
636	420,000dozen.
638/639	1,599,828 dozen.
637	206,210 dozen.
640	1,134,500 dozen.
642	273,000 dozen.
645/646	642,000 dozen.
647	1,123,415 dozen.
648	1,086,835 dozen.
650	94,987 dozen.
652	2,044,350 dozen.
659-H [5]	4,883,424 pounds.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

[2] In Categories 338pt./339pt., only TSUSA numbers 381.0240, 381.0425, 381.3516, 381.4020, 381.4130, 381.4337, 381.6610, 381.8506, 381.9924, 384.0216, 384.0223, 384.0229, 384.0232, 384.2818, 384.2930, 384.2970 and 384.3437 in Category 338pt.; and 384.0213, 384.0214, 384.0217, 384.0225, 384.0227, 384.0230, 384.0231, 384.0233, 384.0235, 384.0330, 384.0461, 384.2704, 384.2815, 384.2816, 384.2821, 384.2934, 384.2935, 384.2950, 384.2960, 384.2980, 384.3439, 384.3441, 384.3462, 384.5404, 384.7704, and 384.9517 in Category 339pt.

[3] In Category 359-D, only TSUSA number 384.5214.

[4] In Category 359-V, only TSUSA numbers 381.0258, 381.0554, 381.3949, 381.5800, 381.5920, 384.0451, 384.0648, 384.0650, 384.0651, 384.3449, 384.3450, 384.4300, 384.4421 and 384.4422.

[5] In Category 659-H, only TSUSA numbers 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Amendment of an Import Limit for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Costa Rica

December 8, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs amending a limit.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Governments of the United States and Costa Rica have agreed to amend the current limit for Categories 340/640 to conform with the New Category System.

A copy of the current bilateral textile agreement is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647-1998.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 53 FR 47745, published on December 16, 1988). Also see 53 FR 161, published on January 5, 1988.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 31, 1987 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports into the United States of cotton and man-made fiber textile products in Categories 340/640, produced or manufactured in Costa Rica and exported during the twelve-month period which began on January 1, 1988 and extends through December 31, 1988.

Effective on December 15, 1988, the directive of December 31, 1987 is amended to increase to 451,500 dozen [1] the current limit for Categories 340/640.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martellol,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-28691 Filed 12-13-88; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton, Wool, and Man-Made Fiber Textile Products Produced or Manufactured in Singapore

December 8, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 16, 1988.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bullentin boards of each Customs port or call (202) 535-6736. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain cotton, wool, and man-made fiber textile products are being adjusted, variously, for carryover, special shift, shift, and shift subtracted.

In addition, the Governments of the United States and Singapore, pursuant to a data investigation, have established an agreed level of trade for 1987 in man-made fiber textile products in Categories 645/646 of 100,693 dozen.

A description of the textile categories in terms of T.S.U.S.A. number is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the Unitd States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). Also see 52 FR 49188, published on December 30, 1987.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 8, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 24, 1987 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Singapore and exported during the period which began on January 1, 1988 and extends through December 31, 1988.

Effective on December 16, 1988, the directive of December 24, 1987 is being amended further to adjust the current limits for cotton, wool and man-made fiber textile products in the following categories, as provided in the current bilateral textile agreement between the Governments of the United States and Singapore:

Category	Amended 12-month limit [1]
239	505,791 pounds.
331	344,740 dozen pairs.
335	157,774 dozen.
338/339	847,027 dozen of which not more than 508,549 dozen shall be in category 338.
340	595,322 dozen.
341	127,322 dozen.
342	94,374 dozen.
347/348	817,317 dozen of which not more than 506,105 dozen shall be in Category 347 and not more than 396,084 dozen shall be in category 348.
435	1,967 dozen.
634	216,084 dozen.
638	633,489 dozen.
639	3,171,819 dozen.
640	40,485 dozen.
641	170,011 dozen.
645/646	129,306 dozen.
648	1,464,126 dozen.

[1] The limit has not been adjusted to account for any imports exported after December 31, 1987.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

Also you are directed to deduct 9,300 dozen pairs and 716 dozen for goods exported in 1987 from the charges made to the current limits for categories 331 and 335, respectively. These same amounts are to be charged to the 1987 limits for Categories 331 and 335.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88-28758 Filed 12-13-88; 8:45 am]

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Enlistee Financial Statement; NAVCRUIT Form 1130/13; and OMB Control Number 0703-0020.

Type of Request: Extension.

Average Burden Hours/Minutes Per Response: 33 minutes.

Frequency of Response: One-time.

Number of Respondents: 86,600.

Annual Burden Hours: 28,578.

Annual Responses: 86,600.

Needs and Uses: The Enlistee Financial Statement is used by Navy recruiters and by recruiting management personnel in assessing the Navy applicant's ability to meet his/her financial obligations on Navy pay.

Affected Public: Individuals or households.

Frequency: Continuing.

Respondent's Obligation: Voluntary; Required to obtain or retain a benefit.

OMB Desk Officer: Dr. J. Timothy Sprehe. Written comments and recommendations on the proposed information collection should be sent to Dr. J. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison. A copy of the information collection proposal may be obtained from, Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302, telephone (202)746-0933.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 8, 1988.

[FR Doc. 88-28751 Filed 12-13-88; 8:45 am]

BILLING CODE 3810-01-M

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, applicable form, and Applicable OMB Control number: Custodianship Certificate to Support Claim on behalf of Minor Children of Deceased Members of the Air Force; AF Form 3116; and OMB Control Number 0701-0092.

Type of Request: Reinstatement.

Average burden hours/minutes per Response: 6 minutes.

Frequency of Response: On occasion.

Number of Respondents: 1,200.

Annual burden Hours: 120.

Annual Responses: 1,200

Needs and Uses: The Air Force uses AF Form 3116 to collect information from custodians of dependent minor children who are entitled to receive survivor annuity benefit funds when an Air Force retiree dies. The custodian certifies that he or she has care and custody of the child until the child reaches the age of majority. The Air Force needs this information to pay annuities to the proper guardians or custodians on behalf of minor dependent children of deceased Air Force retirees.

Affected public: Custodians of Minor Children of Deceased Air Force Retirees.

Frequency: Continuing.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk officer: Dr. Timothy Sprehe.

Wrtten comments and recommendations on the proposed information collection should be sent to Dr. Timothy Sprehe at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms: Pearl Rascoe-Harrison.

A copy of the information collection proposal may be obtained from, Ms. Rascoe-Harrison, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington,Virginia 22202-4302, telephone (202) 746-0933.

December 8, 1988.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Assistant Secretary for International Affairs and Energy Emergencies

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreement involves the sale of 84.74 grams of natural uranium from the U.S. Department of Energy to Gewerkschaft Brunhilde GmbH, Birkenfeld/Nahe, Federal Republic of Germany. Contract Number S-EU-051 has been assigned to this sale.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Date: December 8, 1988.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

[FR Doc. 88-28772 Filed 12-13-88; 8:45 am]

BILLING CODE 6450-01-M

Office of Fossil Energy

Invitation for Public Views and Comments on the Conduct of the 1989 Clean Coal Technology Solicitation; Meeting

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of meetings to invite public views and comments on the conduct of the 1989 Clean Coal Technology solicitation, and to invite the public to participate in briefings by Department of Energy (DOE) officials on the Department's rules and procedures for awarding financial assistance.

Introduction

The third Clean Coal Technology (CCT) solicitation (to be issued by May 1, 1989) is related to the decision by President Reagan on March 18, 1987, to seek $2.5 billion to fund the demonstration of innovative clean coal technologies over a five-year period. President Reagan directed the projects be selected, to the extent possible, using the criteria recommended by the Special Envoys on Acid Rain, Drew Lewis of the United States, and William Davis of Canada. In January of 1986, the appointees issued the *Joint Report of the Special Envoys on Acid Rain*, also known as "the Lewis/Davis Report." The Special Envoys provided twelve recommendations, the first one of which was that the:

> U.S. government should implement a five-year, five-billion-dollar control technology commercial demonstration program. The federal government should provide half the funding * * * for projects which industry recommends, and for which industry is prepared to contribute the other half of the funding.

To advise DOE on the CCT Program, the President directed the Secretary of Energy to establish the Innovative Control Technology Advisory Panel (ICTAP). On June 9, 1987, the Secretary named the charter members of ICTAP. As of this writing, there are 39 panelists representing federal agencies, government representatives from a cross section of affected states, producers and users of coal, environmental groups, unions, Indian tribes, and the Government of Canada; the Chairman of ICTAP is Deputy Secretary of Energy Joseph F. Salgado.

On December 22, 1987, Pub. L. No. 100-202, "An Act Making Appropriations for the Department of the Interior and Related Agencies for the Fiscal Year Ending September 30, 1988, and for Other Purposes," was signed into law. This Act, among other things, provided $575 million to conduct cost-shared innovative clean coal technology (ICCT) projects to demonstrate emerging clean coal technologies that are capable of retrofitting or repowering existing facilities. Pub. L. No. 100-202, in its reference to Pub. L. 99-190 of December 19, 1985, also specifically addressed the levels and forms of cost sharing that were applicable to proposed projects. On February 22, 1988, the Innovative CCT Program Opportunity Notice (PON) was issued in accordance with the requirements of that Act. Proposals were due by May 23, 1988, and on September 28, 1988, DOE announced the 16 proposals that were selected to proceed to award of cooperative agreements.

Public Law No. 100-446, "An Act Making Appropriations for the Department of the Interior and Related Agencies for the Fiscal Year Ending September 30, 1989, and for Other Purposes" (the "Act"), enacted on September 27, 1988, provides, among other things, that $575 million be made available for additional CCT demonstration projects, and "That projects selected * * * shall be subject to all provisos contained under this head in Public Laws 99-190 and 100-202 as amended by this Act."

Furthermore, the accompanying Conference Report 100-862 (the "Report") stipulates that, "a request for proposals should be issued by May 1, 1989, with proposals due no later than 120 days after issuance of the request for proposals [by August 28, 1989], and that the Secretary of Energy should make project selections no later than 120 days after receipt of proposals [by December 26, 1989]."

Purpose of the Meetings

In general, the goal of the anticipated ICCT solicitation will be to implement the legislative guidance contained in Pub. L. No. 100-446 and the accompanying Conference Report, and to further implement the Administration's decision to provide funding of $2.5 billion for the demonstration of innovative clean coal technologies over a five-year period.

The CCT program will yield significant benefits to the United States, not only in terms of cleaner air and the increased use of coal, our most abundant energy resource, but also by:

- Addressing the concerns regarding global warming by significantly increasing the efficiency of power generation; in some cases, electricity may be produced with perhaps 10 to 30 percent less carbon dioxide emitted,
- Improving the reliability of electric power stations by developing modular technologies, such that a number of small units would work together, rather than depending on a single large installation. Similarly, new CCT technologies may offer superior "load following" capabilities, and repowering will provide environmental benefits while increasing plant capacity,
- Greatly enhancing U.S. technological leadership and international competitiveness,
- Benefitting both eastern and western states by making available more cost-effective, fuel-flexible, power and industrial systems capable of using the full spectrum of U.S. coals,
- Improving our position in international trade by providing advanced technology that would make American coal more attractive to foreign markets, and by reducing the cost of producing energy-intensive U.S. goods,
- Helping to ensure that the U.S. enters the 21st century with a broad array of sophisticated, cleaner, and more economical coal-based energy technologies, rather than being limited to the more costly, less effective, environmental control options available today, and
- Enhancing the long term energy security of the United States.

However, DOE is interested in exploring alternatives that may be available with regard to how the May 1, 1989, solicitation is structured. The purpose of the meetings is to provide a conduit from the public to DOE. Accordingly, DOE is issuing this Notice in order to invite the public to attend any one of several meetings, and to give interested persons an opportunity to present their views, comments, and recommendations with regard to the forthcoming solicition.

Nothing in this Notice should be considered as definite, final, or binding on DOE with regard to the nature and/or content of the solicitation. The public is further advised that DOE cannot reimburse those who attend the public meetings or otherwise submit views to DOE for any expenses that they may incur in responding to this notice.

Proposed Outline of the Anticipated Solicitation

To establish a framework for discussion and comment, it is useful to outline generally the structure of the anticipated CCT solicitation.

The solicitation will be consistent with the Report guidance, which provides, among other things, that, "projects selected * * * shall be subject to all provisos contained under this head in Public Laws 99–190 and 100–202 as amended by this Act." The Report notes also that, "the procurement * * * is subject to the cost-sharing provisions of the previous two procurements."

DOE anticipates that the solicitation will invite applications for financial assistance awards and, accordingly, will be governed by DOE's Financial Assistance Rules, 10 CFR Part 600 (the "Rules").

The Rules establish uniform policies and procedures for the award and administration of DOE grants and cooperative agreements. (Both the 1986 PON and the 1988 PON specified that cooperative agreements would be awarded.)

Project sponsors would be required to share the costs of the projects, such that DOE would not finance more than 50 percent of the total project cost as of the date of award, and the solicitation may require, as was the case in the two previous PONs, that the cost sharing by the offeror be at least 50 percent in each of the project phases (in the past, design and permitting, construction and startup, and operation and disposition). Costs would be shared between DOE and the offeror on an "as expended," dollar-for-dollar, basis.

The solicitation may include Qualification Criteria, and provide that failure to meet any one, or more than one, of these criteria would result in rejection of the proposal and the cessation of its consideration for financial assistance. The Qualification Criteria stipulated in the previous PON were:

- The proposed demonstration project or facility (existing or new) must be located in the United States.
- The proposed demonstration project must be designed for and operated with coal(s). These coals must be from United States mines.
- The offeror must agree to provide a cost share of at least 50 percent of total project cost, with at least 50 percent in each of the three project phases.
- The proposer must have access to, and use of, the proposed site and any proposed alternate site(s) for the duration of the project.
- The proposed project team must be identified and firmly committed to fulfilling its proposed role in the project.
- The offeror agrees that, if selected, it will submit a "Repayment Plan" consistent with the requirements stated in the PON.

If the Qualification Criteria are met, a proposal would undergo preliminary evaluation, if such a phase is included in the solicitation. As noted above for the Qualification Criteria, failure to meet one or more of the Preliminary Evaluation requirements would result in rejection of the proposal and its elimination from further consideration for financial assistance. Preliminary Evaluation requirements were employed in the previous PON: Among other things, included were stipulations that the proposal must be consistent with the objectives of the PON; the proposal must contain sufficient technical, cost, and other information to enable Comprehensive Evaluation (discussed below); and, the proposal must be signed by a responsible official of the proposing organization authorized to bind the organization to the performance of the Cooperative Agreement in its entirety.

Once a determination is made that a proposal meets both (as may be applicable) the Qualification criteria and the Preliminary Evaluation requirements, it would then enter the Comprehensive Evaluation phase and be evaluated in accordance with the Criteria stated in the solicitation. The solicitation would state the different evaluation criteria, and describe the relative weights assigned to the Technical, Business and Management, and Cost aspects of the proposal. The solicitation also would provide guidance and instructions to prospective offerors on how to prepare and submit the proposal.

Evaluation criteria will be developed that are consistent with the guidance in the Act and the Report that selected projects shall be subject to all of the provisions (relevant to the solicitation) that were provided in Pub. L. No. 99–190, which governed the 1986 PON, and in Pub. L. No. 100–202, which governed the 1988 PON, as amended by the Act.

In developing the evaluation criteria, DOE will consider factors that would contribute to achieving the goals established by the Congress and by the Administration. Such considerations include reducing additional forms of pollution from coal combustion (that is, in addition to sulfur dioxide and oxides of nitrogen the "greenhouse gases" such as carbon dioxide). Other factors under consideration would be the potential for reducing the cost of producing additional electric power and the expanded utilization of U.S. coals. The public is invited to comment on these factors, and to suggest others that might be used to evaluate proposed CCT projects.

The final consideration with regard to the selection of a proposal is the application of the Program Policy Factors (PPF). These factors are used to identify the proposals that, in the aggregate, best will achieve the CCT program objectives.

Subjects of Particular Interest

DOE wishes to receive public views, comments, and recommendations on any and all aspects of the forthcoming anticipated CCT solicitation, that will assist DOE with the preparation of a solicitation that optimally balances the needs of the prospective offerors and the goals and objectives of the CCT Program.

DOE is particularly interested in suggestions that would lead to improved evaluation criteria, an increased number of proposed Western projects that respond to the solicitation, reduced cost of proposal preparation, and reduced time required for the negotiation of cooperative agreements.

Meetings, Locations, and Dates

There will be three public meetings, at the locations and dates listed below:

1. Radisson Hotel Denver, 1550 Court Place, Denver, Colorado 80202 (Tel. 303–893–3333), at 8:30 a.m., on Wednesday, January 18, 1989.
2. Harvey Hotel-DFW Airport, 4545 W. John Carpenter Freeway, Irving, Texas 75063 (Tel. 214–929–4500), at 8:30 a.m., on Thursday, February 2, 1989.
3. Radisson Hotel Atlanta, Courtland and International Boulevard, Atlanta, Georgia 30303 (Tel. 404–659–6500), at 8:30 a.m., on Thursday, February 16, 1989.

Format of the Meetings

All three of the meetings will follow the same format, as described below. Each meeting will commence with a brief plenary session that will include introductory remarks and program overviews by DOE officials. At about mid-morning, there will be a brief recess, after which there will be concurrent Discussion Workshops led by panels of DOE officials. There will not be any formal presentations or statements in the Workshops. Attendees will be asked to engage in informal, unstructured, discussions with the panelists on the subjects described earlier in this Notice, and on such other subjects as may be introduced by

members of the audience or by the panelists.

At the conclusions of the Workshops, attendees will meet in a closing plenary session. The discussions that ensued in the various Workshops, and the recommendations that resulted, will be reviewed and summarized. Each of the meetings will conclude with a presentation by DOE's Office of Procurement Operations on the rules and procedures applicable to the award and administration of financial assistance. The presentation will be followed by a question-and-answer period.

The meetings are expected to adjourn in the late afternoon.

Public Participation

Individuals may attend the meetings without notification in advance to DOE, and there is no registration fee or other charge for attendance. Attendees are responsible for making their own travel and lodging arrangements. DOE will not provide any meals or other refreshments at the meetings.

Written Comments

Written comments may be submitted by individuals who are not able to attend the public meetings, and also by persons who do attend one of the meetings and subsequently wish to provide written material to DOE. Written comments that include suggestions for the public meeting agendas (please indicate which of the three meetings is of particular interest to you) will be considered if they are received by December 30, 1988. Written comments with suggestions for the May 1, 1989, CCT solicitation will be considered if they are received by February 26, 1989. In all instances, written comments should be submitted in triplicate (if possible) to the address noted below:

Address for Comments

All written comments should be submitted to: Dr. C. Lowell Miller, Associate Deputy Assistant Secretary for Clean Coal, Fossil Energy, FE–22, U.S. Department of Energy, Washington, DC, 20585, (202) 586–7150.

Issued in Washington, DC, December 9, 1988.

J. Allen Wampler,

Assistant Secretary, Fossil Energy.

[FR Doc. 88–28773 Filed 12–13–88; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. QF89–58–000, et al.]

Megan-Racine Associates, Inc., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings.

Take notice that the following filings have been made with the Commission:

1. Megan-Racine Associates, Inc.

[Docket No. QF89–58–000]

December 6, 1988.

On November 22, 1988, Megan-Racine Associates, Inc. (Applicant), of 16401 Shagbark Place, Tampa, Florida 33618, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to §292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Canton, New York. The facility will consist of a combustion turbine generator, a heat recovery steam generator equipped with supplementary firing, and an extraction/condensing turbine generator. Thermal energy recovered from the facility will be sold to Kraft, Inc. for use in processing of milk into finished products. The electric power production capacity of the facility will be 49,000 KW. The primary source of energy will be natural gas. Construction of the facility is scheduled to begin April, 1989.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

2. Southern California Edison Company

[Docket No. ER89–96–000]

December 7, 1988.

Take notice that on November 29, 1988, Southern California Edison Company (Edison) tendered for filing the Edison-Vernon CDWR Firm Transmission Service Agreement (Agreement) which has been executed by Edison and the City of Vernon, California (Vernon).

Under the Agreement, Edison agrees to make firm transmission service available to Vernon in 1989 and 1990 from Vincent Substation to Vernon's Point of Delivery during certain hours, for Vernon's CDWR capacity and associated energy. Edison will be providing firm transmission service for up to 62 megawatts of capacity and associated energy from CDWR during the months of January, February, March, April, November, and December and 98 megawatts of capacity and associated energy during the months of May through October during 1989 and 1990.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the City of Vernon, California.

Comment date: December 27, 1988 in accordance with Standard Paragraph E at the end of this notice.

3. PacifiCorp Doing Business as Pacific Power & Light Company

[Docket No. ES89–9–000

December 7, 1988.

Take notice that on November 30, 1988, PacifiCorp dba Pacific Power & Light Company (Pacific) filed its application with the Federal Energy Regulatory Commission, pursuant to section 204 of the Federal Power Act, seeking an order: (1) Authorizing it to issue and sell, in one or more public offerings, prior to December 31, 1990, fixed or floating rate Debt in aggregate principal of not more than $450,000,000 or, if the Debt is issued at an original issue discount, such greater amount as shall result in an aggregate offering price of not more than $450,000,000 (or its equivalent amount in, or based upon, foreign currencies determined at the time of issue), (2) authorizing it to enter into a letter of credit arrangement with one or more banks or such other agreements as may be necessary or appropriate to provide additional credit support for the payment of the principal of, the interest on, and the premium (if any) on the Debt, (3) authorizing it to enter into one or more currency exchanges, and (4) exempting the issuance from competitive bidding pursuant to 18 CFR 34.2(b)(2).

Comment date: December 28, 1988, In accordance with Standard standard Paragraph E at the end of this notice.

4. The Washington Water Power Company

[Docket No. ER89–92–000]

December 7, 1988.

Take notice that on November 25, 1988, The Washington Water Power Company (WWP) tendered for filing copies of a service schedule applicable to what WWP refers to as a Load Control Energy Exchange Agreement between WWP and The Montana Power Company (MPC). WWP states that WWP will provide MPC from time to time with up to 30 MW of load control service in response to a signal provided by MPC's automatic generation control equipment.

WWP requests that the requirements of prior notice be waived and the effective date be made May 3, 1988.

VOL
53
ISS
240
DE
14
1988
UMI

which is the first day the load control services were provided to MPC.

Comment date: December 27, 1988, in accordance with Standard Paragraph E at the end of this notice.

5. Puget Sound Power & Light Company

[Docket No. ER89–56–000]

December 7, 1988.

Take notice that on November 4, 1988, Puget Sound Power & Light Company (Puget) tendered for filing copies of the Sixth Amendment to an Exchange Agreement with the Washington Water Power Company (Washington) which provides for the exchange of steam-electric generation which, because of plant locations and load area locations, results in substantial savings in both transmission service cost and in transfer losses. The savings resulting therefrom are shared equally by Washington and Puget under the terms of the Exchange Agreement.

The Sixth Amendment shows the calculation of estimated costs and benefits for the 12-month period beginning January 1, 1988. It is estimated that the equal sharing of benefits under the Exchange Agreement will result in payments by Puget to Washington of $1,518,876 during this period.

Copies of the filing were served upon Washington.

Comment date: December 27, 1988, in accordance with Standard Paragraph E at the end of this notice.

6. Indianapolis Power & Light Company

[Docket No. ER89–62–000]

December 7, 1988.

Take notice November 10, 1988, Indianapolis Power & Light Company (IPL) tendered for filing Amendment No. 2 to the Agreement dated as of October 9, 1986 which sets forth the rates, charges, terms and conditions for wholesale electric service to Boone County Rural Electric Membership Corporation (Boone REMC) which is the only REMC IPL serves. Amendment No. 2 extends for an additional two year period the term of the existing Agreement which would otherwise terminate December 9, 1988.

The only customer affected is Boone REMC, which has executed said Amendment No. 2 and has concurred in this filing.

IPL states that copies of this filing were sent to Boone REMC and to the Indiana Utility Regulatory Commission.

Comment date: December 27, 1988, in accordance with Standard Paragraph E at the end of this notice.

7. The Washington Water Power Company

[Docket No. ER89–91–000]

December 7, 1988.

Take notice that on November 25, 1988, The Washington Water Power Company (WWP) tendered for filing copies of a service schedule applicable to what WWP refers to as a Transmission Service Agreement between WWP and The Montana Power Company (MPC). WWP states that WWP will provide MPC with firm transmission service from the WWP/MPC point of interconnection near the Burke 115 kV Switching Station to the WWP/Bonneville Power Administration (Bonneville) 230 kV point of interconnection at the Noxon Switchyard. MPC will in turn provide WWP with firm transmission service from the MPC/Bonneville 230 kV point of interconnection at the Garrison Substation to Burke.

WWP requests that the effective date be concurrent with the initial deliveries of power by MPC to the Los Angeles Department of Water and Power which is expected sometime in January or February 1989.

Comment date: December 27, 1988, in accordance with Standard Paragraph E at the end of this notice.

8. Southwestern Electric Power Company

[Docket No. ER89–97–000]

December 7, 1988.

Take notice that on November 29, 1988, Southwestern Electric Power Company (SWEPCO) tendered for filing an amendment, dated November 15, 1988, to a letter agreement, dated September 2, 1987, between SWEPCO and Empire District Electric Company (Empire). The Amendment provides for the continued sale by SWEPCO to Empire of capacity (without reserves) and associated energy beyond the original November 30, 1988 termination date.

SWEPCO requests an effective date of December 1, 1988 to assure that there is no break in service and, accordingly, requests waiver of the Commission's notice requirements.

Copies of the filing were served upon Empire and the Missouri Public Service Commission.

Comment date: December 27, 1988, in accordance with Standard Paragraph E at the end of this notice.

9. Northern States Power Company (Minnesota)

[Docket No. ER89–99–000]

December 7, 1988.

Take notice that on December 1, 1988 Northern States Power Company (Minnesota) tendered for filing a request for conditional waiver of the Commission's fuel clause regulations. According to the Company, waiver is sought in order to obtain Commission approval, if needed, of the recovery through the fuel adjustment clause of certain payments made under a minimum take provision of a coal supply contract. The company states that its 1988 fuel costs include payments to be made to a coal supplier under a minimum take provision of a coal supply contract. The company believes that these amounts are properly recordable in account 151 and therefore properly recoverable through the fuel adjustment clause. Waiver is requested only in the event that the Commission ultimately determines that the payments should not be recorded in Account 151. The company requests an effective date of November 1, 1988, for this filing.

Comment date: December 27, 1988, in accordance with Standard Paragraph E at the end of this notice.

10. Florida Power & Light Company

[Docket No. ER89–95–000]

December 8, 1988.

Take notice that on November 28, 1988 Florida Power & Light Company tendered for filing in this docket what it describes as an initial rate schedule for service by it to Seminole Electric Cooperative, Inc. to provide capacity and scheduled incremental energy during the forced outage of Seminole Unit No. 1.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

11. Wisconsin Public Service Corporation

[Docket Nos. ER87–44–005 and EL87–36–003]

December 8, 1988.

Take notice that on November 9, 1988, Wisconsin Public Service Corporation tendered for filing its refund report in the above dockets.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this docket.

12. Tapoco, Inc.

[Docket No. ER82–774–009]

December 8, 1988.

Take notice that on September 1, 1988, Tapoco, Inc. submitted a petition for

termination of rate condition imposed in Opinion No. 277. Tapoco, Inc. describes this condition as requiring it to subsidize the power supply costs of Nantahala Power and Light Company. Tapoco, Inc. states that it requests this relief as of November 3, 1987, the date that Duke Power Company filed its application for approval to acquire Nantahala Power and Light Company.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

13. Public Service Company of Colorado

[Docket No. ER88-539-001]

December 8, 1988.

Take notice that on November 15, 1988 Public Service Company of Colorado filed a notice of compliance with a Commission order of September 30, 1988 in this docket.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

14. Wisconsin Public Service Corporation

[Docket Nos. ER87-44-003 and EL87-36-001]

December 8, 1988.

Take notice that on November 9, 1988, Wisconsin Public Service Corporation tendered for filing its refund report in the above dockets.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

15. Wisconsin Public Service Corporation

[Docket Nos. ER87-44-004 and EL87-36-002]

December 8, 1988.

Take notice that on November 9, 1988, Wisconsin Public Service Corporation tendered for filing its refund report in the above dockets.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

16. Pacific Gas & Electric Company

[Docket No. ER88-302-003]

December 8, 1988.

Take notice that on November 17, 1988, Pacific Gas & Electric Company (PGandE) tendered for filing its compliance filing in response to the Commission's order in this docket of October 20, 1988.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

17. Alabama Power Company

[Docket No. E-8851-005]

December 8, 1988.

Take notice that on October 11, 1988, Alabama Power Company submitted its letter of compliance in response to the Commission's order of September 23, 1988 in this docket.

Comment date: December 28, 1988, in accordance with Standard Paragraph E at the end of this notice.

18. Tamal Suffolk North

[Docket No. QF88-464-000]

December 8, 1988.

On November 17, 1988, Tamal Suffolk North (Applicant), of Tamal Suffolk North, 80 E. Sir Francis Drake Blvd., Suite 2A, Larkspur, CA 94939 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located at 366 Sheep Pasture Road, Port Jefferson Station, New York, New York 11777. The facility will consist of a low Btu gas-fired steam generator and a steam turbine generator. The primary energy source will be biomass in the form of low Btu gas produced via gasification of wood waste. The electric power production capacity will be 14 megawatts. Natural gas and diesel oil will be used for startup and as pilot fuel.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph 4 at the end of this notice.

19. Dakota County, a Minnesota Political Subdivision

[Docket No. QF89-60-000]

December 8, 1988.

On November 23, 1988, Dakota County, a Minnesota political subdivision (Applicant), of Dakota County Government Center, 1560 West Highway 55, Hastings, Minnesota 55033 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Dakota County, Minnesota. The facility will coinsist of two steam generators and two turbine generators. The net electric power production capacity will be 20 megawatts. The primary energy source will be biomass in the form of municipal solid waste. There is no planned usage of natural gas, oil or coal in the facility. The facility is projected to begin operation in mid 1993.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

20. City of Chicago, Illinois a Municipal Corporation

[Docket No. QF89-61-000]

December 8, 1988

On November 25, 1988, City of Chicago, Illinois, a Municipal Corporation, Applicant of, 121 North LaSalle Street, Chicago Illinois 60602 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission s regulations. No determination has been made that the submittal constitutes a complete filing.

The 2 MW small power production facility will be located in Chicago Illinois. The facility consists of waterwall steam generators and steam turbine generators. The primary energy source is biomass in the form of municipal solid waste. Natural gas use for start-up and other purposes, will not exceed 1% of the total energy input of the facility during any calendar year.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

21. Total Petroleum, Inc.

[Docket No. QF89-52-000]

December 8, 1988

On November 18, 1988, Total Petroleum, Inc. (Applicant), of Bypass 142, P.O. Box 188, Ardmore, Oklahoma 73402, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Ardmore, Oklahoma. The facility will consist of two combustion turbine generators, two heat recovery steam generators equipped for supplemental firing and one condensing steam turbine generator. The steam recovered from the generators will be used in Total Petroleum's refinery operations. The net electric power production capacity will be 40.44 megawatts. The primary energy source will be natural gas and refinery fuel gas.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

BILLING CODE 6717-01-M

[Docket No. TA89-1-16-001]

National Fuel Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

December 9, 1988.

Take notice that on December 1, 1988, National Fuel Gas Supply Corporation ("National") tendered for filing Substitute Seventeenth Revised Sheet No. 4 as part of its FERC Gas Tariff, First Revised Volume No. 1, proposed to become effective January 1, 1989.

National states the tariff sheet reflects a revision, pursuant to § 154.305(c)(4) of the Commission's Regulations, to the Current Adjustment included in National's first annual PGA filing. National states that the purpose of the filing is to update National's annual Purchased Gas Cost adjustments to reflect changes in the rates charged by its pipeline suppliers.

Further, National states that Substitute Seventeenth Revised Sheet No. 4 reflects an overall increase in rates of 15.84 cents per dekatherm above National's prior quarterly PGA filing, which went into effect October 1, 1988. The overall increase results from an increase in current purchased gas costs, a positive demand surcharge adjustment and a negative commodity surcharge adjustment.

National states that copies of this filing were served on National's jurisdictional customers and on the regulatory commissions of the states of New York, Ohio, Pennsylvania, Delaware and New Jersey.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rule 214 or 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions to intervene or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28785 Filed 12-13-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA89-1-17-000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 9, 1988.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on December 2, 1988 tendered for filing certain revised tariff sheets as part of its FERC Gas Tariff.

Texas Eastern states that the tariff sheets are being filed pursuant to section 23, Purchased Gas Cost Adjustment, and Section 26, Electric Power Cost (EPC) Adjustment, contained in the General Terms and Conditions of Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1. This filing constitutes Texas Eastern's first annual PGA filing pursuant to Section 23 in accordance with the Commission's recently revised regulations governing PGA filings as promulgated by its Order No. 483, and also constitutes Texas Eastern's semiannual tracking of changes in electric power costs pursuant to Section 26. Finally, Sheets Nos. 50, 50A, 50B, 50C, and 50D reflect the deletion of Rate Schedule TS-1 as proposed in a separate tariff filing made concurrently with this filing.

Texas Eastern states that in compliance with § 154.305(a)(2) of the Commission's Regulations, a report containing detailed computations which clearly show the derivation of the current adjustment and a surcharge rate to be applied to Texas Eastern's effective rates is attached and enclosed in 9-track computer tape format as prescribed by FERC Form No. 542-PGA (Revised) for formal filing with the Commission.

Texas Eastern states that the rate changes proposed by this filing consist of:

(1) PGA increases of $.061/dth in the Demand-1 component of Texas Eastern's sales rates and $.2159/dth in the commodity component and a decrease of $.0386/dth in the Demand-2 component pursuant to Section 23 of Texas Eastern's tariff based upon Texas Eastern's best projection of cost of purchased gas for the period February 1, 1989 through April 30, 1989 as required by § 154.305(c) of the Commission's Regulations and a surcharge rate to amortize the current deferral subaccount balance in Account 191 as of September 30, 1988 over the 12-month period beginning on February 1, 1989 as required by § 154.305(d) of the Commission's Regulations.

(2) Changes in rates for sales and transportation services pursuant to Section 26 of Texas Eastern's tariff to reflect the projected annual electric power cost incurred in the operation of transmission compressor stations with electric motor prime movers for the 12 months beginning February 1, 1989 and to reflect the EPC surcharge which is designed to clear the balance in the Deferred EPC account as of October 31, 1989.

Texas Eastern states that underlying the calculations for rate changes proposed with respect to both Section 23, Purchased Gas Cost Adjustment and Section 26, EPC Adjustment, is the assumption that the Commission will approve and make effective as of or prior to February 1, 1989 Texas Eastern's Compliance Filing of October 26, 1988 in Docket No. RP85-117 *et al.* This assumption has a substantial impact on the rate changes proposed. As a result, should timely approval of such October 26, 1988 Compliance Filing not be forthcoming, Texas Eastern states that it will file pursuant to § 154.305(c)(4) to revise this annual PGA filing at least 30 days prior to February 1, 1989 to reflect the impact of the October 26 Compliance Filing not being effective during the time period covered by this filing.

Texas Eastern states that the Account 191 balance proposed to be amortized beginning February 1, 1989 includes an amount of $492,530 related to actual purchased gas costs for the period August 1988 through September 1988 incurred by Texas Eastern in excess by more than 3% of the computed projected purchased gas costs pursuant to § 154.306(e) of the Commission's Regulations. Since § 154.306 requires specific Commission approval for such amount to be recoverable through a

BEST COPY AVAILABLE

PGA Surcharge, Texas Eastern has respectfuly requested the Commission to authorize the recovery by Texas Eastern of such amount (a mere three tenths of one percent above the threshold) on the grounds that Texas Eastern incurred such additional purchased gas costs for reasons beyond its control.

The proposed effective date of the above tariff sheets is February 1, 1989.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protect said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 30, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 88-28786 Filed 12-13-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TM89-2-17-000]

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

December 9, 1988.

Take notice that Texas Eastern Transmission Corporation (Texas Eastern) on December 2, 1988 tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, six copies of the following tariff sheets:

Tenth Revised Sheet No. 50
Ninth Revised Sheet No. 51

Texas Eastern states Sheet Nos. 50 and 51 are being filed pursuant to (1) Section 4.F of Texas Eastern's Rate Schedule SS-2 and Section 4.F of Texas Eastern's Rate Schedule SS-3 which provide for an automatic rate adjustment to flow through any changes in CNG Transmission Corporation's (CNG) Rate Schedule GSS rates which underline Texas Eastern's Rate Schedule SS-2 and SS-3 and (2) Section 25 of the General Terms and Conditions of Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1, to include in Texas Eastern's rates the GRI Funding Unit of 1.51 cents per MCF approved by the Commission in Opinion No. 320 issued on November 30, 1988 in Docket No. RP88-182.

Texas Eastern states that CNG filed on July 1, 1988 to increase the Rate Schedule GSS rates as a part of their general rate increase filing in Docket No. RP88-211-000. The proposed rate increase was suspended by Commission order dated August 1, 1988 in Docket No. RP88-211-000 until January 1, 1989. Pursuant to Rate Schedule SS-2 and SS-3 of Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1, any change in Consolidated's GSS rates are flowed through to Texas Eastern's SS-2 and SS-3 rates. Schedule A in the filing reflects the calculations involved in tracking the GSS rate changes through Texas Eastern's Rate Schedules SS-2 and SS-3. These rates reflect CNG's ACA charge of $0.0018 per dth which was approved by the Commission in an order dated September 30, 1988 in Docket No. TM89-1-22 to be effective October 1, 1988.

Texas Eastern states Schedule B in the filing shows the conversion of the GRI Funding Unit of 1.51 cents per Mcf to 1.46 cents per dry dekatherm (Texas Eastern's billing basis). The GRI charge of 1.46 cents per dekatherm is reflected on Sheets Nos. 50 and 51.

Texas Eastern states Section 4.F of its Rate Schedules SS-2 and SS-3 states that each change in Texas Eastern's rates to reflect changes in CNG's Rate Schedule GSS rates shall become effective without suspension. Texas Eastern respectfully requests that the Commission waive any of its rules and regulations necessary to permit this filing to become effective on January 1, 1989.

The proposed effective date of the above tariff sheets is January 1, 1989 and February 1, 1989, respectfully.

Texas Eastern states that it has before the Commission for approval, tariff sheets filed October 26, 1988 in Docket Nos. RP85-177-056, RP88-67-011, and CP88-136-001. In the event the tariff sheets filed October 26, 1988 are not approved or are altered in any way by the Commission's decision, Texas Eastern will refile the above listed tariff sheets to reflect the Commission's decision.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

First Revised Sheet No. 732
First Revised Sheet No. 733
First Revised Sheet No. 734

Original Volume No. 2

Second Revised Sheet No. 984
Fourth Revised Sheet No. 985
Third Revised Sheet No. 1052

Texas Eastern states these tariff sheets are being filed to reflect the cancellation and withdrawal of Texas Eastern's Rate Schedule TS-1 as required by the Commission in its orders issued October 15, 1987 in Docket No. RP85-177-019, *et al.* and September 29, 1988 in Docket Nos. RP85-177-044 through-046 and CP88-136-000.

Texas Eastern states that pursuant to the Commission's order issued October 15, 1987 in Docket No. RP85-177-019, *et al.*, and September 29, 1988 in Docke

Nos. RP85–177–044 through -046 and CP88–136–000, Texas Eastern was ordered to terminate transportation service under Rate Schedule TS–1. Accordingly, Texas Eastern gave notice to Arkansas Louisiana Gas Company, Consumers Gas Company, Elizabethtown Gas Company, New Jersey Natural Gas Company, and Public Service Electric and Gas Company terminating all Service Agreements under Rate Schedule TS–1 as of February 1, 1989. Therefore, as of February 1, 1989 Texas Eastern will not have any effective Rate Schedule TS–1 Agreements, and under the terms of such Rate Schedule will not execute any such agreements in the future.

Texas Eastern states the tariff sheets proposed to be withdrawn are Original Sheet Nos. 366, 367 and 368 which tariff sheets set forth the TS–1 Rate Schedule. References to the Rate Schedule TS-1 rate on Sheet Nos. 985 (Rate Schedule X–116) an 1052 (Rate Schedule X–121) have been changed to reflect the applicable effective Rate Schedule IT–1 rate. The remaining tariff sheets proposed for filing herein are being filed soley to relect the appropriate deletion of references to Rate Schedule TS–1.

The proposed effective date of the above tariff sheets is February 1, 1989.

Texas Eastern states that it has before the Commission for approval, tariff sheets filed October 26, 1988 in Docket Nos. RP85–177–056, RP88–67–011, and CP88–136–001. In the event the tariff sheets filed October 26, 1988 are not approved or are altered in any way by the Commission's decision, Texas Eastern will refile the above listed tariff sheets to reflect the Commission's decision.

Copies of the filing were served on Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM89–2–29–000]

Transcontinental Gas Pipe Line Corp.; Proposed Changes in FERC Gas Tariff

December 9, 1988.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on December 1, 1983, Revised Third Substitute Revised Fifty-Second Revised Sheet No. 12, Third Substitute Fifty-Third Revised Sheet No. 12, and Second Substitute Fifth-Fourth Revised Sheet No. 12 to Second Revised Volume No. 1 of its FERC Gas Tariff. The purpose of this filing is to track, pursuant to Section 4 of Transco's LSS Rate Schedule and Section 26 of the General Terms and Conditions of Volume No. 1 of Transco's tariff, rate changes in storage and transportation services purchased from Texas Eastern Transmission Corporation (TETCO), National Fuel Gas Supply Corporation (National Fuel) and Consolidated Gas Supply Corporation (Con Gas) which are included in Transco's Rate Schedule S–2 and LSS.

Transco states that on Aug. 31, 1988, TETCO filed revised rates, to be effective September 1, 1988 to reflect a revision to its compliance filing of July 22, 1988 in Docket No. RP88–67. Included therein was an increase in TETCO's demand charge for service rendered under Rate Schedule X–28 which is utilized by Transco to render service to its customers under Rate Schedule S–2. Transco's tariff sheet proposed effective September 1, 1988 reflects the resulting rate incease in its Rate Schedule S–2 demand charges.

Transco states that it purchases transportation service under National Fuel's Rate Schedule X–42 and storage service under Con Gas' Rate Schedule GSS to provide service under Transco's Rate Schedule LSS. National Fuel's filing of August 31, 1988 in Docket Nos. TQ89–1–16 *et al.* and Con Gas' filing of August 30, 1988 in Docket No. RP88–217 *et al.* reflect a reduction in the Commission approved ACA charge effective October 1, 1988. Similarly, on September 2, 1988 TETCO filed in Docket No. TM89–1–17 revised Rate Schedule X–28 rates to reflect a reduction in the Commission approved ACA charge effective October 1, 1988. Transco's tariff sheet proposed effective October 1, 1988 reflects the revised ACA charges under its Rate Schedules LSS and S–2.

Transco states that in this filing is a revised tariff sheet proposed to be effective November 1, 1988 which incorporates the revised Rate Schedules LSS and S–2 rates filed herein into Transco's November 2, 1988 minimum bill compliance filing in Docket Nos. RP87–7–042 and RP86–48–002.

Transco states that copies of the filing are being mailed to each of its customers and interested State Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with § 385.214 and § 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP89–43–000]

Valero Interstate Transmission Co.; Tariff Filing

December 9, 1988.

Take notice that on December 5, 1988, Valero Interstate Transmission Company ("Vitco") tendered for filing the following Tariff Sheets as part of its FERC Gas Tariff, Original Volume No. 2:

1st Revised Sheet No. 95
Original Sheet No. 95.1

Vitco states these tariff sheets establish a fixed take-or-pay charge designed to recover fifty percent (50%) of Vitco's take-or-pay buy-out and buy-down costs in accordance with the provisions of Order No. 500. The take-or-pay costs include (a) amounts actually paid by Vitco under settlements entered into prior to December 1, 1988 and (b) take-or-pay costs which Vitco reasonably expects to pay pursuant to settlement agreements entered into as of December 1, 1988, with payments to commence within nine months of this filing.

Vitco proposes to allocate the take-or-pay costs to the sole jurisdictional sales customer to whom the subject gas purchase contracts are dedicated, El Paso Natural Gas Company ("El Paso"). The total amount that Vitco seeks to recover from El Paso is $1,325,000, exclusive of interest.

Vitco states it is electing, pursuant to Order No. 500, to absorb fifty percent (50%) of its take-or-pay costs and collect fifty percent (50%) from El Paso through a fixed demand surcharge. If El Paso prefers to pay the charges over an extended period, not to exceed eighteen (18) months, Vitco is willing to so collect the costs along with interest computed in accordance with § 154.67 of the Commission's Regulations.

In the event El Paso or a state agency elects to contest the prudence of the subject costs, Vitco seeks the right to bill El Paso through a demand surcharge the *full* amount of the take-or-pay costs found to be prudently incurred. Vitco requests that all parties be required to elect whether or not to contest prudence within thirty (30) days from the effective date of the filing.

Vitco further requests that it be permitted to file after December 31, 1988 to collect, consistent with Order No. 500, take-or-pay costs which are subject to litigation, arbitration, or settlement as of December 31, 1988, or any later date the Commission may establish.

Vitco requests a proposed effective date for the proposed tariff sheets of January 5, 1989, and requests waiver of the general rate filing requirements of § 154.63 of the Commission's regulations.

Copies of the filing were served on El Paso and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 16, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of Vitco's filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180795; FRL 3491-1]

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the 11 States listed below. Five crisis exemptions were initiated, by the Arkansas State Plant Board, California Department of Food and Agriculture, and the Maryland, Montana, and Texas Departments of Agriculture. Three guarantine exemptions were granted to the California Department of Food and Agriculture, the Mississippi Department of Agriculture, and the New Jersey Department of Environmental Protection. These exemptions, issued during the months of September and October, are subject to application and time restrictions and reporting requirements designed to protect the environment to the maximum extent possible. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific, crisis, or guarantine exemption for its effective date.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person. The following information applies to all contact persons:

By mail: Registration Division (TS-767C), office of pesticide Programs, Environmental Protection Agency, 401 M St., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM# 2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-1806).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Arizona Commission of Agriculture and Horticulture for the use of Hydrogen cyanamide of table grapes to promote uniform bud-break; October 13, 1988, to January 31, 1989. A notice was published in the **Federal Register** of September 21, 1988 (53 FR 36635). This exemption was granted on the basis that there are no registered alternative pesticides which will promote uniform bud-break on table grapes. Based on information provided by the Applicant and comments in connection with the **Federal Register** notice, unfavorable weather will result in both yield and price decline producing economic losses if an effective pesticide is not made available. Residues of hydrogen cyanamide will not exceed 0.1 ppm in or on grapes. This residue level should not pose a threat to the public health. There has been progress toward registration (necessary toxicity studies have been initiated). Precautions on the label and in the authorizing mailgram are adequate to protect mixers, loaders, applicators, and endangered species. (Jim Tompkins)

2. California Department of Food and Agriculture for the use of hydrogen cyanamide on table grapes to promote uniform bud-break; October 13, 1988, to February 15, 1989. A notice was published in the **Federal Register** of September 13, 1988 (53 FR 35372). This exemption was granted on the basis that there are no registered alternative pesticides which will promote uniform bud-break on table grapes. Based on information provided by the Applicant and comments in connection with the **Federal Register** notice, unfavorable weather will result in both yield and price decline producing economic losses if an effective pesticide is not made available. Residues of hydrogen cyanamide will not exceed 0.1 ppm in or on grapes. This residue level should not pose a threat to the public health. there has been progress toward registration (necessary toxicity studies have been initiated). Precautions on the label and in the authorizing mailgram are adequate to protect mixers, loaders applicators, and endangered species. (Jim Tompkins)

3. California Department of Food and Agriculture for the use of fenamiphos on plums and prunes to control nematodes; September 19, 1988, to September 15, 1989. (Libby Pemberton)

4. California Department of Food and Agriculture for the use of sodium chlorate on dry beans as a desiccant; September 26, 1988, to December 31, 1988. (Robert Forrest)

5. California Department of Food and Agriculture for the use of chlorothalonil on mushrooms to control *Verticillium fungicola*, dry bubble or brown spot disease; October 1, 1988, to September 30, 1989. (Gene Asbury)

6. Colorado Department of Agriculture for the use of chlorpyrifos on winter wheat to control Russian wheat aphid; October 6, 1988, to December 31, 1988. (Robert Forrest)

7. Florida Department of Agriculture for the use of anilazine on watercress to control Cercospora; September 1, 1988, to June 1, 1989. (Jim Tompkins)

8. Illinois Department of Agriculture for the use of thiabendazole on stored corn to control storage mold and fungi; September 19, 1988, to January 1, 1989. (Jim Tompkins)

9. Illinois Department of Argiculture for the use of permethrin of turnip and mustard greens to control cabbage worms and aphids; September 22, 1988, to January 1, 1989. (Libby Pemberton)

10. Michigan Department of Agriculture for the use of sodium chlorate on dry edible beans as a desiccant; September 22, 1988, to October 31, 1988. (Robert Forrest)

11. Mississippi Department of Agriculture and Commerce for the use of sodium chlorate on southern peas and lima beans as a dessicant; September 23, 1988, to November 1, 1988. (Robert Forrest)

12. Missouri Department of Agriculture for the use of thiabendazole on stored corn to control storage mold and fungi; September 19, 1988, to January 1, 1989. (Jim Tompkins)

13. New York Department of Environmental Conservation for the use of sulfur dioxide on table grapes to control decay and mold; October 3, 1988, to December 31, 1988. (Libby Pemberton)

14. Oregon Department of Agriculture for the use of carbofuran on peppermint to control strawberry root weevil larvae; September 8, 1988, to October 31, 1988. (Robert Forrest)

15. Texas Department of Agriculture for the use of bifenthrin on field, pop, and seed corn to control Banks grass mites and two-spotted spider mites; September 27, 1988, to December 31, 1988. (Gene Asbury)

Crisis exemptions were initiated by the:

1. Arkansas State Plant Board on September 23, 1988, for the use of sodium chlorate on southern peas as a desiccant. This program has ended. (Robert Forrest)

2. California Department of Food and Agriculture on September 1, 1988, for the use of sethoxydim on dry beans to control watergrass. This program has ended. (Robert Forrest)

3. Maryland Department of Agriculture on September 23, 1988, for the aerial use of glyphosate on corn to control Johnsongrass. This program has ended. (Libby Pemberton)

4. Montana Department of Agriculture on October 3, 1988, for the use of chlorpyrifos on wheat to control Russian wheat aphids. This program has ended. (Robert Forrest)

5. Texas Department of Agriculture on October 10, 1988, for the use of sodium chlorate on pinto beans as a preharvest desiccant. This program has ended. (Robert Forrest)

Quarantine exemptions were granted to the:

1. California Department of Food and Agriculture for the use of methol on honey bee hives to control Acarine mites; September 7, 1988, to September 7, 1991. (Robert Forrest)

2. Mississippi Department of agriculture for the use of menthol on honey bee hives to control Acarine mites; September 5, 1988, to September 15, 1991. (Robert Forrest)

3. New Jersey Department of Environmental Protection for the use of menthol on honey bee hives to control tracheal mites; October 13, 1988, to October 13, 1991. (Robert Forrest)

Authority: 7 U.S.C. 136.

Dated: November 23, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the eight States and two crisis exemptions were initiated by the Florida Department of Agriculture and Consumer Service and the Texas Department of Agriculture. Also listed is a quarantine exemption granted to the United States Department of Agriculture, Department of Animal Plant Health Inspection Service. These exemptions, issued during the months of October 1987 through May 1988, were inadvertently omitted from the monthly notices, and are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. Information on these restrictions is available from the EPA contact persons listed below.

DATES: See each specific, crisis, and quarantine exemption for its effective date.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person. The following information applies to all contact persons:

By mail: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1806).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the: Q02

1. California Department of Food and Agriculture for the use of prometryn on parsley to control cheeseweed, burning nettle, and shepherd's purse; October 5, 1987, to May 31, 1988. (Libby Pemberton)

2. California Department of Food and Agriculture for the use of metalaxyl on strawberries to control *Phytophora fragariae;* December 7, 1987, to April 30, 1988. (Donald Stubbs)

3. California Department of Food and Agriculture for the use of glyphosate in dates to control Bermudagrass; April 26, 1988, to December 1, 1988. (Donald Stubbs)

4. Indiana State Chemist and Seed Commission for the use of Harmony on wheat to control wild garlic; February 17, 1988, to April 30, 1988. (Robert Forrest)

5. Michigan Department of Agriculture for the use of clopyralid on sugarbeets to control Canada thistle and perennial sowthistle; May 17, 1988, to July 15, 1988. (Libby Pemberton)

6. Montana Department of Agriculture for the use of clopyralid on sugarbeets to control Canada thistle, cocklebur, and wild sunflowers; May 17, 1988, to July 30, 1988. (Libby Pemberton)

7. New Jersey Department of Environmental Protection for the use of metalaxyl on cranberries to control root rot; April 7, 1988, to December 31, 1988. (Robert Forrest)

8. Ohio Department of Agriculture for the use of Harmony on wheat to control wild garlic; February 23, 1988, to April 30, 1988. (Robert Forrest)

9. Pennsylvania Department of Agriculture for the use of Imazethapyr (Pursuit) on snap beans to control weeds; April 5, 1988, to September 30, 1988. (Robert Forrest)

10. Texas Department of Agriculture for the use of cypermethrin on dry bulb onions to control onion and western flower thrips; March 1, 1988, to September 15, 1988. (Gene Asbury)

Crisis exemptions were initiated by the:

1. Florida Department of Agriculture and Consumer Services on January 8, 1988, for the use of benomyl on cabbage to control white mold (Sclerotinia sclerotiorum). This program has ended. (Don Stubbs)

2. Texas Department of Agriculture on April 8, 1988, for the use of ethyl parathion on rape of control aphids. This program has ended. (Robert Forrest)

A quarantine exemption was granted to the United States Department of Agriculture, Department of Animal Plant Health Inspection Service, for the use of quaternary compounds on field equipment to control witchweed seed in

North and South Carolina; February 4, 1988, to February 4, 1991. (Donald Stubbs)

Authority: 7 U.S.C. 136.

Dated: November 23, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-100058; FRL-3490-8]

Unisys Systems Support Group; Transfer of Data

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). UNISYS Systems Support Group (UNISYS) has a contract with EPA to operate and maintain a National Computer Center (NCC) located at the Research Triangle Park, North Carolina, a Washington Information Center (WIC) located at EPA headquarters in Washington, DC, and an integrated communications network to make the NCC mainframe processing capacity available to EPA locations throughout the United States. Some of the submitted information that has been placed on the NCC mainframe may have been claimed to be confidential business information (CBI) by submitters. Access to this information by EPA contractors is authorized by 40 CFR 2.307(h)(3) and 40 CFR 2.308(i)(2). This action will serve to notify affected persons.

DATE: UNISYS employees at the WIC who are newly-involved with this information will be given access to it no sooner than December 21, 1988. Other UNISYS employees (at the NCC) continue to have access.

FOR FURTHER INFORMATION CONTACT:

By mail: Catherine S. Grimes, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 212, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-4460).

SUPPLEMENTARY INFORMATION: Under Contract No. 68-01-6658, UNISYS manages components of a national EPA data processing and communications network at both the NCC and WIC.

The NCC is equipped with mainframe hardware and software to provide a major multiuser operating system environment as well as major data base management, data processing, computational, statistical, graphics, and related support and utility applications. NCC is also equipped with communications hardware and software necessary to make the NCC mainframe environment accessible within a national network from EPA locations throughout the United States.

The WIC is a high capacity node in the national network to provide services to the high concentration of EPA program activities located at headquarters in Washington, DC. These facilities are used by the Office of Pesticide Programs (OPP) and therefore some information submitted to EPA under FIFRA and the FFDCA resides within this system environment, and is therefore accessible to UNISYS employees who work at the NCC and the WIC. UNISYS employees who maintain and operate the NCC and WIC facilities have access to all data and software within the system environment. This access is incidental to their work, which involves loading and maintenance of all system and applications software, system performance tuning, data file backup services, diagnosis and remedy of system hardware and software failures, routing and distribution of printed system output, production of system utilization statistics, and implementation of EPA-directed security protocols within the system environment. While UNISYS employees have complete access to all data within the NCC/WIC environment, they are not in a position to know the actual significance of the data, nor do they use the data within its subject-matter context.

OPP has determined that placement of submitted information on the NCC network environment, and the resulting access by UNISYS to this information (relating to all pesticides covered by the OPP regulatory program) is necessary to the carrying out, by OPP, of regulatory responsibilities under FIFRA and FFDCA. Some of this information is entitled to confidential treatment.

In accordance with the requirements of 40 CFR 2.301(h)(2), UNISYS shall not use the information for any purpose other than the purpose(s) specified in the contract; shall not disclose the information in any form to a third party without prior written approval from the agency or affected business; and shall require that each official and employee of the contractor sign an agreement to protect the information from unauthorized release. In addition, UNISYS has submitted a security plan under which CBI within the national system environment will be secured—safe from unauthorized access or compromise. This security plan has been approved by EPA. No information will be provided to any employees of this contractor until the above requirements have been fully met with respect to those employees.

Dated: November 29, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[FRL-3491-3]

Clean Water Act Class II; Proposed Administrative Penalty Assessment and Opportunity to Comment Regarding Leggett & Platt, Inc., Carthage, MO

December 5, 1988.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed administrative penalty assessment and opportunity to comment regarding Leggett & Platt, Inc., Carthage, Missouri.

SUMMARY: EPA is providing notice of a proposed administrative penalty assessment for alleged violations of the Clean Water Act. EPA is also providing notice of opportunity to comment on the proposed assessment.

Under 33 U.S.C. 1319(g), EPA is authorized to issue orders assessing civil penalties for various violations of the Act. EPA may issue such orders after filing a Complaint commencing either a Class I or Class II penalty proceeding. EPA provides public notice of the proposed assessment pursuant to 33 U.S.C. 1319(g)(4)(a).

Class II proceedings are conducted under EPA's Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation and Suspension of Permits, 40 CFR Part 22. The procedures by which the public may submit written comments on a proposed Class II order or participate in a Class II proceeding, and the procedures by which a respondent may request a hearing, are set forth in the Consolidated Rules. The deadline for submitting public comment on a proposed Class II order is thirty days after issuance of this public notice.

On November 30, 1988, EPA commenced the following Class II

proceeding for the assessment of penalties by filing with the Regional Hearing Clerk, U.S. Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101, (913) 236–2811, the following Complaint: In the Matter of Leggett & Platt, Inc., 1225 East Central, Carthage, Missouri; EPA Docket No. VII 89–W–0003.

The Complaint proposes a penalty of $125,000, for effluents discharged from the Leggett & Platt, Inc. processing plant to the City of Carthage Water and Electric Plant wastewater treatment facilities in excess of the Iron and Steel Point Source Categorical Pretreatment Standards at 40 CFR Part 420, 47 FR 23284, May 27, 1982, as amended.

FOR FURTHER INFORMATION: Persons wishing to receive a copy of EPA's Consolidated Rules, review the Complaint or other documents filed in this proceeding, comment upon the proposed penalty assessment, or otherwise participate in the proceeding should contact the Regional Hearing Clerk identified above.

The administrative record for the proceeding is located in the EPA Regional Office at the address stated above, and the file will be open for public inspection during normal business hours. All information submitted by Leggett & Platt, Inc. is available as part of the administrative record, subject to provisions of law restricting public disclosure of confidential information. In order to provide opportunity for public comment, EPA will issue no final order assessing a penalty in this proceeding for thirty days from the date of this Notice.

Date: November 30, 1988.

Morris Kay,

Regional Administrator.

BILLING CODE 6560–50–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200193.

Title: Jacksonville Port Authority Terminal Agreement.

Parties: Jacksonville Port Authority (Authority) C.N. Lloyd Brasileiro (CNLB).

Synopsis: The agreement provides that the Authority will give CNLB incentive tariff discounts for wharfage and container and chassis receiving/delivery charges based on the number of vessel calls. The term of the agreement is for one year.

By Order of the Federal Maritime Commission.

Dated: December 9, 1988.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Metrocorp, Inc.; Application To Provide Armored Car and Courier Services

Metrocorp, Inc., East Moline, Illinois, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) ("BHC Act") and § 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)), for permission to engage *de novo* through Metro Armored Couriers, Inc., East Moline, Illinois, in the activity of providing armored car and courier services.

These proposed activities include: (i) Providing fully-insured transportation of cash, negotiable instruments, securities, and valuables; collecting currency and checks from commercial customers and nonbank financial institutions and transporting these collections to and depositing them with financial institutions; and delivering cash, negotiable instruments, securities, and valuables to commercial customers and nonbank financial institutions; (ii) providing related services, such as interbank transfers, coin wrapping, change delivery, mail delivery, payroll check cashing, and servicing of automatic teller machines; and (iii) providing incidental courier services as permitted under § 225.25(b)(10) of the Board's Regulation Y.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity "which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." A particular activity may be found to meet the "closely related to banking" test if it is demonstrated that banks have generally provided the proposed activity; that banks generally provide services that are operationally or functionally similar to the proposed activity so as to equip them particularly well to provide the proposed activity; or that banks generally provide services that are so integrally related to the proposed activity as to require their provision in a specialized form. *National Courier Ass'n v. Board of Governors,* 516 F.2d 1229, 1237 (D.C. Cir.1975). In addition, the Board may consider any other basis that may demonstrate that the activity has a reasonable or close relationship to banking or managing or controlling banks. Board Statement Regarding Regulation Y, 49 FR 806 (1984).

The Board has not previously considered an application to engage in armored car and courier services. The Board has considered, however, on two occasions adding armored car services to the list of nonbanking activities that are closely related to banking. *See* 49 FR 9215 (1984); 36 FR 21897 (1971). On both occasions, the Board decided to take no action. *See* FR 39994; 38 FR 32126 (1973).

Applicant states that the proposed activity is so closely related to banking as to be a proper incident thereto on the basis of its belief that banks engage in activities that are functionally and operationally similar to those involved in the application, including the handling or transfer or currency and valuables.

In determining whether a particular activity is a proper incident to banking, the Board considers whether the performance of the activity by an affiliate of a holding company can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue

concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices. Applicant maintains that permitting bank holding companies to engage in the proposed activities would be procompetitive and would enable holding companies to provide greater convenience and increased services to customers. In addition, Applicant believes that the proposal would not result in adverse effects.

In publishing the proposal for comment, the Board does not take any position on issues raised by the proposal under the BHC Act. Notice of the proposal is published solely in order to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets or is likely to meet the standards of the BHC Act.

Comments are requested on whether the proposed activity is "so closely related to banking or managing or controlling banks as to be a proper incident thereto," and whether the proposal as a whole can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."

Any request for a hearing on these questions must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Chicago.

Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than January 13, 1989.

Board of Governors of the Federal Reserve System, December 8, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[ORD–059–N]

Medicare and Medicaid Programs; Health Care Financing Research and Demonstration; Availability of Funds for Cooperative Agreements and Grants, Medicare Catastrophic Coverage Act of 1988

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice announces the availability of HCFA funds for certain priority research and demonstration cooperative agreements and grants to conduct projects related to the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360). The closing date for receipt of applications in response to this solicitation is February 6, 1989.

This notice also postpones the closing date for receipt of applications for fiscal year 1989 in response to the general statement of funding priorities for research and demonstration grants and cooperative agreements announced in the **Federal Register** on September 10, 1987 (52 FR 34304). The new closing date will be announced in the **Federal Register** in the near future along with the statement of revised funding priorities for fiscal year 1989.

DATES: The closing date for submission of letters of intent is December 30, 1988; the closing date for submission of applications is February 6, 1989.

APPLICATION KITS: Standard application forms and related instructions are available from, and must be formally submitted to: Paul McKeown, Grants Officer, Health Care Financing Administration, Office of Budget and Administration, Room 364 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207–5187, (301) 966–5157.

Mr. McKeown is also available to answer questions and to provide guidance concerning the completion of the application forms.

FOR FURTHER INFORMATION CONTACT: Michael Spodnik, Health Care Financing Administration, Office of Research and Demonstrations, Research and Demonstration Program Support Branch, 2–D–6 Oak Meadows Building, 6325 Security Boulevard, Baltimore, Maryland 21207–5187, (301) 966–6637.

SUPPLEMENTARY INFORMATION: This notice solicits cooperative agreement and grant applications for HCFA research and demonstration projects in certain priority areas resulting from the enactment of the Medicare Catastrophic Coverage Act of 1988 (Pub. L. 100–360). That legislation mandates the development and implementation of a series of demonstration projects. It also mandates the implementation of research in certain specific areas, most notably in the long-term care and drug benefit areas. We are developing specific study plans for these research areas and expect to be announcing through the Commerce Business Daily our specific contract needs; however, we are encouraging the stimulation of research in these areas through this solicitation.

The application procedures, general policy considerations, criteria to be used in reviewing the applications, and selection criteria announced in the September 10, 1987 **Federal Register** notice (52 FR 34304) of general funding priorities will continue to apply to this solicitation. A copy of that notice is included in the package of application materials that can be obtained by contacting the HCFA Grants Officer. (See APPLICATIONS KITS section).

Potential applicants should be aware that we are requiring the submission by December 30, 1988, of a letter of intent from all organizations intending to submit an application in response to this solicitation. This letter is described in the September 10, 1987 notice.

The general notice of funding priorities for fiscal year 1989 research and demonstration grants and cooperative agreements is currently under development. We expect to publish that general solicitation in the **Federal Register** in the near future. Therefore, we have postponed the November 7, 1988 closing date previously announced in the **Federal Register** (52 FR 34304); the new closing date will be included in the general solicitation.

I. Medicare Catastrophic Coverage Act Studies

Public Law 100–360 provided for a new program of expanded benefits for Medicare beneficiaries. As a result of this legislation, a number of new research studies are required, particularly in the areas of long-term care and impact of the new catastrophic benefit program on cost, access, and utilization (particularly in the area of prescription drugs). We are encouraging through this cooperative agreement and grant solicitation the stimulation of research efforts in these areas. We are also interested in receiving applications to respond to the demonstration initiatives mandated by the legislation.

A. Research Studies

There are a number of important areas of study resulting from Pub. L. 100–360. These areas can be divided generally into two groups: Projects that will provide us information to make more informed decisions on program implementation and policy, and projects that will assist us in evaluating the impact of the new program of benefits. We are currently developing specific research study and evaluation plans for the long-term care, drug benefit, and general program evaluation areas; we expect to announce later this year through the Commerce Business Daily our specific contract needs in these areas.

In addition to specific contract needs, however, we are encouraging the stimulation of research in these areas by making available funds for grants and cooperative agreements designed to expand the current state of knowledge and information available in these areas. Areas where we are encouraging research include the following:

•Impact of the catastrophic benefit on beneficiary utilization of services (volume, composition and outcomes, beneficiary out-of-pocket expenditures, and program outlays). We are interested in the broad impact on utilization, both of institutional and noninstitutional care, covered and noncovered services. Areas of particular interest include changes in utilization of services resulting from new benefits, such as prescription drugs and mammography screening.

• The response of the private health insurance sector, especially how insurers have altered the supplementary benefit packages they market to the elderly, how retiree benefit packages have been affected, and the response of State regulations governing these private insurance products.

• The use of outpatient prescription drugs by Medicare beneficiaries (both before and after implementation of Pub. L. 100–360), including indications of medical necessity, potential for adverse drug interactions, cost (including whether lower cost drugs could have been used) and rates of patient stockpiling and wastage.

• In the long-term care area, we are interested in receiving applications addressing the following issues:

• The financial characteristics of Medicare beneficiaries who receive or need long-term care services, including whether such beneficiaries are eligible for Medicare, Medicaid, or other benefits for such services. The impact of the Catastrophic legislation on the use of long-term care services by program beneficiaries.

• How the financial and other characteristics of Medicare beneficiaries affect their utilization of institutional and noninstitutional long-term care services.

• How relatives of Medicare beneficiaries are affected financially and in other ways because the beneficiaries require or receive long-term care services.

• The magnitude of the nation's elderly population with various levels of disability and need for noninstitutional and institutional long-term care; projection of future long-term care needs for persons with various levels of disability.

• The quality of long-term care services (in community-based and custodial settings).

• How the provision of long-term care services may reduce expenditures for acute care services.

• The effectiveness of, and need for, State and Federal consumer protections that assure adequate access to and protect the rights of Medicare beneficiaries who are provided long-term care services (other than in a nursing facility). We are particularly interested in projects that examine innovative approaches for ensuring access to such care.

B. Demonstration Initiatives

Public Law 100–360 specifically mandated the establishment of several demonstration programs for which HCFA has responsibility. We are soliciting applications in response to three specific demonstration programs:

1. Benefits Counseling for Medicare and Medicaid Beneficiaries. Section 424 of the Medicare Catastrophic Coverage Act mandates a demonstration for the purpose of providing training and technical assistance to volunteers who would provide to elderly individuals receiving benefits under Medicare or Medicaid counseling with respect to eligibility for these benefits and assistance in preparing documentation to receive benefits. We are interested in receiving an application from a private or public nonprofit organization to conduct such a demonstration. Particular attention should be given to assessing the adequacy of the training, competency of the volunteers, and effectiveness of the counseling and assistance provided by the volunteers. Potential applicants should carefully review the legislative mandate for further information concerning reimbursement to volunteers for transportation and other expenses, the provision of technical materials and publications, and other matters.

2. Case Management for Beneficiaries with Catastrophic Illnesses. Section 425 of Pub. L. 100–360 mandates a series of demonstration projects (one of which is to be conducted through an agreement with a Medicare Utilization and Quality Control Peer Review Organization with a contract with HCFA under title XI of the Social Security Act) to test alternative approaches to case management for Medicare beneficiaries with catastrophic illnesses, particularly those with high costs of health care services. We are interested in receiving applications to conduct such demonstration projects. Applications should address, at a minimum:

• How claims history data can be used for cost-effective focusing of beneficiary case management services at early stages of onset of catastrophic illness;

• How case management services would be organized and delivered, such as frequency and types of interventions, qualifications of case managers, etc.;

• How payments for case management services would be determined and potential incentives for cost-effective case management services;

• Incentives to encourage targeted beneficiaries to voluntarily participate in case management programs; and

• Any special considerations for quality assurances, access, and beneficiary grievance and appeal rights.

Interested applicants are encouraged to request further information regarding the proposed scope and focus of these demonstrations from the HCFA project officer, Nancy Row ((301) 966–6499).

3. Reclassification of Hospital Chronic Ventilator Dependent Units as Rehabilitation Units. Section 429 of Pub. L. 100–360 mandates a demonstration program designed to examine the appropriateness of classifying hospital chronic ventilator-dependent units in hospitals as rehabilitation units. The demonstration should assess the financial impact of such a reclassification (hospitals' revenues before and after implementation of the reclassification, any resultant cost-shifting) and should use such variables as hospital size, occupancy rates, utilization of the units, rural and urban status, and teaching status. Interested applicants are encouraged to request further information regarding the proposed scope and focus of these demonstrations from the HCFA project officer, Tom Talbott (301) 966–6685).

II. Application Procedures, Eligible Organizations, General Policy Considerations, and Evaluation and Selection Criteria

All pertinent information concerning application procedures, eligibility of applicants, evaluation and selection criteria and process, amount and duration of funding including cost sharing, and information to be contained in letters of intent and applications is included in the September 10, 1987 **Federal Register** notice (52 FR 34304). A copy of this notice is included in the application materials which can be obtained from the HCFA Grants Officer.

III. Reporting and Recordkeeping Requirements

This notice contains no information collection requirements. Consequently, they need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

(Sec. 1110, 1115(a), 1875, and 1881(f) of the Social Security Act (42 U.S.C. 1310, 1315(a), 139511, 1395rr(f); section 222(a) of the Social Security Amendments of 1972, as amended (42 U.S.C. 1395b–1 (note)); section 402 of the Social Security Amendments of 1967, as amended (42 U.S.C. 1395b–1); the Medicare Catastrophic Coverage Act of 1989 (Pub. L. 100–360)

(Catalog of Federal Domestic Assistance Programs No. 13,766 Health Financing Research, Demonstrations and Experiments)

Dated: November 30, 1988.

William L. Roper,

Administrator, Health Care Financing Administration.

BILLING CODE 4120–01–M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory Bodies scheduled to meet during the month of January 1989:

Name: National Advisory Council on Health Professions Education.

Date and Time: January 25 and 27, 1989, 9:00 a.m.

Place: Conference Room D and E, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on January 25, 9:00 a.m.-5:00 p.m.

Closed on January 27, 9:00 p.m.-5:00 pm

Purpose: The Council advises the Secretary with respect to the administration of programs of Financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance. This also involves advice in the preparation of regulations with respect to policy matters.

Agenda: The open portion of the meeting will cover welcome and opening remarks, report of the Administrator, Health Resources and Services Administration, report of the Director, Bureau of Health Professions, financial management legislative update, quality assurance, discussions of recommendations made by the Council on Graduate Medical Education and the National Commission on Nursing, and future agenda items. The meeting will be closed January 27, 1989, for the review of grant applications for Graduate Training in Family Medicine, Predoctoral Training in Family Medicine, Area Health Education Special Initiatives, and Training in Preventive Medicine. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., and the Determination by the Acting Administrator, Health Resources and Services Administration, pursuant to Pub. L. 92–463.

Anyone requiring information regarding the subject Council should contact Mr. James. M. Hoeven, Executive Secretary, National Advisory Council on Health Professions Education, Room 8C–22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–6880.

Name: Advisory Council on Nurses Education.

Date and Time: January 25 and 27, 1989, 9:00 a.m.

Place: Conference Room G, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on January 25, 9:00-12:00 p.m.

Closed for remainder of meeting.

Purpose: The Council advises the Secretary and Administrator, Health Resources and Services Administration, concerning general regulations and policy matters arising in the administration of the Nurse Education Amendments of 1985 (Pub. L. 99–92). The Council also preforms final review of grants applications for Federal Assistance, and makes recommendations to the Administrator, HRSA.

Agenda: The open portion of the meeting will cover announcements; considerations of minutes of previous meeting; report by the Director, Bureau of Health Professions, the Director, Division of Nursing and staff reports. The meeting will be closed to the public on January 25, at 12:30 p.m. for the remainder of the meeting for the review of grant applications for Advance Nurse Education applications, Nurse Practitioner/ Nurse Midwifery applications, and Special Project Grants applications. The closing is in accordance with the provisions set forth in section 552b(c)(6), title 5 U.S.C., and the Determination by the Administrator, Health Resources and Services Administration, pursuant to Pub. L. 92–463.

Anyone requiring information regarding the subject Council should contact Dr. Mary S. Hill, Executive Secretary, Advisory Council on Nurses Education, Room 5C–14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–6193.

Name: Joint Meeting of the National Advisory Council on Health Professions Education and the Advisory Council on Nurses Education.

Date and Time: January 26, 1989, 9:00 a.m.

Place: Conference Room D and E, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

The entire meeting is open.

Purpose: The Councils advise the Secretary concerning general regulations and policy matters arising in the administration of Titles VII and VIII of the Public Health Service Act. The Council also preform final reviews of grant applications for Federal assistance and make recommendations to the Secretary.

Agenda: The agenda for the meeting will include: (1) Discussions on quality assurance and quality of care; (2) student assistance; (3) geriatrics; (4) recruitment of minorities into the health professions; (5) HRSA AIDS activities.

Agenda Items are subject to change as priorities dictate.

Date: December 9, 1988.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[FR Doc. 88–28746 Filed 12–13–88; 8:45 am]

BILLING CODE 4160–15–M

Office of Human Development Services

Family Violence Prevention and Services

AGENCY: Office of Human Development Services (HDS), HHS.

ACTION: Notice of the availability of FY 1989 funds for State and Indian Tribal grants for family violence prevention and services.

SUMMARY: FY 1989 funds are now available for grants to States (including Territories and Insular Areas) and Indian Tribes and Tribal organizations to assist in establishing, maintaining, and expanding programs and projects to prevent family violence and to provide immediate shelter and related assistance for victims of family violence and their dependents. This notice sets forth the application process and requirements for these grants.

DATE: Applications must be received by January 30, 1989.

ADDRESS: Address applications to: Office of Human Development Services, Office of Policy, Planning and Legislation, Attn: William D. Riley, Room 312–F, Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: William D. Riley, (202) 245–2892.

VOL 53 ISS 240 DEC 14 1988 UMI

SUPPLEMENTARY INFORMATION:

A. Background

Title III of the Child Abuse Amendments of 1984 (Pub. L. 98–457, 42 U.S.C. 10401 *et seq.*) is entitled the "Family Violence Prevention and Services Act" (the Act). It was first implemented in FY 1986 and was reauthorized by Congress in April 1988 by Pub. L. 100–294.

The purposes of this legislation are to assist States in their efforts to prevent family violence; provide immediate shelter and related assistance for victims of family violence and their dependents; and carry out coordination, research, training, technical assistance, documentation, and evaluation activities. The Secretary also may make demonstration grants directly to Indian Tribes and Tribal organizations to prevent family violence and provide immediate shelter and related assistance.

During FY 1988, 121 grants under the Act were made to States and Indian Tribes. Grants to the States are based on population, with a minimum of $50,000 specified in the Act. Grants ranged from $50,000 to $712,000. Grants to eligible Indian Tribes, depending upon tribal population were either $5,477 or $15,480, with the exception of the Navajo Nation which received $48,000.

Grantees are required to use not less than 60 percent of these funds for immediate shelter and related assistance (section 303(g)). States and Indian Tribes have met this requirement with the majority of the Tribes, and fifty-one of the States, exceeding the 60 percent requirement.

New activities supported by States during FY 1988 included the establishment of shelters in rural and underserved areas, the development of special programs for the children of victims of family violence, and the demonstration of models of services that address elderly abuse. Through the Department of Justice, the Department continued to support regionally-based training and technical assistance for State and local law enforcement personnel, and through the Administration for Children, Youth and Families, HHS, supported the operation of the National Clearinghouse on Family Violence.

B. Reporting Requirements

Program Reports

States and Indian Tribes are reminded that the annual program reports for FY 1987 funds are due December 30, 1988.

Fiscal Reports

A Financial Status Report, Standard Form 269 (SF–269), is due on an annual basis for each fiscal year award. An SF–269 must be submitted within 90 days after the end of the grant period. If an extension was granted for FY 1986 or FY 1987 funds, a provisional final SF–269 must be submitted 90 days after the end of the grant period. A final SF–269 must be submitted 90 days after the date of the extension. Thus, the SF–269 for FY 1987 funds for the period ending September 30, 1988 is due December 30, 1988.

C. Funding Period

States must obligate FY 1989 funds by September 30, 1990, and liquidate all obligations incurred under the award not later than December 30, 1990.

D. Funds Available

Public Law 100–426, the Approximately Act of FY 1989, made $8.219 million available to carry out all activities under the Act. (A total of $8.138 million was awarded in FY 1988.) On this amount, the Department will make $6.986 million (85 percent of total funds) available for grants to States (see section 310(b) of the Act). State allocations are listed at the end of this Notice and have been computed based on the forumla in section 304.

The Department also has set aside $600,000 for direct grants to Indian Tribes or Tribal organizations.

The remaining funds will be used to carry out the research, evaluation, coordination, training, clearinghouse, and documentation activities required by the Act.

E. Eligibility: States

"States" as defined in section 309(6) of the Act are eligible to apply for funds. The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the remaining eligible entity previously a part of the Trust Territory of the Pacific Islands—the Republic of Palau. In the past, Guam and the Commonwealth of the Northern Mariana Islands have applied for family violence funds as a part of their Consolidated Grant under the Social Services Block Grant.

F. Eligibility: Indian Tribes and Tribal Organizations

In FY 1986, the first year of this program, Indian tribal eligibility was limited to those Federally recognized Tribes, as defined in section 309(2), that had an already established social services program as evidenced by receipt of "638" contracts for social services with the Bureau of Indian Affairs (BIA). One hundred twenty-six Indian Tribes and Tribal organizations were eligible based on this standard. Sixty-five Indian Tribes received grant awards.

In FY 1987 we expanded eligibility to include Indian Tribes and Tribal organizations who had received FY 1986 grants under the Indian Child Welfare Act from the BIA. Under this new eligibility standard, 171 Indian Tribes and tribal organizations were eligible. Seventy-four Indian Tribes were awarded family violence prevention grants in FY 1987. We considered further expansion of Indian tribal eligibility for FY 1988 grants, but, given the funds available, we limited Indian tribal eligibility to those Indian Tribes and Tribal organizations which received FY 1987 family violence grants.

For FY 1989 we again have decided to limit eligibility for this program to our FY 1987 grantees. Should additional funds become available, however, a supplemental announcement will be published. As in previous years, Indian Tribes may apply singly or as a consortium. A list of the eligible Indian Tribes and Tribal organizations is found at the end of this Notice.

Because section 304(a) specifies a minimum base amount for State allocations, we have set likewise a base amount for Indian Tribal allotments beginning in FY 1986, the first year of the program. We have found, over the last three years, that the establishment of such a minimum allocation, based on population, has facilitated our efforts to make a fair and equitable distribution of limited grant funds. Tribes which meet the application requirements and whose reservation and surrounding tribal trust lands population is less than 3,000 will receive a minimum of $3,000; Tribes which meet the application requirements and whose reservation and surrounding tribal trust lands population exceeds 3,000 will receive a minimum of $8,000, except for the Navajo Tribe which will receive a minimum of $24,000 because of its size. We have used these figures since the beginning of the program.

The Department will use the best available population figures from the Census Bureau. Where Census Bureau data are unavailable we will use figures from the BIA Indian Population and Labor Force Report. If not all eligible Tribes apply, the available funds will be divided proportionally among the Tribes which apply and meet the requirements.

G. Matching Requirements

States and Indian Tribes and Tribal organizations are not required to furnish matching funds, but sub-State grantees must meet the requirements in section 303(f) as follows:

In the first year (FY 1986), if the State gave a sub-State grantee $10,000, the required match was $3,500 or 35 percent of the funds received under this Act. If the same sub-State grantee received $10,000 in the second year (FY 1987), the required match was $5,500 or 55 percent of the funds received under this Act. In the third and subsequent years (FY 1988 and beyond), if the same sub-State grantee receives $10,000, the required match will be $6,500 or 65 percent of the funds received under the Act.

If a different sub-State grantee receives funds for the first or second time under the Act, then the match is computed at 35 or 55 percent, respectively. The required match, in any case, should not be computed against total project funds or any amount other than the amount of funds received by the sub-State grantee under this Act.

H. Change in the Law Regarding Funding of Sub-State Grantees

Public Law 100–294 recently amended the Act to delete the requirement in section 303(c) that an individual sub-State grantee could receive funds under the Act only for a three year period. Currently, sub-State grantees may receive grants in any fiscal year but may not receive a total of more than $150,000 in funds under the Act.

I. State Application Requirements

The application requirements for these grants do not go beyond the requirements in the statute. We have cited each requirement to the specific section of the law.

Please note the new assurance in paragraph (3)(e) below that limits the funds an entity may receive from the State in any one fiscal year to $50,000 and provides that no entity will receive more than a total of $150,000 under this Act (section 303(c)).

Please note also that in order to apply for these FY 1989 funds, a State must have or have under consideration a procedure for the eviction of an abusing spouse from shared residence. (See the assurance in paragraph (3)(1) below.)

The Secretary will approve any application that meets the requirements of the Act and this Notice and will not disapprove an application unless the State has been given reasonable notice of the Department's intention to disapprove and an opportunity to correct any deficiencies (section 303(a)(3)).

All applications must meet the following requirements:

The State's application must be signed by the Chief Executive of the State or the Chief Program Official designated as responsible for the administration of the Act.

The application must contain the following information:

(1) The name of a State agency contact person, if different from the Chief Program Official designated as responsible for the administration of State programs and activities related to family violence carried out under the Act and for the coordination of related State programs (section 303(a)(2)(D).

(2) The procedures designed to involve knowledgeable individuals and interested organizations and assure an equitable distribution of grants and grant funds within the State and between rural and urban areas in the State (section 303(a)(2)(C)). (For example, knowledgeable individuals and interested organizations may include: State Advisory Committees on Family Violence, law enforcement officials, or Coalitions of Directors of Family Violence Shelters.)

(3) The applications also must obtain the following assurances:

(a) That funds under the Act will be distributed as demonstration grants to local public agencies and non-profit private organizations for programs and projects within the State to prevent incidents of family violence and to provide immediate shelter and related assistance for victims and their dependents (section 303(a)(2)(A)).

(b) That not less than 60 percent of the funds distributed shall be used for immediate shelter and related assistance (section 303(g).

(c) That not more than 5 percent of the funds will be used for State administrative costs (section 303(a)(2)(B)(i).

(d) That in distributing the funds, the States will give special emphasis to the support of community-based projects of demonstrated effectiveness carried out by non-profit private organizations (particularly those projects the primary purpose of which is to operate shelters for victims of family violence and their dependents) and those which provide counseling, alcohol and drug abuse treatment, and self-help services to abusers and victims (section 303(a)(2)(B)(ii)).

(e) That no entity funded by the State will receive more than $50,000 in any one fiscal year, and no entity will receive more than a total of $150,000 under this Act (section 303(c)).

(f) That demonstration grants funded by the State will meet the matching requirements in section 303(f), i.e., 35 percent of the total funds provided under this title in the first year, 55 percent in the second year, and 65 percent in the third or subsequent year; that except in the case of a public entity, not less than 50 percent of the local matching share shall be raised from private sources; that the local share may be cash or in-kind; and that the local share may not include any Federal funds provided under any authority other than this title (section 303(f)).

(g) That demonstration grants funded by the State may not be used as direct payment to any victim or dependent of a victim of family violence (section 303(d)).

(h) That no income eligibility standard will be imposed on individuals receiving assistance or services supported with funds appropriated to carry out the Act (section 303(e)).

(i) That procedures will be developed to assure the confidentiality of records pertaining to persons receiving assistance or services from any program assisted under the Act as specified in section 303(a)(2)(E).

(j) That the address or location of any shelter-facility assisted under the Act will not be made public, except with written authorization of the person or persons responsible for the operation of such shelter (section 303(a)(2)(E)).

(k) That all demonstration grants made by the State under the Act must prohibit discrimination on the basis of age, handicap, sex, race, color, national origin or religion (section 307).

(l) That the State has, or has under consideration, a procedure for the eviction of an abusing spouse from a shared residence (section 303(a)(2)(F)).

(m) That States will comply with Departmental recordkeeping and reporting requirements and general requirements for the administration of grants under 45 CFR Part 92.

J. Indian Tribe and Tribal Organization Application Requirements

The application requirements for these grants do not go beyond the requirements in the statute. We have cited each requirement to the specific section of the law.

The Secretary will approve any application that meets the requirements of the Act and this Notice and will not disapprove an application unless the Indian Tribe or Tribal organization has been given reasonable notice of the Department's intention to disapprove and an opportunity to correct any deficiencies (section 303(a)(3)).

The application from the Indian Tribe or Tribal organization must be signed by the Chief Executive Officer of the Indian Tribe or Tribal organization and must contain the following information:

(1) The name of the organization or agency designated as responsible for the administration of this program (section 303(a)(D)), and the name of a contact person in the designated organization or agency.

(2) A copy of a resolution stating that the designated organization or agency has the authority to submit an application on behalf of the Indian individuals in the Tribe(s) (section 303(a)(2)(G)).

(3) A description of the procedures designed to involve knowledgeable individuals and interested organizations in providing services under the Act (section 303(a)(2)(C)). (For example, knowledgeable individuals and interested organizations may include: Tribal officials involved in child abuse or family violence prevention, Tribal law enforcement officials, State Coalitions Against Domestic Violence, and Directors of Family Violence Shelters.)

(4) A brief description of how the Indian Tribe or Tribal organization plans to use the grant funds to prevent incidents of family violence and to provide immediate shelter and related assistance to victims of family violence and their dependents (section 303(a)(2)(G)).

(5) Each application also must contain the following assurances:

(a) That not less than 60 percent of the funds shall be used for immediate shelter and related assistance (section 303(g)).

(b) That no funds under the Act will be used as direct payment to any victim or dependent of a victim of family violence (section 303(d)).

(c) That no income eligibility standard will be applied to individuals receiving assistance or services supported with funds appropriated to carry out the Act (section 303(e)).

(d) That procedures will be developed to assure the confidentiality of records pertaining to persons receiving assistance or services from any program assisted under the Act as specified in section 303(a)(2)(E).

(e) That the address or location of any shelter-facility assisted under the Act will not be made public, except with written authorization of the person or persons responsible for the operation of such shelter (section 303(a)(2)(E)).

(f) That Indian grantees will comply with Departmental recordkeeping and reporting requirements and general grant administration requirements of 45 CFR Part 92.

K. Notification Under Executive Order 12372

For States, this program is covered under Executive Order 12372, "Intergovernmental Review of Federal Programs" for State plan consolidation and simplification only—45 CFR 100.12. The review and comment provisions of the Executive Order and Part 100 do not apply. Federally recognized Indian Tribes are exempt from all provisions and requirements of E.O. 12372.

L. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the application requirements contained in this notice have been approved by the Office of Management and Budget under control number 0980–0175.

(Catalog of Federal Domestic Assistance number 13.671, Family Violence Prevention and Services)

Dated December 8, 1988.

Sydney Olson,

Assistant Secretary for Human Development Services.

Indian Tribal Eligibility

Below is the list of Indian Tribes which are eligible for fiscal year 1989 Family Violence Prevention and Services grants. Tribes are listed by BIA Area Office based on Census Bureau population data or, where that is not available, BIA data.

Tribes under 3,000 population.

Eastern Area Office

Miccosukee Tribe of Indians of Florida

Aberdeen Area Office

Cheyenne River Sioux Tribe of the Cheyenne River Reservation, South Dakota
Crow Creek Sioux Tribe of the Crow Creek Reservation, South Dakota
Devil's Lake Sioux Tribe of the Devil's Lake Sioux Reservation, North Dakota
Winnebago Reservation of Nebraska

Minneapolis Area Office

Grand Traverse Band of Ottawa and Chippewa Indians of Michigan
Menominee Indian Tribe of Wisconsin
Michigan Inter-Tribal Council on behalf of: Keweenah Bay Indian Community
Saginaw Chippewa Indian Tribe of Isabella Reservation, Michigan
Sault Saint Marie Tribe of Chippewa Indians of Michigan
Lac du Flambeau Reservation of Wisconsin
Red Cliff Band of Lake Superior Chippewa Indians of Wisconsin
Bad River Tribal Council, Wisconsin
Minnesota Chippewa:
Nett Lake Reservation (Bois Fort)
Fond du Lac Reservation
Grand Portage Reservation
Mille Lac Reservation

Anadarko Area Office

Apache Tribe of Oklahoma
Cheyenne-Arapaho Tribes of Oklahoma
Comanche Indian Tribe of Oklahoma
Kiowa Indian Tribe of Oklahoma
Four Tribes of Kansas
Kickapoo Tribe of Kansas
Otoe-Missouria Tribes Oklahoma

Billings Area Office

Chippewa-Cree Indians of the Rocky Boy's Reservation, Montana
Fort Belknap Indian Tribe of Montana

Phoenix Area Office

Colorado River Indian Tribes of the Colorado River Indian Reservation, Arizona and California
Duckwater Shoshone Tribe of the Duckwater Reservation, Nevada
Elko Band Council
Ft. McDermitt Paiute and Shoshone Tribes of the Ft. McDermitt Indian Reservation, Nevada
Ft. McDowell Mohave-Apache Indian Community, Arizona
Hualapai Tribe of the Hualapai Reservation, Arizona
Paiute-Shoshone Tribe of the Fallon Reservation and Colony, Nevada
Pyramid Lake Paiute Tribe of the Pyramid Lake Reservation, Nevada
Reno-Sparks Indian Colony, Nevada
Salt River Pima-Maricopa Indian Community of the Salt River Reservation, Arizona
Shoshone Paiute Tribes of the Duck Valley Reservation, Nevada
Havasupai Tribe of Arizona
Yavapai-Prescott Tribe, Arizona
Ute Indian Tribe of the Unitah and Ouray Reservation, Utah
Walker River Paiute Tribe of the Walker River Reservation, Nevada
Washoe Tribe of Nevada and California

Albuquerque area office

Pueblo of Acoma, New Mexico
Pueblo of Isleta, New Mexico
Ute Mountain Tribe of the Ute Mountain Reservation, Colorado, New Mexico and Utah

Portland area office

Confederated Tribes of the Warm Springs Reservation, Oregon
Confederated Tribes of the Grand Ronde Oregon
Nez Perce Tribe of Idaho
Nisqually Tribe of Washington
Upper Skagit Indian Tribes of Washington
Skokomish Tribe of Washington
Muckleshoot Tribe of Washington
Puyallup Tribe of Washington
Squaxin Island Tribe of Washington

Juneau area office

Ketchikan Indian Corporation, Alaska
United Crow Band, Alaska
Kodiak Native Association, Alaska
Northern Pacific Rim Association, Alaska

Sacremento area office

Big Lagoon Rancheria, California
Coastal Indian Community of the Resighina Rancheria
Trinidad Rancheria
La Jolla Indian Band of Mission Indians
Tribes over 3,000 population

Eastern area office

Eastern Band of Cherokee Indians of North Carolina
Mississippi Band of Choctaw Indians, Mississippi

Aberdeen area office

Rosebud Sioux Tribe of the Rosebud Indian Reservation, South Dakota
Standing Rock Sioux Tribe of the Standing Rock Reservation, North and South Dakota
Three Affiliated Tribes of the Fort Berthold Reservation, North Dakota
Sisseton-Wahpeton Sioux Tribe of the Lake Traverse Reservation, South Dakota

Billings area office

Shoshone-Arapahoe Tribes of Wyoming (Wind River Reservation)

Phoenix area office

Gila River Pima-Maricopa Indian Community of the Gila River Reservation, Arizona

Navajo area office

Navajo Tribe of Arizona, New Mexico and Utah

Albuquerque area office

Pueblo of Laguna, New Mexico

Portland area office

Confederated Salish and Kootenai Tribes of the Flathead Reservation, Montana
Confederated Tribes of the Colville Reservation, Washington

Juneau area office

Association of Village Council Presidents, Alaska
Central Council of the Tlingit and Haida Indians of Alaska
Tanana Chiefs Conference, Alaska
Bristol Bay Native Association of Alaska
Fairbanks Native Association, Alaska

Muskogee area office

Cherokee Nation of Oklahoma
Choctaw Nation of Oklahoma
Muskogee Creek Nation of Oklahoma

Minneapolis area office

Minnesota Chippewa:
Leech Lake Reservation.

BILLING CODE 4130-01-M

Public Health Service

National Commission on Orphan Diseases; Public Meeting

AGENCY: Office of the Assistant Secretary for Health, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (DHHS) and the Office of the Assistant Secretary for Health are announcing a meeting of the National Commission on Orphan Diseases scheduled on January 8–10, 1989.

DATE: Date, time and place: Open Public Meeting, January 8, 1989, 2:00–6:00 p.m., January 9, 1989, 9:00 a.m.–5:00 p.m., January 10, 1989, 9:00 a.m.–12:00 noon; Open Public Session, January 9, 1989, 9:00–10:00 a.m.; Orleans Room, Omni Royal Orleans Hotel, Royal and St. Louis Streets, New Orleans, Louisiana, 70140. The entire meeting is open to the public.

FOR FURTHER INFORMATION CONTACT: Written requests to participate in the Open Public Session should be sent to: Mary C. Custer, Ph.D., Executive Secretary, National Commission on Orphan Diseases, 5600 Fishers Lane, Park Building, Room 1–20, Rockville, MD 20857, 301–443–6156.

Agenda: Open Public Session

Interested persons may present data, information or views, orally or in writing, on issues pending before the Commission or on any of the duties and responsibilities of the Commission on January 9 from 9:00 a.m. to 10 a.m. Those desiring to make oral presentations should notify the contact person before January 3, 1989 and submit a brief statement of the information they wish to present to the Commission. The request should include the names and addresses of proposed participants and an indication of the approximate time required to make their comments. Any person attending the open public session who does not request prior approval to speak may make an oral presentation at the conclusion of the session, if time permits, at the chairperson's discretion.

VOL 53 ISS 240 DE 14 1988 UMI

Agenda: Open Commission Meeting

The Commission will review the draft report to Congress and adopt recommendations to be included in the report.

SUPPLEMENTARY INFORMATION: The Commission meeting will be conducted in accordance with the agenda published in this **Federal Register** notice. Any changes in the agenda will be announced at the beginning of the meeting.

Persons interested in specific agenda items to be discussed in the open meeting may ascertain from the contact person the approximate time of discussion.

A list of Commission members and the charter of the Commission will be available at the meeting. Interested persons who are unable to attend the meeting may request this information from the contact person. In addition, summary minutes of the meeting will be available upon request from the contact person.

This notice is issued under 10(a) (1) and (2) of the Federal Advisory Committee Act, Pub. L. 92–463 (5 U.S.C. Appendix I).

Dated: November 7, 1988.

Robert E. Windom,

Assistant Secretary for Health.

BILLING CODE 4160–17–M

Social Security Administration

Revised Redelegations of Authorities for Disposition of Supplemental Security Income Overpayments

Section 1631(b) of the Social Security Act, as amended (the Act), provides the Secretary of Health and Human Services (the Secretary) with authority to approve or deny waiver of adjustment or recovery of those Supplemental Security Income (SSI) benefit payments made under the provisions of title XVI of the Act found to be incorrect. This applies to situations where the overpaid individual is without fault and recovery of the overpayment would defeat the purposes of title XVI, or would be against equity and good conscience, or would, because of the small amount involved, impede efficient or effective administration of title XVI. The Secretary has delegated his authority under section 1631(b) of the Act to the Commissioner of Social Security (the Commissioner), with authority to redelegate (38 FR 15648, dated June 14, 1973).

Under 31 U.S.C. 3711, the Secretary, or his designee, is authorized to compromise, suspend or terminate collection action on certain debts owed to the Department of Health and Human Services (HHS). To take such action, appropriate HHS regulations must be promulgated in accordance with standards provided in Joint Regulations of the Department of Justice (DOJ) and the General Accounting Office (4 CFR Parts 101–105). Such regulations for HHS are published in the Code of Federal Regulations at 45 CFR Part 30. The Secretary's authority is restricted to those debt claims which involve compromise, suspension or termination of collection action regarding amounts of $20,000 or less, exclusive of interest. In addition, the Secretary's authority does not apply to cases involving fraud, presentation of a false claim, misrepresentation on the part of the debtor or any other party having an interest in the claim, or conduct in violation of antitrust laws.

Claims which cannot be collected, suspended, compromised or terminated, or which amount to more than $20,000, exclusive of interest, are referred to DOJ for disposition. Cases involving fraud, false claims, misrepresentation, or violation of antitrust laws are also handled by DOJ.

The Secretary has delegated his authority under 31 U.S.C. 3711 to the Commissioner, with authority to redelegate (33 FR 5836 and 5843, dated April 16, 1968), insofar as that authority relates to the mission of the Social Security Administration (SSA).

The above authorities to approve or deny waiver of adjustment or recovery of SSI overpayments, and to compromise, suspend or terminate collection action on these overpayments, were redelegated by the Commissioner to other SSA positions on October 3, 1978. These redelegations were effective upon publication in the **Federal Register**, which occurred on October 16, 1978 (43 FR 47614–47615). Notice is hereby given that the Commissioner has approved revised redelegations of these authorities, as follows:

Authorities

1. Authority to approve or deny waiver of adjustment or recovery of incorrect SSI benefit payments, under section 1631(b) of the Act.

2. Authority to compromise, suspend or terminate collection action on debts owed to SSA as a result of SSI overpayments.

Delegates	Scope of Authority
a. Deputy Commissioner for Operations b. Deputy Commissioner for Programs c. Associate Commissioner and Deputy Associate Commissioner for Supplemental Security Income d. Regional Commissioners and Deputy Regional Commissioners e. Assistant Regional Commissioners and Deputy Assistant Regional Commissioners for Programs f. District Managers, Assistant District Managers, Branch Managers, Resident Representatives, Operations Supervisors, Claims Representatives and Field Representatives g. All positions in the direct line of management above the positions in item f. above	a.–g. The incumbents of these positions may exercise authorities 1. and 2. on SSI overpayment cases within the jurisdiction of their respective components, to the extent permitted by their particular functional responsibilities, as specified in their position descriptions, operating instructions or other pertinent issuances. –
h. Debt Management Specialists and Chiefs, Debt Management Branches, Program Service Centers i. All positions in the direct line of management above the positions specified in item h. above	h. and i. The incumbents of these positions may exercise authority 2. on SSI overpayment cases within the jurisdiction of their respective components, to the extent permitted by their functional responsibilities, as specified in their position descriptions, operating instructions or other pertinent issuances.

Conditions

(1) Further redelegations are not authorized.

(2) These redelegations do not apply to the handling of any debt claim where there is an indication of fraud, the presentation of a false claim, misrepresentation on the part of the debtor or any other party having an interest in the claim, or conduct in violation of antitrust laws. Such cases are handled by DOJ.

(3) Decisions to compromise, suspend or terminate collection efforts involving amounts of $20,000 or more, exclusive of interest, are made by DOJ.

(4) These redelegations must be exercised in accordance with all pertinent provisions of law, regulations, policies, procedures, operating instructions and other requirements.

The above revised redelegations are effective on the date that they are

published in the **Federal Register** and replace those previous redelegations approved by the Commissioner on October 3, 1978 and published in the **Federal Register** on October 16, 1978 (43 FR 47614–47615). I affirm and ratify any actions by the above delegates which may constitute the exercise of any of the subject authorities before the date that these revised redelegations are published in the **Federal Register**.

Dated: November 29, 1988.

Dorcas R. Hardy,

Commissioner of Social Security.

[FR Doc. 88–28697 Filed 12–13–88; 8:45 am]

BILLING CODE 4190–11–M

Finding Regarding Foreign Social Insurance or Pension System; Tonga

AGENCY: Social Security Administration, HHS.

ACTION: Notice of finding regarding foreign social insurance or pension system—Tonga.

Finding: Section 202(t)(1) of the Social Security Act (42 U.S.C. 402(t)(1)) prohibits payment of monthly benefits to any individual who is not a United States citizen or national for any month after he or she has been outside the United States for 6 consecutive months. This prohibition does not apply to such an individual where one of the exceptions described in section 202(t)(2) through 202(t)(5) of the Social Security Act (42 U.S.C. 402(t)(2) through 402(t)(5)) affects his or her case.

Section 202(t)(2) of the Social Security Act provides that, subject to certain residency requirements of section 202(t)(11), the prohibition against payment shall not apply to any individual who is a citizen of a country which the Secretary of Health and Human Services finds has in effect a social insurance or pension system which is of general application in such country and which:

(a) Pays periodic benefits, or the actuarial equivalent thereof, on account of old age, retirement, or death; and

(b) Permits individuals who are United States citizens but not citizens of that country and who qualify for such benefits to receive those benefits, or the actuarial equivalent thereof, while outside the foreign country regardless of the duration of the absence.

The Secretary of Health and Human Services has delegated the authority to make such a finding to the Commissioner of Social Security. The Commissioner has redelegated that authority to the Director of the Office of International Policy. Under that authority the Director of the Office of International Policy has approved a finding that Tonga, beginning August 1988, does not have a social insurance system of general application in effect which pays periodic benefits, or the actuarial equivalent thereof, on account of old age, retirement, or death.

Accordingly, it is hereby determined and found that Tonga does not have in effect, beginning August 1988, a social insurance system which meets the requirements of section 202(t)(2)(A) of the Social Security Act (42 U.S.C. 402(t)(2)(A)).

This finding also affects the application of subparagraphs (A) and (B) of section 202(t)(4) of the Social Security Act (42 U.S.C. 402(t)(4)(A) and (B)). That section provides that, subject to certain residency requirements of section 202(t)(11), section 202(t)(1) shall not be applicable to benefits payable on the earnings record of an individual who has 40 quarters of coverage under Social Security or who has resided in the United States for a period or periods aggregating 10 years or more. However, the provisions of subparagraphs (A) and (B) of section 202(t)(4) shall not apply to an individual who is a citizen of a foreign country that has in effect a social insurance or pension system which is of general application in such country and which satisfies the provisions of subparagraph (A) of section 202(t)(2) but not the provisions of subparagraph (B) of section 202(t)(2).

By virtue of the finding herein, the limitation on payment of monthly benefits to aliens included in section 202(t)(1) does not apply to citizens of Tonga receiving benefits on the earnings records of individuals who have 40 quarters of coverage under Social Security or who have resided in the United States for a period or periods aggregating 10 years of more.

FOR FURTHER INFORMATION CONTACT: J. Joseph Rausch, Room 1104, West High Rise Building, 6401 Security Boulevard, Baltimore, MD 21235, (301) 965–3567.

BILLING CODE 4190–11–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Birch Creek Final Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: Pursuant to section 102(2)c of the National Environmental Policy Act of 1969, as amended, the Department of the Interior, Bureau of Land Management (BLM) prepared a final environmental impact statement (FEIS) covering placer mining within the drainage of the Birch Creek National Wild River.

The drainage area is located approximately 70 miles notheast of Fairbanks, Alaska, and encompasses nearly 1.4 million acres of land. Much of the area is located within the Steese National Conservation Area.

Primarily, the issues addressed are the cumulative impacts of multiple mining operatons on the environment (particularly water quality), subsistence uses in and around the study area, and BLM permitting and monitoring procedures under the Alaska National Interest Lands Conservation Act.

Comments on the draft EIS have been considered in the preparation of this document. A proposed action and four alternatives present management options ranging from emphasis on enforcement of regulations under 43 CFR Part 3809 to a "no mining" alternative. The proposed action has been modified from the draft document to include enforcement of water quality standards of the Enviornmental Protection Agency and the State of Alaska, and to emphasize reclamation. The environmental consequences of all the alternatives are analyzed and presented.

DATE: The 30-day wait period for the FEIS will begin on the day that the Environmental Protection Agency publishes its Notice of Availability.

FOR FURTHER INFORMATION CONTACT: Page Spencer, Project Manager, U.S. Bureau of Land Management, Alaska State Office, Section 918, 701 C Street, Box 13, Anchorage, AK 99513 or at (907) 271–3114.

Richard Dworsky,

Acting State Director.

VOL 53 ISS 240 DE 14 1988 UMI

[UT-040-09-4211-09-NRJI]

Environmental Impact Statement; Steep Creek WSA et al.

AGENCY: Bureau of Land Management, Interior.

ACTION: Draft EA on proposed improvements to the Boulder to Bulldrog (Burr Trail) Road.

SUMMARY: A draft environmental assessment on Garfield County's proposed upgrading of the Boulder to Bullfrog road (also known as the Burr Trail) is now available for public review and comment. The document, which was prepared by an independent contractor, discusses the impacts of the County's proposal, a No Action Alternative, and a National Scenic Roadway alternative. The impacts addressed would occur, at least in part, within the Steep Creek WSA, the Mount Pennel WSA, and the North Escalante Canyons/The Gulch ISA complex.

DATE: Interested persons may submit comments at the address listed below until January 17, 1989.

ADDRESS: To obtain a copy of the draft EA, request additional information, or submit comments, contact David Everett, Bureau of Land Management, 176 East DL Sargent Drive, Cedar City, UT 84720, or telephone (801) 586–2401.

December 5, 1988.

BILLING CODE 4310–DQ–M

Supplemental Rules and Vehicle Route Designation; East Mojave National Scenic Area, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Adoption of supplemental rules and off-road vehicle designation decisions for the East Mojave National Scenic Area.

SUMMARY: The purpose of these supplementary rules is to provide for the protection of persons, property, and public lands and resources in the East Mojave National Scenic Area ("Scenic Area"). A Management Plan for the Scenic Area (approved in September, 1988) calls for the adoption of rules concerning firearm use and revises the designation of some vehicle routes in the Needles Resource Area. The Management Plan also puts limits on various activities so as to limit surface disturbance in the Scenic area and proposes the development of new recreational-interpretive facilities to provide for an expected four-fold increase in visitor use over the next ten years.

Firearm use

1. Adopt San Bernardino County Ordinance 22015 for Federal enforcement:

Except as otherwise provided by statute of the State of California, it shall be unlawful for any person to discharge a firearm in the East Mojave National Scenic Area within 150 yards of any building without having in his possession the written permission of the owner or tenant thereof, or within 150 yards of any tent, motorhome, house trailer, or other temporary incampment of persons without having in his immediate possession the written permission of the occupants or tenants thereof.

2. No shooting safety zones have been established at Piute Creek Area of Environmental Concern, Granite Mountains Research Natural Area and adjacent recreation sites, public lands within the boundary of the Providence Mountain State Recreation Area, and developed recreation sites as shown on Map 2–2 of the Final Management Plan, including Hole-in-the-Wall and Mid Hills campgrounds.

3. The use of firearms is prohibited within 50 yards of either side of the following roads:

a. Kelbaker Road,
b. Ivanpah/Lanfair Roads,
c. Cedar Canyon Road,
d. Cima Road,
e. Kelso-Cima Road,
f. Black Canyon Road,
g. Essex Road (north of I–40),
h. Mojave Road, and
i. Morningstar Mine Road.

Vehicle Route Designations

The majority of routes in the National Scenic Area are approved for use. However, some routes have been closed to all motorized vehicle use to protect sensitive resources. These routes are described in detail in the Final Management Plan with exceptions as noted in the Decision Record. Maps showing the general location of these routes are included in the Final Plan; more detailed maps are available for public review in the Needles Resource Area Office and the California Desert District Office in Riverside, California.

Additionally, notice is given that the vehicle route designation for the remainder of the Needles Resource Area which covers the eastern half of San Bernardino County, California are approved. A public review of existing routes and proposed designations was completed in 1985. One road outside the Scenic Area will be closed, and ten roads limited to permitted users only (primarily segments of off-road race courses). Maps are available for inspection at the locations given below under Further Information.

EFFECTIVE DATE: These rules and designations will be effective January 13, 1989, and will remain in effect until rescinded or modified by the authorized officer. Enforcement of these decisions and rules will be implemented as areas/routes are signed and information made available to the public.

FOR FURTHER INFORMATION CONTACT: John Bailey, Scenic Area Manager, Bureau of Land Management, Needles Resource Area, 101 West Spike's Road, P.O. Box 888, Needles, California 92363, (619) 326–3896. Hours: 7:45 a.m. to 4:30 p.m., Monday through Friday.

Dave Mensing, Outdoor Recreation Planner, Bureau of Land Management, California Desert District, 1695 Spruce Street, Riverside, California 92507, (714) 351–6402. Hours: 7:45 a.m. to 4:30 p.m., Monday through Friday.

SUPPLEMENTARY INFORMATION: The authority for establishing supplemental rules is contained in 43 CFR 8365.1–6. These rules have been recommended and adopted through the development of a comprehensive management plan for the East Mojave National Scenic Area along with extensive review by the public and other governmental agencies. These rules will be posted at key entry points to the Scenic Area and described in literature to be made available to visitors to the region. The vehicle route designations are enforceable under the authority provided in the Federal Land Policy and Management Act (43 U.S.C. 1701 *et. seq.*), EO 11644 (Use of Off-Road Vehicles on the Public Lands), and 3 CFR 74.332 as amended by EO 11989, 42 FR 26959 (May 25, 1977).

Any person who violates or fails to comply with the firearm restrictions or vehicle route designations as governed by 43 CFR Part 8341, is subject to arrest, conviction, and punishment pursuant to appropriate laws and regulations. Such punishment may be a fine of not more than $1,000.00 and/or imprisonment for not longer than twelve months.

Gerald E. Hillier,

District Manager.

BILLING CODE 4310–40–M

[MT-930-09-4314-10; MTM 41840]

Proposed Continuation of Withdrawal; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Forest Service, Department of Agriculture, proposes that the withdrawal of 229.87 acres of land for the Ear Mountain Administrative Site, known as Ear Mountain Guard Station, continue for an additional 20 years. The land is now being used as an administrative site by the Rocky Mountain Ranger District. The land will remain closed to surface entry and nonmetalliferous mining, but has been and will remain open to metalliferous mining and mineral leasing.

DATE: Comments should be received by March 14, 1989.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406–657–6082.

The U.S. Forest Service proposes that the existing land withdrawal made by the Executive Orders of October 25, 1916, and November 1, 1911, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, insofar as it affects the following described land:

Principal Meridian

T. 24 N., R. 8 W.,
Sec. 4, lots 3, 4, SE¼NW¼, NE¼SW¼ (formerly described as N½NW¼, SE¼NW¼, NE¼SW¼), SW¼NW¼, and NW¼SW¼.

The area described contains 229.87 acres in Teton County.

The purpose of the withdrawal is to protect the Ear Mountain Guard Station.

The withdrawal segregates the land from operation of the public land laws generally and nonmetalliferous mining, but not from metalliferous mining or the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Land Resources, at the address listed above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

James Binando,

Chief, Branch of Land Resources, Division of Lands and Renewable Resources.

December 6, 1988.

BILLING CODE 4310–DN–M

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731–TA–409–410 (Final)]

Certain Light-Walled Rectangular Pipes and Tubes From Argentina and Taiwan

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigations and scheduling of a hearing to be held in connection with the investigations.

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigations Nos. 731–TA–409–410 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Argentina and Taiwan of light-walled rectangular pipes and tubes,[1] provided for in item 610.49 of the Tariff Schedules of the United States (subheading 7306.60.50 of the Harmonized Tariff Schedule of the United States), that have been found by the Department of Commerce, in preliminary determinations, to be sold in the United States at less than fair value (LTFV). Unless the investigation is extended, Commerce will make its final LTFV determinations on or before January 30, 1989, and the Commission will make its final injury determinations by March 20, 1989 (see sections 735(a) and 735(b) of the act (19 U.S.C. 1673d(a) and 1673d(b))).

For further information concerning the conduct of these investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207 as amended, 53 FR 33041 *et seq.* (August 29, 1988)), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: November 21, 1988.

FOR FURTHER INFORMATION CONTACT: Robert Carpenter (202–252–1172), Office of Investigations, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–252–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–252–1000.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted as a result of affirmative preliminary determinations by the Department of Commerce that imports of light-walled rectangular pipes and tubes from Argentina and Taiwan are being sold in the United States at less than fair value within the meaning of section 731 of the act (19 U.S.C. 1673). The investigations were requested in a petition filed on June 6, 1988, by the mechanical tubing subcommittee on the Committee on Pipe and Tube Imports and by the individual manufacturers of the product that are members of the subcommittee. In response to that petition the Commission conducted preliminary antidumping investigations and, on the basis of information developed during the course of those investigations, determined that there was a reasonable indication that an industry in the United States was materially injured by reason of imports of the subject merchandise (53 FR 28277, July 27, 1988).

Participation in the investigations.—Persons withing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list.—Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their

[1] For purposes of these investigations, the term "light-walled rectangular pipes and tubes" covers welded carbon steel pipes and tubes of rectangular (including square) cross section, having a wall thickness less than 0.156 inch (4 millimeters). Light-walled rectangular pipes and tubes are currently reported for statistical purposes under item 610.4928 of the *Tariff Schedules of the United States annotated.*

representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3 as amended, 53 FR 33041 *et seq.* (August 29, 1988)), each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Limited disclosure of business proprietary information under a protective order.—Pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a) as amended, 53 FR 33041 *et seq.* (August 29, 1988)), the Secretary will make available business proprietary information gathered in these final investigations to authorized applicants under a protective order, provided that the application be made not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive business proprietary information under a protective order. The Secretary will not accept any submission by parties containing business proprietary information without a certificate of service indicating that it has been served on all the parties that are authorized to receive such information under a protective order.

Staff report.—The prehearing staff report in these investigations will be placed in the nonpublic record on January 24, 1989, and a public version will be issued thereunder, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with these investigations beginning at 9:30 a.m. on February 8, 1989, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on January 31, 1989. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 9:30 a.m. on February 3, 1989, at the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is Febuary 3, 1989.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonbusiness proprietary summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. Any written materials submitted at the hearing must be filed in accordance with the procedures described below and any business proprietary materials must be submitted at least three (3) working days prior the hearing (see § 201.6(b)(2) of the Commission's rules (19 CFR 201.6(b)(2))).

Written submissions. —All legal arguments, economic analysis, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 of the Commission's rules (19 CFR 207.22). Posthearing briefs must conform with the provisions of § 207.22). Posthearing must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on February 14, 1989. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations on or before February 14, 1989.

A signed original and fourteen (14) copies of each submission must be filed with the Secretary of the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for business proprietary data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any information for which business proprietary treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Business Proprietary Information." Business proprietary submissions and requests for business proprietary treatment must conform with the requirements of §§ 201.6 and 207.7 of the Commission's rules (19 CFR 201.6 and 207.7).

Parties which obtain disclosure of business proprietary information pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a) as amended, 53 FR 33041 *et seq.* (August 29, 1988)) may comment on such information in their prehearing and posthearing briefs, and may also file additional written comments on such information no later than February 21, 1989. Such additional comments must be limited to comments on business proprietary information received in or after the posthearing briefs.

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. The notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: December 7, 1988.

BILLING CODE 7020-02-M

[Investigations Nos. 731-TA-391-399 (Final)]

Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From the Federal Republic of Germany, France, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigations and scheduling of a hearing to be held in connection with the investigations.

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigations Nos. 731-TA-391-399 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the following countries of antifraction bearings (other than tapered roller bearings) and parts thereof, the foregoing whether finished or unfinished, provided for in items 680.30, 680.33, 680.37, 680.39, 681.04, 681.10, 681.39 and 692.32 [1] of the Tariff

[1] For purposes of these investigations, the subject bearings and parts thereof include the following articles, whether finished or unfinished: antifraction balls and rollers (TSUSA) items 680.3025, 680.3030, and 680.3040, and HTS subheadings 8482.91.00 and 8482.91.10); ball bearings with integral shafts and parts thereof (TSUSA) item 680.3300 and HTS subheading 8482.10.10); ball bearings (including radial ball bearings) and parts thereof (TSUSA items 680.3740, 680.3708, 680.3712, 680.3717, 680.3118, 680.3722, 680.3727, and 680.3728, and HTS subheadings 8482.10.50 and 8482.99.10); spherical roller bearings and parts thereof (TSUSA items 680.3952 and 680.3956, andd HTS subheadings 8482.30.00 and 8482.99.50); other roller bearing (except tapered roller bearings) and parts thereof (TSUSA item 680.3960 and HTS subheadings 8482.40.00, 8482.50.00, 8482.80.00, 8482.91.00, and 8482.99.70); ball or roller bearing type pillow blocks and parts thereof (TSUSA items 681.0410 and 681.0430, and HTS subheadings 8483.20.80, 8483.30.80, 8483.90.30, and 8483.90.70); ball or roller bearing type flange, take-up, cartridge, and hanger units, and parts of the foregoing (TSUSA items

Thailand	731-TA-398 (Final)
United Kingdom	731-TA-399 (Final)

Commerce will make its final LTFV determinations on or before March 24, 1989 and the Commission will make its final injury determinations by May 8, 1989 (see sections 735(a) and 735(b) of the act (19 U.S.C. 1673d(a) and 1673d(b))).[1]

For further information concerning the conduct of these investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: November 9, 1988.

FOR FURTHER INFORMATION CONTACT: Jim McClure (202-252-1911), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202/252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted as a result of affirmative preliminary determinations by the Department of Commerce that imports of antifriction bearings (other than tapered roller bearings) and parts thereof from the Federal Republic of Germany, France, Italy, Japan, Romania, Singapore, Sweden, Thailand, and the United Kingdom are being sold in the United States at less than fair value within the meaning of section 731 of the act (19 U.S.C. 1673). The investigations were requested in a petition filed on March 31, 1988 by the Torrington Company, Torrington, CT. In response to that petition the Commission conducted preliminary antidumping investigations and, on the basis of information developed during the course of those investigations, determined that there was a reasonable indication that an industry in the United States was materially injured by reason of imports of the subject merchandise (53 FR 18909, May 25, 1988).

Participation in the investigations.—Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. Any entry to appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list.—Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), and document filed by a party to these investigations must be served on all other parties to these investigations (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Limited disclosure of business proprietary information under a protective order.—Pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a) as amended, (53 FR 33034, August 29, 1988)), the Secretary will make available business proprietary information gathered in these final investigations to authorized applicants under a protective order, provided that the application be made not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive business proprietary information under a protective order. The Secretary will not accept any submission by parties containing business proprietary information without a certificate of service indicating that it has been served on all the parties that are authorized to receive such information under a protective order.

Staff report.—The prehearing staff report in these investigations will be placed in the nonpublic record in March 13, 1989 and a public version will be issued thereafter, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with these investigations beginning at 9:30 a.m. on March 30, 1989 at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on March 13, 1989. All persons desiring to appear at the hearing and make oral presentatives should file prehearing briefs and attend a prehearing conference to be held at 9:30 a.m. on March 21, 1989 at the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is March 23, 1989.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonbusiness proprietary summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. Any written materials submitted at the hearing must be filed in accordance with the procedures described below and any business proprietary materials must be submitted at least three (3) working days prior to the hearing (see § 201.6(b)(2) of the Commission's rules (19 CFR 201.6(b)(2))).

Written submissions.—All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 of the Commission's rules (19 CFR § 207.22). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR

681.1010 and 681.1030, and HTS subheadings 8483.20.40, 8483.30.40, 8483.90.20, and 8483.90.30); machinery parts containing any of the foregoing bearings, not containing electrical features and not specially provided for (TSUSA item 681.3900 and HTS subheading 8485.90.00); and parts of motor vehicles containing any of the foregoing bearings and not specially provided for (TSUSA item 692.3295 and HTS subheading 8708.50.50, 8708.60.50, and 8708.99.50). Finished but unground or semiground balls are not included in the scope of these investigations.

[1] The schedule for the conduct of these investigations also applies to countervailing duty investigation Nos. 303-TA-19 and 20 (Final) (53 FR 40137, October 13, 1988).

BEST COPY AVAILABLE

VOL 53 ISS 240 DE 14 1988 UMI

207.24) and must be submitted not later than the close of business on April 6, 1989. In addition, any person who has not entered an appearance as a party to these investigations may submit a written statement of information pertinent to the subject of these investigations on or before April 6, 1989.

A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for business proprietary data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any information for which business proprietary treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Business Proprietary Information." Business proprietary submissions and requests for business proprietary treatment must conform with the requirements of § § 201.6 and 207.7 of the Commission's rules (19 CFR 201.6 and 207.7).

Parties which obtain disclosure of business proprietary information pursuant to § 207.7(a) of the Commission's rules (19 CFR 207.7(a)) may comment on such information in their prehearing and posthearing briefs, and may also file additional written comments on such information no later than April 10, 1989. Such additional comments must be limited to comments on business proprietary information received in or after the posthearing briefs.

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

[Investigation No. 337-TA-283]

Certain Electronic Dart Games; Commission Decision Not To Review an Initial Determination Terminating Four Respondents on the Basis of Consent Orders and Settlement Agreements; Issuance of Consent Orders

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) Order No. 6) issued by the presiding administrative law judge (ALJ) terminating the above-captioned investigation as to respondents Hanover House Industries, Inc., SYNC, Adam York (the Hanover respondents) and Franklin Sports Industries (Franklin) on the basis of consent orders and settlement agreements.

FOR FURTHER INFORMATION CONTACT: Randi S. Field, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1099.

SUPPLEMENTARY INFORMATION: On November 10, 1988, the presiding ALJ issued an ID granting the joint motions of complainant Arachnid, Inc. and the Hanover respondents (Motion No. 283-4) and of complainant and respondent Franklin (Motion No. 283-5) to terminate the investigation with respect to those respondents on the basis of consents orders and settlement agreements. No petitions for review of the ID or government or public comments were received.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and § 210.53(h) of the Commission's Interim Rules of Practice and Procedure, 53 FR 33070 (Aug. 29, 1988).

Copies of the ID and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission TDD terminal on 202-252-1810.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemption.

SUMMARY: X.O. Bunch, Jr. has filed a petition under 49 U.S.C. 11343(e) seeking an exemption from the requirement of prior regulatory approval for his continuance in control of Carolina Lowcountry Tours, Inc., (Carolina) and Santee Carriers, Inc. (Santee). Mr. Bunch is chairman of the board and controlling stockholder of Santee, a motor common and contract carrier and broker of property, in interstate or foreign commerce. Mr. Bunch is also the president and sole stockholder of Carolina, an intrastate passenger carrier. Carolina is presently seeking an initial grant of operating authority in No. MC-214205 which would allow it to operate as a motor common carrier of passengers, in charter and special operations, beginning and ending at points in South Carolina and extending to points in six States and the District of Columbia. Upon issuance of authority to Carolina, Mr. Bunch will control two regulated motor carriers (*i.e.* Carolina and Santee). Under 49 U.S.C. 11343(a)(5), the Commission's prior approval is required for the acquisition of control of a carrier by a person that is not a carrier but that controls any number of carriers. Thus, this transaction is subject to our jurisdiction and can be carried out only under regulation or an exemption from regulation. Petitioner contends that examination and regulation of this transaction is not necessary to carry out the national transportation policy of 49 U.S.C. 10101. Petitioner asserts that the transaction is of limited scope because Santee's gross operating revenues are approximately $15 million while Carolina is an entity that currently has no interstate operating revenue. Should Carolina obtain the passenger authority it seeks, there will be no area of service overlap.

DATE: Comments must be received by January 13, 1989.

ADDRESSES: Send comments (an original and 10 copies), referring to Docket No. MC-F-19282, to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.
(2) Petitioner's representative: Frank B. Hand, Jr., 12000 Leesburg Pike, Herndon, VA 22070.

FOR FURTHER INFORMATION CONTACT: Andy Nosacek, (202) 275–1712. (TDD for hearing impaired: (202) 275–1721.)

SUPPLEMENTARY INFORMATION: Petitioner seeks an exemption under 49 U.S.C. 11343(e) and the Commission's regulations in *Procedures—Handling Exemptions Filed by Motor Carriers*, 367 I.C.C. 113 (1982).

A copy of the petition may be obtained from petitioner's representative, or it may be inspected at the Washington, DC, offices of the Interstate Commerce Commission during normal business hours (Assistance for the hearing impaired is available through TDD services (202) 275–1721.)

Decided: December 5, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB–1 (Sub–No. 211)]

Chicago and North Western Transportation Co.; Abandonment Between Marshalltown (Powerville) and Cedar Falls Junction and Between Hicks and Dike In Marshall, Tama, Grundy and Blackhawk Counties, IA; Findings

The Commission has found that the public convenience and necessity permit Chicago North Western Transportation Company to abandon its 49.57 miles of track and 8.6 miles of side track and yard track between Marshalltown (Powerville) (milepost 277.73) and Cedar Falls Junction (milepost 317.5), including a spur between Hicks (milepost 38.1) and Dike (milepost 47.9) in Marshall, Tama, Grundy, and Blackhawk Counties, IA.

A certificate will be issued authorizing abandonment unless within 15 days after this publication the Comission also finds that: (1) A financially reponsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served on the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope: "Rail Section, AB–OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27

Decided: December 7, 1988.

By the Commission, Chairman Gradison, Vice Chairman Andre, Commissioners Simmons, Lamboley, and Phillips. Commissioners Simmons and Lamboley dissented with separate expressions.

Noreta R. McGee,

Secretary

BILLING CODE 7035-01-M

[Docket No. AB–12 (Sub-No.123X)]

Southern Pacific Transportation Co.; Abandonment Exemption; La Fourche Parish, LA

Applicant has filed a notice of exemption under 49 CFR Part 1152, Subpart F—*Exempt Abandonments* to abandon its 0.9-mile line of railroad between milepost 9.0 and milepost 9.9 near Lockport in La Fourche Parish, LA.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) all overhead traffic on the line had been rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on January 7, 1989 (unless stayed pending reconsideration). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by December 19, 1988.[3] Petitions for reconsideration and requests for public use conditions under 49 CFR 1152.28 must be filed by December 28, 1988, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Gary A. Lassko, Southern Pacific Building, Room 846, One Market Plaza, San Francisco, CA 94105.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses enviornmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by December 13, 1988. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275–7316. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: December 9, 1988.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

---

[1] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. *See Exemption of Out-of-Service Rail Lines*, 4 I.C.C.2d 400 (198). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[2] *See Exempt. of Rail Abandonment—Offers of Finan. Assist.*, 4 I.C.C.2d 164 (1987), and final rules published in the **Federal Register** on December 22, 1987 (52 FR 48440–48446).

[3] The Commission will accept a late-filed trail use statement so long as it retains jurisdiction to do so.

VOL 53 ISS 240 DE 14 1988 UMI

DEPARTMENT OF JUSTICE

Lodging of Consent Decree; Chevron Chemical Co., et al. (Operating Industries, Inc. Site)

On accordance with section 122(d)(2)(B) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended ("CERCLA"), and in accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on December 7, 1988, a proposed Partial Consent Decree in *United States v. Chevron Chemical Company, et al.*, was lodged with the United States District Court for the Central District of California. That action was brought pursuant to sections 106 and 107 of CERCLA, 42 U.S.C. 9606 and 9607, for performance of certain remedial action at the Operating Industries, Inc. ("OII") landfill in Monterey Park, California, and for reimbursement of response costs incurred by the United States Environmental Protection Agency ("EPA") in responding to releases and threatened releases of hazardous substances at the OII site.

The Consent Decree settles claims against 115 companies that have entered into the settlement regarding the performance of certain interim remedial actions required at the OII site, known as "operable units," and regarding payment of the United States' past costs incurred up to June 1, 1988, of approximately $21.5 million. The Consent Decree requires certain defendants to undertake two operable units at the OII site: The Site Control and Monitoring operable unit, and the Leachate Management operable unit. Under the Site Control and Monitoring operable unit, defendants will maintain and improve systems that are in place at the landfill, including the leachate and gas collection systems, irrigation system, drainage system, maintenance of access roads and slope repair and erosion control. Defendants will also design and construct a leachate treatment plant at the site, and operate the plant to treat leachate emanating from the site. These defendants responsible for performing this work will also reimburse the United States $1.4 million for past costs.

A second group of settling parties will make cash payments, to resolve their liability regarding these two operable units and the United States' past costs incurred up to June 1, 1988. These cash payments include a "premium" over the amounts being paid by the defendants performing the work. This group of settling parties will pay a total of approximately $30.7 million, which shall be credited towards the United States' past response costs, EPA's costs for oversight of the defendants' work under this Consent Decree, and for the establishment of an escrow account to pay for additional years of performance of the two operable units, if necessary. Those parties that are making cash payments only will not be responsible for performance of any aspect of the work under this Consent Decree, if their payments are timely made.

As provided in section 122(d)(2)(B) of CERCLA and 28 CFR 50.7, the Department of Justice will receive comments from persons who are not named as parties to this action relating to the proposed Partial Consent Decree for a period of forty days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *United States v. Chevron Chemical Company, et al.*, D.J. Ref. 90-11-2-156.

The proposed Partial Consent Decree may be examined at the office of the United States Attorney, 312 N. Spring Street, Los Angeles, California 90012, and at the Region IX office of the U.S. Environmental Protection Agency, 215 Fremont Street, San Francisco, California 94105. A copy of the proposed Partial Consent Decree may also be examined at the Environmental Protection Section, Land and Natural Resources Division, United States Department of Justice, Room 1527, Tenth Street and Pennsylvania Ave., NW., Washington, DC 20530. A copy of the proposed Partial Consent Decree may be obtained by mail from the Environmental Protection Section, Land and Natural Resources Division of the Department of Justice. Any request for a copy of the proposed Partial Consent Decree should be accompanied by a check in the amount of $10.80 for copying costs ($0.10 per page) payable to "United States Treasurer."

Roger J. Marzulla,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Judgment; New York City, NY, et al.

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on November 23, 1988, a proposed consent decree in *United States v. City of New York, and its Department of Sanitation*, Civil Action No. 88 Civ. 8357 (RO), was lodged with the United States District Court for the Southern District of New York. This consent decree settled a lawsuit filed on November 23, 1988, pursuant to sections 112 and 113 of the Clean Air Act (the "Act"), 42 U.S.C. 7412 and 7413, and pursuant to 40 CFR Part 61, Subpart M, for injunctive relief and for the assessment of civil penalties against the City of New York and its Department of Sanitation ("DOS"). The complaint is based on, among other things, certain asbestos removal operations that were conducted by DAR Construction Company ("DAR"), a contractor hired by DOS, in August of 1986, at DOS' Bronx West 7 Garage, located at 215th Street in New York, New York. The complaint alleged that the asbestos removal operations by DAR constituted violations of sections 112 of the Act, 33 U.S.C. 7412, and the National Emission Standards for Hazardous Air Pollutants for asbestos codified at 40 CFR Part 61, Subpart M ("asbestos NESHAP").

Under the terms of the proposed consent decree, DOS is permanently enjoined from violating the Clean Air Act (the "Act"), 42 U.S.C. 7401-7642, and the asbestos NESHAP. DOS is also required to implement an "Asbestos Control Program," which includes among other things, that DOS conduct a survey of all its facilities for the presence of asbestos. The proposed consent decree provides that any contracts entered into by DOS for asbestos demolition or renovation are subject to review by an individual trained in asbestos abatement procedures. In addition, DOS is required to have a trained supervisor at the site of any asbestos demolition or renovation operations, who is responsible for insuring that the work is performed in accordance with the Act and the asbestos NESHAP. DOS is also required to notify the Environmental Protection Agency ("EPA"), regarding any planned renovations or demolitions subject to the requirements of the Act and the asbestos NESHAP at least twenty (20) days before any renovation or demolition is scheduled to begin, except in certain emergency situations.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, United States Department of Justice, P.O. Box 7611, Washington, DC 20044-7611. All comments should refer to *United States v. City of NEW York and its Department of Sanitation*, D.J. Ref. 90-5-2-1-1204.

The proposed consent decree may be examined at the following offices of the United States Attorney and the Environmental Protection Agency:

EPA Region II

Contact: Joseph Siegal, Office of the Regional Counsel, U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10278, (212) 264–4760

United States Attorney's Office

Contact: Gabriel W. Gorenstein, Assistant United States Attorney, Southern District of New York, One St. Andrews Plaza, New York, New York 10007, (212) 791–1979

Copies of the proposed consent decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1250, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20044–7611. A copy of the proposed consent decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice. When requesting a copy of the proposed consent decree, please enclose a check for copying costs in the amount of $1.10 payable to the Treasurer of the United States.

Roger J. Marzulla,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 88–28704 Filed 12–13–88; 8:45 am]

BILLING CODE 4410–01–M

Lodging of Consent Decree; Polysar, Inc.

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States of America v. Polysar Incorporated,* Civil Action No. C 87–1080A, was lodged with the United States District Court for the Northern District of Ohio. The complaint filed by the United States in this action sought injunctive relief and civil penalties pursuant to section 3008 of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6928, in connection with a polystyrene production facility owned by Polysar Incorporated ("Polysar") in Copley, Ohio.

The proposed consent decree would require Polysar to conduct an investigation at the company's Copley, Ohio polystyrene production facility to determine the nature and extent of contamination present in soil and groundwater at the site and to evaluate hydrogeologic conditions affecting the rate and extent of contaminant migration. In addition, the proposed decree would require Polysar to implement measures to take an inactive surface impoundment out of service, including the removal, treatment and disposal of impoundment liquids, sludges and contaminated subsoils, in accordance with a plan that has been approved by the United States Environmental Protection Agency ("U.S. EPA"). The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC and should refer to *United States of America v. Polysar Incorporated,* D.J. Ref. No. 90–7–1–371.

The proposed Consent Decree may be examined at the office of the United States Attorney, Suite 500, 1404 East Ninth Street, Cleveland, Ohio 44114 and at the Office of Regional Counsel, United States Environmental Protection Agency, Region V, 111 West Jackson Street, Third Floor, Chicago, Illinois 60604. Copies of the proposed consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. The proposed Consent Decree package consists of a 17-page Consent Decree and 473 pages of Exhibits. You may request a copy of the Consent Decree with or without exhibits. Please specify in the letter of request whether or not exhibits are requested. A request for a copy of the proposed Consent Decree with exhibits should be accompanied by a check in the amount of $47.30 (ten cents (10¢) per page copying costs) payable to the "United States Treasurer." A request for a copy of the proposed Consent Decree without exhibits should be accompanied by a check in the amount of $1.70 payable to the "United States Treasurer."

Roger Marzulla,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

[Docket No. 88–28]

Gordon M. Acker, D.M.D.; Grant of Application With Restrictions

On February 29, 1988, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to Gordon M. Acker, D.M.D. (Respondent) of 2412 Route 71, Apt. 5H, Spring Lake Heights, New Jersey, proposing to deny his application for registration executed on January 29, 1988. The Order to Show Cause alleged that Respondent's registration is inconsistent with the public interest as that term is defined in 21 U.S.C. 823(f).

By letter dated March 14, 1988, Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing procedures, a hearing was held in Washington, DC on June 9, 1988.

On August 31, 1988, Judge Bittner issued her opinion and recommended ruling, findings of fact, conclusions of law and decision. The Administrative Law Judge recommended that Respondent be issued a restricted registration in Schedules III, IV and V.

The Administrative Law Judge found that Respondent entered the University of Pennsylvania School of Dental Medicine in the fall of 1978. In Respondent's third year of dental school he accepted the invitation of a fellow classmate, David Ackerman, to go to a private club. He saw many of his classmates at the club and was offered cocaine. Respondent visited the club several times and eventually agreed to try cocaine. He continued to use cocaine which he obtained from Ackerman on several occasions before going to the club.

Respondent learned through his association with Ackerman that Ackerman and another classmate that resided in Respondent's apartment building, Kenneth Weidler, were packaging and selling cocaine from Weidler's apartment. Respondent visited the apartment and, on one occasion, agreed to take a small package, which he believed contained cocaine, to a Federal Express office for mailing. Respondent eventually agreed to keep small amounts of cocaine at his apartment and deliver the cocaine to other dental students. On at least three occasions in 1980, Respondent made out-of-town trips to deliver cocaine to Ackerman's request. He was paid expenses plus $200 for each trip.

Respondent also accompanied one of Ackerman's partners of Florida to purchase cocaine.

The Administrative Law Judge also found that in late 1980, Respondent determined that his studies were being affected by his cocaine use and he disassociated himself from Ackerman and Weidler. He did, however, admit to using cocaine on one occasion after that time. Respondent graduated from dental school in May 1981, and completed a one-year residency. He was then employed by various dental clinics until his arrest by the FBI in June 1985. This arrest followed his indictment for cocaine conspiracy along with Ackerman and Weidler.

Respondent cooperated with the investigators and, on August 5, 1985, he pled guilty to one count of conspiracy to possess with intent to distribute cocaine. He was sentenced to six months in a work release program, to be followed by four and one-half years probation. He was employed sporadically from the time of his arrest until March 1987, when he was fired by the dental clinic that employed him because his work was "not up to par."

In May 1986, Orders to Show Cause were issued by DEA to Respondent proposing to revoke his DEA registrations. A hearing was held in January 1987. The Administrative Law Judge recommended that Respondent's registrations be revoked based upon his felony convictions. The recommendation was adopted by the Administrator and the registrations were revoked effective April 27, 1987. A petition for review of this order was filed with the United States Court of Appeals for the District of Columbia Circuit. On January 17, 1988, the Court affirmed the Administrator's order. The Court did indicate in its order that, "it would be appropriate for the Administrator to give careful consideration to any application filed by respondent after a year had elapsed from the effective date of the revocation order." On January 29, 1988, the application that is the subject of this proceeding was submitted by Respondent.

The New Jersey State Board of Dentistry entered into a consent agreement with Respondent on April 4, 1986. The agreement provided for random urine screens for one year, practicing under the supervision of another dentist for one year, and that Respondent was not to prescribe or possess Schedule II or IIN controlled substances, except for his own use pursuant to a bona fide prescription from another practitioner for legitimate medical use. The Regents Review Committee of the State of New York placed Respondent's dental license in the State of New York on probation for five years on February 26, 1988.

Respondent submitted an application dated January 29, 1988, for DEA registration in Schedules II (typing underneath "Percodan only"), III, IIIN, IV and V. Respondent answered "yes" in response to the question on the application, "Are you currently authorized to prescribe, distribute, dispense, conduct research, or otherwise handle controlled substances in the schedules for which you are applying, under the laws of the State or jurisdiction in which you operate or propose to operate?" He was, in fact, not authorized at the time he submitted the application, nor is he currently authorized, to handle Schedule II controlled substances in New Jersey. During these proceedings, Respondent requested that his application with regard to Percodan be withdrawn. This request was granted by the Administrative Law Judge.

The Administrative Law Judge concluded that it is undisputed that Respondent has been convicted of a felony relating to controlled substances. This alone is sufficient basis to deny an application for registration. However, based upon the fact that Respondent's illegal activities occurred more than seven years ago, that he cooperated with authorities following his arrest, that he successfully served his sentence, that there is no evidence of misconduct by Respondent since his graduation from dental school, that he has practiced dentistry for several years, and that there is no evidence that he misused his DEA registration when he had one, the Administrative Law Judge recommended that Respondent's application for registration in Schedules III, IV and V be granted subject to restrictions. The Administrator adopts the opinion and recommended decision of the Administrative Law Judge in its entirety. The Administrator concludes that there is sufficient evidence in the record to believe that Respondent, given the opportunity, will utilize a DEA registration in a responsible and professional manner.

The Administrator does impose the following restrictions upon the DEA registration in Schedules III, IV and V to be issued to Respondent:

1. Respondent's controlled substance handling authority shall be limited to writing or prescriptions only, and he shall not dispense, possess or store any controlled substance, except medically necessary for his own use, and which he has obtained pursuant to a written prescription from another licensed practitioner (unless the substance is legitimately obtainable without a prescription).

2. Respondent shall report to the Special Agent in Charge of the nearest DEA office, or his designee, any adverse results of urine tests administered pursuant to Respondent's Federal probation or New Jersey Board requirements.

3. Respondent shall not prescribe any controlled substances for his own use.

4. For at least two years from the date of the entry of a Final Order in this proceeding, every calendar quarter, Respondent shall submit a log of all prescriptions he has written during the previous quarter to the Special Agent in Charge of the nearest DEA office or his designee.

Accordingly, the Administrator of the DEA, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that the application for DEA registration submitted by Gordon M. Acker, D.M.D., on January 29, 1988, be granted in Schedules III, IV, and V, subject to the restrictions enumerated above. This order is effective December 14, 1988.

Dated: December 8, 1988.

John C. Lawn,

Administrator.

[FR Doc. 88-28727 Filed 12-13-88; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 88-15]

Hyland Pharmacy; Revocation of Registration

On February 8, 1988, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to Hyland Pharmacy (Respondent) of 3291 Highland Drive, Salt Lake City, Utah, proposing to revoke its DEA Certificate of Registration, AH8810764 and deny its pending application for renewal of that registration executed on November 3, 1986. The statutory predicate for the proposed action was that William Edmund Leatherwood, owner and manager of Respondent pharmacy, was convicted in the District Court of the Third Judicial District, State of Utah, on August 4, 1986, of five counts of obtaining controlled substances by fraud, felonies relating to controlled substances.

By letter dated February 19, 1988, Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing procedures, a hearing was

held in Salt Lake City, Utah on June 22, 1988.

On September 19, 1988, Judge Bittner issued her opinion and recommended ruling, findings of fact, conclusions of law and decision, recommending that the Administrator not revoke Respondent pharmacy's DEA Certificate of Registration and that the pending application for renewal of that registration be granted. Government counsel filed exceptions to the Administrative Law Judge's opinion and recommended ruling, findings of fact and decision. Respondent's counsel did not file any response to the Government's exceptions.

On October 17, 1988, Judge Bittner transmitted the record of the proceedings, including the Government's exceptions, to the Administrator. The Administrator has considered the record in its entirety and adopts, in part, the findings of fact recommended by the Administrative Law Judge, makes independent findings of his own, and rejects all other findings not included herein, as being unsupported by credible evidence. The Administrator also rejects the recommended decision of the Administrative Law Judge. Pursuant to 21 CFR 1316.67, the Administrator issues his final order in the matter based upon findings of fact and conclusions of law as set forth below.

The Administrative Law Judge found that William Edmund Leatherwood, R.Ph., is the sole owner of Respondent pharmacy in Salt Lake City, Utah. On May 23, 1986, an Investigator with the Division of Occupational Licensing of the State of Utah conducted a compliance investigation of Respondent pharmacy. During this routine inspection the Investigator found that one of the physicians listed on the daily logs as a prescriber of controlled substances was one who had his Utah controlled substance license suspended in November 1985. Further investigation revealed that there were several hundred prescriptions listed in the daily logs as being written by this physician after the date of the physician's suspension. The Investigator determined that these prescriptions were not available for review, and that they had not been authorized by the physician in question.

The Utah State Investigator returned to speak with Mr. Leatherwood again on June 2, 1986. At that time Mr. Leatherwood stated that he had only dispensed controlled substances to one customer without a prescription. The controlled substances he dispensed to that patient included Tylenol with Codeine #4 (Schedule III), Dalmane (Schedule IV), and Paxipam (Schedule IV). An audit of Respondent's prescription files on June 3 and 4, 1986, revealed that Mr. Leatherwood's statements to the Investigator were untrue. The Investigator determined that there were approximately 702 instances in which controlled substances were unlawfully dispensed to ten individuals during the period of June 1985 to June 1986, the only time period reviewed by the Investigator. Mr. Leatherwood realized over $4,000 in additional gross income as a result of his illegal drug sales during that one year.

During the year-long period covered by the investigation, Mr. Leatherwood unlawfully dispensed approximately eight ounces of Phenergan with codeine (Schedule V) on almost a daily basis in the name of Scott Alger, a 13-year-old boy. No physician had prescribed the dispensing of these drugs. Mr. Leatherwood covered these dispensing irregularities by writing false prescriptions which indicated that certain physicians had authorized them, when in fact they had not.

As a result of this investigation, on June 23, 1986, William Leatherwood entered a conditional plea to five counts of obtaining a controlled substance by fraud, a third degree felony, in the Third District Court in and for Salt Lake County, State of Utah.

On June 25, 1986, Mr. Leatherwood's licenses to practice pharmacy and dispense controlled substances in the State of Utah, and Respondent's controlled substance license were immediately suspended by the Department of Business Regulation, State of Utah, and the controlled substances in the pharmacy were, at that time, removed.

On August 4, 1986, Mr. Leatherwood entered a guilty plea to five third degree felony charges of obtaining controlled substances by fraud.

On June 25, 1986, the Utah Department of Business Regulation issued an Order, pursuant to a stipulation between the Department, Mr. Leatherwood and Respondent pharmacy which required that Mr. Leatherwood's licenses to practice pharmacy and to dispense controlled substances be suspended for two years as of June 25, 1986, and that Respondent's controlled substance license be suspended from June 25, 1986 through December 1, 1986. These licenses were to be placed on probation for five years following the period of suspension. In this stipulation, Mr. Leatherwood admitted that he repeatedly sold controlled substances to individuals without a valid prescription and that from June 1985 to June 1986, he repeatedly signed prescription forms for the pharmacy's files and falsely represented that a physician had authorized the prescriptions.

On August 11, 1987, the Third Judicial District Court, Salt Lake County, State of Utah, reduced the five felony charges to Class A misdemeanors and placed Mr. Leatherwood on unsupervised probation for one year.

On November 13, 1987, the Director of the Division of Occupational and Professional Licensing, Utah Department of Business Regulation, ordered the reinstatement of Mr. Leatherwood's license to practice pharmacy and license to dispense controlled substances. These licenses are now subject to a five year conditional probation.

The Administrator finds that although Respondent pharmacy is now currently authorized to handle controlled substances in the State of Utah, neither Respondent nor Mr. Leatherwood, its owner, have provided any evidence which would mitigate Mr. Leatherwood's past conduct and his convictions relating to controlled substances.

The Administrator of the Drug Enforcement Administration may revoke a DEA Certificate of Registration if he finds that the registrant has been convicted of a felony relating to controlled substances. Mr. Leatherwood, owner and operator of Respondent pharmacy, pled guilty and was convicted of five felony violations of the Utah Controlled Substances Act.

The Administrator has consistently held that where the owner, operator, major shareholder, managing pharmacist or key employee of a pharmacy has been convicted of a felony relating to controlled substances, the registration of the pharmacy may be revoked, suspended or denied on that basis. See: *White's Best Buy Drugs*, Docket No. 87–41, 53 FR 7251 (1988); *Unarex of Plymouth Road*, d/b/a *Motor City Prescription Center and Unarex of Dearborn*, d/b/a/ *Motor City Prescription Center*, Docket Nos. 84–1, and 84–2, 50 FR 8877 (1985); *Bourne Pharmacy, Inc.*, Docket No. 83–32, 49 FR 32816 (1984), and cases cited therein.

In addition to the conviction, Mr. Leatherwood's actions on behalf of the pharmacy would render the DEA registration of the pharmacy inconsistent with the public interest as that term is defined in 21 U.S.C. 823(f), which is a ground for revocation of registration under 21 U.S.C. 824(a)(4). The Administrator of the Drug Enforcement Administration has revoked or denied DEA Certificates of Registration of pharmacies based upon conduct similar to that of Mr. Leatherwood. See: *Medicine Shoppe*,

Docket No. 85–47, 51 FR 13854 (1986); *Fourth Street Pharmacy,* Docket No. 86–42, 52 FR 32068 (1987), *aff'd, Fourth Street Pharmacy v. Drug Enforcement Administration,* 836 F.2d 1137 (8th Cir. 1988). Mr. Leatherwood exhibited a pattern of misconduct which was a flagrant abuse of a pharmacist's duty to dispense controlled substances only pursuant to the lawful order of a physician. 21 CFR 1306.04.

In her opinion, the Administrative Law Judge recommended that Respondent be permitted to retain its Federal controlled substance privileges despite its owner's history of wrongful handling activities. Her opinion is based, in part, upon her conclusion that "it does not appear that Mr. Leatherwood acted from criminal intent." To support this statement, Judge Bittner found that Mr. Leatherwood's unlawful dispensings were "motivated by a desire, however misguided, to accommodate his customers." The Administrator is not convinced that Mr. Leatherwood's intentions were totally directed towards "accommodating" his customers. The Administrative Law Judge failed to consider that the pharmacy collected income of over $4,000 from these illegal prescriptions. There is no doubt but that Mr. Leatherwood and his pharmacy benefitted financially from the transactions.

Mr. Leatherwood testified that he knew what he was doing was wrong when he did it. On June 2, 1986, he told the state Investigator that he had only dispensed controlled substances without authorization to one customer. It was not until later, when he was confronted with direct evidence of unauthorized dispensing to nine other customers that he admitted his unlawful activities. The Administrator finds that the evidence in the record does not support a conclusion that Mr. Leatherwood acted without criminal intent in unlawfully dispensing controlled substances, when he knew at the time that he was violating the law.

Mr. Leatherwood admitted that he dispensed controlled substances at least 700 times during a one year period from June 1985 to June 1986, pursuant to false prescriptions which he wrote. Mr. Leatherwood blatantly abused the pharmacy's registration. Although Mr. Leatherwood has indicated that he will not repeat his conduct, the Administrator finds nothing in the record to support this contention. An individual who owns and operates a pharmacy owes the public professional responsibility and integrity. Mr. Leatherwood has disregarded these responsibilities. This registrant's past violative history leads the Administrator to conclude that Respondent cannot be entrusted with the responsibilities of a DEA registration and that its continued registration would be contrary to the public interest. Therefore, the Administrator concludes that Respondent's registration must be revoked and that its pending application for renewal thereof must be denied.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration AH8810764, previously issued to Hyland Pharmacy d/b/a William Edmund Leatherwood, be, and it hereby is, revoked. He further orders that the pending application for renewal of said registration, executed on November 3, 1986, be, and it hereby is, denied.

This order is effective January 13, 1989.

Dated: December 8, 1988.

John C. Lawn,

Administrator.

[FR Doc. 88–28728 Filed 12–13–88; 8:45 am]

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Office of the Assistant Secretary for Administration and Management

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Labor has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Final Interim Rule Relating to the Prohibited Transaction Exemption Procedures Under the Federal Employees' Retirement System Act; No Form; and No OMB Control Number.

Type of Request: Expedited Submission—approval date requested (December 27, 1988.)

Average Burden Hours/Minutes Per Response: 35 hours.

Frequency of Response: On occasion.

Number of Respondents: 3.

Annual Burden Hours: 105 hours.

Annual Responses: 3.

Needs and Uses: This final interim regulation describes the procedures for filing and processing applications for exemptions from the prohibited transaction provisions of The Federal Employees' Retirement System Act of 1986. The Secretary of Labor is authorized to grant exemptions from these restrictions and is required by law to establish a procedure to process such exemptions.

Affected Public: Business or other for profit.

Respondents Obligation: Mandatory.

Requests for Which Paperwork Reduction Act Approval Is Being Sought: (1) An application submitted under this procedure shall contain all of the information specified in paragraph (2) of this section if such application is for an exemption other than for a class of transactions or class of fiduciaries. If the application is for a class of transactions or class of fiduciaries, the application need contain only the information required under paragraphs (D) through (J), (N), and (O) of paragraph (2) of this section. If any of the information specified in paragraph (2) of this section cannot be furnished, an explanation of why it cannot be furnished shall be provided.

(2) Information to be submitted with application for exemption:

(A) The name and type of plan or plans;

(B) The Employer Identification Number (EIN);

(C) The estimated number of plan participants;

(D) A detailed description of the transaction and the fiduciary, or class thereof, for which an exemption is requested;

(E) The possible violation or violations of the prohibited transaction provisions for which exemptions are requested;

(F) Whether such transaction or transactions have been already entered into or are transactions which the parties intend to enter into if the exemption is granted;

(G) Whether the transaction or transactions are customary for the industry or class involved;

(H) The hardship or economic loss, if any, which would result to the person or persons on whose behalf the exemption is sought, to the plan, and to its participants and beneficiaries from denial of the application;

(I) At the option of the applicant, a draft setting forth the exemption proposed by the applicant;

(J) A statement explaining why such exemption would be:

(i) Administratively feasible;

(ii) In the interest of the plan or plans which would be affected if the exemption were granted and of their participants and beneficiaries; and

(iii) Protective of the rights of the participants and beneficiaries of the affected plan or plans;

(K) Whether, to the best knowledge of the applicant, the plan or trust base ever been found by the Secretary or by a court to have violated the provisions of 5 U.S.C. 8477(b) or (c);

(L) Whether, to the best knowledge of the applicant, any relief under 5 U.S.C. 8477(c)(3), section 408(a) of ERISA, or section 4975(c)(2) of the Code has been requested by, or provided to, the applicant 4975(c)(2) of the Code has been requested by, or provided to, the applicant or any of the parties on behalf of whom the exemption is sought and, if so, a description of such relief;

(M) Whether, to the best knowledge of the applicant, the applicant or any of the parties to the transaction sought to be exempted is currently, or has been within the last 5 years, a defendant in any lawsuit concerning such person's conduct as a fiduciary, party in interest, or disqualified person with respect to any plan;

(N) With respect to the notification of interested persons, the applicant shall include the following:

(i) A description of the interested persons to whom notice will be provided;

(ii) The manner by which such notice will be provided; and

(iii) The time period within which such notice will be given;

(O) A certification by the applicant that, to the best of the applicant's knowledge, the application is accurate and complete.

(3) *Conferences.* (A) The applicant shall indicate whether a conference is desired in the event the Secretary contemplates not granting the requested exemption. Any such conference shall be held in Washington, DC.

(B) If more than one applicant has requested an exemption with respect to the same or similar class of transactions, and the Secretary contemplates not granting the exemption, and if more than one applicant has requested a conference, such conferences will be scheduled, insofar as possible, as a joint conference with all such applicants present.

(C) An applicant is entitled to only one conference.

(D) In any case in which a hearing is held, an applicant shall not be entitled to a conference.

OMB Desk Officer: Ms. Diana Rowen.

Written comments and recommendations on the information collection should be sent to Ms. Diana Rowen at Office of Management and Budget, Desk Officer, Room 3001, New Executive Office Building, Washington, DC, 20503, telephone 202/385–6880 by December 27, 1988.

A copy of the information collection proposal may be obtained from Mr. Paul Larson, Director, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N–1301, Washington, DC 20210, telephone number: 202/523–6331.

Signed at Washington, DC, this 12th day of December, 1988.

Marizetta Scott,

Acting Departmental Clearance Officer.

SF–83 Request for OMB Review—Pension and Welfare Benefits Administration, U.S. Department of Labor

Subject: Interim final rule regarding application procedures for exemption from prohibited transactions under FERSA.

Supporting Statement

1. Statutory Authority for Information Collection

Section 408(a) of the Employee Retirement Income Security Act of 1974 (ERISA) establishing the Secretary of Labor's authority to grant a conditional or unconditional exemption of any fiduciary, disqualified person, or transaction from all or part of the prohibitions imposed by section 406(b) of ERISA. Section 406(b) of ERISA prohibits, unless exempted, a fiduciary's dealing with the assets of a plan in his or her own interest, acting on behalf of a party whose interests are adverse to the interests of the plan, its participants or beneficiaries, or receiving consideration for his own personal account from any party dealing with the plan in connection with a transaction involving the assets of the plan.

FERSA section 8477(c)(2) parallels ERISA section 406(b). Section 8477(c)(2)(A) prohibits a fiduciary with respect to the Fund from dealing with assets of the Fund in his or her own interests. Section 8477(c)(2)(B) prohibits fiduciaries with respect to the Fund from acting. In an individual or any other capacity, in any transaction involving the Fund on behalf of a party, or representing a party, whose interests are adverse to the interests of the fund or the interests of participants and beneficiaries. Section 8477(c)(2)(C) prohibits a fidicuary with respect to the Fund from receiving any consideration for his or her own personal account from any party dealing with sums credited to the Fund in connection with a transaction involving the assets of the Fund.

Section 8477(c)(3) of the Federal Employees' Retirement System Act of 1986 (FERSA) parallels ERISA section 408(a), authorizing the Secretary of Labor to grant administrative exemptions from the restrictions of section 8477(c)(2). Under section 111 of the FERSA Technical Corrections Act of 1986 (Pub. L. 99–556, October 27, 1986) the Department's existing exemption procedures (ERISA Proc. 75–1, 40 FR 18471) are made applicable to exemption applications under FERSA until the earlier of the date of publication of final regulations adopting an exemption procedure on December 31, 1988.

To date the Department has not published final regulations revising ERISA Proc. 75–1 to include an exemption application procedure under FERSA in addition to the procedure that already applies to applications under ERISA and the Internal Revenue Code. In order to comply with the Congressional mandate under FERSA to promulgate an exemption application procedure by December 31, 1988 the Department shall adopt, for applications for exemptions from transactions prohibited under FERSA section 8477(a)(2), this interim final rule which contains the procedures provided in ERISA Proc. 75–1 (modified only to the extent necessary to remove references or requirements not applicable to FERSA). This interim final rule shall expire upon the effective date of the final revised exemption application procedure.

2. Purpose of the Information Collection

In order for the Secretary of Labor to grant an exemption, an exemption must be determined to be: (1) Administratively feasible; (2) in the interest of the plan, as well as the interest of the plan's participants and beneficiaries; and (3) protective of the rights of participants and beneficiaries. In order for the Secretary to make such determination, applicants for administrative exemptions are required to provide sufficient information to enable the Department to find whether or not the statutory exemption criteria are satified. The notice to be supplied to interested parties is intended to afford interested persons opportunity to present views regarding the exemption application, as required by statute.

3. Use of Improved Information Technology

This is not applicable to the adoption of the requirements of these class exemptions.

4. Efforts To Identify Duplication

The interim final rule avoids duplication by adopting the procedures

provided in ERISA Proc. 75–1, modified only to the extent necessary to remove references or requirements not applicable to FERSA. It shall expire upon the effective date of the publication of a final revised exemption application procedure which applies to transaction prohibited under ERISA, FERSA or the Internal Revenue Code.

5. Similar Information

Since the information requested from each applicant pertains to the specific transaction for which the exemption is being requested, no similar information is collected or available from any State or Federal agencies, or other sources.

6. Small Businesses

Due to the size and nature of the Thrift Savings Fund, it is unlikely that the Fund will engage in transactions involving small businesses on a frequent basis. No provision has been included in the interim final rule to provide different substantive standards for small business. Since the Department has to make the same findings in every case, and the potential for abuse in any specific transaction is no less in situations involving small entities, it is neither possible nor appropriate to have different standards for small and large businesses.

7. Frequency of Information Collection

The information collection requirements relating to these exemption application procedures are only imposed when a Fund fiduciary chooses to engage in a transaction which necessitates the utilization of an exemption. The frequency of information collection therefore is not determined by a regular or predetermined period of time.

8. Special Circumstances

There are no special circumstance applicable within the meaning of 5 CFR 1320.6.

9. Consultations With Outside Agencies

No outside agencies were consulted in the development of this interim final regulation.

10. Confidentiality

Because the Secretary must make a determination on the record, no assurances of confidentiality can be provided to applicants for exemption. The right to review all information supplied by an applicant is an essential part of providing interested persons the opportunity to make informed comments on a proposed exemption.

11. Questions of a Sensitive Nature

No sensitive questions are asked of applicants for exemptions.

12. Annualized Cost to the Federal Government and Respondents

Cost to the government: The interim final rule will result in certain costs to the government. Notices of pending and granted exemptions are published in the **Federal Register**, resulting in publication and administrative costs to the Federal Government. The Department estimates that it will receive 3 FERSA exemption applications annually (see item 13 for a description of the basis for this estimate), resulting in aggregate costs to the government of $3,860, as described below.

Assuming conservatively that each application would result in a one and one-half page notice of pendency and a one page notice of grant, the total publication cost would be $3,060 (e.g., 7.5 total pages x $408 per page). The interm final rule will also result in a cost to the Federal government for filing, handling and storing the documents. FERSA notices would represent roughly 2 percent of the total exemption notices published by the Department in a year. PWBA has assigned one staff year to this administrative function for all exemption applications under FERSA, ERISA and the Internal Revenue Code, at a cost of $40,000 annually (including space, supplies, and overhead in addition to salary and benefits): Thus, the total administrative cost to the government of FERSA exemption applications is $800 (e.g., 2% x $40,000).

Cost to the applicants: The average costs to the applicant of applying for an exemption are relatively small when compared to the dollar amounts of the transactions for which exemptions are requested. The costs of this paperwork requirement under current proceduers, which effectively remain unchanged under the interim final rule, consists in the preparation of information submitted in an application for an exemption. The Department estimates that it will receive 3 exemption applications annually (see item 13 for a description of the basis for this estimate), resulting in aggregate one-time preparation costs—incurred only by applicants actually requesting exemptive relief—of $7,770, as described below.

Because of the amount of paperwork submitted, the Department estimates that on average roughly 25 hours of professional time (at $100.00/hour) and 10 hours of clerical time (at 9.00/hour) are required for the preparation of an exemption application. Thus, the total preparation cost per exemption application would be $2590 (e.g., 25 x $100 plus 10 x $9).

13. Annualized Information Collection Bfurden

To date the Department has received only 3 applications for exemptions from transactions prohibited under FERSA. It is anticipated that on occasion additional applications will be submitted; thus, based on past experience the Department conservatively estimates that 3 additional new applications will be submitted annually

Based upon its experience under ERISA exemption application procedures during the past decade, the Department estimates that on average a total of 35 burden hours would be required for the preparation of each FERSA exemption application, including 25 hours of professional time and 10 hours of clerical time. Thus, the aggregate burden attributable to exemption application procedures under FERSA is estimated to be 105 hours annually.

14. Reasons for Change in Burden

The change in burden is the result of a statutory enactment under FERSA (and subsequent technical corrections) which has created additional regulatory, oversight and enforcement authority and responsibilities in the Department of Labor.

This interim final regulation does not appear as a separate item in the FY 1989 PWBA Information Collection Budget because it was intended to be incorporated into a revision of the ERISA Exemption Procedures regulation (OMB No. 1210–0060). However, since PWBA is still considering possible amendments to the general exemption procedures regulation, it was necessary to publish a separate interim rule with respect to FERSA in order to comply with the statutory deadline for publication of a FERSA procedure.

15. Collection of Information for Statistical Use

This paperwork requirement is not a collection of information for statistical use; therefore, no statistical methods have been used.

[FR Doc. 28886 Filed 12–13–88; 8:45 am]

BILLING CODE 4510–29–M

Mine Safety and Health Administration

[Docket No. M-88-217-C]

Shannopin Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Shannopin Mining Company, Box 364, Bobtown, Pennsylvania 15315 has filed a petition to modify the application of 30 CFR 75.1103-4(a) (automatic fire sensor and warning device systems; installation; minimum requirements) to its Shannopin Mine (I.D. No. 36-00907) located in Greene County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that automatic fire sensor and warning device systems provide identification of fire within each belt flight.

2. As an alternate method, petitioner proposes to install an early warning fire detection system. A low-level carbon monoxide (CO) detection system would be installed along all belt conveyors, at each drive and at each tailpiece located in intake air courses. The low-level CO system would be capable of giving warning of a fire for four hours should the power fail; a visual alert signal would be activated when the CO level is 10 parts-per-million (ppm) above the established ambient level and an audible signal would sound at 15 ppm above the established ambient level. All persons would be withdrawn to a safe area at 10 ppm and evacuated at 15 ppm. The CO monitoring system would initiate the fire alarm signals at an attended surface location. This responsible person would notify the working sections and other personnel who may be endangered, when the established alert and alarm levels are reached. The CO system would be capable of identifying any activated sensor and for monitoring electrical continuity and deleting electrical malfunctions.

3. The CO monitoring system would be visually examined at least once each coal producing shift and tested for functional operation weekly to ensure the monitoring system is functioning properly. The monitoring system would be calibrated with known concentrations of CO at least monthly.

4. If at any time the CO monitoring system or any portion of the system has been deenergized for reasons such as routine maintenance or failure of a sensor unit, the belt conveyor may continue to operate provided the affected portion of the belt conveyor entry would be continuously patrolled and monitored for CO by a qualified person using hand-held CO detecting devices.

5. The details for the fire detection system including, but not limited to, type of monitor and specific sensor location would be included as a part of the Ventilation System and Methane and Dust Control Plan.

6. The permanent stopping separating the conveyor belt entries from the intake escapeway would be specifically approved in the Ventilation System and Methane and Dust Control Plan for the mine.

7. The petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before January 13, 1989. Copies of the petition are available for inspection at that address.

Dated: December 7, 1988.

BILLING CODE 7510-01-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dipose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATE: Requests for copies must be received in writing on or before January 30, 1989. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESS: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency

records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of Commerce, International Trade Administration (N1–151–88–6). Records created by the Office of International Trade and the Bureau of Foreign Commerce in administering the Point-4 Program (records relating to the direction and organization of the program are being preserved).

2. National Aeronautics and Space Administration (N1–255–87–2). Videotape and microfilm derived from the Lunar Orbiter project and containing still photographic images of individual scanning strips of the lunar surface (composite negatives have been designated for preservation).

3. Tennessee Valley Authority, Division of Reservoir Properties (N1–142–88–14). Material removed from the Division's correspondence files during archival processing because it lacks sufficient archival value to warrant permanent retention by the National Archives.

4. Department of the Treasury, Internal Revenue Service (N1–58–88–3). Additions and revisions to Records Control Schedule 206 for Service Centers.

5. United States Information Agency, Bureau of Educational and Cultural Affairs, Office of the Executive Director (N1–306–89–3). Working papers, chronological files and budget files.

6. United States Information Agency, Bureau of Educational and Cultural Affairs, Office of Arts America (N1–306–89–5). Working papers, chronological files, reference files, and facilitative records. Policy documentation is scheduled for permanent retention.

Dated: December 7, 1988.

Claudine J. Weiher,

Acting Archivist of the United States.

BILLING CODE 7515–01–M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Comments on this information collection must be submitted on or before January 1, 1989.

ADDRESSES: Send comments to Ms. Ingrid Y. Reyes, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue NW., Washington, DC 20506 (202–786–0239) and Jim Houser, Office of Management and Budget, New Executive Office Building, 726 Jackson Place NW., Room 3208, Washington, DC 20503 (202 395 7316).

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Y. Reyes, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202–786–0249) from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entires are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries is subject to 44 U.S.C. 3504(h).

Category: Extension

Title: NEH/Reader's Digest Teacher Scholar Program for Elementary and Secondary School Teachers.
Form Number: 3136–0122.
Frequency of Collection: Annual.
Respondents: Individuals or households Academic scholars, teachers, administrators.
Use: The application instructions provide direction for preparing narrative and budgetary parts of applications for grant funds.
Estimated Number of Respondents: 1,500.
Frequency of Response: 1.
Estimated Hours for Respondents to Provide Information: 4 per respondent.
Estimated Total Annual Reporting and Recording Burden: 6,530.

Susan H. Metts,

Assistant Chairman for Administration.

NATIONAL SCIENCE FOUNDATION

Committee Management; Establishment of Advisory Committee for Cross-Disciplinary Activities

The Assistant Director for Computer and Information Science and Engineering (CISE) has determined that the establishment of the Advisory Committee for Cross-Disciplinary Activities is necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF) and other applicable law. This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Name of Committee: Advisory Committee for Cross-Disciplinary Activities.

Purpose: To provide regular advice, recommendations, and oversight to the Office of Cross-Disciplinary Activities in guiding its policy decisions with regard to the programs within its purview.

M. Rebecca Winkler,

Committee Management Officer.

December 9, 1988.

[FR Doc. 88–28713 Filed 12–13–88; 8:45 am]

BILLING CODE 7555–01–M

Committee Management; Renewals

The Advisory Committees listed below are being renewed until December 18, 1990.

The Assistant Director for Computer and Information Science and Engineering has determined that the renewal of these Committees is necessary and in the public interest. This determination follows consultation with the Committee Management Secretariat, General Services Administration:

—Advisory Committee for Microelectronic Information Processing Systems
—Advisory Committee for Information, Robotics, and Intelligent Systems

M. Rebecca Winkler,

Committee Management Officer.

December 9, 1988.

[FR Doc. 88–28714 Filed 12–13–88; 8:45 am]

BILLING CODE 7555–01–M

Advisory Committee for Design, Manufacturing, and Computer-Integrated Engineering; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Design, Manufacturing, and Computer-Integrated Engineering (DMCE)
Date and Time: January 7–8, 1989; 1:30 p.m.–6:00 p.m., January 7; 9:00 a.m.–3:00 p.m., January 8
Place: University of California-Berkeley, Sibley Auditorium, Steven Bechtel Engineering Center, Berkeley, CA
Type of Meeting: Open
Contact Person: Dr. Ranga Komanduri, Acting Division Director, DMCE , Room 1107, National Science Foundation, Washington, DC 20550, Telephone: 202/357–7508
Summary Minutes: Dr. Komanduri
Purpose of Meeting: To provide advice, recommendations, and counsel on major goals and policies pertaining to the Division of Design, Manufacturing, and Computer-Integrated Engineering
Summarized Agenda: Discussions on issues, opportunities and future directions for the division in Design, Manufacturing, and Computer-Integrated Engineering; discussion of the DMCE budget for FY 89; discussion of budget issues with the NSF Assistant Director for Engineering, as well as other items.

December 9, 1988.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 88–28712 Filed 12–13–88; 8:45 am]

BILLING CODE 7555–01–M

Microelectronic Information Processing Systems Advisory Committee; Meeting

The National Science Foundation announces the following meeting:

Name: Division of Microelectronic Information Processing Systems Advisory Committee
Date and Time: January 30, 1989, 8:30 a.m.–5:00 p.m.; January 31, 1989, 8:30 a.m.–3:00 p.m.
Place: National Science Foundation, 1800 G Street, NW., Washington, DC, Conference Room 540
Type of Meeting: Open
Contact Person: Stephanie Gorman, Administrative Officer, National Science Foundation, 202/357–7853
Minutes: May be obtained from contact person listed above.
Purpose of Meeting: To discuss the content of the Division's program goals and objectives and to advise on areas and priorities, new initiatives and other topics of interest to the Division.
Agenda: Overview of the Division since the last meeting. Continuation of strategic planning for initiatives.

Rebecca M. Winkler,

Committee Management Officer.

December 9, 1988.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Nuclear Waste; Meeting

The Advisory Committee on Nuclear Waste (ACNW) hold a meeting on December 21, 1988, Room P–422, 7920 Norfolk Avenue, Bethesda, MD. The Committee is meeting on an expedited basis in an attempt to be responsive to the Commission's request for ACNW comments by the end of December, 1988. The meeting will start at 8:30 a.m. on Wednesday, December 21 and continue until close of business at 5:00 p.m. The entire meeting will be open to public attendance and the following topics will be discussed:

Wednesday, December 21, 1988

• Proposed revisions of 10 CFR Part 20, "Standards For Protection Against Radiation."

Other topics which may be discussed as time permits include:

• Comments on Advanced Notice of Development of a Commission Policy on Exemptions From Regulatory Control for Certain Practices whose Public Health and Safety Impacts are Below Regulatory Concern and,

• Administrative matters such as future schedules, new members, consultants, and staffing matters.

Procedures for the conduct of and participation in ACNW meetings were published in the **Federal Register** on June 6, 1988 (53 FR 20699). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. The Office of the ACRS is providing Staff support for the ACNW. Persons desiring to make oral statements should notify the Executive Director of the Office of the ACRS as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the ACNW Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the Executive Director of the Office of the ACRS, Mr. Raymond F. Fraley (telephone 301/492–4516), prior to the meeting. In view of the possibility that the schedule for ACNW meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

Date: December 8, 1988.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 88–28748 Filed 12–13–88; 8:45 am]

BILLING CODE 7590–01–M

Memorandum of Understanding Between the Nuclear Regulatory Commission and the Department of Justice

The Nuclear Regulatory Commission and the United States Department of Justice have entered into a Memorandum of Understanding to provide general procedures for the coordination of enforcement activities and exchange of information between the two agencies. The text of the Memorandum of Understanding is set out below.

Samuel J. Chilk,

Secretary of the Commission.

Dated at Rockville, Maryland, this 8th day of December, 1988.

Memorandum of Understanding Between the Nuclear Regulatory Commission And the Department of Justice

I. Purpose

The Nuclear Regulatory Commission (NRC) and the Department of Justice (DOJ) enter into this agreement (1) to provide for coordination of matters that could lead both to enforcement action by the NRC as well as criminal prosecution by DOJ, and (2) to facilitate the exchange of information relating to matters within their respective jurisdictions. This agreement does not affect the procedures and responsibilities set forth in the April 23, 1979 Memorandum of Understanding between the NRC and the Federal Bureau of Investigation regarding cooperation concerning threats, theft, or sabotage in the U.S. nuclear industry. Similarly, this agreement does not apply to those matters arising from internal investigations conducted by the NRC Office of Inspector and Auditor.

This Memorandum of Understanding is not intended to, does not, and may not be relied upon to, create any rights or benefits, substantive or procedural, enforceable at law by a party to litigation with the United States. Nor are any limitations hereby placed by on otherwise lawful litigative prerogatives of DOJ.

II. Background

Under federal statutes, the NRC has the responsibility to protect the radiological health and safety of the public, the public interest, the common defense and security, and the environment (hereinafter collectively referred to as public health and safety), from hazards that might arise from the material and facilities which it regulates. The enforcement program of the NRC is designed to fulfill these responsibilities by ensuring compliance with NRC requirements, obtaining prompt correction of violations and adverse conditions affecting safety, encouraging improvement of licensee performance, and deterring future violations. In contrast, criminal prosecutions for willful violations of NRC requirements are the responsibility of the DOJ. Such prosecutions provide an additional tool to assure compliance and to deter future violations. Therefore, it is useful and desirable for the NRC and the DOJ to coordinate to the maximum practicable extent their different responsibilities.

Under the Atomic Energy Act of 1954, as amended, the NRC has the authority to conduct such investigations as it may deem necessary or proper to assist it in determining whether enforcement or other regulatory action is required under the Act, or any regulations, licenses, or orders issued thereunder.

Enforcement actions within NRC authority include license revocations, suspensions and modifications, cease and desist orders, civil penalties, and notices of violation. The NRC has the authority to take such action as it deems necessary to protect the public health and safety, including the authority, when appropriate, the take immediate action.

The Department of Justice has the responsibility to determine whether to institute criminal prosecution for violations of all federal statutes, including the Atomic Energy Act of 1954, as amended. Such violations are typically developed and brought to the attention of DOJ by law enforcement or investigative agencies, such as the Federal Bureau of Investigation, the Postal Inspection Service, and the various Treasury enforcement agencies. Similarly, suspected criminal violations of the Atomic Energy Act, as amended, or Title 18 of the United States Code may be identified during the course of NRC investigations and referred to DOJ for prosecutive determination.

Thus, both the NRC and DOJ have authority and responsibility to investigate and take action for certain violations that may arise out of the same factual matters. Although each agency will carry out its statutory responsibilities independently, the agencies agree that the public health and safety would be enhanced by cooperation and timely consultation on proposed enforcement actions where both civil and criminal violations appear to exist, and by the timely exchange of information of mutual interest. As an exmaple, it may be appropriate in some cases for the NRC to stay its hand pending a criminal prosecution. Conversely, in other cases the public health and safety may require immediate NRC action that could impact a potential criminal prosecution. Both agencies recognize that these enforcement decisions are inherently matters of judgment for each agency to decide for itself, with due regard, however, for the views of the other.

III. Areas of Cooperation

A. DOJ Notification to NRC of Information Concerning Public Health and Safety

Should DOJ learn of or discover health or safety related information concerning a matter within the jurisdiction of the NRC, and not already reasonably known to the NRC, DOJ shall communicate such information to the NRC as soon as practicable, unless such information is determined by DOJ to be grand jury material. *See* Rule 6(e) of the Federal Rules of Criminal Procedure.

Should DOJ, during grand jury proceedings, discover health or safety related information concerning a matter within the jurisdiction of the NRC, and not already reasonably known to the NRC, which may warrant immediate regulatory action to protect the public health and safety, DOJ promptly will seek a court order, pursuant to the inherent authority of the court to supervise the grand jury, for disclosure of such information to the NRC for use in connection with its safety enforcement responsibilities.

B. NRC Notification to DOJ of Suspected Criminal Violations

If NRC learns of or develops information regarding suspected criminal violations on matters not within the regulatory jurisdiction of the NRC, the NRC will provide the information regarding such suspected criminal violations to the appropriate investigative agency having jurisdiction over the matter.

Should NRC learn of or develop information regarding any suspected criminal violations, including Atomic Energy Act violations, on matters within the regulatory jurisdiction of NRC, it will notify DOJ in the following manner. With respect to matters not involving special circumstances, as described below, the NRC's Director, Office of Investigations (OI), will formally refer the matter to DOJ for prosecutive determination if, on completion of its investigation, the Director, OI, has determined that sufficient evidence has been developed to support a reasonable suspicion that a criminal violation has occurred. Whenever any of the special circumstances listed below occurs, and the Director, OI, has a reasonable suspicion that a criminal violation has occurred, the Director of OI will promptly notify the DOJ of a matter involving such special circumstance(s), notwithstanding the fact that an investigation has not yet been completed by NRC. The special circumstances involve:

(1) A matter where death or serious bodily injury is involved;

(2) A matter under investigation which is likely to generate substantial national news media attention;

(3) A matter where there is evidence of ongoing activity designed to obstruct the investigation;

(4) A matter which may require extraordinary investigative measures which require legal assistance from DOJ.

When a matter arises in which the NRC concludes that regulatory action is necessary to protect the public health and safety, or that it is necessary to propose a civil penalty, and the Director, Office of Enforcement (OE), has been informed by the Director, OI, that there is a reasonable suspicion that a criminal violation has occurred, the Director of OE will promptly notify the DOJ of such matter, notwithstanding the fact that an investigation has not yet been completed by NRC. Any action by the NRC is to be coordinated with DOJ as prescribed in Section C. below.

Notification to DOJ will not normally result in cessation of the NRC investigation.

C. Procedure When NRC Regulatory Activities Run Parallel to or May Affect Future DOJ Activity

NRC regulatory activities with respect to matters that have been referred to DOJ for criminal prosecution, or to which the notification provisions of Section B. apply, shall be coordinated as follows:

1. If the NRC concludes at any time that it lacks reasonable assurance that activities authorized by a license are being conducted without endangering the health and safety of the public and the NRC concludes that immediate action is required to protect the public health, safety, or interest, it will proceed with such action as is necessary to abate the immediate problem. If time permits, the NRC shall notify DOJ of its proposed action prior to acting, but, in any event, shall notify DOJ of its action as soon as practicable. This paragraph shall apply only to those situations that do not allow sufficient time for reasonable consultation.

2. If the NRC concludes that regulatory action is necessary in the public interest, other than the actions described in paragraphs 1 and 3 herein, the NRC shall first consult with DOJ concerning its contemplated action. The NRC shall take into account the views and concerns of DOJ and proceed in a manner that accommodates such views and concerns to the fullest extent possible, consistent with the regulatory action required. Such cooperation at the staff level shall include the seeking of a stay, upon DOJ's request, of discovery and hearing rights during the regulatory proceeding for a reasonable period of time to accommodate the needs of a criminal investigation or prosecution, provided that DOJ supports such action with appropriate affidavits or testimony as requested by the presiding officer.

3. If the NRC concludes that it is necessary to propose a civil penalty, it shall notify DOJ of its contemplated action, and shall defer the initiation of such proceeding until DOJ either concludes its criminal investigation/prosecution or consents to the action, except that if a statute of limitations bar to a civil penalty proceeding is imminent, the NRC may initiate such proceeding after consultation with DOJ. In such event, the NRC staff shall accommodate the needs of DOJ by seeking a stay, upon DOJ's request and with DOJ support as described in paragraph 2 above, of discovery and hearing rights during the civil penalty proceeding for a reasonable period of time.

D. Time Frame for Notification in Matters Referred to DOJ

1. If, on completion of its investigation, the NRC concludes that civil enforcement action is appropriate, it will notify DOJ of its contemplated action normally within 45 days of its referral to DOJ.

2. DOJ will notify the NRC, normally within 60 days of the referral, of its preliminary decision as to whether a criminal investigation or prosecution is warranted.

E. NRC Assistance to DOJ

The NRC will make reasonable efforts, at DOJ's request, to provide informal assistance regarding applicable NRC requirements, technical issues, and factual circumstances. Such assistance should be requested directly from the Director, Office of Investigations, who will forward requests for technical assistance to the Deputy Executive Director for Regional Operations. A request that one or more NRC investigators be assigned to the DOJ investigation or that NRC technical experts be assigned to assist DOJ and the grand jury should be made in writing. Such requests must bear the signature of a United States Attorney or Deputy Assistant Attorney General, as appropriate. These requests will be considered by NRC on a case-by-case basis.

F. Exchange of Information Related to Civil or Criminal Enforcement

Following a DOJ decision not to prosecute a referred case, or at the conclusion of a criminal proceeding, DOJ will provide NRC, upon its request, information not protected from disclosure by Rule 6(e), Fed.R.Crim.P., relevant to the associated civil case. Similarly, NRC will provide information to DOJ, upon its request, on matters being considered by DOJ.

IV. Implementation

The DOJ official responsible for implementation of the notification responsibilities of this agreement is the Chief, General Litigation and Legal Advice Section, Criminal Division; the NRC official responsible for implementation of the notification responsibilities of this agreement with respect to information regarding suspected criminal violations is the Director, Office of Investigations; the NRC official responsible for the notification responsibilities of this agreement with respect to enforcement action is the Director, Office of Enforcement, or the Assistant General Counsel for Enforcement, as appropriate.

V. Effective Date

This agreement is effective when signed by both parties.

Lando W. Zech, Jr.

Chairman, U.S. Nuclear Regulatory Commission.

Date: October 31, 1988.

Edward S.G. Dennis,

Assistant Attorney General, Criminal Division, U.S. Department of Justice.

Date: November 23, 1988.

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from November 21, 1988 through December 2, 1988. The last biweekly notice was published on November 30, 1988 (53 FR 48823).

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 13, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective,

notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this* **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendments: September 16, 1988 as supplemented November 18, 1988

Description of amendment requests: The proposed amendment would revise Technical Specifications (TS) contained in Appendix A of the Quad Cities Station Operating Licenses (DPR-29 and DPR-30). Changes to certain TS are necessary to support the implementation of a Hydrogen Water Chemistry (HWC) program which will improve reactor water chemistry and help reduce the potential for integranular stress corrosion cracking (IGSCC).

The licensee proposes to amend TS by changing the trip setpoint for the main steamline radiation monitor (MSLRM) from a value of seven times the normal full power background (NFPB) radiation level to fifteen times NFPB. NFPB is defined, for these purposes, as the radiation level at the MSLRM associated with normal full power conditions without the use of hydrogen water chemistry. A trip setpoint value of seven times NFPB was previously chosen to provide sufficient margin for avoiding spurious trips while still providing appropriate protection from a control rod drop accident (CRDA). With the use of HWC the normal background levels at the MSLRM may increase by as much a factor of five due to the increase in nitrogen-16 (N-16) which is attributable to chemical changes that occur in the reactor from hydrogen addition. Therefore, in order to maintain sufficient margin from spurious actuations, the licensee proposes to raise the trip setpoint value to fifteen times the NFPB levels which exist without HWC.

This change will facilitate the HWC program developed by the licensee to improve reactor water chemistry at the Quad Cities Nuclear Power Station. The purpose of the program is to reduce the effects from IGSCC of primary pressure boundary piping. The suppression of dissolved oxygen from the addition of hydrogen to the feedwater, coupled with high purity reactor coolant, has been shown to be effective in arresting pipe cracking and pipe crack growth due to IGSCC in susceptible stainless steel piping. Addition of hydrogen decreases the oxidizing power of the reactor water and reduces its aggressiveness toward primary coolant system materials.

The HWC system has been extensively analyzed by EPRI, previously approved for use by the NRC, and is in operation at a variety of stations including Dresden 2, Fitz Patrick, and Duane Arnold.

In addition to revising the MSLRM trip setpoint, the licensee has proposed changes to correct various editorial and typographical errors on associated TS pages.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an Operating License for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) involve a significant increase in the probability of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

Commonwealth Edison Company (CECo) evaluated the proposed amendment and concluded that a significant hazards consideration does not exist. Based upon the criteria of 10 CFR 50.92(c), it was determined that operation of the facility in accordance with the proposed amendment:

(1) Does not involve a significant increase in the probability or consequences of an accident previously evaluated because the consequences of the design basis CRDA, which takes credit for the operation of the MSLRMs, are not adversely affected. No other previously analyzed accidents or malfunctions, as addressed in the Updated Final Safety Analysis Report (UFSAR), are involved.

The safety function of the MSLRMs is to close the MSIVs and shut down the reactor on high radiation levels in the event of a CRDA. The closure of the MSIVs mitigates the release of radioactive fission products to the environment.

The difference between the time required for the MSLRM to reach the current trip setpoint at seven times NFPB (0.7 R/hr) versus the new setpoint of fifteen times NFPB (1.5 R/hr) is approximately 1/4 second. The time period permitted for complete closure of

the MSIVs is five seconds TS 3.7/4.7.D.1). The increase in time-to-closure (due to the new setpoint), is less than 5 percent of the current time-to-closure. Consequently, even though the new setpoint is closer to the predicted main steamline radiation levels for the CRDA, the effect from the slightly longer MSLRM response time will have a negligible impact upon the total release and resultant dose to the public. Since the calculated dose from the CRDA is only 12 mrem, even a five percent increase would be insignificant when compared to 10 CFR 100 limits. The probability of a CRDA is not affected at all since the change in the trip setpoint of the MSLRM instrumentation, used to detect the occurrence of the CRDA, does not have an effect on those events which could lead to the accident.

(2) Does not create the possibility of a new or different kind of accident from any accident previously evaluated because this modification only adjusts the trip setpoint on the MSLRM, no other station instruments or equipment are involved. The only design basis accident which takes credit for MSLRM is the CRDA, and the increased setpoint does not affect the ability of the MSLRM to perform its intended safety function. The MSLRMs operating detection range is not changed. Also, the increase MSLRM setpoint has no effect on the capability of the station to detect noble gas releases from the reactor core. Consequently, the capability to monitor for fuel failures is not affected by this change. The Steam Jet Air Ejector Off-Gas Radiation Monitor, which is more sensitive to fuel failures than the MSLRM, will still be capable of alerting the plant staff to the existence of the minor fuel failures which could be present below the proposed trip setpoint.

(3) Does not involve a significant reduction in the margin of safety because the new trip setpoint for MSLRMs does not reduce margin between the calculated dose rate from the accident and the trip setpoint. CRDA is the only accident which takes credit for the MSLRM trip setpoint. For the CRDA, calculated dose rate at the monitors is 8 R/hr. This calculated dose rate is approximately five times the proposed setpoint of 1.5 R/hr. As such, these monitors will maintain the capability to close the MSIVs, and scram the reactor, at less than 8 R/hr even if the setpoint shifts due to instrument drift. This change can offer significant benefits that enchance the margin of safety for plant operation by supporting a HWC program which substantially mitigates IGSCC of safety-related piping.

As for the associated editorial TS changes proposed by CECo, they are considered representative of example (i) in the Commissions' guidance (51 FR 7751) for examples of no significant hazards, which is defined as "a purely administrative change to TS; for example a change to achieve consistency throughout the Technical Specifications, correction of an error, or change in nomenclature."

Therefore the NRC staff proposes to determine that this amendment request does not involve significant hazards considerations based upon a preliminary review of the application, the licensee's evaluation of no significant hazards, and NRC Guidance.

Local Public Document Room location: Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Project Director: Daniel R. Muller

Commonwealth Edison Company, (CECo) Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendment: November 16, 1988

Description of amendment request: The current Technical Specifications (TS) requirement for local leak rate testing of Main Steam Isolation Valves (MSIV) is once every 18 months. This amendment request proposes to change the surveillance testing frequency of TS 4.7.A.2.d.2 to "once per operating cycle...not to exceed 24 months." Such a change is deemed necessary to allow for extension in plant fuel cycles from 12 months to 18 months.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists. As stated in 10 CFR 50.92(c), a proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not; (1) involve a significant increase in the probability or consequences of an accident from any accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. Pursuant to 10 CFR 50.91(a) the licensee has provided an evaluation of their amendment application addressing these three standards.

CECo has evaluated the proposed Technical Specifications change and concluded that conducting local leak rate tests of MSIVs in accordance with the proposed change:

(1) Will not involve a significant increase in the probability or consequences of an accident previously evaluated because operability of MSIVs is not adversely affected. Surveillance testing is only one of several mechanisms for ensuring important equipment are capable and ready to perform their safety function. Intervals for surveillance testing are usually based upon regulatory guidance and/or requirements. Presuming proper scheduling, these intervals are purposefully designed not to impact upon power operations (i.e., surveillance intervals shouldn't necessitate a forced shutdown). Presently, all primary containment isolation valves except MSIVs, are prescribed by TS 4.7.2.d to be tested every 24 months. This is consistent with the regulatory requirements of 10 CFR 50 Appendix J, "Primary Reactor Containment Leakage Testing for Water Cooled Power Reactors". Revising the surveillance interval for MSIV local leak rate testing, as proposed by the amendment application, merely corrects the TS to conform with the original intent of the TS requirement - to ensure MSIV testing occurred at least every fuel cycle (i.e. every refueling outage since MSIVs can not be tested at power), but not to exceed Appendix J requirements.

(2) Will not create the possibility of a new or different kind of accident from any accident previously evaluated because performing local leak rate tests on the MSIVs at a maximum interval of 24 months does not alter their safety-related function. These valves will continue to be tested at regular intervals, similar to other primary containment isolation valves as specified in 10 CFR 50, Appendix J. The fundamental intent of requirement for 18 months surveillance intervals was to ensure MSIV testing would be conducted at least every fuel cycle and not exceed Appendix J. The revised TS requirements achieve exactly the same intent, but is designed to allow for today's fuel cycles that have grown from 12 to 18 months. In any respect, revised surveillance intervals (in of themselves) do not affect equipment function or operation.

(3) Will not involve a significant reduction in the marign of safety because no protective setpoint or operating parameters are being changed.

Therefore the NRC staff proposes to determine that this amendment request does not involve significant hazards considerations based upon a preliminary review of the application, the licensee's evaluation of no significant hazards, and NRC guidance.

Local Public Document Room location: Dixon Public Library, 221 Hennepin Avenue, Dixon, Illinois 61021.

Attorney for licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Project Director: Daniel R. Muller

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of amendment request: August 29, 1988

Description of amendment request: This proposed amendment supersedes a similar proposed amendment submitted on November 17, 1987 which was previously noticed in the **Federal Register** on February 2, 1988 (53 FR 2896). Section 3.12 "Station Service Power" and Section 4.5 "Emergency Power System the TS Periodic Testing" will be revised and combined into a newly titled Section 3.12 "Electrical Power System". The proposed changes: (1) incorporate the degraded grid voltage protection requirements, (2) incorporate emergency diesel generator (EDG) recommendations contained in Generic Letter 84-15, "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability," (3) incorporate industry improvements, (4) changes the technical specification format to one similar to the W Standard - Format Technical Specifications (STS), and (5) incorporate requirements for battery discharge testing as required by the Systematic Evaluation Program (SEP) Topic VIII-3.A, Station Battery Test Requirements.

In addition CYAPCO has revised Section 4.2 "Operational Safety Item" which provides requirements for calibrating the level-one, level-two and level-three undervoltage instruments and performing channel functional tests. Also Table 4.2-1a "Emergency Bus Undervoltage Instrumentation" is being added to set forth the number of required channels, the applicable modes, the limiting condition for operation and the action requirements.

Basis for proposed no significant hazards consideration determination: CYAPCO has reviewed the proposed changes in accordance with 10 CFR 50.92 and has determined that they involve no significant hazards consideration. The licensee's basis for this conclusion is that the proposed amendment would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The conversion of existing technical specifications to the proposed technical specifications effectively adds many additional requirements to further assure A.C. electrical system reliability and availability. The additional assurance of reliability and availability will reduce the probability of a station blackout/total loss of A.C. power. Since no hardware modifications are associated with this proposed change, the design basis safety analysis is unaffected. Since the proposed changes provide greater assurance that the A.C. electrical systems will be available to the operators, there is no increase in probability or consequences of an accident previously analyzed.

The conversion of existing technical specifications to the proposed technical specifications effectively adds many new requirements to further assure D.C. source reliability and availability. No hardware modifications are associated with this proposed change, thus the design basis safety analysis is unaffected. Since the proposed changes provides greater assurance that the D.C. electrical systems will be available to the operators, there is no increase in probability or consequences of an accident previously analyzed.

The conversion of the existing Technical Specifications to the proposed Technical Specifications effectively adds many new requirements to further assure the onsite power distribution system reliability and availability. No hardware modifications are associated with this proposed change, thus the design basis safety analysis is unaffected. Since the proposed changes provide greater assurance that the onsite power distribution system will be available to the operators, there is no increase in probability or consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed changes provide additional controls and restrictions over the A.C. electrical system already in service at the plant. The proposed changes to the technical specifications do not represent any hardware changes; they are descriptive in nature, affecting surveillance and testing checks only. System functions are not changed; therefore, there are no failure modes associated with these changes.

The proposed changes provide additional controls and restrictions over the D.C. electrical system already in service at the plant. The proposed changes do not represent any hardware changes; they are descriptive in nature, affecting limiting conditions of operations, surveillance, and checks only. System functions are not changed; therefore, there are no failure modes associated with these changes.

The proposed changes provide additional controls and restrictions over the onsite power distribution system already in service at the plant. The proposed changes do not represent any hardware changes; they are descriptive in nature, affecting limiting conditions of operations, surveillance, and checks only. System functions are not changed; therefore, there are no failure modes associated with these changes.

3. Involve a significant reduction in a margin of safety. The proposed changes will ensure the A.C. electrical system is maintained in an operable condition and will require appropriate corrective actions if not. On this bases, the margin of safety of any technical specification is not reduced.

Involve a significant reduction in a margin of safety. The proposed changes will ensure the D.C. electrical system is maintained in an operable condition and require appropriate corrective actions if not. On this bases, the margin of safety of any technical specification is not reduced.

Involve a significant reduction in a margin of safety. The proposed changes will ensure the onsite electrical power distribution system is maintained in an operable condition and require appropriate corrective actions if not. On this bases, the margin of safety of any technical specification is not reduced.

The staff has reviewed the licensee's determination that the proposed license amendment involves no significant hazards consideration and agrees with the licensee's analysis. Additionally, the NRC has established guidance concerning the determination of whether a significant hazards consideration exists by providing certain examples (51 FR 7751) of amendments not likely to involve a significant hazards consideration. The proposed Technical Specifications conform to NRC example (ii) "A change that constitutes an additional limitation, restriction or control not presently included in the technical specifications, e.g. a more stringent surveillance requirement."

The staff has therefore, made a proposed determination that the licensee's request does not involve a significant hazards consideration.

Local Public Document Room location: Russel Library, 123 Broad Street, Middletown, Connecticut 06457.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of amendment request: November 7, 1988

Description of amendment request: The proposed changes identify which radiation monitors are required to be operable in Table 7.2-1, "Radioactive Liquid Effluent Monitoring Instrumentation" and Table 8.2-1, "Radioactive Liquid Effluent Monitoring Instrumentation Surveillance Requirement." The proposed changes are for clarification of the Technical Specifications (TS).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). The licensee has determined and the NRC staff agrees that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed. The proposed changes are intended for clarification only and in no way change the intent of the Technical Specifications.

2. Create the possibility of a new or different kind of accident from any previously analyzed. Since there are no changes in the way the plant is operated, the potential for an unanalyzed accident is not created.

The proposed changes are purely editorial and have no effect on plant operation.

3. Involve a significant reduction in a margin of safety. The proposed changes clarify which radiation monitors are required to be operable and have no effect on the way the plant is operated. Since the proposed changes do not affect the consequences of any accident previously analyzed, there is no reduction in the margin of safety.

Furthermore, the proposed amendment fits example (i) of the types of amendments that are considered not likely to involve significant hazards considerations as published in the **Federal Register** on March 6, 1986 (51 FR 7751), in that it represents a purely administrative change to technical specifications, i.e., a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature.

Based on the preceding discussion, the staff proposes to determine that this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Russell Library, 123 Broad Street Middletown, Connecticut 06457.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: John F. Stolz

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: August 29, 1988

Description of amendment request: The proposed amendment would correct a typographical error in the plant's Fire Protection Technical Specification Table 3.13-2, item 13. That item would be corrected to state that a Hose Station is at the 140 foot elevation instead of at a lower elevation.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards consideration (51 FR 7750). One of these examples of actions involving no significant hazards consideration is example (i), "A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." The change in this case falls within the scope of the example. For this reason, the staff proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003

NRC Project Director: Robert A. Capra, Director

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: September 23, 1988

Description of amendment request: The proposed amendment concerns the backup nitrogen system used to operate the power operated relief valves used to prevent overpressurization of the reactor coolant system. The proposed amendment would insert into the plant's Technical Specifications a requirement for demonstrating the operability of the backup nitrogen system.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving no significant hazards considerations and examples of actions involving significant hazards considerations (51 FR 7750).

One of these examples of actions involving no significant hazards considerations is example (ii) "a change that constitutes an additional restriction,..., e.g., a more stringent surveillance requirement."

Since the application for amendment involves a change encompassed by an example for which no significant hazards consideration exists, the staff has made a proposed determination that the application involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003

NRC Project Director: Robert A. Capra, Director

Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: September 21, 1988.

Description of amendment request: This request would make a total of 14 administrative and editorial corrections to a total of 10 Big Rock Point Plant Technical Specification subsections. For example, the changes add the missing "s" to various plural nouns, capitalize words such as SHUTDOWN to follow Standard Technical Specification guidelines, and correct "picoammeters" to "power range monitor" to rectify an oversight from Amendment 91.

Basis for proposed no significant hazards consideration determination: The proposed changes are administrative and editorial in nature. They provide correction of editorial error, clarification of intent, and consistency. They do not involve modification of any existing equipment, systems, or components, changes of any administrative controls, or revisions of limitations on existing equipment.

In 51 FR 7751, the Commission cited examples of amendments that are considered not likely to involve significant hazards considerations. Example (i) is a purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. Accordingly, the Commission proposes to determine that the requested amendment involves no significant hazards considerations.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Theodore Quay, Acting Director.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: August 29, 1988

Description of amendment request: The proposed amendments would revise Technical Specification (TS) Table 4.3-8, Table Notation 1, and Table 4.3-9, Table Notation 2, by adding a footnote regarding the location of the alarm annunciators for radiation monitors EMF-57 and EMF-58. These alarms are located in the Monitor Tank Building (MTB) Control Room and on the MTB Remote Control Panel which is located in the Auxiliary Building. Also, the proposed amendments would correct a reference in Table 4.11-1 to EMF-58 which should read EMF-57.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10CFR 50.92(c)). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed amendments would not involve a significant increase in the probability or consequences of an accident previously evaluated because the changes would add a clarification to Tables 4.3-8 and 4.3-9 regarding the location of the alarm annunciators, and would correct a reference to a monitor. As such, these changes would not have any impact on the design or operation of the station and would not affect the previously evaluated accidents.

The proposed amendments would not create the possibility of a new or different kind of accident from any accident previously evaluated because the changes requested would not introduce any new modes of operation and would not affect the design of the facility.

The proposed amendments would not involve a significant reduction in a margin of safety because the proposed changes would make the TS tables clearer. As such, these changes would aid the operators and may enhance the safety margin.

Based on the above considerations, the Commission proposes to determine that the proposed amendments involve no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: David B. Matthews

Duke Power Company, Docket Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units 1, 2 and 3, Oconee County, South Carolina

Date of amendment request: September 3, 1987, as supplemented on February 27, September 9, and September 20, 1988.

Description of amendment request: The proposed amendment would revise the Technical Specifications (TS) to replace the values of cycle-specific parameter limits with a reference to the Core Operating Limits Report, which contains the values of those limits. In addition, the Core Operating Limits Report has been included in the Definitions Section of the TS to note that it is the unit-specific document that provides these limits for the current operating reload cycle. Furthermore, the definition notes that the values of these cycle-specific parameter limits are to be determined in accordance with TS 6.9.1. to 6.9.4. These TS require that the Core Operating Limits be determined for each reload cycle in accordance with the referenced NRC-approved methodology for these limits and consistent with the applicable limits of the safety analysis. Finally, this report and any mid-cycle revisions shall be provided to the NRC upon issuance. Generic Letter (GL) 88-16, dated October 4, 1988, provided guidance to licensees on requests for removal of the values of cycle-specific parameter limits from TS. The licensee's proposed amendment is consistent with this GL.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and proposes to determine that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated; or

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; or

3. Involve a significant reduction in a margin of safety.

The proposed revision to the License Condition is in accordance with the guidance provided in GL 88-16 for licensees requesting removal of the values of cycle-specific parameter limits from TS. The establishment of these limits in accordance with an NRC-approved methodology and the incorporation of these limits into the

BEST COPY AVAILABLE

Core Operating Limits Report will ensure that proper steps have been taken to establish the values of these limits. Furthermore, the submittal of the Core Operating Limits Report will allow the staff to continue to trend the values of these limits without the need for prior staff approval of these limits and without introduction of an unreviewed safety question. The revised specifications with the removal of the values of cycle-specific parameter limits and the addition of the referenced report for these limits does not create the possibility of a new or different kind of accident from those previously evaluated. They also don't involve a significant reduction in the margin of safety since the change does not alter the methods used to establish these limits.

Consequently, the proposed change on the removal of the values of cycle-specific limits does not involve a significant increase in the probability or consequences of an accident previously evaluated.

Because the values of cycle-specific parameter limits will continue to be determined in accordance with an NRC-approved methodology and consistent with the applicable limits of the safety analysis, these changes are administrative in nature and do not impact the operation of the facility in a manner that involves significant hazards considerations.

The proposed amendment alters neither the requirement that the plant be operated within the limits for cycle-specific parameters nor the required remedial actions that must be taken when these limits are not met. While it is recognized that such requirements are essential to plant safety, the values of limits can be determined in accordance with NRC-approved methods without affecting nuclear safety. With the removal of the values of these limits from the TS, they have been incorporated into the Core Operating Limits Report that is submitted to the Commission. Hence, appropriate measures exist to control the values of these limits. These changes are administrative in nature and do not impact the operation of the facility in a manner that involves significant hazards considerations.

Based on the preceding assessment, the staff proposes to determine that the proposed amendment involves no significant hazards considerations.

Local Public Document Room location: Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina 29691

Attorney for licensee: J. Michael McGarry, III, Bishop, Lieberman, Cook, Purcell and Reynolds, 1200 17th Street, NW., Washington, DC 20036

NRC Project Director: David B. Matthews

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of amendment request: April 7, 1987, revised on November 1, 1988 (renotice)

Description of amendment request: The staff published a notice of proposed no-significant-hazards determination (52 FR 26585) on the April 7, 1987 submittal; the November 1, 1988 submittal totally replaces that submittal. The proposed amendment dated November 1, 1988, would revise condition 2.c(5) of operating license DPR-66, and would remove fire protection Technical Specifications 3/4.3.3.6 (fire detection instrumentation), 3/4.7.14.1 through 3/4.7.14.5 (fire suppression system), 3/4.7.15 (fire-rated assemblies), 6.2.2.f (fire brigade composition), 6.4.2 (training for the Emergency Squad), and 6.9.2.f and g (reports on fire detection and suppression equipment actuations). These requirements would be incorporated into the plant administrative procedures, the Updated Final Safety Analysis Report, or the Fire Protection Program.

NRC Generic Letters 86-10, dated April 24, 1986, and 88-12, dated August 2, 1988, provided guidance to licensees to request removal of the fire protection Technical Specifications. The licensee's proposed amendment is in response to these Generic Letters.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed revision to the License Condition is in accordance with the guidance provided in Generic Letter 86-10 for licensees requesting removal of fire protection Technical Specifications. The amendment would incorporate the NRC-approved Fire Protection Program, and the current technical specification (TS) requirements, into the plant administrative procedures and the Updated Final Safety Analysis Report (UFSAR). The use of a standard license condition on fire protection will ensure that the Fire Protection Program, including the systems, the administrative and technical controls, the organization, and the other plant features associated with fire protection will be on a consistent status with other plant features described in the UFSAR. Also, the provisions of 10 CFR 50.59 would then apply directly for changes the licensee desires to make in the Fire Protection Program.

The elimination of existing requirements from the Technical Specifications and incorporation of these into the UFSAR, the Fire Protection Program and administrative procedures do not involve station hardware changes, and do not diminish the present level of conservatism. Hence the answers to both questions (1) and (2) are negative. Furthermore, the safety limits assumed in the safety analyses are not expected to be affected by the proposed amendment since all assumptions would remain unchanged. Hence the answer to question (3) is also negative.

Therefore, the staff proposes to determine that the requested amendment involves no significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: November 18, 1988

Description of amendment request: The proposed amendment would provide the bundle Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) and higher Linear Heat Generation Rate (LHGR) limits for the new fuel being added for the second reload. The new fuel being added is GE8X8EB which includes an increased LHGR limit of 14.4 kw/ft. The new GE8X8EB bundles are similar to other bundles currently in the River Bend Station core. The proposed amendment would revise Specification 3/4.2.1 to include new figures and revise Specification 3.2.4 to include the higher LHGR limit.

The proposed amendment would also revise two additional areas of the Technical Specifications (TS). Technical Specification Section 5, Design Features, Item 5.3.1 would be revised to generalize the fuel details to allow referencing future fuel designs included in the "General Electric Standard Application for Reactor Fuels" (GESTAR). Technical Specification Bases 3/4.2.1 would also be revised to reference Technical Specification 3.2.1 instead of referencing individual MAPLHGR curves.

In addition to the proposed changes, the request for amendment provided analysis which identified continued support of the Minimum Critical Power Ratio and shutdown margin limits. The analysis also indicates that the limiting transients identified in Cycle 2 remain the limiting transients for this cycle, Cycle 3. The licensee is implementing the GEXL-PLUS critical quality - boiling length correlation that was approved by the staff.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided an analysis that addressed the above three standards in the amendment application.

Proposed MAPLHGR and LHGR Limit Changes

(1) 10 CFR 50.46 establishes the acceptance criteria for fuel and emergency core cooling systems (ECCS). The MAPLHGR limits are established to ensure the acceptance criteria are met. The LHGR limit is established to maintain fuel integrity. The fuel being used in this reload consists of two new General Electric (GE) bundle types which have an increased LHGR limit and varying gadolinia content. This results in MAPLHGR limits that vary axially (by lattice type) as well with fuel exposure. The MAPLHGR limits were calculated using NRC approved methods. Only the most limiting value of APLHGR for the most limiting lattice, as function of exposure, has been proposed for multiple lattice fuel designs, as discussed in the NRC evaluation of Amendment 19 of GESTAR, dated November 17, 1987. The proposed LHGR limit was previously approved generically by the NRC and meets the acceptance criteria described in GESTAR.

The new design fuel bundles being used in this reload are similar to bundles currently in the core and use additional water rods and gadolinia to improve power distribution and fuel use efficiency. Because the new fuel is of the same design, the proposed MAPLHGR and LHGR limits were calculated using approved methodology, the reliability of the fuel is the same, the proposed changes to the MAPLHGR and LHGR limits do not involve a significant increase in the probability or consequences of any accident previously evaluated.

(2) MAPLHGR and LHGR limits are not the initiating event of any accident. No hardware changes or modifications are proposed with this amendment. As stated above, the proposed changes to the limits have been made in accordance with approved methods and continue to support the Safety Analysis Report. Therefore, the proposed changes to the MAPLHGR and LHGR limits do not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The acceptance criteria of 10 CFR 50.46 establish the margins of safety for fuel and ECCS. Calculation for the MAPLHGR and LHGR limits were performed using NRC approved models and resulted in limits within the acceptance criteria. Therefore, the proposed changes to the MAPLHGR and LHGR limits do not involve a significant reduction in the margin of safety.

Proposed Design Feature Changes

(1) The proposed change to the description of the fuel assemblies in Section 5 of the TS will allow fuel designs, as approved by the NRC, to be added to future cycles. The description will be a generalization of the fuel design details. Only those fuel designs will be used which have been generically approved by the NRC and have been evaluated by Gulf States Utilities (GSU) for each cycle to show compliance with the original design and approved amendment assumptions. Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Section 5 of the TS, Design Features, are not the initiating event of any accidents. No hardware changes or modifications are proposed and, as discussed above, each new fuel design is reviewed by the NRC staff and evaluated by GSU for each cycle. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) As discussed above, the calculations performed for the new fuel used NRC approved methods and yielding results within the acceptance criteria. Therefore, the proposed change to the design features does not involve a significant reduction in the margin of safety.

Proposed Bases Change

Currently Bases 3/4.2.1 references the individual MAPLHGR curves for Technical Specification 3.2.1. Each time a new type of fuel is used in a fuel cycle, the MAPLHGR curves change. Since the curves are referenced in the Bases, the Bases must be changed for each fuel cycle using a new type of fuel. To eliminate this, the proposed change to the Bases would reference Specification 3.2.1 rather than the individual MAPLHGR curves. This change only affects the Bases, does not make hardware changes or modifications and does not change surveillance requirements, limiting conditions for operation or the TS. Therefore, this administrative change (1) does not involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination. Based on the review and the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Attorney for licensee: Troy B. Conner, Jr., Esq., Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Jose A. Calvo

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: February 5, 1988

Description of amendment request: This proposed change request affects two parts of Facility Operating License NPF-62. The first change is to delete a license condition that is no longer applicable. License Condition 2.C.6 required a Senior Reactor Operator

VOL 53 ISS 240 DE 14 1988 UMI

(SRO) with hot operating experience on each shift for a period of one year following fuel load or until attainment of 100% reactor power, whichever occurs later. Fuel load at Clinton Power Station was completed on October 21, 1986. 100% reactor power was reached on September 15, 1987. Both requirements of the license condition have been met; therefore, the licensees request that this license condition be deleted.

The second proposed change is to update License Condition 2.E. The Clinton security program has been revised since the issuance of the license. This particular license condition could be revised to remove out-of-date references and to prevent the need for future changes due to periodic revisions to the Security Plan.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kinds of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because this change is to delete a license condition for which the requirements have been fulfilled and to modify another license condition by removing out-of-date data. No previous accident analyses are affected.

The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated because modification of License Condition 2.E merely removes out-of-date data and completion of the requirements of License Condition 2.C.6 indicates that the on-shift operators have now attained the desired amount of hot operating experience under the cognizance of experienced SROs to support safe operation of the facility. No new accident scenario has been created by the proposed change.

Basis for proposed no significant hazards consideration determination: The of safety because the changes to these two license conditions do not impact a margin of safety specifically assumed or required by any accident analysis. If hot operating experience is considered a margin of safety, fulfillment of the license condition (and therefore its deletion) indicates that the minimum margin of safety has been attained.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc. (the licensees), Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: February 5, 1988

Description of amendment request: This proposed amendment would incorporate the Startup Test Program data into the Clinton Power Station Technical Specifications. The licensees committed to providing this data within 90 days following the completion of the Startup Test Program.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant increase in the possibility or consequences of an accident previously evaluated because these changes are either:

(a) administrative (deleting extraneous or outdated information of an administrative nature), or

(b) required to provide the correct setpoints and limits determined to be appropriate for the as-built plant design and are consistent with the applicable safety analyses. They are based on the reviewed and approved test results from the Startup Test Program and have been incorporated into the appropriate plant design documents.

The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed values are consistent with plant design and/or are based on the operational performance of the as-built plant during the Startup Test Program. The values support a plant-specific design basis for Clinton, so their incorporation into the plant design documents and the CPS Technical Specifications does not create the possibility of a new or different kind of accident from any previously evaluated.

The proposed changes do not involve a significant reduction in a margin of safety because the values proposed have been determined to be consistent with plant design and the corresponding accident analyses. In some cases, the proposed values are values established to support a margin of safety since such values had not been previously established. Therefore, the proposed changes do not constitute a reduction in a margin of safety.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: February 5, 1988

Description of amendment request: This proposed amendment to the Clinton Power Station Technical Specifications would delete Note (h) attached to the Channel Check requirement for the Average Power Range Monitor (APRM) Flow-Biased Simulated Thermal Power-High scram function identified as Item 2.b on Table 4.3.1.1-1. On the basis of the licensees' discussions with GE and other utilities, it appears that the following concerns and/or events may have been considered when the note was originally incorporated in the Technical Specifications:

(1) Flow control valve fouling
(2) Jet pump beam cracking phenomenon
(3) Jet pump blockage
(4) Core fouling
(5) Instrumentation problem

The ACTION specified per the associated Limiting Condition for Operation (3.4.1.2) ensures that the plant will be placed in a safe condition if any of the phenomena discussed above occur. Therefore, the licensees believe that a requirement like Note (h) should not be included in the RPS instrumentation Technical Specification because the concerns described above do not require it in view of the requirements already contained in Specification 3/4.4.1.2 and in view of the other existing requirements specified for the APRMs.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or
(2) Create the possibility of a new or different kinds of accident from any accident previously evaluated; or
(3) Involve a significant reduction in a margin of safety.

The proposed change to the CPS Technical Specifications does not involve a significant increase in the probability or consequences of an accident previously evaluated (with respect to the fuel cladding safety limits) because the proposed change only removes a requirement determined to be redundant to existing requirements and/or have no meaningful value from a safety point of view. Deviations or trends away from established core-flow/drive-flow conditions (m-ratio) will be indicated by performance of the surveillance required under Specification 3/4.4.1.1.

The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated because no new modes of operation or changes to plant design are involved. The scope of the proposed change is strictly limited to the deletion of the requirement specified by Note (h) which has been determined to involve no significant change to existing surveillances.

The proposed change does not involve a significant reduction in a margin of safety because the relationships (under Specification 3.2.2) used to establish the APRM Flow-Biased Simulated Thermal Power-High scram and Flow-Biased Neutron Flux-Upscale control rod block trip setpoints will remain unchanged. The APRM-indicated recirculation loop drive flows will continue to be appropriately checked to ensure that their established relationship to total core flow is preserved or accounted for under other Technical Specifications. All other Operability and surveillance requirements associated with the affected instrumentation remain unchanged.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: May 18, 1988

Description of amendment request: This proposed amendment would revise Technical Specification Table 3.3.2-1 to add a note applicable to item 2.h. The note would provide additional information regarding the channel configuration for the Main Steam Line (MSL) Turbine Building Temperature - High trip channels which provide for automatic isolation of the main steam lines. This note would clarify the Operability requirements for the Main Steam Line Turbine Building Temperature channels thus eliminating any confusion regarding compliance with the Limiting Condition for Operation and the associated Actions. The intent of the existing Technical Specification would remain unchanged.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or
(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or
(3) Involve a significant reduction in a margin of safety.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed change is only a textual clarification to the operability requirements currently specified in the Technical Specifications for the Main Steam Line Turbine Building Temperature - High trip channels and does not impact the main steam line isolation trip function.

The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated because the proposed change will not create any new modes of operation or new failure modes and does not impact plant design.

The proposed chance does not involve a significant reduction in a margin of safety since the change does not involve any changes to setpoints or limits associated with any margin of safety assumed or required by a safety analysis.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: May 18, 1988

Description of amendment request: This proposed amendment would revise Technical Specification Table 3.3.7.5-1, "Accident Monitoring Instrumentation," which specifies Operability requirements for the Drywell/Containment Hydrogen and Oxygen Concentration Analyzers/Monitors and includes Action to be taken if one or more of the monitors are inoperable. Illinois Power Company proposes to revise the Action specified in Table

3.3.7.5-1 for the monitors such that the Action is consistent with the guidance provided in NRC Generic Letter 83-36. The Action that is currently specified in the CPS Technical Specifications for the monitors (Action "80") is applicable to a large number of the instruments listed in Table 3.3.7.5-1. This Action, however, is not recommended for "hydrogen concentration analyzer(s) and monitor(s)" by Generic Letter 83-36 issued November 1, 1983. Incorporation of the Action recommended for an inoperable hydrogen monitor(s) (designated as Action "82" in Generic Letter 83-36) will make the CPS Technical Specification consistent with that recommended by the Generic Letter.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

Although the proposed change would increase the allowed out-of-service time for the hydrogen/oxygen monitors, the proposed Technical Specification (Action statement) is consistent with the Specification recommended by Generic Letter 83-36 which was issued to provide guidance for the Technical Specifications considered appropriate for the accident monitoring instrumentation installed in response to NUREG-0737. The proposed change therefore should not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change does not involve any changes to plant design. The impact of the proposed change is limited only to the out-of-service time allowed for the hydrogen/oxygen monitors which perform only a monitoring function. The proposed change does not impact the operation of any other plant systems or components.

The proposed change does not involve a significant reduction in a margin of safety since the change does not involve any changes to setpoints or limits associated with any margin of safety assumed or required by a safety analysis.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: May 18, 1988

Description of amendment request: This proposed amendment would revise Technical Specification Section 4.1.3.3.b.1.b to change the setpoint requirements for the control rod scram accumulator low pressure alarm from 1520 +30, -0 psig to greater than or equal to 1520 psig. This change is proposed by the licensees because the upper limit imposed on the setpoint is viewed as an unnecessary restriction due to the fact that a setpoint of greater than or equal to 1520 psig is conservative. Any setpoint above the minimum setpoint of 1520 psig is conservative with respect to alarming upon a low pressure condition; therefore it is inappropriate to impose an upper limit in the Technical Specifications for the alarm setpoint. Removing the upper limit currently specified in the Technical Specifications is consistent with the recommendations prescribed in General Electric Service Information Letter No. 429.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated because the HCU accumulator pressure switch setpoints would be acceptable only if the as-found values were greater than or equal to the minimum value established from a safety standpoint. The proposed change is consistent with instrument characteristics and in accordance with vendor recommendations. The proposed change does not involve a change to the minimum required scram accumulator pressure itself. In addition, the pressure check required at least once per seven days by the current Technical Specification will not be affected by the proposed change and will continue to be performed as required.

Due to its limited scope, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated. The impact of the proposed change is limited only to its potential impact on accumulator operability and therefore scram capability. This impact is described above.

The proposed change does not involve a significant reduction in a margin of safety because the proposed change does not change the minimum acceptable accumulator pressure setpoint. Higher setpoints are conservative as there is no basis to impose an upper limit. The proposed change will not impact the minimum accumulator pressure required to ensure sufficient energy for a reactor scram under any reactor pressure conditions. The original basis for establishing a minimum accumulator pressure setpoint remains unchanged.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Illinois Power Company, Soyland Power Cooperative, Inc., Western Illinois Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: May 18, 1988

Description of amendment request: This proposed amendment would revise Technical Specification Table 4.11.2-1 to include several changes regarding Note "c." This note is attached to the monthly sampling and analysis requirements for the "Station HVAC Exhaust." The note imposes (in addition to the normal periodic monthly sampling and analysis) an additional requirement or trigger for performing sampling and analysis "following shutdown, startup, or a THERMAL POWER change exceeding 15% of RATED THERMAL POWER within a 1-hour period." The intent of the proposed revision is that this note should contain the provisional exclusion which effectively states that the additional requirement (of performing sampling and analysis following a plant shutdown, startup or a Thermal Power change exceeding 15% of Rated Thermal Power within a 1-hour period) is not applicable if Dose Equivalent I-131 concentration in the reactor coolant has not increased by more than a factor of three or the noble gas monitor shows that effluent activity has not increased by more than a factor of three.

The provisional exclusion is applicable to this note because the extra associated sampling and analysis requirements are triggered if conditions are such that fuel leaks or cladding failures may be suspected as associated with the iodine spiking phenomenon. Such occurrences, which may be indicated by an observed increase in the offgas activity level along with a determined increase in the Dose Equivalent I-131 concentration, would most likely be observed during a Thermal Power change or following a plant startup or shutdown. The extra sampling and analyses should not therefore be required if no significant increase in Dose Equivalent I-131 or offgas activity level has been indicated.

An additional change is proposed for Note "c" concerning the sampling and analysis for tritium. The licensees believe that the requirements of Note "c" are not applicable to tritium because significant increases in the level of tritium are not expected or associated with the iodine spiking phenomenon indicative of fuel leaks or cladding failures. Due to the current format of Table 4.11.2-1 in the Clinton Technical Specifications, it appears that the requirements of Note "c" include sampling and analysis for tritium. Thus, a change to Table 4.11.2-1 is proposed to separate Note "c" and Note "e." (Note "e" is applicable to tritium while Note "c" is not.)

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed exclusion to the particular testing (i.e., specially triggered isotopic analysis of the HVAC Common Stack effluent) is only allowed when conditions are such that the iodine spiking phenomenon is not indicated. The change to the table format (i.e., separating Notes "c" and "e") is an administrative change proposed to clarify existing requirements and does not change the intent of the Specification.

The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed changes introduce no changes to plant design or operation of the facility.

The proposed changes do not involve a significant reduction in a margin of safety because, as noted above, they are consistent with the intent of the Technical Specifications and yet eliminate unnecessary sampling and analyses which would otherwise appear to be required without the proposed changes. The proposed changes do not eliminate any testing that should be performed if a fuel problem (i.e., iodine spiking occurrence) is indicated. Eliminating unnecessary testing reduces the risks associated with human error, potentially reduces exposure to personnel, and allows efforts to be devoted to other areas of greater concern.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: Daniel R. Muller

Maine Yankee Atomic Power Company, Docket No. 50-309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of application for amendment: March 5, 1987, October 11, 1988, and November 1, 1988.

Description of amendment request: In accordance with the requirement of 10 CFR 73.55, the licensee submitted an amendment to the Physical Security Plan for the Yankee Nuclear Power Station to reflect recent changes to that regulation. The proposed amendments would modify paragraph 2.C(3) of Facility Operating License DPR-36 to require compliance with the revised plan.

Basis for proposed no significant hazards consideration: On August 4, 1986 (51 FR 27817 and 27822), the Nuclear Regulatory Commission amended Part 73 of its regulations, "Physical Protection of Plants and Materials," to clarify plant security requirements to afford an increased assurance of plant safety. The amended regulations required that each nuclear power reactor licensee submit proposed amendments to its security plan to implement the revised provisions of 10 CFR 73.55. The licensee submitted its revised plan on March 5, 1987, October 11, 1988 and November 1, 1988, to satisfy the requirements of the amended regulations. The Commission proposes to amend the license to reference the revised plan.

The Commission has provided guidance concerning the application of the criteria for determining whether a significant hazards consideration exists by providing certain examples of actions involving significant hazards considerations (51 FR 7750). One of these examples of actions involving no significant hazards consideration is example (vii) "a change to conform a license to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations." The changes in this case fall within the scope of the example. For the foregoing reasons, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Wiscasset Public Library, High Street, P. O. Box 367, Wiscasset, Maine 04578.

Attorney for licensee: J. A. Ritscher, Esq., Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02210.

NRC Project Director: R. Wessman

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 14, 1988

Description of amendment request: The licensee has proposed a change to Technical Specification 3.1.1.b(3)(b) to eliminate a contradiction between that Specification and Specification 3.1.1.e. Currently, Specification 3.1.1.b(3)(b) requires that, when reactor power is less than 20% and fewer than 12 control rods have been withdrawn, no control rods shall be moved without an operable rod worth minimizer. However, Specification 3.1.1.e requires that, when Technical Specifications 3.1.1.a through d are not met, (including an operable rod worth minimizer), the reactor shall be placed in hot shutdown within ten hours. Thus, the rod movement requirement of Specification 3.1.1.e is prohibited by the contradiction of Specification 3.1.1.(b)(3)(b).

In order to resolve this contradiction, the licensee has proposed to revise Specification 3.1.1.b(3)(b) to require that, if the rod worth minimizer fails prior to the complete withdrawal of the first twelve rods, the rods are to be inserted in reverse order from which they have been withdrawn. The revision would also require a second independent operator or engineer to verify that the operator at the controls is following the control rod program in reverse order.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

For the following reasons the proposed changes will not (1) involve a significant increase in the probability or consequences of an accident, (2) create the possibility of a new or different kind of an accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The purpose of the rod worth minimizer is to annunciate to the operator when an out-of-sequence rod has been selected and to block its motion. The revision to the limiting conditions for operation allows the operator to shut down the reactor by inserting control rods in such a manner that the control rod configuration will not deviate from the analyzed condition. Therefore, there will be no significant increase in the probability or consequences of a postulated control rod drop accident.

The proposed change requires no hardware modifications. The change to the limiting conditions for operation clarify operator action and provide greater assurance that no unanalyzed control rod configurations will exist. Therefore, the change does not create the possibility of a new or different kind of accident.

Safety margins are included in the safety analysis for the rod drop accident. Since the proposed change will not change the accident conditions, the change will not result in a significant reduction in the margin of safety.

Based upon the above considerations, the staff proposes to determine that the proposed changes do not constitute a significant hazards consideration.

Local Public Document Room location: Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006.

NRC Project Director: Robert A. Capra, Director

Pennsylvania Power and Light Company, Docket No. 50-387 Susquehanna Steam Electric Station, Unit 1, Luzerne County, Pennsylvania

Date of amendment request: August 10, 1988

Description of amendment request: The proposed amendment would change the Technical Specifications for Susquehanna Steam Electric Station (SSES) Unit 1 to permit extended operation during Cycle 4 with one recirculation loop out of service (SLO).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed changes are similar to the changes previously approved by the staff for the SSES Unit No. 2 Cycle 3 operation in Amendment No. 45, dated April 25, 1988.

The staff has reviewed the licensee's request and concurs with the following basis and conclusion provided by the licensee in its August 10, 1988 submittal.

The following three questions will be addressed for each of the proposed changes:

I. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

II. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

III. Does the proposed change involve a significant reductions in a margin of safety?

° Specification 3.4.1.1.2, Recirculation Loops - Single Loop Operation

I. No. Specification a.3 is revised to provide the proper MAPLHGR (Maximum Average Planar Linear Heat Generation Rate) multiplier for ANF fuel. LOCA (Loss of Coolant Accident) analyses performed by ANF (XN-NF-80-125) indicate that the two loop MAPLHGR limits are applicable to SLO (Single Loop Operation) for ANF fuel, and therefore the multiplier has been set to 1.0. New Specification a.5 proposes new MCPR (Minimum Critical Power Ratio) limits for SLO based on the aforementioned transient analyses performed by ANF for events initiated for SLO conditions. These analyses show that the Safety Limit MCPR must be increased to a minimum of 1.40 for SLO. A 0.01 constant is added to the two loop Operating Limit MCPR for low power and low core flow conditions for Single Loop Operating Limit MCPR values greater than 1.40.

Editorial changes to remove unnecessary verbage and renumber these specifications have also been provided.

Based on the above analyses of the non-editorial changes to Specification 3.4.1.1.2, appropriate limits have been proposed to assure that operation with one recirculation loop out of service will not result in a significant increase in the probability or consequences of any accident previously evaluated. The editorial changes have no impact on previous analyses.

II. No. The revised MAPLHGR and MCPR limits have been developed based on approved LOCA and transient analysis methods and therefore will not create the potential for any new event.

III. No. The analyses for LOCA and other anticipated operational occurrences ensure that no significant reduction in safety margin has occurred based on their inputs, applied

conservatisms, and calculation methodologies as documented in this proposal. The editorial changes have no safety impact.

Based on the above considerations and the fact that similar changes were approved by the staff for SSES Unit No. 2 in Amendment No. 45, the Commission proposes to determine that the proposed changes involve no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037

NRC Project Director: Walter R. Butler

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: October 14, 1988

Description of amendment request: The proposed amendments would revise the Technical Specifications to remove a requirement for surveillance to show that the control room emergency outside air supply system (CREOASS) automatically switches to pressurization mode of operation upon a signal indicating outside intake air radiation - high signal.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and concurs with the following basis and conclusion provided by the licensee in its October 14, 1988 submittal.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. Revising Specification 4.7.2.d.2 will not alter the surveillance testing performed on CREOASS. It will alter the acceptance criteria however to make it consistent with the intended design function of CREOASS as described in FSAR Subsections 6.5.1.2.1 and 9.4.1.2.4, and Regulatory Guide 1.95. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated. CREOASS provides two separate functions for two specific scenarios i.e. high radiation and high chlorine. The proposed revision of Technical Specification 4.7.2.d.2 does not jeopardize either function since CREOASS will be tested consistent with its design function as described in the FSAR Subsections 6.5.1.2.1 and 9.4.1.2.4, General Design Criterion 19, and Regulatory Guide 1.95.

The proposed change does not involve a reduction in the margin of safety. CREOASS ensures that the control room will remain habitable during and following all design basis accident conditions, by limiting radiation exposure to personnel occupying the control room to 5 rem or less whole body and isolating the control room in the event of an accidental chlorine release.

Based on the above considerations, the Commission proposes to determine that the proposed changes involve no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037

NRC Project Director: Walter R. Butler

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: October 27, 1988 as supplemented November 9, 1988

Description of amendment request: The proposed amendment would change reactor protection system (RPS) surveillance test intervals (STIs), allowed outage times (AOTs), and incorporate some editorial changes.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and concurs with the following basis and conclusion provided by the licensee in its October 7, 1988 submittal as supplemented November 9, 1988.

The following three questions are addressed below for each of the proposed changes:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

2. Does the proposed change create the possibility of a new or different kind of accident previously evaluated?

3. Does the proposed change involve a significant reduction in a margin of safety?

° Changes to STIs and AOTs

1. No. The new AOTs and STIs have been justified generically in GE study NEDC-30851P-A, which is NRC-approved, and plant specifically in the [——] study MDE-79-0485. These changes can only affect the probability, not the consequences, of previous analyses. In that regard, the studies indicate, and PP&L has confirmed, that the probability of an ATWS event is almost insensitive to an RPS instrumentation failure. Therefore, given the resulting reductions in scrams and test-induced wearout of equipment, the net affect of these changes is to decrease core damage frequency.

2. No. The proposed changes do not result in any physical or functional changes to the RPS; therefore, they cannot create the possibility of any new event.

3. No. In this case, the only margin of safety affected by the proposed changes is related to their impact on their potential to increase the probability of previously analyzed events. This was analyzed in response to 1. above, and based on that answer, the net affect of the proposed changes is to increase the margin of safety.

° Editorial Changes to Specification 3.3.1 and Table 3.3.1-1

1. No. Editorial changes are proposed in several places in order to ensure proper interpretation of the Technical Specification requirements. Current footnote ° and Action a have been combined in order to delete the need for the footnote and thereby ensure that its provisions are complied with. The words "the Trip Function" have been changed to "a scram" because they are not used in the associated table and could therefore be considered to reflect a half-scram, which is obviously not the intent (a half-scram will ALWAYS occur from placing and RPS channel in the tripped condition). Finally, a table notation was enhanced to ensure proper compliance with the new AOTs. None of these changes have any relationship to the probability or consequences of an existing accident evaluation; they simply clarify existing requirements to ensure compliance with their intent.

2. No. See 1. above; editorial changes have no physical or functional impact on the RPS system.

3. No. Given the improvement in understanding the requirements of the subject

VOL 53 ISS 240 DE 14 1988 UMI

Technical Specifications, margin of safety as measured by compliance with the requirements of Specification 3.3.1 is improved. No margin of safety that plays a role in any accident evaluation is impacted by these editorial improvements.

Based on the above considerations, the Commission proposes to determine that the proposed changes involve no significant hazards consideration.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037

NRC Project Director: Walter R. Butler

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388 Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: November 9, 1988

Description of amendment request: The proposed amendments would change the Technical Specifications to delete reference to the Drywell Floor Drain Sump Flow Rate Monitoring System and clarify Technical Specification 3.4.3.1 action statement.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and concurs with the following basis and conclusion provided by the licensee in its November 9, 1988 submittal.

The proposed change does not:

I. Involve a significant increase in the probability or consequences of an accident previously evaluated.

The primary methods for accurately detecting small unidentified leakage within primary containment are unchanged by the deletion of the Flow Rate Monitoring System. (See FSAR Section 5.2.5.1.2.4) The Flow Rate Monitoring System was intended to provide a redundant backup to the Drywell Floor Drain Sump Level System for quantifying unidentified leakage flow rate. The capability to determine unidentified leakage flow rate within required accuracies is not affected by the deletion of the Flow Rate Monitoring System.

The revised action statement of Technical Specification 3.4.3.1 precludes a non-conservative interpretation of remedial measures to be taken under designated conditions.

Based on these conclusions, no significant change occurs to the probability or consequences of any previously analysed accident.

II. Create the possibility of a new or different kind of accident from any previously evaluated.

This change reflects the removal of a system which provides redundancy for unidentified leakage flow measurement. There is no requirement for the redundancy nor does its elimination affect the capability of quantifying leakage flow rate.

Changes to the action statement of Technical Specification 3.4.3.1 preclude a non-conservative interpretation of remedial measures to be taken under designated conditions.

III. Involve a significant reduction in a margin of safety.

The capability to accurately quantify unidentified leakage is not compromised by the deletion of the Flow Rate Monitoring System. The Flow Rate Monitoring System provided redundant backup to the Drywell Floor Drain Sump Level System. Deletion of the Flow Rate Monitoring System does not reduce any safety margin.

Philadelphia Electric Company, Docket No. 50-352, Limerick Generating Station, Unit 1, Montgomery County, Pennsylvania

Date of amendment request: November 1, 1988

Description of amendment request: The application for amendment requests changes to the Technical Specifications (TSs) to permit "forward" leak testing of five isolation valves and the valve packing.

Basis for proposed no significant hazards consideration determination: The design basis for the Primary Containment Isolation System allows the normal and emergency passage of fluids through the containment boundary. Isolation valves are installed at each penetration to prevent (or limit) the escape of fission products which would accumulate inside the containment during an accident. At least two barriers are required at each containment penetration. Generally, two valves are located between the containment atmosphere (or the reactor coolant system) and the outside atmosphere, to act as barriers, so that failure of any single valve would not prevent isolation of the containment penetration during an accident.

Various types of valves (i.e., gate, globe, etc.) are installed at Limerick Station for use as primary containment isolation valves. All of these valves require periodic testing for leak tightness. The methods used for periodic leak tightness testing are designated in 10 CFR Part 50, Appendix J as type A tests, type B tests and type C tests. The subject application concerns only type C testing of globe valves.

Type C testing is accomplished on individual valves and is sometimes accomplished in the "Reverse" direction, i.e., the test pressure is not from the containment direction, but is from outside the containment, directed toward the valve in the containment direction. "Forward" testing would refer to type C testing of valves from the same direction as that which the valve would be subjected to during an accident. Testing is accomplished on some valves in a manner, (or from a direction), which would not include the leakage through the valve packing, because the packing is opposite from the valve globe which effectively blocks the test pressure from the packing. In those cases where the valve is installed with the packing on the containment side of the valve, i.e., exposing the stem packing to possible containment pressures and creating a potential path for containment fluid leakage during an accident, the packing must be leak tested during type C testing.

Table 3.6.3-1 Part A of the Limerick TSs lists the primary containment isolation valves along with their function, the inboard and outboard isolation barriers, the maximum isolation time, if applicable, the isolation signal, if applicable, etc. If a particular globe valve in the Table is normally tested in the reverse direction, the reader is referred to "Note 5". "Note 5" states, "Inboard globe valve tested in the reverse direction." During the upcoming second refueling outage, which is scheduled to start January 13, 1989, Philadelphia Electric (PECo or licensee) proposes to modify certain containment penetrations whose inboard containment isolation valves have their stem packing exposed to containment atmosphere and proposes to revise testing methods in order that the stem packing be included during leak testing. The penetrations will be modified to allow periodic testing to include leakage through the valve(s) stem packing in accordance with 10 CFR Part 50, Appendix J. Modifications to these penetrations would allow "forward" testing to test valve packing leakage along with the leakage through the valve seat. For three valves, the

licensee proposes to install a new blocking valve and test tap between containment and the isolation valve so that gas pressure can be applied to these valves from the containment "forward" direction during type C testing. These block valves remain open except when they are being used during type C testing. The new blocking valves will be oriented such that their packings are included in the type C test boundary. For two other valves, a revised method of testing will be used which will allow "forward" testing, including leak testing of the valve's stem packing. For these two valves, a temporary test plug and test rig will be used for type C testing from inside the containment.

Once the above modifications are completed, reference to "Note 5" in Table 3.6.3-1 for these five valves will no longer be appropriate. The licensee's proposed change to the TSs is to delete reference to "Note 5" for these five valves in Table 3.6.3-1. No other TS changes are being proposed.

The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

In the application dated November 1, 1988, the licensee provided an extensive and thorough discussion of the above three standards. The licensee has determined and the NRC staff agrees that:

(1) Operation of the plant under the proposed Technical Specifications after the addition of Blocking valves and test taps and/or revising the leakage testing methods, would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The containment isolation system is evaluated in section 6.2.4.1 of the Final safety Analysis Report. The Final Safety Analysis Report evaluated the containment isolation system in eleven design areas:

a. The containment isolation system is designed to allow the normal or emergency passage of fluids through the containment boundary while preserving the ability of the boundary to prevent or limit the escape of radioactive materials that can result from postulated accidents.

* The addition of blocking valves and test taps will not affect the ability of the isolation system to limit or prevent the escape of radioactive materials that could result from postulated accidents.

b. The containment isolation system is designed to either automatically isolate fluid penetrations or provide the capability for remote manual isolation from the control room.

* Automatic and remote manual isolation would remain the same after the proposed modifications.

c. The arrangement of containment isolation valves for fluid systems that penetrate the primary containment conforms to General Design Criteria 54, 55, 56 and 57 to the greatest extent practicable.

* The isolation valves would continue to conform to General Design criteria 54, 55, 56 and 57 to the same degree as the original design, after the proposed modifications.

d. Fluid instrument lines that penetrate primary containment conform to the isolation criteria of Regulatory Guide 1.11 to the greatest extent practicable.

* No fluid instrument lines are affected by the proposed modifications.

e. Containment isolation provisions are designed to withstand the most severe natural phenomenon or site-related event (e.g., earthquake, tornado, hurricane, flood, or transportation accident) without impairing their functions.

* Stress and pipe support calculations have been reviewed to ensure that changes and additions satisfy the existing seismic design criteria.

f. The containment isolation system is designed with provisions for periodic operability and leak rate testing.

* The proposed modifications would allow more effective and accurate leak rate testing. Periodic operability and leak rate testing provisions on isolation valves will be enhanced by the proposed modifications and new testing methods.

g. Valve closure times are selected to minimize the release of containment atmosphere to the environs, to mitigate offsite radiological consequences, and to ensure that ECCS effectiveness is not degraded.

* Valve closure times would not be affected by the proposed modifications.

h. Design provisions are made to detect possible leakage from lines provided with remote manually controlled isolation valves.

* The leak detection provisions would not be affected by the proposed modifications.

i. Isolation valves, actuators, and controls are protected against loss of functional capability from missiles and impact accident environments.

* The proposed modifications has been evaluated for protection against loss of functional capability from missiles and impact accidents.

j. Redundancy and physical separation are provided in the electrical and mechanical design to ensure that no single failure in the containment isolation system can prevent the system from performing its intended function.

* No changes are proposed in the design of the electrical and mechanical redundancy and separation provisions for isolation valves.

k. The design of the control systems for automatic containment isolation valves is such that resetting the isolation signal does not result in the automatic reopening of containment isolation valves.

* The design for isolation valves will continue to maintain the containment isolation valves closed after resetting the isolation signal.

Based on the design areas discussed above, as previously evaluated in the Final Safety Analysis Report, and based on the determination that there would be no significant changes to these areas following the proposed modifications, operation of the plant under the proposed technical specifications after the addition of blocking valves and test taps and/or revising the test methods would not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Operation of the plant under the proposed Technical Specifications after the addition of blocking valves and test taps and after revising the leakage test methods for valves 60-1057 and 60-1071, would not create the possibility of a new or different kind of accident from any accident previously evaluated.

Chapter 15 of the Final Safety Analysis Report examined postulated accidents to determine their effect on the containment isolation system. The barrier performance sections (as explained in FSAR section 15.0.3.4) include analysis of anticipated operational occurrences (e.g., Loss of Electrical Load); off-design, abnormal transients; postulated accidents (e.g., sudden loss of a major component) and; hypothetical events such as an anticipated transient without scram. The proposed modifications would not adversely affect any of these analyses.

Adding block valves and test taps and/or revising the leakage test methods, would not change the evaluations made in the Final Safety Analysis Section 15, and therefore, the proposed changes would not increase the possibility of a new or different type accident from those previously evaluated.

(3) Operation of the plant under the proposed Technical Specifications after the addition of blocking valves and test taps and/or revising the leakage test methods, would not involve a significant reduction in a margin of safety.

The existing margin of safety for the containment isolation valves is based upon the assurance of operability, the isolation closure times of the valves and the leak tightness of these valves. This margin of safety is periodically confirmed by surveillance testing, which would continue on the same schedule following the valve modifications. Surveillance testing would continue, after making the proposed modifications, to verify that the isolation valves:

* Maintain leak tightness to a degree which provides an adequate margin of safety.

* Close after receipt of a closure signal in a time which would preclude escape of radioactive materials to the environs.

* Continue to remain operable, isolating the containment in the event of an accident and would continue to be periodically tested for continued operability.

Because of a new ability for better leakage testing of containment isolation valve stem packing, the proposed modifications would be more conservative in the event of challenges to the containment isolation system, because packing leakage if excessive, would be discovered and corrected. Based on continued testing of the containment isolation valves' operability, their closure times and their leak tightness, following modifications, the proposed changes would not involve a significant reduction in a margin of safety.

Based on the above, the licensee has determined that the proposed amendment does not involve a significant hazards consideration. The NRC staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the proposed amendment does not involve a significant hazards consideration.

Local Public Document Room location: Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Attorney for licensee: Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Walter R. Butler

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant, Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendments request: May 24, 1988 and supplemented on November 7, 1988.

Description of amendments request: Technical Specification Table 15.4.1-1, "Minimum Frequencies for Checks, Calibrations, and Test of Instrumentation Channels," specifies the test frequency for instrument channels. The proposed amendments would change the test frequency from bi-weekly to monthly for: Item 1, "Nuclear Power Range" instrument channels; Item 4, "Reactor Coolant Temperature" instrument channels; and Item 18, "Reactor Containment Pressure" instrument channels. In addition, the channel check for Item 18, "Reactor Containment Pressure," would be changed from daily to once per shift to conform with the recommendation of the Standard Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee addressed these criteria as follows:

The proposed change in channel check frequency for Item 18 from daily to once per shift is a conservative change and will not increase the probability or consequences of an accident previously evaluated. The other proposed changes would reduce the frequency of testing the channel logics from biweekly to monthly. These changes will make the nuclear power range, reactor coolant temperature, and containment pressure channel logic test frequencies consistent with the other channels which use similar components. Additionally, these changes will allow Point Beach Nuclear Plant, Units 1 and 2, to conform to industry standards as well as the Standard Technical Specifications for Westinghouse Pressurized Water Reactors. These channels have been very reliable. Based on the most severe drift rate experienced during biweekly testing, the channels should remain within Technical Specification setpoint limits between monthly testing. We, therefore, believe that these changes will not involve a significant increase in the probability or consequences of an accident previously evaluated, and the first criterion is not violated.

Because these changes only modify the frequency of testing for these three instrument channels and introduce no new testing, a new or different accident from any previously evaluated accident cannot be created and, therefore, the second criterion is not violated.

Lastly, these changes do not involve a significant reduction in a margin of safety for the same reasons discussed for criterion one. The amended test frequencies will be consistent with (1) other plant instrumentation using the same relays and bistables, (2) industry testing frequencies, and (3) the Standard Technical Specifications.

The staff has reviewed the licensee's evaluation of the proposed amendment, and agrees with the licensee's conclusion. Therefore, the staff proposes to determine that the requested amendments do not involve significant hazards considerations.

Local Public Document Room location: Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

NRC Project Director: John N. Hannon.

Yankee Atomic Electric Company Docket No. 50-029 Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of application for amendment: October 21, 1988 as supplemented November 22, 1988.

Description of amendment request: Replace the High Pressurizer Water Level trip with the High Main Coolant System Pressure trip in the plant Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee's analyses contained in the October 21, 1988 letter states the following:

This proposed change is requested in order to modify two descriptions within the Technical Specification, Section 2, Bases, to be consistent with present safety analysis, and to remove the operability requirement associated with the High Pressurizer Water Level instrument. As such, this proposed change would not:

(1) Involve a significant increase in the probability or consequences of an accident previously analyzed. The modification of two descriptions within Technical Specification, Section 2, Bases, is an administrative change, and as such, would not involve a significant increase in the probability or consequences of an accident previously analyzed. Also, removing the requirement for operable High Pressurizer Water Level instrumentation would not involve a significant increase in the probability or consequences of an accident previously analyzed as the High Main Coolant System Pressure instrumentation will provide overpressurization protection for transient events.

(2) Create the possibility of a new or different kind of accident from any previously analyzed. The modification of two descriptions within Technical Specification, Section 2 Bases, is an administrative change, and as such, would not create the possibility of a new or different kind of accident from any previously analyzed. Also, removing the requirement for operable High Pressurizer Water Level instrumentation would not create the possibility of a new or different kind of accident as the High Main Coolant System Pressure instrumentation will provide

an equivalent level of protection against overpressurization for transient events.

(3) Involve a significant reduction in a margin of safety. The modification of two descriptions within Technical Specification, Section 2, Bases, is an administrative change, and as such, would not involve a significant reduction in a margin of safety. Additionally, the modification to the action statement of the High Pressurizer Water Level instrumentation would not involve a significant reduction in a margin of safety as the High Main Coolant System Pressure instrumentation will provide an equivalent level of protection against overpressurization for transient events.

The licensee also stated, in his submittal, that NRC previously approved methodology was used in the High Main Coolant System Pressure trip loss of load and control rod withdrawal safety analyses.

The results of the analyses demonstrate that the High Main Coolant System Pressure trip, in conjunction with the pressurizer safety relief valves, provides adequate protection against system overpressure. The Pressurizer High Water Level trip is completely redundant and not required to provide overpressure protection when the High Pressure trip is operable.

Based on the considerations contained herein, it is concluded that there is reasonable assurance that operation of the Yankee plant consistent with the proposed Technical Specification will not endanger the health and safety of the public. This proposed change has been reviewed by the Nuclear Safety Audit and Review Committee.

The staff has reviewed the licensee's analysis and agrees with it. Therefore, we conclude that the amendment satisfies the three criteria listed in 10 CFR 50.92. Based on that conclusion, the staff proposes to make a no significant hazards consideration determination.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Commonwealth Edison Company, Docket Nos. 50-454 and 50-455, Byron Station, Units 1 and 2, Ogle County, Illinois

Date of application for amendments: August 15, 1986 and October 29, 1986

Brief description of amendments: These amendments revise the Technical Specifications to require that availability of one unit's Essential Service Water pump while the other unit is operating.

Date of issuance: November 23, 1988

Effective date: November 23, 1988

Amendment Nos.: 24, 24

Facility Operating License Nos. NPF-37 and NPF-66. The amendments revised the Technical Specification.

Date of initial notice in **Federal Register:** September 24, 1986 (51 FR 33946). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated November 23, 1988.

No significant hazards consideration comments received: No.

Local Public Document Room location: Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-424, Vogtle Electric Generating Plant, Unit 1, Burke County, Georgia

Date of application for amendment: March 27 and November 24, 1987, and January 6, 1988

Brief description of amendment: The amendment modified paragraph 2.E. of the license to require compliance with the amended Physical Security Plan. The Plan was amended to conform to the requirements of 10 CFR 73.55. Consistent with the provisions of 10 CFR 73.55, search requirements must be implemented within 60 days and miscellaneous amendments within 180 days from the effective date of this amendment.

Date of issuance: November 21, 1988

Effective date: November 21, 1988

Amendment No.: 13

Facility Operating License No. NPF-68: Amendment revised the Operating License.

Date of initial notice in **Federal Register:** October 19, 1988 (53 FR 40988). The Commission's related evaluation of the amendment is contained in a letter to Georgia Power Company dated November 21, 1988 and a Safeguards Evaluation Report dated November 21, 1988.

No significant hazards consideration comments received: No.

GPU Nuclear Corporation, et al., Docket No. 50-289, Three Mile Island Nuclear Station, Unit No. 1, Dauphin County, Pennsylvania

Date of amendment request: April 4, 1988
Description of amendment request: The amendment removes details of the TMI-1 fire protection program from the Technical Specifications in accordance with Generic Letter No. 86-10 and revises License Condition 2.c.4. In addition, all pages of the Facility Operating License have been re-typed for appearance purposes including deletion of an obsolete footnote.
Date of Issuance: November 30, 1988
Effective date: November 30, 1988
Amendment No.: 146
Facility Operating License No. DPR-50: Amendment revised the Technical Specifications and a license condition.
Date of initial notice in **Federal Register:** May 4, 1988 (53 FR 15912). The Commission's related evaluation of this amendment is contained in a Safety Evaluated dated November 30, 1988
No significant hazards consideration comments received: No.
Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Illinois Power Company, Docket No. 50-461, Clinton Power Station, Unit 1, DeWitt County, Illinois

Date of application for amendment: May 18, 1988
Description of amendment request: The proposed change will delete the requirement for the chlorine detection system.
Date of issuance: November 21, 1988
Effective date: November 21, 1988
Amendment No.: 12
Facility Operating License No. NPF-62: The amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** October 19, 1988 (53 FR 40990). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 21, 1988.
No significant hazards consideration comments received: No
Local Public Document Room location: The Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy, Center, Linn County, Iowa

Date of application for amendment: August 19, 1988
Brief description of amendment: The amendment revised the Duane Arnold Energy Center Technical Specifications to reflect new fuel loaded for Cycle 10 operation. The changes revised the Section 3.12 fuel thermal limits and the fuel cladding integrity limit of Section 1.1.A.
Date of issuance: November 22, 1988
Effective date: November 22, 1988
Amendment No.: 154
Facility Operating License No. DPR-49: Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** October 19, 1988 (53 FR 40990). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 22, 1988.
No significant hazards consideration comments received: No.
Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S. E., Cedar Rapids, Iowa 52401.

Iowa Electric Light and Power Company, Docket No. 50-331, Duane Arnold Energy, Center, Linn County, Iowa

Date of application for amendment: September 2, 1988
Brief description of amendment: The amendment revised the DAEC Technical Specifications to reflect changes made to certain accident monitoring instrumentation as part of the licensee's Detailed Control Room Design Review Program.
Date of issuance: November 30, 1988
Effective date: November 30, 1988
Amendment No.: 155
Facility Operating License No. DPR-49: Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** October 19, 1988 (53 FR 40992). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 30, 1988.
No significant hazards consideration comments received: No.
Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S. E., Cedar Rapids, Iowa 52401.

Long Island Lighting Company, Docket No. 50-322, Shoreham Nuclear Power Station, Suffolk County, New York

Date of application for amendment: April 24, 1987
Brief description of amendment: Revised Attachment 3 to the Shoreham License regarding maintenance and surveillance for the TDI emergency diesel generators.
Date of issuance: November 30, 1988
Effective date: November 30, 1988
Amendment No.: 9
Facility Operating License No. NPF-36: This amendment revised the License.
Date of initial notice in **Federal Register:** July 1, 1987 (52 FR 24555). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 30, 1988
No significant hazards consideration comments received: No
Local Public Document Room location: Shoreham-Wading River Public Library, Route 25A, Shoreham, New York 11786-9697.

Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Dates of application for amendment: April 22, July 8, and August 12, 1988
Brief description of amendment: The amendment changes Technical Specification 3/4.1.3.3, "Control Rod Scram Accumulators," by adding action statements to provide alternate means for determining accumulator operability if the accumulator pressure and leakage alarm is inoperable.
Date of issuance: November 30, 1988
Effective date: November 30, 1988
Amendment No.: 50
Facility Operating License No. NPF-29: This amendment revises the Technical Specifications.
Date of initial notice in **Federal Register:** September 21, 1988 (53 FR 36670). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 30, 1988
No significant hazards consideration comments received: No
Local Public Document Room location: Hinds Junior College,

McLendon Library, Raymond, Mississippi 39154

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of application for amendment: March 28, 1988

Brief description of amendment: Revises portions of Technical Specification 6.2 to make Table 6.2-1 consistent with the requirements of 10 CFR 50.54(m)(2)(i) and Specification 6.2.2.e and to clarify the staffing required during hot shutdown versus that required during cold shutdown and refueling.

Date of issuance: November 29, 1988

Effective date: November 29, 1988

Amendment No.: 102

Facility Operating License No. DPR-63: Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** October 5, 1988 (53FR39172). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 29, 1988

No significant hazards consideration comments received: No

Local Public Document Room location: State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Docket No. 50-277, Peach Bottom Atomic Power Station, Unit No. 2, York County, Pennsylvania

Date of application for amendment: April 21, 1988

Brief description of amendment: This amendment revised Technical Specification Figures 3.5.1.M and 3.5.1.N to correct errors and to revise nomenclature used on these figures when they were previously revised in Amendment Number 123. The curves on these figures showing the values of maximum average planar linear heat generation rate (MAPLHGR) for the most limiting and the least limiting lattices were revised to agree with the printed values on the Figures which are correct and are unchanged, with one minor exception, by the amendment.

Date of issuance: November 22, 1988

Effective date: November 22, 1988

Amendment No.: 136

Facility Operating License No. DPR-44: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 29, 1988 (53 FR 24513). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated November 22, 1988.

Tennessee Valley Authority, Dockets Nos. 50-259, 50-260 and 50-296, Browns Ferry Nuclear Plant, Units 1, 2 and 3, Limestone County, Alabama

Date of application for amendments: October 27, 1987 (TS 235)

Brief description of amendments: The amendment changes the Technical Specifications to reference the ASME Section XI Pump and Valve Program definition and to revise various surveillance test frequencies consistent with the specified ASME program. Existing monthly pump valve surveillance testing frequencies were based upon earlier editions of the ASME code which required once per month operability testing of some components. The ASME code of record referenced in the Browns Ferry Nuclear Plant pump and valve program, specifies an edition of the code which requires these components to be tested quarterly.

Date of issuance: November 22, 1988
Effective date: November 22, 1988, and shall be implemented within 60 days

[FR Doc. 88-28749 Filed 12-13-88; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-206]

Southern California Edison Co. and San Diego Gas and Electric Co., San Onofre Nuclear Generating Station, Unit No. 1; Consideration of Issuance of Amendment to Provisional Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Provisional Operating License No. DPR–13 issued to Southern California Edison Company, *et al.* (the licensee), for operation of San Onofre Nuclear Generating Station, Unit No. 1, located in San Diego County, California. The request for amendment was submitted by letter dated November 11, 1988.

The proposed amendment would raise the allowable diesel generator load from 5250 KW to the design rating of 6000 KW. The loading is currently limited because the diesel generators have piston skirts that have a propensity to crack. The licensee proposes to change the piston skirts to a new design that does not have this problem, and thereby restore the diesel generators to their full power rating of 6000 KW.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 13, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject provisional operating license, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the

Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene must set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to George W. Knighton: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-White Flint, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Charles R. Kocher, Assistant General Counsel, and James Beoletto, Esq., Southern California Edison Company, P.O. Box 800, Rosemead, California 91770, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713.

Dated at Rockville, Maryland, this 6th day of December 1988.

For the Nuclear Regulatory Commission.

George W. Knighton,

Project Director, Project Directorate V, Division of Reactor Projects–III, IV, V and Special Projects.

[FR Doc. 88–28742 Filed 12–13–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–029]

Yankee Atomic Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 122 to Facility Operating License No. DPR–3 issued to Yankee Atomic Electric Company (the licensee), which revised the Technical Specifications for operation of the Yankee Nuclear Power Station located in Rowe, Massachusetts. The amendment was effective as of the date of issuance.

The amendment modified the Technical Specifications to accommodate the gradual change in the incore detection system from movable detectors to fixed detectors.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which is set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on May 4, 1988 (53 FR 15933). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment and Finding of No Significant Impact (53 FR 43298) related to the action and has concluded that an environmental impact statement is not warranted and that the issuance of this amendment will not have a significant adverse effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated April 4, 1988, and as supplemented October 11, 1988, (2) Amendment No. 122 to License No. DPR–3, and (3) the Commission's related Safety Evaluation and Environmental Assessment.

All of these items are available for public inspection at the Commission's Public Document Room, Gelman Building, Lower-Level, 2120 L Street, NW., Washington, DC and at the Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington,

DC 20555, Attention: Director, Division of Reactor Projects.

Dated at Rockville, Maryland, this 8th day of December 1988.

For the Nuclear Regulatory Commission.

Morton B. Fairtile,

Project Manager, Project Directorate I–3, Division of Reactor Projects, I/II.

BILLING CODE 7590–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–24770]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

December 8, 1988.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by January 3, 1989 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Columbia Gas System, Inc. (70–7487)

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delware 19807, a registered holding company, has filed a post-effective amendment to its declaration pursuant to sections 6(a) and 7 of the Act and Rules 50 and 50(a)(5) thereunder.

By prior Commission order in this matter, dated April 22, 1988 (HCAR No. 24627), Columbia was authorized to issue and sell through December 31, 1989, in one or more transactions, aggregating no more than $300 million principal amount, up to (i) $300 million principal amount of debentures maturing in thirty or fewer years, or (ii) $300 million principal amount of medium-term notes ("MTNs") maturing in ten or fewer years with redemption protection for a period of not longer than seven years. On November 23, 1988, Columbia sold $100 million principal amount of debentures maturing in twenty-five years.

In the original declaration, it was stated that the MTNs would have maturities ranging from nine months to ten years from date of issue. Since the original filing, Columbia asserts that the market for longer-term medium-term notes has expanded such that Columbia could issue MTNs with maturities up to thirty years. Columbia requests approval to extend the maturities on MTNs up to thirty years in order to achieve the benefits associated with MTNs, by allowing Columbia the flexibility to issue MTNs at any point along the yield curve.

MTN's generally do not contain sinking fund provisions. Since the principal amount of MTNs issued at any one time may be relatively small, it would not be practical to include a sinking fund. Additionally, Columbia asserts that the issuance of MTNs with various maturities would result in a repayment schedule similar to those of a traditional long-term debenture issue with a sinking fund. The terms of the proposed MTNs would not be in accordance with the requirement of the *Satement of Policy Regarding First Mortgage Bonds Subjects to the Public Utility Holding Company Act of 1935* (HCAR No. 13105, February 16, 1956) ("Policy") respecting sinking funds, therefore, Columbia requests authority to deviate from that Policy

Hawaiian Electric Industries, Inc., et al. (70–7587)

Hawaiian Electric Industries, Inc. ("HEI"), 900 Richards Street, Honolulu, Hawaii 96813, a Hawaii corporation and an exempt holding company pursuant to Rule 2 under the Act, and two of its electric utility subsidiary companies, Hawaiian Electric Company, Inc. ("HECO"), 900 Richards Street, Honolulu, Hawaii 96813, and Maui Electric Company, Limited ("MECO"), 210 Kamehameha Avenue, Kahului, Maui, Hawaii 96732, have filed an application pursuant to sections 9(a)(2) and 10 of the Act.

HEI owns all of the outstanding common stock of HECO, a Hawaii corporation and an operating electric utility company on the Island of Oahu. HECO has two wholly owned electric utility subsidiaries, Hawaii Electric Light Company, Inc. ("HELCO"), a Hawaii corporation which provides electric service to the Island of Hawaii, and MECO, which provides electric service to the Islands of Maui and Lanai. All of these islands are within the State of Hawaii.

Molokai Electric Company, Limited ("MOECO"), a Hawaii corporation, is a small, independent, electric utility company which provides electric service to the Island of Molokai in Hawaii. MECO proposes to acquire up to all of the outstanding common stock of MOECO in a transaction described as follows:

The initial form of the proposed transaction will be a cash tender offer by MECO for all of the outstanding shares of common stock of MOECO at a cash price of $60 per share. One of the conditions of such tender offer (which may be waived by MECO) will be that MECO acquire a number of shares of common stock of MOECO which, when added to the number of shares of common stock of MOECO presently indirectly owned by HEI (1,160 shares or 4.9%), will constitute not less than a majority of the issued and outstanding shares of common stock of MOECO.

To induce MECO to commence the tender offer, MOECO granted an option to MECO to purchase up to 24,000 shares of authorized and unissued common stock of MOECO at a cash price of $60 per share. Exercise of the option in full would result in MECO's owning a majority of the common stock of MOECO.

In addition to the foregoing, MECO will undertake to acquire all of the shares of common stock of MOECO not purchased through the proposed tender offer or through exercise of the option in a merger transaction. The merger transaction will be accomplished through the merger of a wholly owned subsidiary of MECO into MOECO with MOECO as the surviving corporation. MECO has organized a Hawaii corporation, New Meco, Inc. ("NEW MECO"), which would serve as the vehicle for the merger. MECO will provide NEW MECO with sufficient cash to carry out the merger. NEW MECO would then merge into MOECO and in this merger:

(a) Each outstanding share of common stock of MOECO would be exchanged for cash in the amount of 60¢ per share; and

(b) The common stock of NEW MECO would be converted into an equal

number of shares of common stock of MOECO.

As a result, the stockholders of MOECO would receive cash in the amount of $60 per share for their shares of common stock of MOECO and MECO would become the owner of all of the outstanding common stock of MOECO, the surviving corporation. Any stockholder of MOECO who dissents from the merger and perfects his dissenter's rights would be entitled to claim the fair market value of his MOECO shares in cash.

Within 180 days after the expiration of MECO's tender offer, MECO will transfer all of the shares of MOECO common stock then owned by it to HECO, together with all of the capital stock of NEW MECO if the merger transaction has not occurred prior to such transfer. Thereafter HECO will undertake to acquire all of the shares of common stock of MOECO not acquired from MECO through the merger of NEW MECO into MOECO, as described above. In addition, after such acquisition, HECO may cause a merger of MOECO into MECO in order to have MOECO become a division of MECO.

It is stated that the purpose of the acquisition is to provide the consumers of Molokai with a more stable and financially secure electric utility and to facilitate interconnection by underseas power cable of the Islands of Maui, Lanai, and Molokai by MECO.

HECO and its two subsidiaries are separate utilities engaged in the generation, purchase, transmission, distribution, and sale of electricity on the Islands of Oahu (HECO), Hawaii (HELCO), Maui (MECO), and Lanai (MECO). These four islands had an estimated population of 1,028,300 as of July 1987, about 95% of the population of the State of Hawaii. MOECO is an operating electric utility company engaged in the generation, purchase, transmission, distribution, and sale of electricity on the Island of Molokai. Pertinent data concerning the utility operations of the four companies for the nine-month period ended and at September 30, 1988, is summarized below:

	HECO	HELCO	MECO	MOECO
Net Utility Plant (as of 9/30/88)	$626,751	$140,222	$113,151	$10,898
Operating Revenues	$313,537	$48,626	$49,333	$3,933
Net Income (after preferred dividends paid)	$25,656	$4,857	$4,941	$61
Customers (as of 9/30/88)	243,160	45,521	39,092	2,626

It will be necessary for the Hawaii Public Utilities Commission ("PUC") to approve the proposed acquisition of common stock of MOECO by MECO, whether pursuant to the tender offer, the option, or a merger, and the issuance of authorized and unissued common stock of MOECO pursuant to the option. A joint application for the purpose of obtaining PUC approvals has been filed by MECO and MOECO with the PUC. HECO will also apply for PUC approval of the transfer of the MOECO common stock by MECO to HECO and for PUC approval of (A) the merger of NEW MECO into MOECO, in order to acquire all of the issued and outstanding common stock of MOECO, and (B) at a later time, the merger of MOECO into MECO. No other state commission and no federal commission, other than this Commis· has jurisdiction over the pro· nsaction.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2325]

North Carolina (And Contiguous Counties in the State of Virginia); Declaration of Disaster Loan Area

As a result of the President's major disaster declaration on December 2, 1988, I find that Currituck, Dare, Franklin, Halifax, Hyde, Nash, Northampton, Pamlico, and Wake Counties, in the State of North Carolina, constitute a disaster loan area due to damages from tornadoes and severe storms which occurred on November 28, 1988. Eligible persons, firms, and organizations may file applications for physical damage until the close of business on February 2, 1989, and for economic injury until the close of business on September 5, 1989, at the address listed below: Disaster Area 2 Office, Small Business Administration, 120 Ralph McGill Boulevard, 14th Floor, Atlanta, Georgia 30308, or other locally announced locations. In addition, applications for economic injury from small businesses located in the contiguous counties of Beaufort, Bertie, Camden, Chatham, Craven, Durham, Edgecombe, Granville, Harnett, Hertford, Johnson, Martin, Tyrrell, Vance, Warren, Washington, and Wilson, in the State of North Carolina, and Brunswick, Greenville, and Southampton Counties, as well as the Cities of Chesapeake and Virginia Beach, in the State of Virginia, may be filed until the specified date at this location.

The interest rates are:

	Percent
Homeowners With Credit Available Elsewhere	8.000
Homeowners Without Credit Available Elsewhere	4.000
Businesses With Credit Available Elsewhere	8.000
Businesses and Non-Profit Organizations Without Credit Available Elsewhere	4.000
Businesses and Non-Profit Organizations (EIDL) Without Credit Available Elsewhere	4.000
Others (Including Non-Profit Organizations) With Credit Available Elsewhere	9.125

The number assigned to this disaster is 232512 for physical damage and for economic injury the number is 667700.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Date: December 6, 1988.

Win Allred,

Acting Deputy Associate Administrator for Disaster Assistance.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Washington County, OR

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project on Murray Blvd. in Washington County Oregon.

FOR FURTHER INFORMATION CONTACT: Elton Chang, Environmental Coordinator and Safety Programs Engineer, Federal Highway Administration, Equitable Center, Suite 100, 530 Center NE, Salem, Oregon 97301 Telephone: (503) 399–5749.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Oregon Department of Transportation, and the Washington County Department of Land Use and Transportation will prepare an environmental impact statement (EIS) on a proposal to improve Murray Blvd. in Washington County, Oregon. The proposed improvement would involve the reconstruction of the existing Murray Boulevard between Old Scholls Ferry Road and Allen Boulevard, a distance of about 2.6 miles.

Improvements to the roads are considered necessary to provide for the existing and projected traffic demand. Alternatives under consideration include (1) taking no action; (2) using alternative travel modes; and (3) widening the existing two-lane highway to five lanes while also improving both vertical and horizontal curvatures.

Information describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this project. A series of public meetings will be held following the project's formal start up. In addition, a public hearing will be held. Public notices of the time and place of the meetings and hearing. The draft EIS will be available for public and agency review and comment prior to the public hearing.

The initial Technical Advisory Committee meeting will serve as the scoping meeting for the project.

To ensure that the full range of issues related to this proposed action is addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The provisions of Executive Order 12372, "Intergovernmental Review of Federal Programs" apply to this program.)

Issued on December 6, 1988.

Elton H. Chang,

Environment Coordinator/Safety Program Engineer, Oregon Division, Salem, Oregon.

BILLING CODE 4910-22-M

Maritime Administration

Values For War Risk Insurance; Ship Value Determinations

AGENCY: Maritime Administration, DOT.

ACTION: Determination of ship values for war risk insurance, effective July 1, 1988.

SUMMARY: Pursuant to the procedure stated at 46 CFR 309.1, the required biannual notice is hereby given of the stated valuations of individual vessels upon which interim binders for war risk hull insurance have been issued. The valuations set forth herein constitute just compensation for the vessels to which they apply, and have been computed in accordance with sections 902(b) and 1209(a)(2) of the Merchant Marine Act, 1936, as amended (46 App. U.S.C. 1242(b), and 1289(a)(2)). The authority to make these vessel valuations was delegated to the Maritime Administrator by the Secretary of Transportation by DOT Order 1100.60 (August 6, 1981). Such stated valuations apply to vessels covered by interim binders for war risk hull insurance, Form MA–184, prescribed by 46 CFR Part 308. In accordance with Pub. L. 99–59, authority to issue such war risk insurance will expire on June 30, 1990.

The interim binders listed below shall be deemed to have been amended as of July 1, 1988, by inserting in the space provided thereof, or in substitution for any value appearing in such space, the stated valuations of the respective vessels that appear on the list. Such stated valuations shall apply with respect to insurance attached during the period July 1, 1988 to December 31, 1988 inclusive, subject to reservation by the Maritime Administration of the right to revise the values assigned herein. The assured shall have the right, within 60 days after the date of publication of this notice, or within 60 days after the attachment of the insurance under the interim binder to which a specific valuation applies, whichever date is later, to reject such valuation and proceed as authorized by 46 App. U.S.C. 1289(a)(2).

(Catalog of Federal Domestic Assistance Program No. 20.803 War Risk Insurance)

By Order of the Maritime Administration.

Dated: December 9, 1988.

Joel C. Richard,

Assistant Secretary.

BILLING CODE 3910-81-M

VOL 53 ISS 240 DE 14 1988 UMI

National Highway Traffic Safety Administration

[Docket No. IP 88-04; Notice 1]

Chrysler Corp. Receipt of Petition for Determination of Inconsequential Noncompliance

Chrysler Corporation of Detroit, Michigan, has petitioned to be exempted from the notification and remedy requirement of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.100, Federal Motor Vehicle Safety Standard No. 100, "Controls and Displays," on the basis that it is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under Section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Standard No. 100 requires that motor vehicles under 10,000 pounds that do not have a narrow ring-type control for the horn, have a symbol which identifies the horn on the horn control. Chrysler Corporation produced 120,232 1988 Dodge Omni and Plymouth Horizon passenger cars from September 1987, through July 1988, without the horn identifying symbol. Chrysler supports its position of inconsequential noncompliance with the following:

- The location and operation of the horn on the subject vehicles has been unchanged since the 1984 Model Year, and the addition/deletion of the horn symbol in no way affects the proper functioning of the horn system.
- The location of the "horn" is not unique to the subject vehicles and is in a position presumed by most drivers. Similarly, activation of the horn is not uncommon and can be achieved at sereral locations on the steering wheel assembly—including the wheel's spokes and center.
- Because of the "familiar" location/activation of the horn, it is our evaluation that drivers who are unfamiliar with the operation of the subject vehicles would successfully activate the horn even in the absence of the horn symbol display.
- Chrysler is not aware of any owner complaints, field reports or allegations of hazardous circumstances for the subject or equivalent prior year models relating to horn location or identification.
- Should the owner of an affected vehicle express concern over the lack of horn identification, Chrysler will make arrangements to install a horn pad which does have the symbol specified in Table 1 of FMVSS No. 100.
- Upon discovery of the subject condition, Chrysler took immediate corrective action and initial 1989 Model Year vehicles were contained until correct horn pads were available for installation. All 1989 Model Year vehicles incorporate the horn symbol display.

Interested persons are invited to submit written data, views and arguments on the petition of the Chrysler Corporation described above. Comments should refer to the Docket Number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, DC, 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, a Notice will be published in the **Federal Register** pursuant to the authority indicated below:

Comments closing date: January 13, 1988.

(Sec. 102, Pub. L. 93-492; 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on December 8, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

Urban Mass Transportation Administration

UMTA Section 3 and 9 Grant Obligations

AGENCY: Urban Mass Transportation Administration (UMTA), DOT.

ACTION: Notice.

SUMMARY: The Department of Transportation and Related Agencies Appropriations Act, 1989, P.L. 100-457, signed into law by President Reagan on September 30, 1988, contained a provision requiring the Urban Mass Transportation Administration to publish an announcement in the **Federal Register** each time a grant is obligated pursuant to sections 3 and 9 of the Urban Mass Transportation Act of 1964, as amended. The statute requires that the announcement include the grant number, the grant amount, and the transit property receiving each grant.

This notice provides the information as required by statute.

FOR FURTHER INFORMATION CONTACT: Edward R. Fleischman, Chief, Resource Management Division, Department of Transportation, Urban Mass Transportation Administration, Office of Grants Management, 400 Seventh Street, SW., Room 9305, Washington, DC 20590, (202) 366-2053.

SUPPLEMENTARY INFORMATION: The section 3 program was established by the Urban Mass Transportation Act of 1964 to provide capital assistance to eligible recipients in urban areas. Funding for this program is distributed on a discretionary basis. The section 9 formula program was established by the Surface Transportation Assistance Act of 1982. Funds appropriated to this program are allocated on a formula basis to provide capital and operating assistance in urbanized areas. Pursuant to the statute UMTA reports the following grant information:

Transit property	Grant number	Grant amount	Date obligated
Section 3 Grants:			
San Francisco Public Utilities Commission, San Francisco, CA	CA-03-0324	$18,411,750	Nov. 7, 1988.
City of Orlando, Orlando, FL	FL-03-0099	6,199,998	Do.
Suburban Bus Division of the Regional Transportation Authority, Chicago, IL	IL-03-0139	114,750	Nov. 1, 1988.
Suburban Bus Division of the Regional Transportation Authority, Chicago, IL	IL-03-0122	1,933,851	Nov. 21, 1988.
Bi-State Development Agency, St. Louis, MO	MO-03-0027	149,449,000	Oct. 25, 1988.
Milwaukee County, Milwaukee, WI	WI-03-0048	25,500,000	Nov. 7, 1988.
Section 9 grants:			
Regional Transportation Commission of Clark County, Las Vegas, NV	NV-90-X010	1,600,000	Nov. 4, 1988.
New York Metropolitan Transportation Authority, New York, NY	NY-90-X149	160,100,240	Oct. 20, 1988.

Issued On: December 9, 1988.

Alfred D. DelliBovi,

Administrator.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: December 9, 1988.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue, NW., Washington, DC 20220.

Comptroller of the Currency

OMB Number: 1557-0100.

Form Number: FFIEC 009 and 009A.

Type of Review: Extension.

Title: Country Exposure Report and Disclosure.

Description: Country Exposure Report and Disclosure require national banks to report quarterly their exposures in foreign countries and to disclose quarterly material exposures in foreign countries. This information is critical in determining and monitoring the soundness of national banks, state-chartered banks and the world banking system as a whole.

Respondents: Businesses or other for-profit, Small businesses or organizations.

Estimated Number of Respondents: 360.

Estimated Burden Hours Per Response: 27 hours 30 minutes.

Frequency of Response: Quarterly.

Estimated Total Reporting Burden: 39,600 hours.

Clearance Officer: John Ference, (202) 447-1177, Comptroller of the Currency, 5th Floor, L'Enfant Plaza, Washington, DC 20219.

OMB Review: Gary Waxman, (202) 395-7340, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 240
Wednesday, December 14, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 9:47 a.m. on Thursday, December 8, 1988, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider matters relating to the Corporation's assistance agreement with an insured bank.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(9)(A)(i) and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(9)(A)(i) and (c)(9)(B)).

Dated: December 8, 1988.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[FR Doc. 88-28791 Filed 12-12-88; 9:09 a.m.]

Standards of Performance for New Stationary Sources Portland Cement Plants; Amendments to Monitoring, Recordkeeping, and Reporting Requirements; Final Rule

VOL 53 ISS 240 DE 14 1988 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD-FRL-3085-5]

Standards of Performance for New Stationary Sources Portland Cement Plants; Amendments to Monitoring, Recordkeeping, and Reporting Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Revisions to the monitoring, recordkeeping, and reporting requirements associated with the new source performance standards (NSPS) for portland cement plants were proposed in the **Federal Register** on September 10, 1985 (50 FR 36956). Such requirements are authorized by section 114 of the Clean Air Act, 42 U.S.C. 7414. This action promulgates final revisions to the requirements. The effect of this action is to require monitoring and associated recordkeeping and reporting of visible emissions from all kilns and clinker coolers that are subject to the NSPS, i.e., all kilns and clinker coolers that were constructed, modified, or reconstructed after August 17, 1971.

EFFECTIVE DATE: December 14, 1988.

Under section 307(b)(1) of the Clean Air Act, judicial review of the actions taken by this notice is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under section 307(b)(2) of the Clean Air Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

ADDRESSES: *Background Information Document.* The background information document (BID) for the promulgated revisions may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777. Please refer to "Portland Cement Plants—Background Information for Promulgated Revisions to Standards," EPA–450/3–85–003b. The BID contains (1) a summary of all the public comments made on the proposed amendments and the Administrator's response to the comments and (2) a summary of the changes made to the amendments since proposal. There are no changes to the final environmental impact statement presented in the documentation for the original standards.

Docket. A docket, number A–84–08, containing information considered by EPA in development of the promulgated amendments, is available for public inspection between 8:00 a.m. and 3:30 p.m., Monday through Friday, at EPA's Central Docket Section (LE–131), South Conference Center, Room 4, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. Doug Bell or Ms. Shirley Tabler, (919) 541–5256, concerning the regulatory decisions for the amendments and Mr. Kenneth R. Durkee, Industrial Studies Branch, (919) 541–5425, concerning technical aspects of the industry and control technologies. The address for both parties is Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION:

I. The Promulgated Revisions

Under sections 111 and 114 of the Clean Air Act, new source performance standards (NSPS) and monitoring, recordkeeping, reporting, and testing requirements for portland cement plants were promulgated by EPA on December 23, 1971 (36 FR 24876), and revised on November 12, 1974 (39 FR 39872). The existing standards apply to any facility that manufactures portland cement by either the wet or dry process and that commenced construction, modification, or reconstruction after proposal on August 17, 1971 (36 FR 15704). These standards limit emissions of particulate matter from new, modified, or reconstructed kilns, clinker coolers, raw mill systems, finish mill systems, raw mill dryers, raw material storage areas, clinker storage areas, finished product storage areas, conveyor transfer points, bagging operations, and bulk loading and unloading systems.

The existing standards limit particulate mass emissions from the kiln to 0.15 kilogram per megagram (kg/Mg) (0.30 pound [lb]/ton) of feed (dry basis) to the kiln; visible emissions are limited to 20 percent opacity. The existing standards also limit particulate mass emissions from the clinker cooler to 0.05 kg/Mg (0.10 lb/ton) of feed (dry basis) to the kiln; visible emissions are limited to less than 10 percent opacity. Visible emissions from all other affected facilities are limited to less than 10 percent opacity.

Section 111(b)(1)(B) of the Act requires review of the NSPS at least every 4 years and, if appropriate, revision of the standards. The principal purpose of such review and appropriate revisions is to ensure that the standards reflect a current assessment of best demonstrated technology (BDT). The first review of the standards was completed in 1979. No revisions to the standards were made as a result of that review (44 FR 60761).

In 1983, EPA undertook a second review of the standards of performance and the monitoring, recordkeeping, reporting, and testing requirements for portland cement plants. As a result of the second 4-year review, amendments to the monitoring, recordkeeping, and reporting requirements associated with the NSPS were proposed on September 10, 1985 (50 FR 36956). The basis and purpose of the amendments are stated in the notice of proposed rulemaking. Revisions and supplementary rationale arising as a result of comments on the proposal are presented in Part IV of this notice.

The amendments require that a continuous opacity monitoring system (COMS) be installed to monitor the opacity of visible emissions from control devices used on all kilns and clinker coolers that are subject to the NSPS, i.e., all kilns and clinker coolers that were constructed, modified, or reconstructed after August 17, 1971. When the affected kiln uses a bypass system that prevents all or a portion of the kiln exhaust gases from entering the main control device and the gases are ducted through a separate control device, a COMS is required on each bypass stack as well as on the main control device stack. The bypass system does not include emergency systems designed to duct gases directly to the atmosphere in the event of a malfunction of any device controlling kiln emissions. Each owner or operator that is required to install a COMS must install, calibrate, maintain and operate the COMS as required by 40 CFR 60.13 and must complete installation within 180 days of promulgation of the amendments. Excess emissions recorded by the COMS must be reported semiannually. For the purpose of reporting, periods of excess emissions are defined as all 6-minute periods during which the average opacity exceeds the applicable opacity standard. The reports of excess emissions must conform to the requirements of 40 CFR 60.7(c).

In cases where control of emissions from affected facilities (kilns and clinker coolers) is accomplished by a positive-pressure or negative-pressure fabric filter with multiple stacks or by an electrostatic precipitator (ESP) with multiple stacks, the requirement to install a COMS is waived. Multiple-stack control devices may offer some

economic and environmental advantages, and it would be very costly to require the installation of multiple COMS's in those cases. Instead, a certified observer may record the opacity of any visible emissions for at least three 6-minute periods once per day of operation according to EPA Method 9.

A single COMS may not measure accurately the opacity of visible emissions from a monovent. Therefore, where control is accomplished with a control device that exhausts gases through a monovent, monitoring must be performed using visible emission observations in accordance with Method 9.

If visible emissions are observed for a number of emission sites from a control device with multiple stacks, Method 9 observations will be recorded for the emission site with the highest opacity. The excess emissions recorded using EPA Method 9 must be reported semiannually. In addition, owners or operators of facilities (kilns) that use the Method 9 monitoring alternative must submit semiannual reports of the frequency, duration, and cause of any malfunction resulting in bypass or deenergization of any device controlling kiln emissions.

These monitoring, recordkeeping, and reporting requirements are being imposed for the purposes of (1) indicating when repairs, maintenance, or changes in operation of emission control devices or other equipment are necessary; (2) indicating when performance tests are necessary to determine whether sources are in compliance with the NSPS; and (3) gathering information that will aid in future development and revisions of the standards. These requirements do not affect the rules governing determination of compliance with the standards (40 CFR 60.11(a), 60.11(b)).

II. Environmental, Energy, and Economic Impacts

The environmental and energy impacts of the standards are not changed by the amendments and, thus, were not reassessed. The economic impacts and cost effectiveness of the standards were evaluated in order to ensure that the control technology required by the NSPS for portland cement plants is still reasonable.

As of December 1983, 45 companies operated 143 portland cement plants in the U.S. and Puerto Rico. Growth of the portland cement industry is closely tied with growth of the construction industry. Since the 1979 review of the NSPS, a total of 30 kilns and 20 clinker coolers have become subject to the NSPS; 31 plants have facilities other than the kiln and clinker cooler that have become subject to the NSPS. Permits have been issued for four entirely new plants in the U.S., two additional plants have submitted permit applications, at least three existing plants plan reconstruction or modification activities that would bring them under the standards, and four plants currently subject to the standards plan to add new facilities to the existing plant. Construction could begin on these projects in the next 3 years.

The cost effectiveness of the standards to reduce particulate matter from kilns is estimated to range from $43 to $52 per Mg ($39 to $47 per ton) of particulate matter removed for fabric filter control and from $35 to $45 per Mg ($32 to $40 per ton) for ESP control of typical facilities. The cost effectiveness of the standard for clinker coolers is estimated to range from $28 to $45 per Mg ($26 to $41 per ton) for fabric filter control of typical facilities. The cost effectiveness of the standards for other facilities (e.g., mills and storage/transfer facilities) controlled by fabric filters is estimated to range from $31 to $93 per Mg ($28 to $84 per ton). The cost effectiveness of EPS control of finish mills is estimated to be $175 per Mg ($155 per ton). Additional details on costs can be found in the BID for the proposed amendments.

The amendments to the monitoring, recordkeeping, and reporting requirements ensure that the environmental goals of the NSPS are met. The cost and economic impacts associated with the amendments were evaluated prior to proposal of the amendments (see 50 FR 36962) and have been reevaluated as a result of comments received after proposal. Based on information submitted by industry at EPA's request, the capital cost for a COMS has been revised and is expected to range from $32,000 to $40,000 in 1984 dollars. The resulting revised annualized cost is estimated to be $12,800. The requirement to install COMS's results in a maximum increase in annual control costs of 3.8 percent (0.6 percent higher than EPA's estimate at proposal). The annualized cost of visible emission observations submitted by industry was lower than the EPA's estimate at proposal ($8,700), which is less than 3 percent of annualized control costs.

III. Public Participation

Prior to proposal of the amendments of the monitoring, recordkeeping, and reporting provisions, interested parties were advised by public notice in the **Federal Register** on June 29, 1984 (49 FR 26807), of a meeting of the National Air Pollution Control Techniques Advisory Committee to discuss the revisions recommended for proposal. This meeting was open to the public, and each attendee was given an opportunity to comment on the amendments recommended for proposal.

The proposed amendments were published in the **Federal Register** on September 10, 1985 (50 FR 36956). The preamble to the proposed amendments announced the availability of the BID (Portland Cement Plants—Background Information for Proposed Revisions to the Standards, EPA 450/3–85–003a), which described in detail the results of the second 4-year review of the NSPS. Public comments were solicited at the time of proposal, and copies of the BID were distributed to interested parties.

To provide interested persons the opportunity for oral presentation of data, views, or arguments concerning the proposed amendments, a public hearing was held on October 25, 1985, at Research Triangle Park, North Carolina. The hearing was open to the public, and each attendee was given an opportunity to comment on the proposed amendments. Four interested parties testified at the public hearing.

The public comment period was from September 10, 1985, to November 25, 1985. Eighteen comment letters were received. The comments have been carefully considered, and, where determined to be appropriate by the Administrator, changes have been made in the proposed amendments.

IV. Significant Comments and Changes to the Proposed Amendments

Comments on the proposed amendments were received from industry, State and local air pollution control agencies, and trade associations. A detailed discussion of these comments and responses can be found in the promulgation BID, copies of which are available upon request. See the **ADDRESSES** section of this preamble. The comments and responses in the BID serve as the basis for the changes that have been made to the amendments between proposal and promulgation. The major comments and responses are summarized in this preamble.

In response to the public comments and as a result of reevaluation by EPA, several changes have been made to the amendments since proposal. The rationale for these changes is presented below in the responses to the public comments.

The COMS excess emission reporting frequency has been changed from quarterly to semiannually. Also, the

VOL 53 ISS 240 DE 14 1988 UMI

separate requirement to submit semiannual reports on the frequency, duration, and cause of any episodes leading to bypass or deenergization of any device controlling kiln emissions has been deleted for sources using a COMS. The EPA has determined that this information can be obtained from the semiannual excess emission reports. However, those sources that do not install a COMS are required to submit semiannual reports on the frequency, duration, and cause of any incident leading to bypass or deenergization of the kiln control device.

The regulation has been revised to allow owners or operators of existing and new, multi-stack, positive- or negative-pressure fabric filters or multi-stack ESP's the option of performing daily observations of opacity in accordance with EPA's Method 9 in lieu of installing COMS's. The EPA has determined that multiple-stack control devices may have some economic and environmental advantages (such as permitting faster identification and resolution of problems within a compartment) compared to single-stack control devices. Therefore, EPA does not want to discourage the use of multiple-stack control devices by requiring installation of multiple COMS's. The regulation also has been revised to require visible emission observations in accordance with Method 9 rather than the use of a COMS for facilities that control emissions with a device that exhausts gases through a monovent. This requirement is being imposed because a COMS may not measure accurately the opacity of visible emissions from a movement.

Section 60.63(c) has been revised to clarify that where visible emissions are observed for a number of emission sites on either multiple-stack fabric filters or ESP's, Method 9 observations must be made for the emission site with the highest opacity.

For clarification, definitions of "bypass," "bypass stack," and "monovent" have been added to the amended regulation. The definition of bypass does not include emergency systems that exhaust gases directly to the atmosphere during a malfunction.

Most of the comment letters contained multiple comments, and the comments have been divided into several topics. The following areas are discussed below: Costs and Economic Impacts, Legal Considerations, Testing and Monitoring, and Reporting and Recordkeeping.

Costs And Economic Impacts

A. Costs of Continuous Opacity Monitoring Systems

Several commenters believe that EPA underestimated the capital and annualized costs of installing COMS's on control device stacks from kilns and clinker coolers at portland cement plants. The commenters believe that the costs presented by EPA are too low and do not include all components involved in the COMS installation. The commenters believe that:

1. The EPA has underestimated ancillary costs such as those for tools for calibration and repair. In addition, an estimate for COMS installation should include the following components: Engineering, the COM, a recorder, an alignment tool, materials, labor, certification, the cost associated with ensuring that access ladders comply with safety standards, and other contingencies;

2. The EPA did not consider the substantial costs of constructing access to and platforms on installation sites, and those costs, in many cases, could surpass hardware costs;

3. Costs for older plants may be substantially higher than those for new plants because of limited accessibility of stacks;

4. The estimate of 22 hours of labor for maintenance seems low and assumes few, if any, breakdowns; and

5. The annualized cost should reflect the higher cost of installation, as discussed above.

The commenters' estimates of capital and installation costs for a COMS ranged from greater than $50,000 to $1.5 million per COMS, and their estimates of annualized costs ranged from $12,500 to $125,000. The high estimate of annualized cost was based on an estimate provided to one company by an independent engineering firm and included a self-supporting stair tower around the existing stack and a new platform.

In response to these comments, EPA requested additional information from seven plants that have already installed COMS's, generally in response to State or local requirements. Five responses for six COMS installations were received (see entries in Docket Category IV–D). The information request sent to the respondents specifically asked for cost information on tools for calibration and repair, engineering, a recorder, certification, contingencies, etc. Table 1 presents a summary of the capital and annual COMS costs reported for the six installations. For comparison, all cost data were updated to 1984 dollars (Docket Item IV–B–4). The kilns at Plants C, D, and E are subject to the NSPS; Plants A and B are subject to State requirements only. At the plants surveyed, COMS's were installed on existing stacks for four of the kilns and were installed during construction for two of the kilns.

The cost for a COMS and associated equipment ranged from $18,000 to $27,000. Plant E reported a cost of $55,200, but this was for a combination opacity, SO_2, NO_x, and CO_2 monitor. The vendor of the $55,200 combination monitor reported that the cost for an opacity monitor alone at Plant E would be about $18,000 (Docket Item IV–E–60).

TABLE 1.—CONTINUOUS OPACITY MONITORING SYSTEM CAPITAL AND ANNUAL COSTS—Continued

[1984 dollars]

Plant	Plant A (retrofit/ non-NSPS)	Plant B (retrofit/ non-NSPS)	Plant C (retrofit/ NSPS)	Plant D (retrofit/ NSPS)	Plant E (new/ NSPS)	Plant D (new/ NSPS)	EPA estimate at proposal
Total	11,799	[a] 12,613	[b] 7,436	8,279	[a] 112,346	6,471	10,688

NA = not available.
[a] The cost reported by the plant is for a combination opacity, SO_2, NO_x, and CO_2 monitor. The vendor reports that the cost for the opacity monitor alone would be approximately $18,000 (1985 dollars).
[b] Cost underestimated because the entire cost of wiring and conduit could not be determined.
[c] The COMS was installed during construction and was included in the installation cost of the stack. Labor cost of $40,000 was included in the response, but it included building a 5 ft x 10 ft structure around the monitor.
[d] The COMS has not been certified, and there are no plans to have it certified.
[e] Total cost underestimated because installation cost was underestimated.
[f] This is the estimated cost in 1985 dollars for COMS installation on the clinker coolers based on Plant D experience installing COMS's on its kilns.
[g] Cost overestimated because this includes cost of installing the stack.
[h] Utilities and labor for the COMS alone could not be determined.
[i] There is no access or platform installed. A lift truck is used to reach the COM (21 feet above grade) for maintenance. This cost includes the amount the plant would have to spend to rent a high lift truck if it did not already have one.
[j] A capital recovery charge was calculated (16.275 percent of capital costs) to compare EPA and Plant B costs. Overhead was not included in Plant B costs.
[k] Total cost underestimated because utilities and labor cost could not be determined.

These monitor costs are consistent with EPA's previously estimated cost of $22,000.

At Plant A, which is not subject to the NSPS, a new platform and access had to be installed because the existing platform and access were not in a location suitable for COMS installation. The installation and certification cost of this COMS was $37,800. The largest cost components at this plant were a transformer and the labor to install the COMS, platform, and access. The costs at this plant are unusually high. However, if this kiln were subject to the NSPS, the platform and access would have been in a location suitable for stack testing and, thus, for COMS installation; therefore, the platform and access would not have required rebuilding. Also, if the kiln were subject to the NSPS, the proper voltage and amperage would have been available to perform EPA Method 5 during compliance testing. Thus, for these reasons, EPA believes that the COMS installation costs at this plant are not representative of the COMS installation costs for a plant subject to the NSPS. At Plant B, the existing platform and access were used, and the total installation cost was about $8,600.

At Plant C, the existing stack testing platform and access were used with modifications at a reported installation and certification cost of $18,300. At Plant D, the existing stack testing platform and access were used for one kiln, and the plant estimated the installation cost at $10,100 in 1985 dollars. The 1985 capital and installation costs provided for this facility were the plant's estimated and budgeted costs to install COMS's on its clinker coolers based on its experience and the costs of installing COMS's on its kilns. Thus, for Plants A, B, C, and D, COMS installation costs for existing kilns, including certification costs where available, ranged from $8,600 to $37,800. The EPA had estimated a total installation cost of $9,500 (including operator training and certification), which is at the lower end of the range of costs reported by the four facilities. The high estimate of $37,800 includes the costs for installation of a new platform and access and for a transformer. However, as discussed previously, the $37,800 estimated cost would not be typical for a plant subject to the NSPS, and, excluding this estimate, the COMS installation and certification costs range from $8,600 to $18,300.

Plant E provided cost information for a COMS installed on the kiln stack during construction of the kiln. Because only total construction costs were available, the plant was not able to determine the cost for installing only the COMS. The reported installation and certification cost of $659,400 includes the cost of the stack and $40,000 for purchase of the COMS. The cost of the COMS is overstated because it is for a combined opacity, SO_2, NO_x, and CO_2 monitor. The platform and access and the majority of the engineering and supervision activities would have been required for performance testing, and, thus, the associated costs are not directly attributable to the COMS. Therefore, it is not possible to make a comparison between this plant's installation cost and EPA's estimated installation cost.

One of the plants that installed a COMS on its existing kiln also installed a COMS on a new kiln during construction; and the plant estimated that the installation cost, $10,000, was about the same in both cases.

In conclusion, these responses show that capital and installation costs are site-specific and that the installation costs are generally higher than costs previously estimated by EPA. The total capital and installation costs of COMS's ranged from $31,700 to $57,000 compared to EPA's previous estimate of $31,500. However, for the reasons stated previously, it has been determined that the higher cost of $57,000 is not representative of COMS capital and installation costs at plants subject to the NSPS because the plant reporting that cost was not subject to the NSPS and had to install a new platform and access. Thus, in response to the survey, EPA has reevaluated its estimate of COMS capital and installation costs and has increased its estimate from $31,500 to a range of $32,000 to $40,000 (Docket Item IV-B-4). However, EPA does not believe that even the higher cost of $40,000 will result in an unreasonable burden on the plants.

The EPA does not consider it appropriate to include the cost of constructing an access and a platform because these items should have been installed to permit stack testing to determine compliance with the mass emission standard as required by 40 CFR 60.8, which states:

(e) The owner or operator of an affected facility shall provide, or cause to be provided, performance testing facilities as follows:

(1) Sampling ports adequate for test methods applicable to such facility.

(2) Safe sampling platform(s).

(3) Safe access to sampling platform(s).

(4) Utilities for sampling and testing equipment.

Thus, the existing platform and access should be adequate as is or with only minor modifications to accept the installation of a COMS.

At Plants C and D, which are subject to the NSPS and which installed COMS's on the existing stacks, the

VOL 53 ISS 240 DE 14 1988 UMI

existing platforms and accesses were used. Plant B, which is not subject to the NSPS, was also able to use the existing platform and access. At Plant C, the platform required slight modifications to widen the platform and strengthen the handrails; and the installation cost was $13,150. Plant A was the only plant responding to this survey that was unable to use the existing platform and access, and this plant is not subject to the NSPS. This plant did not have the platform and access in a suitable location for compliance testing and, thus, for COMS installation.

Certification costs reported were $1,500 at two plants and $5,500 at another plant. The EPA has included the cost of certification with an installation cost of $9,500. All the COMS's that were required to be certified passed the certification test on the first attempt. One plant was not required to certify its COMS. The $5,000 cost seems high, and further inquiry provided no information from this plant about the possible reason. However, the total capital cost at this plant was $36,800, which includes the certification cost; and this total is consistent with the capital cost range of $32,000 to $40,000 that represents EPA's revised estimate.

The EPA does not believe that COMS installation costs will be substantially higher for older plants with limited accessibility than for new plants because all plants subject to the NSPS should have installed and maintained an access for compliance stack testing. At one plant responding to the survey, the kiln was installed in 1963 and the COMS was installed in 1984; however, the COMS installation cost of $8,600 was comparable to the other cost estimates. At another plant, the platform was widened and the handrails were strengthened when the COMS was installed 3 years after construction of the kiln. The costs of these modifications and installation of the COMS totaled approximately $13,150, which is also comparable to the other cost estimates.

The annual costs for utilities, operating labor, maintenance, and capital charges reported by four plants ranged from $6,500 to $12,600, compared to EPA's previous estimate of $10,700. These figures include a capital recovery charge (16.3 percent of capital costs) that has been added to the annual costs reported by Plants A, C, and D to allow comparison with the costs reported by Plant B, which included capital recovery charges. The annual cost for Plant E was not included in the range because the capital recovery factor includes the cost of installing the stack; however, the other components of the annual costs for Plant E were within the range of costs reported by the other plants.

The respondents indicated that very little maintenance is required for the COMS's. The frequency of reported maintenance activities ranged from weekly to monthly and included checking the calibration and cleaning the lens and filter. The number of malfunctions/breakdowns of the COMS was also low and ranged from zero to three incidents per year. No estimates for maintenance labor hours were submitted, and the reported costs of maintenance ranged form $400 to $4,600 per year. The EPA had previously estimated the cost of maintenance at $1,000. Although some of the reported maintenance costs were higher than EPA's estimate, the reported utilities and operating costs were lower than those estimated by EPA. Overall, the total annual costs reported by industry are consistent with the EPA estimate. Because of EPA's decision to increase the estimated range of capital costs to $32,000 to $40,000, the annual cost estimate has been increased to reflect the capital recovery charge ($8,510) associated with the $40,000 capital cost. Thus, EPA estimates that the annual cost for COMS's would be approximately $12,800 (Docket Item IV–B–4). This results in a maximum increase in total annual control costs of 3.8 percent, which is still considered reasonable.

In most cases, only one COMS will be required per kiln. However, for kilns with a separate bypass stack, a COMS will be required on the bypass stack in addition to the main control device stack. No situations have been identified where more than two COMS's will be required per kiln as suggested by one of the commenters.

Of the 64 plants subject to the NSPS, 5 plants may be required to install 4 COMS's each, the most that any plant would be required to install. Assuming the estimated annual cost of $12,800 per COMS, the total annual cost at each of these five plants will be $51,200. Thus, the $45,000 to $65,000 mentioned by one of the commenters is likely to be incurred only by those five plants; costs for the remaining 59 plants will be substantially lower.

The Agency has reviewed the cost estimates provided by one commenter's independent engineering firm and has determined that the capital cost estimates of $125,000 to $130,000 for installation of a COMS are overstated. The EPA does not agree that it is necessary to build a new platform and staircase at this plant; in addition, the type of staircase costed is unnecessarily expensive for its intended purpose. The EPA has evaluated these costs and determined that if the costs of building the stairs and platforms and the associated engineering costs are excluded, the resulting capital cost is about $33,500 including installation, which is consistent with the range of costs ($32,000 to $40,000) estimated by EPA and is supported by responses from the plant survey discussed above.

B. Costs of Using Visible Emission Observers

Several commenters believe that the costs of performing visual observations are understated. They believe that EPA has underestimated the costs to train, certify, and employ qualified personnel; the number of personnel needed; and the time involved in making the required observations, particularly if there are a large number of multiple stacks to read.

The EPA has estimated that a company would need to train two employees to read visible emissions at a total cost of $2,969 including fees, mileage, per diem, hotel, and wages (Docket Item II–B–4). However, two plants surveyed by EPA reported that costs to train observers were $50 and $300. In addition, EPA believes that only one person at a time would be required to perform visible observations for a short period each day and that the remainder of the reader's work day would be used to perform other tasks. The EPA estimates the time required to take three 6-minute readings and reduce the data would be about 40 minutes per day at an annual cost of $6,821. The two plants responding to this question in the survey estimated 1 hour would be required, and one plant estimated an annual cost of $4,400. The EPA has concluded that its estimated cost of visual observations is still appropriate; in fact, the cost may be overstated. Therefore, EPA does not believe the requirement to read visible emissions using certified observers will result in an unreasonable burden on personnel, time, or financial resources.

It will not be necessary to read emissions from every single compartment of a multiple-stack control device. The regulation has been revised to require that visible emission observations be recorded only for the emission site with the highest opacity. Thus, in most cases, the time to perform observations should not exceed 40 to 60 minutes per day.

C. Economic Impact of the Amendments

Several commenters believe that the portland cement industry is

economically depressed and that it should not be required to incur further financial burden. The commenters stated that foreign competition, especially from Mexico, is severe and has caused at least one plant closure. The commenters also believe that the 3 percent increase in total annualized control costs estimated by EPA is not an adequate indicator of the economic impact on the industry and that product price increase and decrease in profits are better indicators of economic impact. One commenter estimated a price increase of $0.50 per ton as a result of the requirement to install COMS's. Another commenter estimated that compliance with the COMS requirement at his company would cost 2.8 percent of the company's 1984 profits because 19 COMS's will be required. The commenter estimates that total industry compliance capital costs will be $12.8 million.

The estimate in the proposal preamble of about a 3 percent increase in annualized control costs to which the commenters referred was obtained by comparing the estimated annual cost to operate a COMS to the annual cost of complying with the existing NSPS at a single affected facility. In this analysis, a worst-case cost was used, that is, installation of a COMS on a small clinker cooler (300,000 tons of clinker produced per year) controlled by a fabric filter was assumed. For this clinker cooker, the annualized cost to comply with the existing NSPS would be about $333,000. Based on EPA's estimate at proposal of the annualized COMS cost, which was $10,700, there was a 3.2 percent increase in annualized control cost. Using EPA's revised estimate of $12,800, the estimated compliance cost increase ranges from 0.6 percent for a large kiln (1,200,000 tons of clinker produced per year) controlled by a fabric filter (annualized control cost of $2,288,000) to 3.8 percent for a small clinker cooler controlled by a fabric filter (i.e., worst case). The amendments will not increase the cost of controlling facilities that are subject to the NSPS but are not required to install COMS's (i.e., the raw mill system, finish mill system, storage facilities, transfer points, and loading/unloading systems). Thus, in most cases, the effect of the COMS requirement will be a cost increase that is less than 3.8 percent of existing overall particulate control costs. For the few facilities that also must install a COMS on the bypass stack, the cost increase would double. However, the resulting impact is still reasonable.

The EPA agrees that comparing the cost of the monitor to the cost of the control device does not necessarily indicate the reasonableness of these costs. However, in this case, EPA believes that COMS costs that are in the range of 0.6 to 3.8 percent of the total particulate control system costs are not unreasonable, especially considering that no other means are available for effectively monitoring control system performance continuously and ensuring proper operation and maintenance.

The Agency used the annualized cost estimate of $12,800 and a product price of $56.78/Mg ($51.62/ton) (Docket Item IV–J–9) to assess the impact of the regulation on product price for a medium-size model plant [544,000 Mg/yr [600,000 tons/yr]) with a 76.3 percent clinker capacity utilization rate. This assessment ($12,800÷(544,000 Mg/yr 0.763)) resulted in an estimated product price increase of $0.03/Mg ($0.03/ton) for one COMS, which represents an increase of 0.05 percent ($0.03/Mg÷ $56.78/Mg) in the product price. The EPA has determined that for the 118 kilns, clinker coolers, and bypass stacks at the 64 plants subject to the NSPS, more than 29 COMS's have been installed, in most cases in response to State requirements. The remaining 89 units will require an average of less than 2 COMS's per facility. The product price impacts just stated could double for facilities that must install two COMS's; however, the impacts are still reasonable.

The 4-year review of this NSPS revealed that no plants closed as a result of the NSPS, and none are expected to close as a result of the requirement to install COMS's. Data from the Bureau of Mines and the Portland Cement Association (Docket Items IV–J–9 and IV–J–8) show that production is increasing currently in the U.S. after the decline experienced by the industry in the late 1970's and early 1980's. The EPA acknowledges that Mexican cement plants compete with U.S. plants located in areas near the Mexican border. However, the product price increase ($0.03/Mg [$0.03/ton]) estimated for one COMS at a medium-size model plant is negligible compared to the $18 per Mg ($20/ton) difference between U.S. and foreign prices and will not have a significant adverse impact on the industry.

The commenter who estimated the cost increase at $0.50 per ton provided no information on the basis of the estimate. However, EPA visited the commenter's facility in 1985 and observed that the facility has two kilns and two clinker coolers subject to the NSPS. There are also alkali bypasses on the kilns, but the exhaust gases from the separate control devices appear to be directed to the kiln control device stack. Thus, it is assumed that four COMS's are needed to comply with the proposed amendments at this facility. (As noted earlier, four is the greatest number of COMS's required by the amendments at any plant.) The EPA estimates the maximum capital cost of installing a COMS to be $40,000 with annualized costs of $12,800. Therefore, the maximum capital cost at the commenter's facility would be about $160,000, and the annualized costs would be about $51,200. The EPA was provided with annual production figures of 453,600 to 544,300 Mg (500,000 to 600,000 tons) for this plant. Thus, the product cost increase at this facility would be $0.11/Mg ($0.10 per ton) (assuming 453,600 Mg [500,000 tons] per year production). This increase is 0.19 percent of $56.78 ($51.62), the 1984 average price per Mg (ton) of cement and is considered a reasonable impact by the Agency. The increase would be even less if the higher rate of production provided by the commenter (544,300 Mg/yr [600,000 tons/yr]) were achieved.

The EPA has evaluated the case of the commenter who believes that a total of 19 COMS's will be needed in his company's 17 plants (Docket Item IV–J–8) and that these COMS's would result in capital costs of $1.5 million, which represents 2.8 percent of the company's 1984 profits. As a result of the analysis of the information obtained in the survey discussed above and the commenter's assumption that 19 COMS's are necessary, EPA estimates that this company would experience capital costs of $760,000 and annualized costs of $243,200. (This company submitted information in response to a section 114 request for costs of COMS installation at one of its plants; the capital cost at the facility presented was $36,900, and the annualized cost was $12,600. For 19 installations, the resulting capital costs would be $701,100 and the annualized costs would be $239,400; these costs are consistent with the EPA estimates presented above.) The annual production for the U.S. cement industry in 1984, according to the Bureau of Mines, was 74.4 million tons. If the commenter's company produces 11.9 percent of industry production, as estimated, this company would have produced 8,853,600 tons in 1984. This production level would result in a product cost increase of $0.03/Mg ($0.03/ton). Using the information provided by the commenter, this company's 1984 net profit is calculated to be $53.6 million ($1.5 million/2.8 percent). This estimate is corroborated

by Moody's Industrial Manual, which reports a 1984 profit of $53,436,000 for this company. Thus, based on the EPA cost estimates presented above, the annualized costs represent 0.5 percent of the annual profit, and the capital costs represent 1.4 percent of the annual profit. The Agency considers these impacts to be reasonable.

As stated previously, EPA has determined that there are 118 kilns, bypasses, and clinker coolers subject to the NSPS and that at least 29 of these units are equipped with COMS's. Thus, about 89 additional COMS's will be needed by the industry to comply with the proposed revisions. Using the estimated maximum capital cost per COMS of $40,000, the industry-wide capital costs are $3,560,000 (1984 dollars) for existing facilities, which is one-fourth to one-third the cost estimated by some commenters. The Agency believes that these costs and the impacts are reasonable.

Legal Considerations

Several commenters state that requiring installation of COMS's on existing facilities is illegal. These commenters believe that EPA has incorrectly interpreted the language and intent of the Clean Air Act as permitting such a requirement and that EPA is setting a dangerous precedent.

Three commenters believe that the statutory language of section 111 and the legislative history of the 1977 amendments to the Clean Air Act expressly state that all NSPS, including revisions, are effective only prospectively and not retroactively. The commenters cite the House of Representatives Conference Report on H.R. 6161: "Any revised requirement under section 111(b) would of course be effective only prospectively and would not apply to any source which actually commenced construction or modification before such revised standards became effective." Another commenter states that it is contrary to the intent of the Clean Air Act to use section 114 (inspections, monitoring, and entry) to adopt retroactively standards that circumvent the prospective applicability of section 111 (standards of performance for new stationary sources). The commenter contends that: (1) Only sources for which construction commenced or that are modified after the date of proposal of the revisions are subject to the amendments, which are effective at promulgation; (2) the prospective applicability of NSPS has been uniformly recognized by the Agency both in its promulgation of NSPS and its enforcement of them; and (3) although most of the recently promulgated NSPS have required some form of opacity monitoring, the Agency is not free to apply its new source regulations retroactively. The commenter cites cases where courts have recognized that NSPS are effective only prospectively.

One commenter states that the technology for reliably determining optical density and relating it to opacity was not demonstrated and not available in 1971. According to the commenter, EPA is now suggesting that it has the authority to require sources that have been in operation for many years to employ a technology that was not available when the sources were constructed.

The Administrator disagrees with these commenters. The authority for these requirements is not section 111 but section 114 of the Act, 42 U.S.C. 7414, which provides:

> (a) For the purpose (i) of developing or assisting in the development of * * * any standard of performance under Section 7411 of this title * * * [or] (ii) of determining whether any person is in violation of any such standard * * *
>
> (1) The Administrator may require any person who owns or operates *any emission source* * * * to (A) establish and maintain such records, (B) make such reports, (C) install, use and maintain such monitoring equipment or methods, (D) sample such emissions (in accordance with such methods, at such locations, at such intervals, and in such manner as the Administrator shall prescribe), and (E) provide such other information as he may reasonably require * * * [emphasis added].

"[S]ection 114(a)(1) identifies a certain composite class of persons—those who own or operate emission sources or who are subject to any requirement of the Act—and authorizes the Administrator to require *any person* in that class to do any or all of the five things enumerated." *Ced's Inc. v. EPA*, 745 F.2d 1092, 1098 (7th Cir. 1984) (emphasis added). "[T]he agency is authorized to request the owner or operator * * * to supply the agency with whatever information it 'may reasonably require' to carry out its statutory responsibilities." *U.S. v. Tivian Laboratories, Inc.*, 589 F.2d 49, 53 (1st Cir. 1978).

There is no exemption in section 114 for sources that have already been constructed. Indeed, it is hard to imagine how any such exemption could be consistent with the broad purpose of section 114 to provide the Administrator with the information necessary to adopt and enforce standards under the Act.

The amendments require monitoring, recordkeeping, and reporting of emissions from kilns and clinker coolers that are subject to the NSPS. These requirements will ensure proper operation and maintenance of control equipment. The COMS's help to ensure effective enforcement of the standards because data from a COMS are used as an indicator of the compliance status of the source and may be used to identify the need for inspections, performance tests, or other enforcement activities. Thus, the proposed requirements, imposed for the purposes of determining whether persons are in violation of the NSPS and of developing future standards of performance, fall squarely within the grant of authority in section 114. The requirements do not change the standards of performance themselves.

Testing and Monitoring

One commenter, an air pollution control agency official, agrees with the Agency that 180 days after initial startup of a facility is sufficient time in which to conduct a performance test and states further that the 180-day limit is probably too long. However, two portland cement companies do not believe that 180 days is enough time for manufacturers to supply all the COMS's that will be required for the entire industry to comply with the regulation. These commenters requested that the 180-day period be verified. One commenter estimates that it would require up to 2 years for his company to prepare and approve capital budgets, engineer the installation, order the equipment, and install the total of 19 COMS's that would be required for all its plants.

Several COMS vendors and one consultant were contacted to determine if the 180-day requirement for installation of COMS's could be met (Docket Items IV–B–3, IV–E–11, 12, 13, and 14), and they agreed that 6 months is a reasonable time period. The primary factor affecting whether the 6-month deadline can be met is delivery time. Estimates of delivery time ranged from 1 week (a rush order) to 2 months, with an average estimated delivery time of 1 month. Time for placing the order ranged from 1 to 8 weeks depending on whether the facility orders directly from a catalog or requests vendors to submit bids, provide a list of references, or perform demonstrations. The COMS's are fairly standard in design and do not have to be custom-made, and it is not expected that companies will invest a substantial amount of time in ordering.

Installation is expected to require 1 to 2 weeks if the existing platform is used. If the platform (or other means of access) also requires modifications, up to 2 months could be needed for installation. However, the platform

could be modified before delivery of the COMS. Testing and certification are relatively simple procedures and would require approximately 1 week. Writing and submitting a report to the State agency or EPA regional office would take between 2 and 4 weeks. In the worst case, a period of 6 months would be required for a COMS to be on-line. In most cases, however, startup of a COMS will require only 3 to 4 months.

The vendors contacted also confirmed that they would be able to supply the projected number of COMS's that will be required for plants in this industry to comply with the regulation. Therefore, the Administrator believes that 180 days provides sufficient time to order, install, and test the COMS's required on affected facilities at portland cement plants.

Several commenters questioned that necessity and fairness of the requirement to retrofit COMS's on existing kilns and clinker coolers. The commenters claim that EPA has not demonstrated that COMS's improve operation and maintenance beyond that provided by existing equipment and current operating practices. The commenters gave the following reasons for their contention that COMS's are not necessary:

1. The EPA acknowledged that present standards are being met, and, therefore, neither monitoring nor visual observations are technically justified;

2. The EPA has not supported or documented the statement that COMS's or Method 9 observations will necessarily improve proper operation and maintenance of control equipment;

3. The COMS's do not prevent malfunctions and are not required for determining whether controls are functioning properly;

4. The COMS's in themselves do not reduce emissions, and EPA has not demonstrated that the magnitude of particulate emissions from portland cement plants warrants installations of COMS's;

5. Information from COMS's would be redundant because methods other than COMS's (e.g., monitoring of pressure drop, temperature, and electrical parameters; alarm mechanisms that identify system failures) are used for monitoring proper operation and maintenance of control equipment. In addition, in many plants, maintenance scheduling systems (MSS) are in use that include additional periodic monitoring of particulate matter control systems by maintenance personnel. In some cases, records of these maintenance scheduling system inspections are required under the operating permit; and

6. Portland cement plants are already subject to frequent monitoring by State and local agencies and by EPA, and sufficient reporting and inspection procedures are already in place to make the additional requirements unnecessary. Many States also conduct spot checks or annual on-site inspections or require annual compliance tests that include stack tests and Method 9 observations. Furthermore, plant personnel usually make daily (or more frequent) visual inspections.

The EPA disagrees with the commenters' assertion that COMS's are not necessary and responds to each point made by the commenters as follows:

1. The Agency agrees that the standards are being met as determined by the initial performance tests using Methods 5 and 9. However, compliance tests can demonstrate only that a source is meeting the applicable standards at the time the tests are conducted. Without continuous opacity monitoring via either a COMS or visual observation, neither the plant operator nor enforcement personnel can determine whether control equipment is properly operated and maintained on a continuous basis and whether there is reason to believe that the emission limits are being exceeded.

2. The Agency believes that the benefits of continuous monitoring in ensuring proper operation and maintenance are considerable. The effectiveness of COMS's in accomplishing this goal has long been recognized by the Agency. (See 49 FR 18076, April 26, 1984; 44 FR 33580, June 11, 1979; 36 FR 24876, December 23, 1971.) Furthermore, the need for COMS's for the portland cement industry has been recognized since the first 4-year review, and the use of COMS's was recommended in the **Federal Register** notice summarizing the results of that review (44 FR 60761, October 22, 1979). Such monitoring will alert the operator to the gradual deterioration in control device performance that may occur over time as the result of inadequate maintenance or improper operation, thus allowing the owner or operator to take the necessary action (either a change in operation or increased maintenance) to minimize the increase in emissions. Therefore, a COMS will result in improvements in the operation and maintenance of the control device.

3. The COMS's are not intended to prevent malfunctions; they are required to ensure that control equipment has not deteriorated over time and is being properly operated and maintained. This may aid in preventing malfunctions by alerting the operator to potential problems that could cause malfunctions.

4. It is not the purpose of COMS's in themselves to reduce emissions. In an EPA-sponsored study on operation and maintenance problems, the total annual excess emissions from cement kilns were approximately 35 Mg (38 tons) per kiln per year. The Agency has determined that COMS's represent an effective means for ensuring proper operation and maintenance of particulate matter control equipment, which should, in turn, reduce excess emissions. Thus, indirectly, emissions are reduced by the use of COMS's. The Agency has discovered no other means as effective as requiring the use of COMS's to ensure proper operation and maintenance of control equipment.

5. Monitoring of process or control device parameters may alert the operator to sudden and total failure of the control device; however, there is no evidence that these indicators are sensitive to the subtle and gradual deterioration of the control device that may occur over a period of time. In fact, one utility company has found that COMS's represent a feasible method of optimizing ESP performance (Docket Item IV–J–10). In contrast to stack testing, COMS's allow real-time observations of the effects of fuel changes and control system changes (e.g., excess air levels, precipitator voltage, and rapping) on process operation and control device performance.

Furthermore, the Agency has found that excess emissions at cement plants are caused primarily by improper control device operation and maintenance. Although the maintenance scheduling system may be used in some plants to ensure proper maintenance, the Agency believes that use of COMS's is the most effective means to ensure that the control equipment is properly operated. The Agency has no information to show whether visual observations are routinely performed at all cement plants; however, where use of a COMS is practicable, a COMS can provide continuous data. Therefore, the Agency believes that a COMS (where use is feasible) is the most effective means to ensure proper operation and maintenance. There are no data to show how monitoring of process parameters will ensure that pollution control equipment is properly operated and maintained on a continuous basis. For these reasons, the Agency has determined that COMS's are appropriate and necessary as indicators of proper control device operation and maintenance and that their use will

VOL 53 ISS 240 DE 14 1988 UMI

significantly reduce the quantity of excess emissions from portland cement plants.

6. The commenter does not provide any information about the type and/or frequency of monitoring by State, local, and EPA personnel. However, the EPA does not consider inspections that are sporadic rather than continuous to be redundant with the monitoring requirements of the proposed amendments. Some plants are subject to annual walk-through inspections by the State, but few plants (if any) are subject to annual compliance stack testing. (See entries in Docket Category IV–E.) Annual and periodic inspections performed by State and local agencies are intended to determine compliance with the standards at the time of inspection and are not intended to ensure continuous proper operation and maintenance of particulate matter control equipment. About one-half of the kilns subject to the NSPS are already using COMS's. Excess emission reports submitted pursuant to State or local requirements can be copied and submitted to the Administrator to fulfill the NSPS reporting requirement if such reports satisfy EPA's information requirements.

Two commenters believe that all control devices, including negative-pressure fabric filters, with multiple stacks are environmentally superior to single stacks, but that the proposed regulation would provide a strong incentive to use single stacks in order to avoid installing multiple COMS's. If multiple-section fabric filters were vented to a single stack, an observer might require an hour to find the cause of a subtle change in plume opacity. With multiple stacks, a malfunctioning baghouse section is easily identifiable by virtue of its contrasting plume opacity relative to the opacity of the plumes of adjacent stacks, and that compartment can be taken off-line right away. One commenter also requests that owners or operators using ESP's with multiple stacks be afforded the alternative of using visible emission observations in lieu of in-stack monitoring, as is permitted for fabric filters with multiple stacks.

The EPA has reevaluated its position on multiple-stack fabric filters and ESP's. The Administrator agrees that multiple-stack control devices may offer some economic and environmental advantages, as described in the comment. Therefore, the Administrator does not want to discourage the use of multiple-stack control devices by requiring installation of multiple COMS's. Also, at the time of proposal, EPA was not aware that any portland cement plants use ESP's with multiple stacks. Because one plant is now known to use an ESP with multiple stacks, the Agency will allow the alternative of performing visible emission observations using a certified observer in lieu of installing COMS's. Thus, the regulation has been revised to allow owners or operators of exisitng and new multiple-stack, positive- or negative-pressure fabric filters or multiple-stack ESP's the option of performing Method 9 observations daily in lieu of installing COMS's.

The regulation also has been revised to clarify that, where visible emissions are observed at a number of emission sites on either multiple-stack fabric filters or ESP's, Method 9 observations must be made for the emission site with the highest opacity.

Reporting and Recordkeeping

Several commenters contend that recordkeeping of either opacity monitoring data or visual emission data is costly and that it is not needed because recordkeeping does not affect emissions. It was requested that EPA reconsider the recordkeeping requirements and withdraw them.

The Administrator has reevaluated the proposed recordkeeping and reporting requirements and has decided to withdraw the separate requirement for semiannual reports on the frequency, duration, and cause of any incident or malfunction leading to bypass or deenergization of the kiln control device for sources using a COMS. Section 60.7(c) of the General Provisions requires that excess emission reports include the frequency, duration, cause, and corrective action taken for periods of excess emissions that occur during malfunctions. Therefore, the Administrator had determined that excess emission reports would provide an accurate record of periods of bypass or deenergization. If such periods do not cause excess emissions, a report on the incidents is not necessary. However, those sources not equipped with opacity monitors will be required to submit semiannual reports on the frequency, duration, and cause of any incident or malfunction leading to bypass or deenergization of the kiln control device.

In addition to this change, the Administrator has reevaluated the required frequency of reporting COMS excess emission data. Under NSPS, reporting frequencies of data, other than direct compliance information, are reviewed on a case-by-case basis, and semiannual reporting of these data is required unless evidence is produced that supports more frequent reporting (50 FR 46467, November 8, 1985). Therefore, the regulation has been revised to require semiannual reporting of COMS excess emission data.

The Administrator has determined that the recordkeeping and reporting requirements associated with Method 9 observations and with the use of COMS's that are being promulgated by publication of this notice are essential for effective enforcement and will not impose an excessive burden on the industry. A maximum of 0.1 person per year at a cost of approximately $7,300 per affected facility (based on $30.45/h, which includes labor and overhead) will be necessary to comply with the recordkeeping and reporting requirements described herein (Docket Item IV–H–2). This cost estimate represents a worst case; it assumes that two excess emission periods will be recorded and reported annually for an affected facility. This case would not be typical.

V. Administrative Requirements

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file because material is added through the rulemaking development. The docketing system is intended to allow members of the public and industries involved to identify and locate documents so that they can effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated amendments to the NSPS and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review (see Clean Air Act, section 307(d)(7)(A), 42 U.S.C. 7607(d)(7)(A)).

The effective date of this revised regulation is December 14, 1988.

This revised regulation will be reviewed again in 4 years. The review will include an assessment of such factors as the need for integration with other programs, the existence of alternative methods, enforceability, improvements in emission control technology, and reporting requirements.

Section 317(a) of the Clean Air Act, 42 U.S.C. 7617(a), states that economic impact assessments are required for revisions to standards or regulations when the Administrator determines such revisions to be substantial. The revisions to the portland cement NSPS do not change the mass or visible emission limits for any of the affected facilities. Today's revisions add

requirements for continuous opacity monitoring and for reporting of malfunctions during which the control device for the kiln is deenergized or bypassed. An abbreviated economic analysis was performed that indicated the maximum increase in compliance costs as a result of these revisions would be 3.8 percent. Because the cost of complying with the revision is small, the monitoring, recordkeeping, and reporting requirements have been determined to be insubstantial. Because the amendments are not substantial, no detailed economic impact assessment of the amendments has been prepared. An economic analysis of the standards was prepared during development of the original standards (36 FR 15704, August 17, 1971); the economic impacts of the revised standards are essentially the same as those described in that economic analysis.

Paperwork Reduction Act

The information collection requirements in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.* and have been assigned OMB control number 2060–0025.

Public reporting burden for this collection of information is estimated to average 332 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM–223, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and therefore subject to the requirement of a regulatory impact analysis (RIA). The Agency has determined that the amendments would result in none of the significant adverse economic effects set forth in section 1(b) of the Order as grounds for finding a regulation to be a "major rule." The amendments are not substantial. The Agency has, therefore, concluded that this action is not a "major rule" under Executive Order 12291.

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The Act requires the completion of a regulatory flexibility analysis for every rule unless the Administrator certifies that the rule will not have a significant economic impact on a substantial number of small entities. Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the final rule will not have a significant economic impact on a substantial number of small entities. The reasons for this certification were explained in the preamble to the proposed rule (50 FR 36963, September 10, 1985), which concluded that the economic impact of this rule is not significant.

List of Subjects in 40 CFR Part 60

Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements, Incorporation by reference, Portland cement plants.

Date: December 3, 1988.

Lee M. Thomas,

Administrator.

40 CFR Part 60 is amended as follows:

PART 60—[AMENDED]

1. The authority citation for Part 60 continues to read as follows:

Authority: Secs. 101, 111, 114, 116, 301 of the Clean Air Act, as amended (42 U.S.C. 7401, 7411, 7414, 7416, 7601).

2. In § 60.61, paragraphs (b), (c), and (d) are added to read as follows:

§ 60.61 Definitions.

* * * * *

(b) "Bypass" means any system that prevents all or a portion of the kiln or clinker cooler exhaust gases from entering the main control device and ducts the gases through a separate control device. This does not include emergency systems designed to duct exhaust gases directly to the atmosphere in the event of a malfunction of any control device controlling kiln or clinker cooler emissions.

(c) "Bypass stack" means the stack that vents exhaust gases to the atmosphere from the bypass control device.

(d) "Monovent" means an exhaust configuration of a building or emission control device (e.g., positive-pressure fabric filter) that extends the length of the structure and has a width very small in relation to its length (i.e., length to width ratio is typically greater than 5:1). The exhaust may be an open vent with or without a roof, louvered vents, or a combination of such features.

3. In § 60.63, paragraphs (b), (c), (d), and (e) are added to read as follows:

§ 60.63 Monitoring of operations and emissions.

* * * * *

(b) Except as provided in paragraph (c) of this section, each owner or operator of a kiln or clinker cooler that is subject to the provisions of this subpart shall install, calibrate, maintain, and operate in accordance with § 60.13 a continuous opacity monitoring system to measure the opacity of emissions discharged into the atmosphere from any kiln or clinker cooler. Except as provided in paragraph (c) of this section, a continuous opacity monitoring system shall be installed on each stack of any multiple stack device controlling emissions from any kiln or clinker cooler. If there is a separate bypass installed, each owner or operator of a kiln or clinker cooler shall also install, calibrate, maintain, and operate a continuous opacity monitoring system on each bypass stack in addition to the main control device stack. Each owner or operator of an affected kiln or clinker cooler for which the performance test required under § 60.8 has been completed on or prior to December 14, 1988, shall install the continuous opacity monitoring system within 180 days after December 14, 1988.

(c) Each owner or operator of a kiln or clinker cooler subject to the provisions of this subpart using a positive-pressure fabric filter with multiple stacks, or a negative-pressure fabric filter with multiple stacks, or an electrostatic precipitator with multiple stacks may, in lieu of installing the continuous opacity monitoring system required by § 60.63(b), monitor visible emissions at least once per day by using a certified visible emissions observer. If the control device exhausts gases through a monovent, visible emission observations in lieu of a continuous opacity monitoring system are required. These observations shall be taken in accordance with EPA Method 9. Visible emissions shall be observed during conditions representative of normal operation. Observations shall be recorded for at least three 6-minute periods each day. In the event that visible emissions are observed for a number of emission sites from the control device with multiple stacks, Method 9 observations shall be recorded for the emission site with the highest opacity. All records of visible emissions shall be maintained for a period of 2 years.

(d) For the purpose of reports under § 60.65, periods of excess emissions that

VOL
53
ISS
240
DE
14
1988
UMI

shall be reported are defined as all 6-minute periods during which the average opacity exceeds that allowed by § 60.62(a)(2) or § 60.62(b)(2).

(e) The provisions of paragraphs (a), (b), and (c) of this section apply to kilns and clinker coolers for which construction, modification, or reconstruction commenced after August 17, 1971.

(Approved by the Office of Management and Budget under control number 2060–0025.)

4. In § 60.64, paragraph (a)(5) is added to read as follows:

§ 60.64 Test methods and procedures.

(a) * * *

(5) Method 9 and the procedures in § 60.11 for measuring the opacity of stack emissions.

* * * * *

5. Section 60.65 is added to read as follows:

§ 60.65 Recordkeeping and reporting requirements.

(a) Each owner or operator required to install a continuous opacity monitoring system under § 60.63(b) shall submit reports of excess emissions as defined in § 60.63(d). The content of these reports must comply with the requirements in § 60.7(c). Notwithstanding the provisions of § 60.7(c), such reports shall be submitted semiannually.

(b) Each owner or operator monitoring visible emissions under § 60.63(c) shall submit semiannual reports of observed excess emissions as defined in § 60.63(d).

(c) Each owner or operator of facilities subject to the provisions of § 60.63(c) shall submit semiannual reports of the malfunction information required to be recorded by § 60.7(b). These reports shall include the frequency, duration, and cause of any incident resulting in deenergization of any device controlling kiln emissions or in the venting of emissions directly to the atmosphere.

(d) The requirements of this section remain in force until and unless the Agency, in delegating enforcement authority to a State under section 111(c) of the Clean Air Act, 42 U.S.C. 7411, approves reporting requirements or an alternative means of compliance surveillance adopted by such States. In that event, affected sources within the State will be relieved of the obligation to comply with this section, provided that they comply with the requirements established by the State.

(Approved by the Office of Management and Budget under control number 2060–0025.)

6. Section 60.66 is added to read as follows:

§ 60.66 Delegation of authority.

(a) In delegating implementation and enforcement authority to a State under section 111(c) of the Act, the authorities contained in paragraph (b) of this section shall be retained by the Administrator and not transferred to a State.

(b) Authorities which will not be delegated to States: No restrictions.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Fiscal Year 1989 Indian Child Welfare Act Grant Program; Availability of Title II Funds

December 9, 1988.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of availability of Title II funds.

SUMMARY: The Indian Child Welfare Act makes available grant funds from the Bureau of Indian Affairs, Department of the Interior, for the purpose of improving child welfare services to Indian children and families.

EFFECTIVE DATE: The closing date for receipt of applications for this program is February 17, 1989.

ADDRESSES: Bureau of Indian Affairs' area offices are listed in Part IV of this announcement. BIA/Division of Social Services, MS 310 SIB, Code 450, 1951 Constitution Ave., NW., Washington, DC 20245.

FOR FURTHER INFORMATION CONTACT: The Bureau of Indian Affairs' area office nearest to the applicant, or the Acting Chief, Division of Social Services, address given above: Telephone (202) 343–6434.

SUPPLEMENTARY INFORMATION: The Assistant Secretary-Indian Affairs is announcing procedures necessary to apply for grant funds under Title II of the Indian Child Welfare Act. This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary-Indian Affairs by 209 DM8.

Applicants for projects of one year or three years duration may be submitted. Regulations published December 16, 1985, in the **Federal Register** (50 FR 51244) allow multi-year projects, in accordance with 25 CFR 23.37. Applicants who are proposing projects for a multi-year project must submit full applications on all program activities for the entire project period, that is for three years. This includes budget information. The budget period for each grant award will be for twelve (12) months. Funding after the first year of a multi-year project will depend upon the grantee's progress in achieving the objectives of the project according to the approved work plan, the availability of funds, and compliance with appropriate program regulations.

It is important that all applicants carefully review requirements detailed in the announcement related to deadlines, indirect costs, and page limitations. If an application is not received by the close of business on February 17, 1989, the application will not be reviewed. If the applicant does not itemize indirect costs in its proposed budget a total of five points will automatically be deducted from Criteria V—"Fiscal Capabilities, Budget and Budget Justification, Part (b)." If an application is longer than the established page limitation, only the first forty pages of the application will be reviewed.

Authority: The Indian Child Welfare Act, Pub. L. 95–608 authorized the utilization of funds for grants to Indian tribes, organizations, and multi-service Indian centers.

Part I. General Information

A. Background

This announcement provides information on opportunities to apply for Indian Child Welfare Act (ICWA) grant funds for FY '89. The policies established by the Indian Child Welfare Act of 1978 (Pub. L. 95–608, 25 U.S.C. 1902, 25 U.S.C. 1931 and 1932) for which these grant funds may be used are:

1. To prevent separation of Indian children from their families when possible;

2. When separation is necessary, to reunite Indian children with their families as soon as possible;

3. When reunification is not possible, to find permanent families through permanent placement with extended families or through adoption; and

4. To carry out work with Indian children and their families in accordance with the preferences of the ICWA, following procedures and practices which reflect the unique values of Indian culture.

An applicant for an Indian Child Welfare Act Grant may submit only one grant application for this program during this application period (refer to 25 CFR 23.21(b)).

B. BIA Indian Child Welfare Grant Program Purpose

The purposes of Bureau of Indian Affairs' Indian Child Welfare grants as specifically stated in the law are:

1. The establishment and operation of Indian child and family service programs which promote the stability of Indian families, and

2. The provision of non-Federal matching shares for other Federal financial assistance programs which contribute to that same purpose.

These purposes are further defined in Pub. L. 95–608, sections 201 and 202; 25 U.S.C. 1931 and 1932; and 25 CFR 23.22.

The objective of every Indian child and family service program shall be to prevent the breakup of Indian families, and insure that the permanent removal of an Indian child from the custody of his/her parent or Indian custodian shall be a last resort.

C. Eligible Applicants

The governing body of any tribe or tribes, or any nonprofit off-reservation Indian organization or multi-service Indian center, may apply individually or as a consortium for a grant. No applicant may submit more than one application.

A consortium is created by an agreement or association between two or more eligible applicants.

Part II. Available Funds

The appropriation for this program in Fiscal Year 1989 is 8.7 million dollars. Grants will be awarded to individual tribes, organizations, or to consortia of tribes and organizations within the following categories:

(a) A maximum of up to $50,000 for eligible applicants with a total of service area population 2,500 or less;

(b) A maximum of up to $75,000 for eligible applicants with a total service area population greater than 2,500 but less than 5,000;

(c) A maximum of up to $100,000 for eligible applicants with a total service area population greater than 5,000 but less than 7,500;

(d) A maximum of up to $150,000 for eligible applicants with a total service area population greater than 7,500 but less than 15,000;

(e) A maximum of up to $300,000 for eligible applicants with a total service area population greater than 15,000.

Applicants in the State of Alaska will be allowed a 25 percent cost of living adjustment to the total maximum amount for which they may apply. Notwithstanding the above grant guidelines, consortia having a total service area population of 5,000 or less, may apply for a maximum grant of up to $100,000 because of the greater administrative costs associated with operating a small consortium. Consortia with service area populations greater than 5,000 must comply with the grant guidelines set above.

Service area population means the total number of Indians eligible for service under 25 CFR 23.2(d) (2) and/or (3) in the geographical area to which the tribe, or organization, or multi-service center can realistically provide the services proposed in the application. The service area population is used only to determine maximum grant allocations

that a tribe, multi-service center, or organization may be eligible to receive. These population figures must be based on identifiable statistical resources.

All costs associated with the administration of proposed projects shall be line itemized. This means indirect cost as well as all other administrative costs must be broken down by percentage and dollar amounts. All administrative costs will be carefully scrutinized in relation to proposed funds used for direct services. If the applicant does not itemize indirect costs in its proposed budget a total of five points will automatically be deducted from Criteria V—"Fiscal Capabilities, Budget and budget Justification, Part (b)."

In accordance with 25 CFR 23.25(a)(8), the reasonableness and relevance of the estimated costs for the project are considered in the rating of all project applications. Administrative costs are only allowable within the funding specified by the grant forumla, and limitations specified in this announcement.

Applicants will not be funded for more than their demonstrated need, as specifically addressed in 25 CFR 23.24 and 23.25. The statistical requirements established in these regulations, as well as the tribe's multi-service center's or organization's prior service record will be used in determining need. Examples of necessary data include the number of actual or estimated Indian family breakups, and the number of persons who will receive direct services from any portion of the proposed program, by program area.

In accordance with 25 CFR 23.27(C)(3), if an applicant has been a grantee during the preceding fiscal year and proposes to continue essentially the same service program, the applicant, at the time of application, must provide a satisfactory evaluation from the area office along with the other materials required in this subsection.

A satisfactory evaluation means at a minimum, the timely submission of all fiscal and programmatic reports, including utilization of the corrective analysis form when programmatic changes are necesary. At no time may any Indian tribe, organization, or multi-service center which is either an eligible individual applicant in accordance with 25 CFR 23.21 or a member of a consortium, receive Indian Child Welfare Act grant funds greater than a maximum grant of $300,000 through a direct grant or through subgranting procedures with approved applicants.

Part III. Application and Selection Criteria

A. Statutory Authority

The Indian Child Welfare Program from the Bureau of Indian Affairs is authorized by Title II of Pub. L. 95–608, the Indian Child Welfare Act (25 U.S.C. 1901 *et seq.*, 25 CFR Part 23). The appropriation for the grant program is $8.7 million. The Central Office will retain 10 percent of the total available funding, to assure funding for any applicant who may appeal a denial at the area office level. If these funds are not utilized for appeals, they will be redistributed to the area offices.

B. The Closing Date for Receipt of Applications

The closing date for receipt of all applications under this Program Announcement is February 17, 1989. Applications for Indian Child Welfare Act Grants must be received in the appropriate Bureau of Indian Affairs' Social Services Area/Agency Office, as specified in 25 CFR 23.28, on or before 4:15 p.m. or the applicable close of business for that office on the closing date of the application period. Post marks will not be considered as meeting the deadline for applications received after the application deadline. The names and addresses of Bureau Social Service Area Offices and staff are listed at the end of this announcement. Hand delivered applications are accepted during normal working hours Monday through Friday. Applications which do not meet this criteria are considered late applications and will not be considered in the current competition.

C. Program Priorities

Indian Child Welfare Act grants are for the purpose of:

1. Establishment and operation of Indian child and family service programs. In accordance with the policy in 25 CFR 23.2 to emphasize the design and funding of programs to promote the stability of Indian families, program priorities have been established to be utilized by area offices in the competitive review process when more than one application obtains the same competitive score. These priorities reemphasize the programmatic interest in maintaining the family and preventing out-of-home placements. Program priorities are listed below in descending order:

(a) Operation and maintenance of facilities for the counseling and treatment of Indian families and for the temporary custody of Indian children.

(b) Family assistance (including homemaker and home counselors), day-care, after-school care, recreational activities, respite-care, and employment.

(c) A system for tribes or Indian organizations to license or otherwise regulate Indian foster and adoptive homes or the preparation and implementation of child welfare codes within their legal jurisdictional authority, or pursuant to a state-tribal and/or Indian organization agreement.

(d) Guidance, legal representation and advice to Indian families involved in tribal, state or federal child custody proceedings.

(e) Employment of professional and other trained personnel to assist the tribal court in the disposition of domestic relations and child welfare matters.

(f) Education and training of Indians (including tribal court judges and staff) in skills relating to child and family assistance and service programs.

(g) Subsidy programs under which Indian adoptive children may be provided support comparable to that for which they would be eligible as foster children, taking into account the appropriate state standards of support for maintenance and medical needs

(h) Home improvement programs

(i) Other programs designed to meet the purpose of the Act. Planning or feasibility grants may be undertaken for any one of the above listed program purposes. These applications will be ranked according to the priority of the program under consideration.

2. Providing non-Federal matching shares for other federal financial assistance programs as prescribed in 25 CFR 23.43. The order of priority of matching share grants will correlate with the purpose of the program receiving the match.

D. Content of the Application

The application shall be no longer than 40 pages, double spaced excluding the appendix. The table of contents and indices will not be counted toward the maximum length. It is recommended that the appendix be no longer than 20 pages Any application whose narrative exceeds 40 pages will not be reviewed past page 40. The application shall include standard form 424 and the following information:

1. Name and address of Indian tribal governing body(s) or Indian organization applying for a grant,

2. Descriptive name of project.

3. Grant funds requested.

4. The unduplicated client service population directly benefiting from the project,

5. Length of project.

6. Beginning date.

VOL 53 ISS 240 DE 14 1988 UMI

7. Project budget categories or items,
8. Program narrative statement (including three-year plans if appropriate),
9. Certification or evidence of request by Indian tribe or board of Indian organization (covering the duration of the proposed project),
10. Evidence of substantial community support for the proposed program. This request may be in the form of a tribal resolution, an endorsement included in the grant application or such other forms as the tribal constitution or current practice requires,
11. Name and address of the bureau office to which an application is submitted,
12. Date application is submitted to the Bureau, and
13. Additional information pertaining to grant applications for funds to be used as matching shares.

Information included in the appendix should relate specifically to the application. The appendix may include, but is not limited to the following: Resolutions, support letters, position descriptions, fiscal management/accounting certification, operational monitoring system, non-profit status documentation.

E. Evaluation Criteria

The content of the application and the following factors are considered in the competitive review of these grant applications:

1. The degree to which an applicant demonstrates in the program narrative an understanding of the social service problems or issues impacting the client population which the applicant proposes to serve. (If an applicant identifies alcohol or drug abuse as a major problem or issue impacting Indian children and families, they must also clearly address current efforts to coordinate existing resources to attack this problem. This may include information on the development or contents of the Tribal Action Plan specified under section 4206 of the Omnibus Drug and Alcohol Abuse Act of 1986).

2. The degree to which and the methods by which the applicant intends to fulfill the purpose of the grant, specifically relating to goals and the objectives of the program to the issues and problems impacting the client population. (The proposed methods outlined in the application should have an established basis for operation, e.g., a tribal placement program requires tribally established licensing or placement standards on which to operate, or a program to assist the tribal court requires a tribal code and a tribal court with which to work, etc.)

3. Whether the applicant presents narrative, quantitative data and demographics of the client population to be served. Examples of such data include:

(a) The number of actual or estimated Indian child placements outside the home;

(b) The number of actual or estimated Indian family breakups; and

(c) The need for a directly related preventive program. (Refer to Part II for further explanation.)

4. The relative accessibility which the Indian population to be served under a specific proposal already has to existing child and family service programs emphasizing prevention of Indian family breakup.

(a) Cultural barriers;

(b) Discrimination against Indians;

(c) Inability of potential clientele to pay for services;

(d) Lack of programs which provide free service to indigent families;

(e) Technical barriers created by existing public or private programs;

(f) Availability of transportation to existing programs;

(g) Distance between the Indian community to be served under the proposal and nearest existing programs;

(h) Quality of service provided to Indian clientele; and

(i) Relevance of service provided to specific needs of Indian clientele.

5. The proper justification of the extent to which the proposed program would duplicate any existing child and family service program emphasizing prevention of family breakup, taking into consideration all the factors listed in paragraphs (1), (2), (3), and (4) of this section. Proper justification must be given for any duplication of services.

6. Evidence of substantial community support for the proposed program from the Indian community or communities to be served. Such support may be evidenced by:

(a) Letters of support from individuals and families to be served;

(b) Local Indian community representation in and control over the Indian entity requesting the grant;

(c) Letters from local social service or social service related agencies familiar with the applicant's past work experience;

7. The explanation of proposed facilities and of the structure of the tribal or Indian organization requesting grant funds, and the position description of any position to be funded with grant funds, identifying qualifications, responsibilities, and lines of supervision.

8. The reasonableness and relevance of the estimated costs of the proposed program or service.

An application shall not receive a preliminary approval unless a review of the application determines that it:

(a) Contains all the information required in "D Content of an Application".

(b) Receives a minimum score of 85 in a competitive review under the scoring process using the selection criteria established in regulation.

(c) If an applicant has been a grantee during the year immediately preceding the year for which an application is being made, and has made an application to continue essentially the same service program, satisfactory evaluation(s) from the area office review of the program must be provided in addition to the other materials required in this subsection.

LIST OF PUBLIC LAWS

Note: The list of public laws enacted during the second session of the 100th Congress has been completed.

Last List November 30, 1988

The list will be resumed when bills are enacted into public law during the first session of the 101st Congress, which convenes on January 3, 1989. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

Note to FR Subscribers.
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 53 FR 12345.

PUBLIC

Subscriptions:

Paper or fiche	202–783–3238
Magnetic tapes	275–3328
Problems with public subscriptions	275–3054

Single copies/back copies:

Paper or fiche	783–3238
Magnetic tapes	275–3328
Problems with public single copies	275–3050

FEDERAL AGENCIES

Subscriptions:

Paper or fiche	523–5240
Magnetic tapes	275–3328
Problems with Federal agency subscriptions	523–5240

For other telephone numbers, see the Reader Aids section at the end of this issue.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: January 26, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202–523–5240

LOS ANGELES, CA

WHEN: January 12, at 9:00 a.m.
WHERE: Room 8544, Federal Building, 300 N. Los Angeles St., Los Angeles, CA
RESERVATIONS: Call the Federal Information Center. Los Angeles 213–894–3800

Title 3—

The President

Memorandum of December 12, 1988

Memorandum for the Archivist of the United States

By the authority vested in me as President by the Constitution and laws of the United States, including Section 301 of Title 3 of the United States Code, I hereby authorize you to ascertain whether the printed enrollments of H.R. 4637, the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1989 (Public Law 100–461), H.R. 4776, the District of Columbia Appropriations Act, 1989 (Public Law 100–462), and H.R. 4781, the Department of Defense Appropriations Act, 1989 (Public Law 100–463), are correct printings of the hand enrollments, which were approved on October 1, 1988, and if so to make on my behalf the certifications required by Section 2(c) of H.J. Res. 665 (Public Law 100–454).

Attached are the printed enrollments of H.R. 4637, H.R. 4776, and H.R. 4781, which were received at the White House on December 1, 1988.

This memorandum shall be published in the **Federal Register**.

Rules and Regulations

Federal Register
Vol. 53, No. 241
Thursday, December 15, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 1d

Rural Labor; Immigration Reform and Control Act of 1986

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This final rule retains 7 CFR Part 1d, which defines fruits, vegetables, and other perishable commodities as prescribed by section 302(a) of the Immigration Reform and Control Act of 1986, Pub. L. 99–603, 100 Stat. 3359 (hereinafter referred to as "the Act"). This final rule redetermines whether the commodity sod meets the definition of "other perishable commodities" promulgated at 7 CFR 1d.7, in light of the decision and remand of this issue to the Secretary of Agriculture from the United States District Court for the Northern District of Illinois in *Heriberto Morales, et al. v. Richard E. Lyng, et al.*, Civil Action No. 87–C–20522. This rule will assist the Immigration and Naturalization Service (INS) in determining the special agricultural workers to be admitted into the United States for temporary residence.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Al French, Coordinator of Agricultural Labor Affairs, Economic Analysis Staff, Room 227–E, Administration Building, United States Department of Agriculture, 14th and Independence Avenue SW., Washington, DC 20250–1400; telephone (202) 447–4737.

SUPPLEMENTARY INFORMATION:

Background

Section 302(a) of the Act states that "seasonal agricultural services" means "the performance of field work relating to planting, growing and harvesting of fruits and vegetables of every kind and other perishable commodities, as defined in regulations by the Secretary of Agriculture." 8 U.S.C. 1160(h). This subsection requires the Secretary of Agriculture to publish regulations defining the fruits, the vegetables, and the other perishable commodities in which the field work related to planting, cultural practices, cultivating, growing and harvesting will be considered "seasonal agricultural services" for purposes of the Act.

On June 1, 1987, the United States Department of Agriculture (USDA) published its final rule defining the terms "fruits," "vegetables," and "other perishable commodities," as well as several other terms that were necessary to an understanding of the definition of "fruits," "vegetables," and "other perishable commodities."

In the final rule, USDA defined the term "fruits" as "the human edible parts of plants which consist of the mature ovaries and fused other parts or structures, which develop from flowers or inflorescence." 7 CFR 1d.5. The term "vegetables" is defined as "the human edible herbaceous leaves, stems, roots, or tubers of plants, which are eaten, either cooked or raw, chiefly as the principal part of a meal, rather than as a dessert." 7 CFR 1d.10. The term "other perishable commodities" is defined as "those commodities which do not meet the definition of fruits or vegetables, that are produced as a result of seasonal field work, and have critical and unpredictable labor demands." 7 CFR 1d.7. "Critical and unpredictable labor demands" is defined to mean "that the period during which field work is to be initiated cannot be predicted with any certainty 60 days in advance of need." 7 CFR 1d.3. USDA explained that "critical and unpredictable labor demands" was defined to make it clear that the use of alien workers is predicated upon circumstances which create the critical, yet unpredictable demand for a labor force on short notice. 52 FR 13247 (April 22, 1987). An exclusive list of those commodities that were determined to be subject to critical and unpredictable labor demands was provided within the definition of "other perishable commodities," as well as a list of examples of commodities that were determined to be not subject to critical and unpredictable labor demands. 7 CFR 1d.7. Sod was listed as an example of a commodity that was not a fruit or vegetable and was determined to be not subject to critical and unpredictable labor demands. *Id.*

On October 21, 1988, at 53 FR 41339–41342, USDA requested public comment on a proposed rule that reexamined whether the commodity sod meets the definition of "other perishable commodities," in light of the remand of those issues to the Secretary of Agriculture from the United States District Court for the Northern District of Illinois in *Heriberto Morales, et al. v. Richard E. Lyng, et al.*, Civil Action No. 87–C–20522 (hereinafter referred to as "*Morales v. Lyng*"). The comment period closed November 7, 1988. USDA received 68 comments on the proposed rule during the comment period. The comments received are discussed below.

Comments

All of the comments received in response to the October 21, 1988, proposed rule urged the inclusion of sod as an "other perishable commodity." Generally, commenters stated that the planting, cultural practices, cultivation, growing and harvesting of sod, while mechanized to some degree, were seasonal, labor intensive activities and were subject to critical and unpredictable labor demands. Most commenters claimed that the planting, mowing, weeding, irrigation and harvesting of sod are labor intensive activities which are unpredictable as to timing, critical as to need, and require the hiring of extra laborers to perform the activities. Many commenters added soil preparation, picking up rocks, netting, selection of sod pieces, rolling and stacking, and scrap removal as additional seasonal activities which were subject to critical and unpredictable labor demands. No commenter described any field work which is performed by a regular employee complement.

In *Northwest Forest Workers Association v. Richard E. Lyng*, 688 F. Supp. 1 (D.D.C. 1988) (hereinafter referred to as "*NWFWA v. Lyng*"), the United States District Court for the District of Columbia upheld the USDA definition of "other perishable commodities" as "those commodities which do not meet the definition of fruits or vegetables, that are produced as a result of seasonal field work, and have critical and unpredictable labor

demands." *NWFWA v. Lyng*, 688 F. Supp. at 5–7. The court upheld also the USDA definition of "critical and unpredictable labor demands" to mean that the period during which field work was to be initiated cannot be predicted with any certainty within 60 days in advance of need. *Id.* USDA explained that "critical and unpredictable labor demands" was defined to make it clear that the use of alien workers is predicated upon circumstances which create the critical, yet unpredictable demand for a labor force on short notice. 52 FR 13247 (April 22, 1987). Thus, to meet the definition of "critical and unpredictable labor demands, the production of a commodity must be subject to a "critical" *and* "unpredictable" demand for a labor force on short notice. Because this rule must be applied by INS on a uniform basis to determine whether alien applicants may be admitted to the United States as special agricultural workers, this determination must be made on a commodity-by-commodity basis. Thus, USDA must examine the labor demands of each commodity on a national basis as a whole.

In the original final rule, USDA determined that sod production is not sufficiently "seasonal" within the meaning of the USDA definition. USDA defined "seasonal" as meaning "the employment pertains to or is of the kind performed exclusively at certain seasons or periods of the year." 7 CFR 1d.8. In the most recent proposed rule, USDA proposed to determine that sod production does not fall within the definition of "seasonal." 53 FR at 41340–41341 (October 21, 1988). USDA has determined that many operations with respect to sod production are performed generally on a year round basis and not "*exclusively* at certain seasons or periods of the year." However, upon review of the various operations with respect to sod production, USDA recognizes that certain other practices, at least in some areas, may be limited to certain seasons or periods of the year. Therefore, USDA has examined those operations which are limited, at least in some areas of the United States, to certain seasons of the year to determine whether such seasonal field work creates a critical and unpredictable labor demand for a labor force.

In determining whether a commodity meets the definition of critical and unpredictable labor demands, USDA must examine the degree to which the production of a commodity has been mechanized. There is a clear expression of congressional intent in the legislative history of the Act that the Special Agricultural Worker (SAW) program was to include as "other perishable commodities" crops which "must be harvested by hand, thereby requiring a large number of workers on short notice," and not "where mechanical harvesters can be used * * *." 131 Cong. Rec. S11322 (September 12, 1985) (statement of Sen. Wilson); *see also* 131 Cong. Rec. S11325 (September 12, 1985) (statement of Sen. Hatch); 131 Cong. Rec. S11334 (September 12, 1985) (statement of Sen. Gorton); 131 Cong. Rec. S11344 (September 12, 1985) (statement of Sen. Evans); 131 Cong. Rec. S11537 (September 16, 1985) (statement of Sen. Gorton); 131 Cong. Rec. S11606 (September 17, 1985) (statement of Sen. Wilson); 131 Cong. Rec. S11607 (September 17, 1985) (statement of Sen. Gorton); H.R. Rep. No. 99–682, 99th Cong., 2d Sess., Part 1, July 16, 1986, at p. 85. Mechanization affects labor demands in that the more mechanized the production of a particular crop is, the less critical and the more predictable the labor demands are. Highly mechanized crops do not generally experience a critical need for a labor force or short notice.

In *Texas Farm Bureau, et al. v. Richard E. Lyng, et al.*, Civil Action No. M–88–095–CA (E.D. Tex. Sept. 28, 1988) (hereinafter referred to as *"Taxas Farm Bureau v. Lyng"*), the United States District Court for the Eastern District of Texas upheld, *inter alia*, the USDA determination to exclude the commodity hay from the definition of "other perishable commodities" because its "labor requirements * * * have been largely met by the use of herbicides and mechanization." *Texas Farm Bureau v. Lyng*, slip op. at 14 (quoting 52 FR at 20374). As recognized by the court, USDA "considered a number of factors in determining whether a commodity had a critical labor demand. The factors included the nature and extent to which the field work activities utilized labor, the importance of the timing of these activities, [the] effect of a failure to perform these activities and the amount of labor needed." *Id.* at 15 (citations omitted). USDA determined that because hay was so largely mechanized, there is no real critical labor demands for large numbers of workers. *Id.* at 16. In addition, USDA determined that the timing of the harvest of hay is less critical than those commodities which would perish and become unmarketable altogether. *Id.* Thus, in that case the court approved of the USDA determination of the relationship between mechanization and criticality and predictability.

In the proposed rule USDA explained that it had determined that sod did not meet the definition of "other perishable commodities" because the production of sod is highly mechanized and does not involve critical and unpredictable labor demands. 53 FR 41339–41342 (October 21, 1988). USDA also determined that labor demands with respect to the production of sod are reasonably predictable more than 60 days in advance, and weather conditions do not create a critical need for additional labor significantly above the level than can be predicted months in advance. *Id.*

USDA found that many of the comments and sources are quite contradictory. For example, one sod commenter, a turfgrass science professor, stated "[t]he majority of sod operations use small walk-behind sodcutters, hand rolling or folding * * *." But another commenter wrote "[i]t is true that people no longer cut and hand roll sod * * *."

One commenter wrote "[netting] must be done without the use of tractors," while a published authority writes "[p]lastic netting can be installed by a [tractor] rig which rolls it out on tip of a seeded field." A number of commenters stated that netting must be pegged down by hand labor, while an authority writes "[i]f the netting is laid perpendicular to the irrigation laterals, the pipe can serve as the anchor. Except in high wind areas, wooden pegs are probably not needed." [Turfgrass Sod Production, U. of California, Publication 21451, Stephen T. Cockerham, Superintendent of Agricultural Operations for the University of California, Riverside, 1988, pg 36].

Although it is widely recognized that mowing is done by machines, many commenter stated that mowing is an "extremely labor intensive activity" and involves "high levels of hand labor." Several commenters claim that "we must go back and pick up rocks that are laying on the ground * * * by hand by [sic] laborers." On the other hand, a published authority writes "[a] stone picking machine may be used for stone and rock removal * * *."

Many commenters claimed that is impossible to predict the timing or the number of workers which would be needed for sod operations, while others stated in their original comments to the proposed rule published on April 22, 1987, "[b]ased on past experience, we can forecast our labor requirements both in terms of dates and number of workers." Some commenters claim "[s]od harvesting is where labor needs are most critical." However, a sod authority comments "[s]od producers

are not highly mechanized—just the cutting and stacking of sod * * *." One commenter stated "[i]n my previous letter of April 30, 1987, my statement regarding that 'labor requirements were predictable' was misconstrued. Based on today's letter, my labor demands are critical and unpredictable." Thus, not only were many of the comments inconsistent with published materials and expert opinions, many of the comments were inconsistent with the comments of other commenters and with comments received previously from some of the same commenters.

The comments indicate substantial confusion concerning whether sod production is highly mechanized as opposed to being a labor intensive operation requiring high degrees of manual labor. An official of one of the plaintiff sod producer organizations commented:

> [W]e must perform a variety of activities, all of which require us to hire labor on short notice. The specific activities include preparation of the soil by plowing, discing (sic), chiseling, leveling, rotovating, culti-packing, and harrowing. We are also involved in planting seed, applying fertilizer and harvesting * * *. During the course of the season our work force varied between 18 and 37 seasonal workers.

In 1987, this same commenter wrote:

> The sod industry has become quite mechanized over the past several years, but many operations such as irrigation, mowing, harvesting, chemical applications, etc. are still very hand labor intensive.

Many other commenters wrote:

> Turfgrass sod production is an extremely labor intensive activity. Mowing, irrigating, fertilizing, planting, spot checking for weeds and foreign grasses and harvesting involve high levels of hand labor.

According to another commenter:

> We then perform at least 14 tractor operations to get the crop planted. From planting until harvest begins 9 to 12 months later, we will perform at least 55 more tractor operations. The bulk of these is mowing. To market high quality turf, we must mow it 3 times per week in April, May, and June * * *. Sod harvesting is where labor needs are most critical.

These comments are typical of a large number of commenters which USDA believes confuse the relationship between mechanization and hand or manual labor, and labor intensiveness.

The following dictionary definitions are set out to clarify this confusion:

> Manual labor: worked or done by hand and not by machine. [Webster's Ninth New Collegiate Dictionary, Merriam Webster, Inc. 1986].
>
> Mechanize: to equip with machinery esp. to replace human or animal labor. [Webster's Ninth New Collegiate Dictionary, Merriam Webster, Inc. 1986].
>
> Mechanization: A term of very broad meaning, but essentially dealing with changes in the processes of production which result in the displacement of human labor or human skills by machine operations. [Robert's Dictionary of Industrial Relations, Revised Edition, The Bureau of National Affairs, 1971].

The "specific activities" cited by the commenters above, *e.g.*, plowing, disking, chiseling, leveling, rotovating, culti-packing, and harrowing, are all mechanized operations. The planting of seed and the applying of fertilizer in sod operations also are mechanized operations. The "very hand labor intensive operations" of mowing and chemical applications are also performed by machines. All of the foregoing are clearly mechanized operations and, by definition, are not manual labor. The irrigation and harvesting of sod are also largely mechanized operations, although USDA recognizes that, in addition to machine operations, the use of manual labor may be associated with irrigation and harvesting operations. USDA recognizes also that it is sometimes necessary to spot spray herbicides in sod production, but weed and disease control is accomplished largely by spraying machines.

One authority on sod production provided detailed comments to USDA, which was endorsed by a number of other authorities:

> While machines have been adapted to some of the operations on sod farms, sod production can not be described as a highly mechanized operation. The reason for this is the lack of sod producers' ability to accurately predict, 60 days in advance, what he will do and when he will need to do it, to produce his sod.

While USDA has determined that mechanization is a causal factor in creating predictability in terms of the number of workers needed and this determination was accpeted in *Texas Farm Bureau* v. *Lyng*, USDA is unable to discern how the inability to predict the timing and need for future activities in sod production is a causal factor in promoting mechanization, or the lack thereof.

This commenter stated further:

> As a result of partial mechanization, the unpredictability of seasonal activities has increased * * *. In fact, the use of the machine driven sod cutter * * * increases the hand labor complement because it can require more men be working to pick up the sod and stack it.

USDA is not persuaded that mechanization makes activities less predictable or increases the labor demands. Clearly the use of labor saving machinery, such as the machine driven sod cutter, results in a reduced, rather than an increased, demand for labor to perform a comparable amount of work.

A paper apparently prepared especially as a vehicle for responding to the proposed rule was subscribed to by some authorities in the sod field. Apparently, some of these authorities did not understand the context of the regulatory framework in which the issues were being considered. One authority who endorsed the paper stated:

> I don't agree with everything in * * * [the paper], but I do agree with the general tenor * * *. Compared to what it used to be, [sod] certainly is [mechanized]. Compared to tomatoes, celery, and other *mechanically* harvested, hand packed crops it isn't. The idea of any field crop being 'highly mechanized' is a delusion perpetuated by engineers and poorly informed casual observers." (Emphasis added).

Another authority who endorsed the paper cited in the above comment stated in his book:

> Today, machinery is used to perform almost all turfgrass maintenance practices. [Turfgrass Science and Management, Robert D. Emmons, Delmar Publishers, 1984.]

As explained above, Congress intended the SAW program to include as "other perishable commodities" crops which "must be harvested by hand, thereby requiring a large number of workers on short notice," and not "where mechanical harvesters can be used * * *." 131 Cong. Rec. S11322 (September 12, 1985) (statement of Sen. Wilson).

In summary, although many of the commenters asserted that the production of sod is not largely a mechanized operation, many other commenters stated that sod production is largely a mechanized operation. The published authorities agree with the latter, that sod production is largely mechanized. Thus, after thoroughly reviewing all of the comments and available authoritative sources, USDA concludes that sod production is largely a mechanized operation.

USDA recognizes that while some manual labor is utilized in sod production activities, on the basis of the labor requirements indicated in the comments, USDA has determined that there is not a critical and upredictable demand for a large number of manual laborers on short notice.

In reviewing the comments and other authoritative sources, USDA notes that while commenters cited the need for extra labor during the "high season," this season encompasses most of the year in all sod producing areas.

According to the American Sod Producers Association, the average sod farm of 125 to 199 acres requires 5 to 9 employees during the "high season," which is generally 9 months in the northern United States, and 3 to 5 employees during the "low season," which is generally 3 months. Other commenters that indicated the number of workers they require for sod production stated that they generally reduce their work force by half during the "low season." This pattern of employment does not indicate a critical and unpredictable demand for large numbers of workers. Rather, it indicates a reduction in employment during the "low season" and a return to the normal work complement during the "high season." USDA believes that the magnitude, labor intensity, criticality, and predictability of the employment pattern with respect to sod production do not constitute a critical, yet unpredictable demand for a large labor force on short notice. Despite this pattern of employment, many commenters argued that specific activities involved in sod production created critical and unpredictable labor demands.

The activities involved in planting of sod vary widely throughout the nation from re-establishment through rhizomes left in the soil following harvest to intensive land preparation and reseeding of a new crop. Similarly, the timing of planting varies widely. Some areas plant on a year round basis, some plant only in the spring and fall, some in the spring and early summer, some plant in the summer, and some utilize dormant planting in the winter. Many commenters contend that the timing of planting is critical and unpredictable while others stated that they are able to forecast with specificity the timing of planting, such as one commenter who stated that "[o]ur planting times are very short. We have about two weeks in late June and again about two weeks in late August, due to the very unpredictable weather conditions, to get our crops seeded." Some authorities find planting less critical and describe planting considerations in terms of it being "preferred" to plant during a certain season and that other times may be "less desirable."

USDA has determined that the planting of sod is not subject to critical and unpredictable labor demands because the planting of sod is largely mechanized. However, USDA recognizes that sod planting is part of an integrated process which may involve land preparation, planting, in some cases netting, and post-planting irrigation. While some manual labor may be needed to pick up roots and rocks in some cases where not done by machine, land preparation activities do not have critical or unpredictable timing and are primarily mechanized operations.

Several commenters described a need for manual laborers to apply and peg netting. USDA recognizes that if netting is used it should be applied a relatively short time after seeding. However, netting is not critical because it is elective and most growers do not use it. Moreover, the grower has the option of delaying his seeding if he is not prepared to install his netting. In addition, the netting operation does not require a labor force on short notice. One commenter stated that 7 workers could do 20 acres per day. This indicates that the netting operation may be accomplished with the normal work complement.

Although many commenters stated that mowing is an "extremely labor intensive activity" and involves "high levels of hand labor," USDA notes that the scientific literature indicates clearly that mowing is a mechanized activity and does not require a large labor force on short notice. For example, one researcher found "[t]he most common size mower reported was the 5 gang, ground driven unit; however, units from 3-gang to 9-gang were reported." While USDA notes that the frequency of mowing will vary depending on weather conditions, mowing is generally performed by machine operators who are part of the normal work complement of a sod farm, and does not require a large number of workers on short notice.

Many commenters stated that fertilizing was "an extremely labor intensive activity" which "involve[s] high levels of hand labor." However, published authorities indicate that the application of fertilizer is generally a mechanized operation. One authority states, for example:

> It is essential that the fertilization of sod be performed by machine or injection into an irrigation system in order to achieve uniform distribution. [Turfgrass: Science and Culture, James B. Beard (Michigan State University), Prentice-Hall, Inc., 1973, pg 450.]

Another authority states:

> The majority of fertilizer used on turfgrass is in a dry or granular form. It is distributed with either a drop or rotary spreader." [Turfgrass Science and Management, Robert D. Emmons, Delmar Publishers, 1984.]

USDA has determined that fertilization is a mechanized activity and does not require a large labor force on short notice.

Many commenters described weed control as subject to "extreme labor intensity" which "requires extensive hand labor." One commenter, who submitted a paper written as a comment, describes weed control as:

> Weed control in a sod field is a complicated and critical process * * *. Herbicides to control grass weeds are not readily available and are not completely effective. Grass weeds are generally controlled by intense and labor demanding practices * * *. Sod farmers * * * have to use hand laborers to manually apply non-selective herbicides on individual grass weeds in order to eliminate them.

Although some commenters indicated that they used hand labor to control weeds, another sod authority writes:

> Most weeds * * * can be eliminated by fumigating * * *. Relatively simple machines can inject the fumigants and lay the tarp in one operation. Forty eight hours later the tarp can be removed and seed can be planted.
> * * * * *
> Under normal conditions, the sod grower can expect a fumigation to be effective for 4 to 6 years, sometimes longer, before pest population builds to problem proportions. [Turfgrass Sod Production, U. of California, Publication 21451, Stephen T. Cockerham, Superintendent of Agricultural Operations for the University of California, Riverside, 1988, Pg 30, 31].

In addition, USDA has been informed by an agronomist with a state University Department of Agronomy that "[t]here is little or no hand weeding" in sod production. USDA believes that weeds are generally controlled by the use of herbicides applied with machines. Subsequent re-infestations of weed pests may be dealt with on an ongoing basis by the normal work complement. Even in the worst possible case, a sod farm operated under generally accepted management practices should not experience sudden weed infestations, immediately prior to harvest, of critical proportions. However, even this de minimis case would be unlikely to constitute a critical demand for a labor force on short notice.

Several commenters described the need to control insect pests and disease on an immediate basis. One commenter describes this situation as:

> A disease such as Pythium blight can destroy thousands of square meters of sod in less than 24 hours if not treated immediately. Disease control on a sod farm generally requires a highly mobile labor force to control turfgrass canopy humidity and soil moisture, such that the disease is suppressed and the need for chemical control is minimized. Last year alone, numerous cases of diseased sod *resulting from infrequent mowing* were reported to the University of Illinois. This is due to sod producer's inability to predict the

growth rate of grass and having too few seasonal laborers to meet the demand. (Emphasis added).

However, another sod expert has written:

For turfgrass disease to occur, there must be a virulent pathogen, susceptible turfgrass, and proper environmental conditions. Sod producers reported few incidents of turf diseases in 1978 and 1979. During the summer of 1980, an outbreak of gray leafspot was reported in St. Augustinegrass sod in south Alabama. Diseases did not appear to be a serious problem on most commercial turfgrass farms in the state. [Commercial Turfgrass Sod Production in Alabama, Alabama Agricultural Experiment Station, Auburn University, Gale A. Buchanan, Director, Bulletin 529, August 1981, pg 20].

USDA recognizes that insect infestations and the outbreak of disease may, in extreme circumstances, be critical. However, because such incidents are controlled by the application of chemicals by machine, they do not create a critical and unpredictable labor demand.

Several commenters stated that sod must be harvested at the optimum time and noted that various factors could cause delays in the field work performed by the sod industry. They argued that such delays created critical and unpredictable labor demands.

USDA has determined that each crop's optimum harvest period is of relatively long duration, thus militating against the creation of critical and unpredictable labor demands. The comments indicate that the harvesting period for sod is quite long, and that even if the harvest is delayed substantially, it nevertheless remains marketable at reduced quality. One commenter stated for example:

From the time of seeding, our sod takes a minimum of 9 months to prepare for sale, and if not sold within two years of seeding, is discounted in price and not classified by us as nursery sod.

While many commenters asserted that the harvesting of sod accounted for the greatest labor demand, one authority, while urging the inclusion of sod as an "other perishable commodity," stated that harvesting and stacking was the *only* mechanized activity in sod production. He contended that other machine operations such as "land preparation, seeding or sprigging, fertilization, and pest control" are labor intensive. Another authority found that:

[a]ll growers with more than 100 acres (in Alabama) used one or more tractor-mounted sod cutters. These machines cut, rolled, and palletized the sod in one operation.

Many commenters stated that because they were unable to forecast customer's orders from day to day, that the harvesting of sod is critical and unpredictable. One authority commented that:

[f]ew farms cut enough sod on a daily basis to be able to support a full crew of laborers needed for harvesting * * * [T]he rate of harvest can not be spread out over a season or over a single day in order to keep a full crew busy.

The comment of the manager of a 900 acre sod farm which operates eight months of the year was typical of such comments, but provided somewhat greater detail:

Due to * * * extreme fluctuation[s] in weather conditions, our labor needs are *very* unpredictable * * *. [Our] farm cannot predict with any certainty when field work is to be initiated 60 days in advance. We cannot even predict from one day to the next many times what our labor needs will be * * *. One day we might cut 100,000 or 200,000 square feet of sod and the next day or a few days none or very little at all * * *.

USDA notes that, assuming this farm harvests only half of its 900 acres each year, it would be necessary to harvest an average of 115,000 square feet per weekday. This suggests that the harvesting operation on this farm is largely a continuous operation. USDA also recalls that in 1987, this same commenter states:

Within reasonable limits, the seasonal nature of labor requirements are quite predictable. Based on past experience, we can forecast our labor requirements both in terms of dates and number of workers. These figures are predicated on sod harvesting requirements, nurturing [sic] of immature sod and preparation of new fields for future years' sod growth.

The manager of a 500 acre sod farm commented:

[T]o harvest sod, it takes a crew of four men about 8 hours/acre, or 32 man hours/acre * * *.

* * * * *

This year we employed about 35 total field laborers. Assuming that this grower harvests half of his 500 acres each year, his normal work complement could, if it were critical to do so, harvest the year's crop in 52 man days. It seems more likely that the limit of harvesting capacity in this case is the number of harvesting machines available rather than the amount of labor.

Three sod farmers who in 1987 commented "[b]ased on past experience, *we can forecast our labor requirements both in terms of dates and number of workers*" (emphasis added), stated in their comments in 1988:

I recall that in my past letter I stated that labor needs can be predicted in advance. This statement is true in the fact that we know we will need laborers from March through November of each year. *But the number of workers depends* upon the demand of the local market and also the weather conditions.

In addition, some of the commenters who stated in 1987 that they could forecast their labor needs, stated in their most recent comments:

The comment in my letter to Mr. Lyng of May 4, 1987, about being able to forecast our labor needs for sod just meant that we have a general idea of how many workers we're going to need for the season. Any grower who can't do that is in bad shape.

Others stated:

In my previous letter of April 30, 1987, my statement regarding that "labor requirements were predictable" was misconstrued. Based on today's letter, my labor demands are critical and unpredictable.

In *Morales v. Lyng* the court noted that similar conflicting statements could be reconciled:

In short, all of the comments could be reconciled in a plausible fashion and interpreted to mean that: general seasonal demands of extra laborers are predictable, but often within seasonal parameters, the demand for extra field workers is unpredictable.

Slip op. at 6. These comments indicate that sod producers can, within reasonable limits, predict how many workers they will need during the "high season" and the "low season." The particular tasks that these workers may perform each day may not be predictable, but the need for a certain number of workers at certain times of the year may be predicted with reasonable certainty.

A sod authority states that:

Sod harvesting, however, is done only as long as it takes to fill that days' orders. With mechanization, the speed of harvesting has been increased. This * * * makes the scheduling of sod harvesting unpredictable * * *. [T]he timing of sod harvesting is critical. It must be done quickly, and usually in the morning, late afternoon, or on a cloudy day * * *. It must be done when the soil moisture is about 0.3 bars matric potential. Excess water will retain the heat from respiration, due to microorganisms, and results in cumbersome sod handling. It can take less than an hour for a pallet of sod to perish if the producer is not carefully monitoring the sod before and during harvest.

This indicates that harvesting generally is completed in much less than a day, freeing those workers to perform other tasks.

One of the few authorities who has published a description of the labor requirements of sod production found:

Farms having more than 100 acres were of sufficient size to require several laborers

throughout the production process. Therefore, once these growers found a reliable employee, they generally offered full time employment at a reasonable wage to ensure employment. [Commercial Turfgrass-Sod Production in Alabama, Alabama Agricultural Experiment Station, Auburn University, Gale A. Buchanan, Director, Bulletin 529, August 1981, pg 30].

USDA believes that sod producers do not limit workers to specific tasks, rather, workers are utilized to perform various tasks. Because producers need reliable employees, producers generally hire such workers on a full time basis as part of their regular work complement. This suggests that producers do not rely on large numbers of temporary workers to perform tasks such as sod harvesting.

Some harvesting machines cut, roll, and palletize the sod in one operation, while others require two manual laborers as "stackers". USDA believes that the stackers are usually part of the regular employee complement. One authority describes a typical harvest operation:

> Throughout the morning, additional orders to be cut that day are taken to the sod harvest crew * * *. Harvest * * * seldom takes all day. When the stackers are finished with the harvest, they clean the harvester and take empty pallets to the harvest field for use the next day. Then they *return to the production crew* at their regular hourly rate of pay. (Emphasis added). [Turfgrass Sod Production, U. of California, Publication 21451, Stephen T. Cockerham, Superintendent of Agricultural Operations for the University of California, Riverside, 1986, pg 62].

USDA concludes that sod producers do not recruit an additional workforce each time an order is placed by a customer, particularly when the work must be done only in the morning or later afternoon. Instead, USDA believes sod producers make reasonably accurate forecasts, which can be made 60 days in advance of need, of the number of workers needed for a regular work complement adequate for their anticipated harvesting labor demands as well as other activities. This complement may be reduced during any historically slack period according to past experience. The members of the regular employee complement are not limited to certain specific jobs, but rotate among different jobs according to current need. Thus, for example, if not busy with the labor associated with harvesting activities, a worker could be engaged in weeding, picking up rocks, moving irrigation systems, etc. Conversely, workers normally engaged in other activities may be utilized for harvesting in the event of unusually heavy consumer demand.

Because sod is not harvested manually, the ability to accelerate harvesting activity is limited by the capacity of the equipment available. The number of workers required to harvest sod is limited by the number of machine sod cutters available. In the event the total orders exceed the capacity of the mechanical harvesters, there is no indication that sod growers revert to the practice of hand cutting sod. Thus, the availability of an additional labor force would be of no value, and the harvesting of sod does not create a critical and unpredictable labor demand.

Many commenters stated fluctuating consumer demand made it impossible to forecast harvest requirements even from one day to the next. USDA believes that this condition, rather than creating a demand for a labor force on short notice, requires sod producers to maintain the necessary equipment and regular employee complement sufficient to meet anticipated consumer demand. Otherwise, the sod industry would have to have a pool of unemployed laborers on constant standby ready to work on a day to day basis. USDA does not believe that sod products have operated in that manner in the past, nor is the SAW program, which is not remedial, intended to enable them to do so in the future.

For these reasons, USDA concludes that the harvesting of sod does not create critical and unpredictable labor demands.

Many commenters indicated that they had employed undocumented workers in the past and have come to rely on such workers for much of their labor needs. As indicated clearly in the legislative history of the Act, the SAW program is not remedial and was not intended to legalize all undocumented alien agricultural workers.

Many commenters cited the need for irrigation as an example of a condition which caused critical and unpredictable labor demands. An official of the American Sod Producers Association claimed that:

> It is my understanding that an entire sod field can be destroyed in hours or days from the point of seeding to harvest. Sod is extremely susceptible to the effects of too much or not enough rain and numerous varieties of weed, disease and insects. If the required field labor is not available to address these needs immediately, sod crops are lost.

USDA recognizes that many plants, including some sod, may drown or scald if inundated. However, such a criterion would be too broad to determine inclusion within the definition of seasonal agricultural services. USDA believes that if Congress had wanted such a universal criterion to be used they would have simply said that "all crops" should be included. Moreover, USDA believes that under generally accepted farm management practices, such a flooding condition should only occur under extreme conditions or in the case of inadequate drainage or water management on a farm. In either case, damage which may occur in a matter of hours is not likely to be significantly alleviated regardless of labor availability.

The need for irrigation is quite varied and more difficult to analyze. There are many different types of irrigation systems whose labor requirements are quite varied. Irrigation during the establishment phase of sod production is customary and USDA does not believe that a prudent farmer would plant seed or sprigs unless he was prepared to irrigate. However, as explained above, the timing of the planting is not critical. Thus, the irrigation of new plantings is neither critical nor unpredictable. The pre-harvest irrigation of sod is similarly predictable and the consequences of not doing so is not critical to the plants. If the grower is unable to perform the pre-harvest irrigation, he has the opportunity to delay his harvest schedule. In the arid regions of the nation irrigation is performed on a regular and ongoing basis. Thus, the need for irrigation, while it could become critical, is not unpredictable in much of the nation. In some areas, irrigation due to a lack of rain can be expected less than a year. USDA recognizes that in some parts of the nation an unpredictable need for irrigation could develop as a result of drought. Such a condition may be met by several types of irrigation systems which do not require an additional labor force, by the use of the regular work complement, and by the rearrangement of other work schedules to accommodate the need to irrigate. The ability to irrigate may not be limited by the labor supply but the equipment available. USDA notes that following the record drought of 1988, which Congress deemed a national emergency for agriculture, only four commenters noted a crop loss; one of one percent, two of five percent (one of whose losses were new seedlings), and one of 21 percent. One of these commenters expained that the drought forced him to layoff workers rather than create a need for an additional work force on short notice:

> [T]his summer lost 25 or 30 acres of sod because we couldn't irrigate enough. I couldn't afford to keep on the workers I let go just to do irrigating; there just wouldn't have been enough for them to do between moving

pipes * * *. I had to let the [4] part timers and two of the [9] full-timers go because of the drought. There just wasn't enough harvesting work to keep them. Even the crew I did keep I had to make work for * * *. The only reason I didn't let more of them go was because I was afraid I'd never be able to get them back.

The experience of this commenter suggests that even with the prospect of some crop loss, the need for irrigation may not always be economically justified when compared to wage costs. In such cases the need for labor cannot be reasonably held to be critical.

After carefully evaluating all of the above as well as all other comments received, USDA concludes that the irrigation requirements of the sod industry do not create a critical and unpredictable labor demand.

Some commenters stated that sod is highly perishable after harvest and must be installed within a few hours to two days of the time it is removed from the field. USDA recognizes this statement to be correct, however, the installation of harvested sod is not performed on agricultural lands and does not meet the definition of "field work".

Twenty-seven commenters asserted they would not have access to the H–2A Temporary Agriculture Worker program unless sod was considered tc be an "other perishable commodity." There is not connection betweeen the H–2A program and "perishable commodities". Moreover, sod producers can and do utilize the H–2A program to meet their labor needs.

After thorough review of labor demands with respect to sod field activities from planting through harvesting, the comments received, the authoritative sources contained in the administrative record, and the record of *Morales v. Lyng*, USDA has determined that sod field work is not subject to critical and unpredictable labor demands. Thus, USDA has determined that sod does not qualify for inclusion as an "other perishable commodity."

Regulatory Impact

The Assistant Secretary for Economics has reviewed this rule in accordance with Executive Order No. 12291 and has determined that it is not a major rule. Under the framework of the Act, the Immigration and Naturalization Service (INS) will use this proposed rule to assist it in determining which special agricultural workers will be admitted into the United States for temporary residence. Thus, the primary benefits of this proposed rule are internal to the operation of the United States government.

This action, in and of itself, will not have a significant effect on the economy and will not result in a major increase in costs or prices for consumers, individuals, Federal, state, or local government agencies, or geographic regions; or have a significant effect on competition, employment, investment, productivity, innovation, or the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This rule reexamines whether sod meets the definition of "other perishable commodities" for purposes of clarifying the term "seasonal agricultural services" as it relates to sod. The rule does not contain any compliance or reporting requirements, or any timetables. The rule will assist the INS in determining the special agricultural workers to be admitted for temporary residence. Thus, the rule, in and of itself, will have no significant effect upon small entities.

Paperwork Reduction Act

This rule does not require additional procedures or paperwork not already required by law. Therefore, the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3502, *et seq.*) are inapplicable.

National Environmental Policy Act

This rule will not have an impact upon the environment.

Good Cause for Making Rule Effective Less Than 30 Days After Publication

In its October 6, 1988, order, the United States District Court for the Northern District of Illinois in *Morales v. Lyng*, ordered the Secretary to publish this final rule by November 28, 1988. On November 23, 1988, the court extended this deadline to December 15, 1988. On the basis of this order, good cause is found to make this rule effective less than 30 days after publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1d

Immigration, Rural labor.

Accordingly, Part 1d—Rural Labor—Immigration Reform and Control Act of 1986—Definitions is retained as promulgated.

Done at Washington, DC, this 13th day of December, 1988.

Richard E. Lyng,

Secretary of Agriculture.

[FR Doc. 88–28948 Filed 12–14–88; 8:45 am]

BILLING CODE 3410–01–M

FARM CREDIT ADMINISTRATION

12 CFR Parts 611, 612, 618 and 620

Organization; Personnel Administration; General Provisions; Disclosure to Shareholders

AGENCY: Farm Credit Administration.

ACTION: Final rule.

SUMMARY: The Farm Credit Administration (FCA) Board adopts final regulations amendment 12 CFR Parts 611, 612, 618, and 620 which implement certain provisions of the Agricultural Credit Act of 1987 (1987 Act), Pub. L. 100–233. The amendments to Parts 611 and 618 are conforming changes which implement the statutory amendments that eliminated the Farm Credit District boards. Other amendments to Part 611 add regulations regarding eligibility of candidates for bank and association director positions; standards for the director election process; mergers of System institutions; stockholder reconsideration of previously approved mergers; contents of disclosure statements in connection with stockholder votes on the transfers of Farm Credit Bank (FBC) authorities to Federal land bank associations (FLBAs); and other procedures and provisions for disclosure requirements relating to mergers and reorganizations. Finally, regulations are added to Part 620 regarding disclosure requirements for candidates for bank directors.

EFFECTIVE DATE: These regulations shall become effective after the expiration of 30 days from publication during which either or both Houses of the Congress are in session. Notice of effective date will be published.

FOR FURTHER INFORMATION CONTACT:

James F. Thies, Assistant Chief, Financial Analysis and Standards Division, Farm Credit Administration, 1501 Farm Credit Drive, McLean, VA 22102–5090, (703) 883–4475

or

Gary L. Norton, Senior Attorney, Office of General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, VA 22102–5090, (703) 883–4020, TDD (703) 883–4444

SUPPLEMENTARY INFORMATION: On February 16, 1988, the FCA Board published an Advance Notice of Proposed Rulemaking requesting public comments on the implementation of the new authorities for institutions to reorganize contained in the 1987 Act (53 FR 4416). On June 6, 1988, the FCA Board published for comment proposed regulations to implement 1987 Act provisions regarding the election of

directors and candidate disclosure statements; transfers of lending authorities from FCBs to FLBAs; special reconsideration of mergers that occurred between December 23, 1985, and January 6, 1988; merger and reorganization proposals required by the 1987 Act; and, the new or amended disclosure and procedural requirements related to merger and reorganization proposals for banks and associations (53 FR 20637).

Included among the proposed regulations was a regulation which implemented section 411 of the 1987 Act, which requires FLBAs and production credit associations (PCAs) that share substantially the same territory to submit merger proposals to their stockholders. The FCA Board, taking into consideration the comments received on that regulation, determined that in light of the statutory deadlines applicable to section 411 mergers, there was a compelling need to adopt the final regulation related to those authorities as quickly as possible, since any delay could impede compliance with the statutory deadlines. Accordingly, on October 5, 1988, the FCA Board adopted a final regulation, 12 CFR 611.1145, which implements the section 411 merger authorities (53 FR 39079).

The FCA received comments on the remainder of the regulations from the Farm Credit Corporation of America (FCCA) on behalf of its member institutions, the FCB and Bank for Cooperatives (BC) of Texas, the Springfield FCB and BC, a senator on behalf of the PCA and FLBA of the Fourth District, the South Atlantic PCA, the Association Coordination Committee of the Third Farm Credit District, and the North Coast FLBA and North Coast PCA. All of the comments were analyzed and considered before adoption of the final rule by the FCA Board. After the expiration of the comment period, FCA also received additional comments from 1 bank and more than 30 associations that were specifically directed at the appropriate requirements for the official names of associations that have both short-term and long-term lending authority. These associations are referred to in these regulations as Agricultural Credit Associations (ACAs).

A. Eligibility for Membership on Bank and Association Board and Subsequent Employment

Section 611.310(a) of the proposed regulations would provide that no person is eligible for membership on the board of directors of a bank or association who has been, within 1 year preceding the date the term of office begins, a salaried officer or employee of any Farm Credit institution. The FCCA commented that regulatory prohibitions against subsequent service are only appropriate when a person holds a position in which they are afforded the ability to subsequently secure the second position. Therefore, the FCCA recommended that the regulation include a 1-year prohibition against a senior officer of an institution becoming a director of such institution or a director of an institution from becoming an officer or employee of the same institution. In addition, the FCCA recommended that the regulation include a 1-year prohibition against a director of a bank becoming an officer of an affiliated association. The FCCA expressed the view that the regulation should not prohibit a person who has served as an officer or employee of an institution in one district from serving as a director of an institution in another district. The FCCA argued that it was not reasonable to presume that persons would conduct their activities for an institution in one district in a way that would be designed to promote their subsequent election to the board of directors of an institution in another district. The FCCA also stated that such subsequent election would be subject to numerous factors totally out of the control of an officer of an institution in a different district. Finally, the FCCA believed that there should be no regulatory prohibition, or waiting period, for any nonsenior officer who subsequently becomes a director of an institution.

The FCA Board disagrees with the position of the FCCA that there is no sound reason to apply regulatory prohibitions to all officers and employees of institutions and to apply the prohibition beyond district boundaries. The underlying policy in the regulation continues to reflect statutory requirements that previously applied to members of the board of directors of Farm Credit Districts. These requirements were contained in section 5.1 of the Act prior to its repeal by the 1987 Act. While this section was repealed in connection with the elimination of the district boards, there is no published legislative history indicating that Congress intended to refute the underlying policy bases for this prohibition. Taking into consideration these previous statutory requirements, the FCA Board determined that it would be in the best interests of all Farm Credit institutions and their stockholders to preserve these requirements in order to promote the highest standards of conduct for officers and directors of Farm Credit institutions. These restrictions are necessary to minimize the potential for not only real, but also apparent, conflicts of interest that can arise when an officer or employee of a Farm Credit institution seeks to become a director of an institution, or when a director of an institution seeks to become an officer or employee of such institution. The FCA Board also believes that retention of these prohibitions is especially important during this critical transitional period during which significant reorganizations are taking place within the System.

The FCA Board agrees with the recommendation of the FCCA that a director of an FCB should be prohibited from subsequently serving as an officer or director of an association with which the FCB has a discount or agent relationship. The FCA Board agrees that there could be a significant potential for abuse if a bank director were able to obtain a position as an officer or employee of an association over which such director could have exerted considerable influence as a bank director. Accordingly, the final regulation has been amended to include this requirement.

The FCCA recommended that § 611.310(a) be expanded to prohibit a director of a bank or association from subsequently serving as an officer of a service corporation. The FCCA believes that such a prohibition would be consistent with the prohibition against the directors of banks or associations from serving as officers of other banks or associations. This comment raises a broader question as to the appropriate regulatory limitations for membership on the boards of directors of service corporations, and specifically whether the prohibitions in § 611.310 should be applicable to officers, employees, and directors of service corporations and what, if any, exceptions should be provided. The FCA Board determined that it would not be appropriate to amend this regulation to expand its applicability to service corporations in the absence of additional public comments on the specific issues raised by the FCCA and the broader question suggested by the comment. The FCA Board will address this issue during its normal regulatory review process and will propose, for public comment, amendments to the regulations as appropriate.

The FCCA observed that while § 611.310 contains many of the provisions previously contained in section 5.1 of the Act, it does not include the previous statutory prohibition

against officers or employees of FCA serving as directors of banks. The FCA Board notes that these regulations do not include such provisions since there are other Federal statutes and regulations which have restrictions on post-employment activities governing all Federal employees, including employees of the FCA. These authorities include 18 U.S.C. 207, 5 U.S.C. Appendix, and 5 CFR Part 737. FCA implementing regulations are contained in 12 CFR Part 601. In addition, section 5.8 of the Act contains restrictions on the post-employment activities of members of the FCA Board. The FCA will in the course of its normal regulatory review process, determine whether modifications or additions to those regulations are necessary and appropriate.

The FCCA recommended that § 611.310 be amended to prohibit a convicted felon or person who is mentally incompetent from becoming a director of a bank or association. The FCCA also recommended that this section be amended to clarify items which were left unclear in the proposed regulation and in repealed section 5.1 of the Act. Specifically, the FCCA sought clarification of when a person "becomes" legally incompetent and when a person is "finally" convicted of a felony. In addition, the FCCA expressed a view that § 611.310 is inconsistent in part with the section 5.65(d)(1) of the Act. The FCCA observed that while § 611.310(b) prohibits a person convicted of a felony from continuing to serve as a director, section 5.65(d)(1) would permit a person convicted of a felony involving dishonesty or a breach of trust to serve as a bank director, with the prior written consent of the FCA. The FCCA stated that the FCA regulations must acknowledge the existence of a statutory exception to the intended general rule that no convicted felon serves as a bank director.

The FCA Board disagrees with the FCCA's interpretation of section 5.65 of the Act. Prior to the enactment of section 5.65 of the Act, section 5.1 of the Act expressly prohibited a person from serving on a district board if the person had been convicted of a felony or adjudged liable in fraud. This express prohibition, which applied only to members of a district board, would have prohibited a person from being elected to such position if that person had been previously convicted, or would have prohibited such a person from continuing to serve on a board if such board member had been subsequently convicted.

Section 5.65 was enacted by the 1987 Act in connection with the establishment of the Farm Credit System Insurance Corporation. This section provides that it is unlawful, except with the prior written consent of the FCA, for any person convicted of any criminal offense involving dishonesty or a breach of trust to serve as a director, officer, or employee of any insured System bank. This section further provides that if any bank willfully violates that prohibition, such insured bank shall be subject to a penalty of not more than $100 per day during which time the violation occurs. Section 5.65 applies not only to directors of institutions but also to their officers and employees, and imposes a penalty, not on the offending official, but rather on the institution.

By the adoption of 12 CFR 611.310(b), the FCA Board has determined that it will not provide its consent to the service of any convicted felon on the board of directors of a bank or association and this prohibition will apply for any felony conviction, including those involving dishonesty or a breach of trust. The FCA Board believes that this regulatory provision, which is similar to the one previously contained in section 5.1 of the Act, must be continued to ensure the integrity of and public confidence in the operations of Farm Credit institutions.

As a technical matter, the FCA Board concurs with the suggestion of the FCCA that § 611.310(b) be amended to clarify that a convicted felon is ineligible to be elected to a board. In addition, the FCA Board agrees that the use of the term "finally" for convictions should be deleted, consistent with the terminology used in section 5.65 of the Act. This will eliminate any possible ambiguity as to whether a person may run for election or continue to serve as a director following a conviction but prior to the exhaustion of all appeals. Once a person has been convicted, § 611.310 would prohibit such person from being elected or continuing to serve as a director. Such person's eligibility could only be returned if the conviction were overturned and the person subsequently acquitted or the charges dropped. The FCA Board agrees that there is some lack of specificity as to when a person "becomes" legally incompetent but that lack of specificity is inherent in the fact that there are numerous ways in which legal incompetence can be determined under the various State laws. The FCA Board does not believe it is necessary to clarify this provision at this time in the absence of any specific problems involving its interpretation.

B. Impartiality in the Election of Directors

Section 611.320 requires each bank and association to adopt policies and procedures which assure that elections of broad members are conducted in an impartial manner. The FCCA commented that it was unfair to expose an institution to civil money penalties or other legal actions for unfair electoral processes occurring despite the institution's reasonable effort to assure impartiality. Accordingly, the FCCA recommended that this section be amended to only require institutions to adopt policies and procedures "necessary to provide reasonable assurance that elections of board members are conducted in an impartial manner." The FCA Board agrees that institutions cannot be held accountable if parties beyond the control of the institution engage in unfair electoral processes. However, this regulation addresses the requirement that the institution must have policies, procedures and controls in place that, if adhered to, will assure that elections are conducted in an impartial manner. To clarify this point, the final regulation has been amended to require institutions to adopt policies and procedures "that are designed to assure that" the elections of board members are conducted in an impartial manner. The FCA will review those policies and procedures in the course of its normal examination process to determine if the regulatory requirements have been met. If, in the course of an election, an institution fails to adhere to or implement its policies and procedures, the FCA will consider any appropriate actions.

The FCCA also inquired why paragraphs (b) and (c) of § 611.320 are applicable to all Farm Credit institutions, including service corporations, while paragraphs (a), (d) and (e) are only applicable to banks and associations. The FCCA commented that all these paragraphs should be applicable to all Farm Credit institutions. The FCA Board agrees with the FCCA comment and notes that this omission was a technical error in the proposed regulation. As noted by the FCCA, § 611.320 replaces provisions previously contained in § 612.2200, which was applicable to all Farm Credit institutions including service corporations. The final regulation has been amended accordingly.

C. Confidentiality in the Election of Directors

Section 611.330 requires banks and associations to adopt policies and

procedures that assure confidentiality in the election of board members and prohibits the use of signed or otherwise voter-identifying ballots or proxy ballots. The FCCA commented that the regulation should clarify what must be held confidential. The FCCA also pointed out that the language of the Act regarding confidentiality of voting applies only to "lending institutions of the Farm Credit System," and not other institutions.

The FCA Board agrees with the FCCA's comment that the regulation should clarify what types of information and materials generated in the election process must be kept confidential. To address this issue the final regulation has been amended to specify the required scope of policies and procedures designed to maintain the confidentiality of the election process.

The FCA Board concurs with the observation of the FCCA that section 4.20 of the Act only addresses the confidentiality requirement for "lending institutions." However, the FCA Board, in the exercise of its regulatory responsibility, determined that a similar confidentiality requirement should be applicable to all Farm Credit institutions, including FLBAs which are not direct lenders, and service corporations. The Board believes that the stockholders of all institutions, whether those institutions lend or not, are entitled to the same level of confidentiality in the exercise of their voting franchise.

The FCCA also expressed the view that § 611.330 should provide for the release of election related materials in the event that an election is contested. The FCA Board notes that § 611.330(d) authorizes the FCA to require an institution to release election related materials. The principal circumstance under which this requirement would be imposed would be in the event an unsuccessful candidate contested an election by notifying the FCA. In light of the FCCA comment, the final regulation has been amended to specifically note that election materials may be released for review in the event of a contested election.

The North Coast FLBA and North Coast PCA commented that the prohibition against signed proxy statements in paragraph (b) was not consistent with the provision of paragraph (c) which permits a stockholder to revoke a proxy prior to balloting at a stockholders' meeting. The FCA Board understands the difficulty that arises in reconciling the statutory prohibition against the use of signed ballots with the need for stockholders to be able to revoke proxies, and the need to identify stockholders in those situations where votes are weighed according to the stockholders equity ownership. Section 611.330 (b) and (c) set out procedures that will comply with the Act and still permit institutions to ascertain that votes are cast only by persons eligible to do so. To preserve a stockholder's right to withdraw a proxy vote, in accordance with section 611.330(c), the institution will have to retain all proxy ballots unopened until the stockholders who attend the annual meeting are given an opportunity to withdraw any proxy ballots that have been mailed.

D. Security in the Election of Directors

Section 611.340 requires banks and associations to adopt policies and procedures relating to the security of election-related material, and a required retention period for records, ballots, and other materials. The FCCA reiterated its comment made with respect to § 611.320 regarding the applicability of these requirements to all Farm Credit institutions, not just banks and associations. The FCA Board agrees with the comment of the FCCA for the reasons stated in response to the same comment regarding § 611.320, and the final regulation was amended to provide for its applicability to all Farm Credit institutions.

Section 611.340 requires each institution to adopt policies and procedures that assure the security of ballots, proxy ballots, and records in the election of board members. The FCCA commented that the scope of coverage of this provision may be too narrow and may not include other election-related material such as "envelopes marked as part of the voting process." While it is clearly the intent of this provision to include all election records and related materials, the FCA Board is concerned that, as evidenced by the FCCA comment, this provision could be read too narrowly. Accordingly, the final regulation has been amended to require that policies and procedures address the security of "all records and materials related to the election of board members, including, but not limited to, ballots, proxy ballots, and other related materials."

Section 611.340(c) requires institutions to safeguard ballots and proxy ballots prior to and subsequent to an election. In addition, this section requires election records to be retained until the end of the director's term of office. The FCCA commented that the retention period was excessive, and recommended that the retention period be reduced to 1 year. The FCA Board disagrees that the retention period should be reduced. The essential purpose of the retention period is to ensure that during any time a director is in office the institution or the FCA will have access to the election materials to resolve any questions that arise regarding the election of such director. The FCA Board also notes that the FCA used these procedures and this retention period when the FCA was responsible for conducting elections for district boards. While there is some recordkeeping and storage burden imposed, the FCA Board believes that this burden is minimal when compared with the benefits derived from having access to materials in the event of a challenge to procedures involved in the election of a board member.

Section 611.340(d) requires each institution to verify the validity of ballots before a public announcement is made of the election results. The FCCA inquired as to the scope of the verification requirement imposed in the regulation. The FCCA commented that verification should be a function of the tellers committee and that unless an election is challenged, no other party should be permitted to review the ballots. The FCCA also requested that the regulation be clarified to ensure that banks are not involved in association elections.

The FCA Board agrees that the only parties responsible for verifying the results of the election should be the tellers committee or a similar group, as provided for in the election procedures of the institution. To clarify this point, the final regulation has been amended to specifically require the institution to have election procedures which provide for the establishment of a tellers committee or other designated group of persons who are responsible for validating ballots and proxies and tabulating election results. The final regulation has also been reworded to clarify that each institution and its officers, directors, and employees are prohibited from making any public announcement regarding the results of an election before the tellers committee or other designated group has verified the results of the election. In response to the FCCA's final comment, the FCA Board notes that the regulation does not provide a basis for a bank to be involved in an association's election process and therefore no further amendment to the regulation is necessary.

E. General Statement on the Farm Credit System Organization

Part 611, Subpart D, contains only one section, § 611.400, which describes the organization of the Farm Credit

institutions in general terms. The proposed regulations would delete that section, which does not have any substantive effect, as part of a general reorganization of FCA regulations designed to eliminate duplicative, unnecessary, or redundant materials. The FCCA commented that § 611.400 should be retained since it provides a "more understandable and complete brief statement of the System's integral nature than any other single provision in the Act or regulations." The FCA Board does not agree with the need to retain this section or any other sections in the FCA regulations which serve no legitimate regulatory purpose. It is noted that there are various official and unofficial documents published by Farm Credit institutions and the FCA that contain general statements regarding the organization and operation of Farm Credit institutions. Those types of publications are informative and useful in providing the public with a general overview of the operations of Farm Credit institutions. The FCA Board believes there is no need to include those types of general provisions in the regulations since they have no substantive effect.

F. Transfers of Authorities From Banks to Associations

Sections 611.500–611.525 set forth the procedures and the approval and voting requirements for the transfer of certain authorities from FCBs to FLBAs under section 7.6 of the Act. The FCCA commented that most issues relating to transfers of lending authorities are common to sections 7.6 and 7.8 of the Act and section 411 of the 1987 Act and should be treated under a single comprehensive regulation. The North Coast expressed the contrary viewpoint, believing that the transfers of authorities under the various sections of the Act are dissimilar and should not be treated under the same regulation. The FCA Board continues to believe that these two types of asset transfers must be treated differently. The transfers and assumptions under section 7.6(a) of the Act are voluntary actions on the part of the stockholders of both the banks and associations that are parties to the transactions, while the transfers under section 7.8 of the Act and section 411 of the 1987 Act are required as the result of a merger between an FLBA and a PCA. Sections 611.500–611.525 prescribe the procedures to be followed and the disclosures required when transfers of lending authorities are voted on by stockholders in the absence of merger activity.

Both the FCCA and North Coast noted that the proposed regulation assumes that when lending authority is transferred from a bank to an association that assets will also be transferred. The FCA Board notes that neither the Act nor the proposed regulation mandates a transfer of assets in connection with a transfer of lending authority. The FCA Board believes that the decision to transfer assets at the time lending authority is transferred is a matter that should be negotiated between the banks and associations involved, taking into consideration their respective needs and operating capabilities. To eliminate any confusion on this point, § 611.515(b)(6) and § 611.520 (a) and (b) have been amended to clarify this issue.

The FCCA expressed the view that § 611.505 should incorporate standards for FCA review and approval of proposals to transfer lending authority. Similar comments were made by the FCCA in responding to the FCA Board's Advance Notice of Proposed Rulemaking. Rather than include evaluative criteria in the regulations, the FCA Board continues to believe that each transaction should be evaluated according to the specific circumstances presented. As discussed in greater detail in response to the same comment regarding § 611.1010, this position is consistent with procedures used for many years in approving other types of corporate reorganizations.

The FCCA noted that § 611.510 authorizes each institution's stockholders to vote on the proposed transfer of authority "in accordance with the institutions' bylaws." The FCCA commented that the regulations should specify that when an association votes as a stockholder of the bank, it casts a number of votes equal to the number of the association's stockholders. The FCCA pointed out that these are the requirements contained in sections 5.17(a)(2), 7.0, and 7.12(a)(3) of the Act. The proposed regulation was silent on the issue of whether or not weighted voting is used in these circumstances and did not specify the voting requirements for association stockholders. The FCA Board agrees that the statutory requirements applicable to such votes clearly provide for weighted voting by associations, and to avoid any ambiguity the FCA Board has amended the final regulation to expressly restate those statutory requirements.

The FCCA suggested that the regulations regarding the transfer of authorities from banks to associations should address the question of approval at the bank level of loans to association directors and of certain large loans based on a percentge of association capital. The FCA Board disagrees with the need for a new regulation to address this issue since 12 CFR 614.4470 currently specifies the approval requirements for director loans, employee loans, and certain large loans, and is applicable to all associations. The FCCA also suggested that the regulations should recognize the impact of transferred lending authority on the capital adequacy of the institutions involved. The FCA Board agrees that the effects of the proposed transaction on the capital adequacy of the institutions should be disclosed. The disclosure of such effects is provided for by the requirements of § 611.515(b) (3), (6), (10) and (12), and other regulations.

The FCA Board adopted two technical amendments recommended by the FCCA which provide for the adoption of resolutions "approving", rather than "proposing", the transfer of authorities, and require the bank and association to forward to the FCA a certified record of the stockholder vote rather than a certified copy of the adopted resolution.

The FCA Board disagrees with two other technical comments offered by the FCCA. The FCCA stated that regulations should require representations and warranties respecting the quality of any assets transferred to an FLBA. The FCA Board notes that the regulations do require the disclosure of the quality of any assets transferred but do not require any warranties regarding the quality of such assets. The extent and nature of warranties or representations, if any, regarding the quality of assets, must be agreed to by the parties in the plan of transfer. The FCA Board agrees that if warranties are given regarding the quality of assets, such warranties must be disclosed. Accordingly, § 611.520(b) was amended to include this requirement. The FCCA was also concerned that the regulation does not clearly establish that the board of directors of either the bank or the association could rescind the transfer under § 611.520. The FCA Board believes the context of the regulation in its entirety, and the specific language in question, make it clear that when either party rescinds its resolution of approval under the circumstances specified in the regulation the transfer will not be consummated. However, to eliminate any ambiguity regarding this point, the final regulation has been amended to specifically provide that the recision of a resolution by the bank or the association will void the transfer.

VOL 53 ISS 241 DE 15 1988 UMI

G. General Authorities and Requirements Related to Bank Mergers, Consolidations and Charter Amendments

Section 611.1000 sets forth general requirements for the contents of bank charters and general authorities for obtaining amendments to charters. Section 611.1000(c) provides that the FCA may make changes to bank charters as may be necessary or expedient to implement the provisions of the Act. The FCCA commented that paragraph (c) should be revised to conform to the provisions of sections 1.3(b) and 3.0(a) of the Act, which provide that the authority of the FCA to amend charters may only be exercised in a manner "not inconsistent with the provisions of the Act."

It is noted that the specific statutory language which was advocated for inclusion by the FCCA has been deleted from the statute by the Agricultural Credit Technical Corrections Act of 1988, Pub. L. 100–399. However, the deletion of this statutory language does not affect the specific authorities of the FCA to amend bank charters which are contained elsewhere in the Act. For instance, section 5.17(a)(2) of the Act authorizes the FCA Board, after consultation with the boards of directors of the banks involved, to require two or more banks to merge if the FCA Board has determined that any one of such banks has failed to meet its outstanding obligations.

The FCA Board agrees that the FCA is only authorized to exercise functions provided for in the Act and is not empowered to take any action which is inconsistent with the Act. That limitation on FCA's powers is an implicit requirement in every section of the regulations governing FCA action and for that reason was not restated in the proposed regulation. However, in order to eliminate any concern regarding this matter the FCA Board amended the final regulation to include an appropriate limiting phrase in paragraph (c) to ensure that there is no misunderstanding regarding the authority of the FCA to amend charters of banks.

H. Bank Charter Amendment Procedures

Section 611.1010 sets forth the procedures to be followed in order for a bank to obtain amendments to its charter. Section 611.1010(a) lists the types of amendments that can be obtained to a charter of a bank. The FCCA commented that the regulation should include a fourth item providing for "any other change that is properly the subject of a bank charter." The FCA Board agrees with this comment and the final regulation has been amended accordingly.

Section 611.1010(b) requires a bank seeking a charter amendment to submit an appropriate resolution of its board of directors, together with supporting documentation, to the FCA for preliminary approval. The FCCA commented that, as a technical matter, some charter amendments are not subject to stockholder approval and therefore this section should be clarified to provide that the submission to the FCA shall be "for preliminary or final approval, as the case may be." The FCA Board agrees with the need for this technical change and the final regulation has been amended accordingly.

Section 611.1010(c) provides for FCA review and approval of requests for charter amendments. The FCCA commented that the regulation should specifically require the FCA to "expeditiously" review materials and provide for "prompt" notice of any reasons for disapproval. In addition, the FCCA recommended that this section set forth the standards used by the FCA in reviewing the proposal. The FCA Board concurs with the intent expressed in the first comment but does not believe a specific amendment to the regulation is necessary. The FCA makes every effort to process charter amendments and any other documents requiring FCA action as expeditiously as possible and in accordance with any applicable statutory deadline. With regard to the second comment, the FCA Board does not agree with the need for, and does not see any benefit to be derived from, attempting to set forth specific standards for the review and approval of charter amendment applications. As a general matter, the FCA is charged with the administration of the Act and with promoting the safe and sound operations of Farm Credit institutions. In addition, the Act empowers the FCA to exercise certain specific authorities relating to the operations of Farm Credit institutions. It would not be possible or practical for the FCA to try to delineate all of the considerations that are involved in reviewing applications for charter amendments. Any attempt to do so would only create the false impression that the list was exhaustive. Rather, the FCA provides clear guidance to institutions regarding the requirements for obtaining specific types of charter amendments through detailed regulations regarding the contents of required documents relating to such matters as mergers and territorial adjustments. For these reasons, the FCA Board believes that no change to the regulation is necessary or appropriate.

Section 611.1010(d) sets forth the requirements for stockholder approval of certain bank charter amendments. The FCCA made the same comment regarding voting requirements as was made with respect to § 611.510. For the same reasons set forth with regard to that section, the FCA Board agrees with the comment and has amended the final regulation accordingly.

I. Requirements for Merger or Consolidation of Banks

Section 611.1020 implements the provisions of sections 7.0 and 7.12 of the Act which provide for mergers and consolidations of banks. The FCCA stated that the regulation should be clarified "to provide for a section 7.12 merger of the Farm Credit Bank in one district with a merged Farm Credit Bank/bank for cooperatives in another district." The FCA Board disagrees with the need for the suggested change since § 611.1020(a) is merely an introductory provision which restates the statutory authorities under which bank mergers can occur and does not describe what types of mergers are authorized under the Act.

Section 611.1020(b) provides that banks proposing to merge or consolidate shall submit to the FCA the same documents that are required by 12 CFR 611.1122(a)–(e) and 611.1123, for mergers of associations. The FCCA stated that several of the requirements in the referenced sections applicable to associations would not apply to bank mergers, such as the requirement for FCB approval. To resolve the discrepancies, the FCCA recommended that the regulation be amended to require that the documents submitted in connection with the bank mergers shall be "substantially similar in format and content" to the documents itemized by regulations governing association mergers. The FCA Board agrees that there may be some provisions of the referenced sections relating to the bank review and approval of the association merger documents which are not applicable in the case of a bank merger. However, the documents submitted in connection with bank mergers must comply with the express requirements of those regulations rather than being "substantially similar" to the documents required by the regulations. The FCA Board notes that the ambiguity in the proposed regulations was caused by the inadvertent reference to § 611.1122(a)–(e), rather than § 611.1122(a) and (e). Accordingly, the FCA Board amended the final regulation to correct this

technical error, and in addition, to clarify that in reading those referenced sections, the term "bank" shall be substituted for the term "association."

Section 611.1020(d) sets forth the procedures for obtaining final approval of a bank merger and the required documents to be submitted to the FCA, including the requirement for submission of copies of the articles of association for the bank. The FCCA commented that the statutory provisions governing banks, unlike those governing associations, do not include references to articles of associations. The FCA Board agrees with the FCCA comment and has amended the final regulation to delete this requirement.

J. Board of Directors of an Agricultural Credit Bank

Section 611.1030 provides for the establishment of a board of directors of an agricultural credit bank (ACB), which is a bank formed by the consolidation of a Farm Credit Bank and a bank for cooperatives. The FCCA commented on the use of the term ACB and also made the same comment regarding the use of the term "agricultural credit association (ACA)." The FCCA assumed that the references to ACBs and ACAs were only generic references and did not require institutions to actually use those terms. Several other commenters expressed concern that the required use of a corporate name that did not permit immediate recognition of these entities as institutions of the Farm Credit System would negate much of prior years' public relations efforts to create name identification, as well as incur the cost of changing trademarks and other corporate identifications. The FCCA recommended that merged associations should have the option to use as their official name either "Farm Credit Services" together with an appropriate geographical designation, "Farm Credit Association" with an appropriate geographical designation, or some other appropriate name utilizing the word "association."

The FCCA correctly noted that the references to "agricultural credit association" and "agricultural credit bank" in these regulations, and in other regulations promulgated by the FCA to date, were used in order to ensure that one can identify the various regulatory requirements applicable to different institutions. It would be impossible to know whether a regulatory provision regarding, for instance, limitations on the terms of a loan, was applicable to PCAs, FLBAs or an association resulting from the merger of a PCA and FLBA unless the regulation used different names to identify which associations were subject to that provision.

Thus, these regulations do not, by their terms, establish any requirements for the official names of associations. However, during the comment period on these regulations, the FCA Board has been required to review, for preliminary approval, certain proposed mergers of PCAs and FLBAs. Several of these merger proposals provided that the resulting association would be referred to as a "Farm Credit Association." The FCA Board advised these associations that the name "Farm Credit Association" could not be used since the inevitable use of the acronym "FCA" would be confused with the name of the agency. Since the Board did not have the opportunity to develop a comprehensive proposal regarding the official names of institutions in light of the 1987 Amendments, the FCA Board advised the merging associations that, consistent with these proposed regulations, they should use the name "agricultural credit association." Now, based on a thorough evaluation of this issue and the many public comments it has received, the FCA Board has addressed the questions regarding official names of banks and associations in a comprehensive manner.

With the exception of the provisions of section 413 of the 1987 Act regarding the National Bank for Cooperatives, the 1987 Act and the Act do not expressly require any of the various types of banks and associations to use a specific name in its official title. However, prior to the 1987 Act, the Act referred to each of the different banks and associations by using specific names such as "production credit association," "Federal land bank association," and "bank for cooperatives." Based on these statutory references, the FCA, in granting charters to institutions, has required that the official names of institutions include the appropriate name used in the statute. Thus, for instance, associations chartered under Title II of the Act were required to use production credit association as part of their official name.

Until a few years ago, banks and associations transacted business using only their official names to identify themselves. Then, an effort was undertaken to develop a common identifying name that could be used by any bank or association which would identify the institution's affiliation with other Farm Credit institutions. The name selected for this purpose was "Farm Credit Services." That name eventually came into use to a greater or lesser extent among institutions throughout the country. The use of "Farm Credit Services" appears to have been particularly popular among associations operating under joint management because it enabled the two associations to be identified by a single name. FCA advised institutions that it did not object to an institution identifying itself through the use of this trade name, but that the use of the name in communications and official documents would have to be accompanied by the official name of the institution.

Enactment of the 1987 Act, particularly the provisions authorizing the merger of unlike banks or associations, has caused the FCA to reevaluate its policies regarding the official names of institutions. This reevaluation was especially necessary in light of the growing public acceptance of the term "Farm Credit Services." The Board has concluded that institutions should have the maximum degree of flexibility possible in proposing official names for their institution and should not have to use trade names that are more commonly accepted than their official names. At the same time, the official name of an institution should always be one that can be readily identified by the public as belonging to an institution affiliated with the System. In addition, there must be a simple way for the public and the FCA to be able to identify the name as belonging to one of the various types of institutions regulated by the FCA. For instance, one must be able to know whether a bank can lend to cooperatives, like a bank for cooperatives, or whether an association can only make short-term loans, like a PCA.

The FCA Board has determined that each of these concerns can be addressed through a policy regarding official names that combines the authority to use historically accepted names with the emerging acceptance of the term "farm credit," together with an appropriate use of acronyms. This policy contains the following elements. The FCA Board will issue charters for institutions which contain the statutorily sanctioned names "production credit association," "Federal land bank association," "bank for cooperatives" and "Farm Credit Bank." If an institution requests an official name that does not incorporate one of those terms, the official name must include the acronym for the appropriate term after the name. For instance, the Production Credit Association of North Central Jersey could request a change in its name to "Farm Credit Services of North Central Jersey, PCA." The Board will also issue charters for institutions that contain the

BEST COPY AVAILABLE

name "agricultural credit bank," for a bank formed by the merger of an FCB and BC, the name "agricultural credit association," for an association formed by the merger of a PCA and FLBA, and the name "Federal land credit association" for an FLBA that has direct lending authority. If such an institution requests an official name that does not include the appropriate term, the name must be followed by the arconym "ACB," "ACA" or "FLCA." For instance, and FLBA that has acquired direct lending authority could use names such as "Farm Credit of Central City, FLCA," or "Federal Land Bank Association of Central City, FLCA."

As discussed above, the FCA Board has adopted this policy position at this time, which will be expressed in a formal policy statement, because of the numerous mergers and other reorganization proposals that are pending. The FCA has never promulgated specific regulations governing the names of institutions in the past since such matters have been addressed on an individual basis in connection with specific request for approvals. However, the Board is considering whether it would be beneficial to adopt comprehensive regulations in this matter which would provide general guidance to institutions. In the course of reviewing this matter, the Board will consider any views it receives from interested parties on the need for regulations regarding this topic.

K. Creation of New Associations

Section 611.1040 sets forth the requirements for the creation of new associations, including PCAs, FLBAs and ACAs. The FCCA commented that this section implies that ACA's do not have the authority to make long-term real estate loans and recommends that the regulation be amended accordingly.

Section 611.1040 merely identifies the procedural requirements necessary for obtaining charters for associations and is not an attempt to specify the various powers, duties, and authorities of those associations, which are matters addressed throughout other FCA regulations. For instance, the specific lending powers of associations, including ACAs, are addressed in a proposed regulation approved by the FCA Board on September 28, 1988 (53 FR 44438). However, to eliminate any ambiguity regarding the interpretation of § 611.1040, a technical amendment was adopted in the final regulation which deletes the reference to the authorities of ACAs.

L. Requirements for Mergers or Consolidations

The proposed regulation would amend § 611.1122(e) by requiring the inclusion of additional materials in the disclosure statement distributed to stockholders in connection with mergers. The FCCA questioned why 3-year financial projections should be mandatory, since it would be likely that there would be factors beyond the control of institutions that could have a material impact on those projections. The FCCA commented that if such projections are mandated, the agency should provide instructions regarding their preparation and, in addition, should provide a "safe harbor" rule which would protect an institution if the statement was prepared with a reasonable basis and was disclosed in good faith.

The FCA Board agrees with the FCCA comment and notes that the inclusion of 3-year financial projections in the disclosure statement distributed to stockholders was a technical error in the proposed regulation. The 3-year financial projections were not intended to be included under § 611.1122(e). They were intended to be supplemental material submitted to the affiliated banks and to the FCA as an aid in the approval of the merger proposal. The final regulation has been amended accordingly.

The FCA Board disagrees with the FCCA suggestion that the regulations governing the preparation of financial projections include a "safe harbor" rule to protect institutions in the event they may want to include this information in disclosure statements distributed to stockholders. As stated above, financial projections are required as additional material to be used by affiliated banks and the FCA to aid in the review and approval of merger proposals, not as disclosure documents to be distributed to stockholders. The FCA Board recognizes that other Federal regulators permit the inclusion of forward-looking financial information in stockholder disclosures, if prepared in accordance with rules governing their preparation and presentation. The Board is concerned that very little benefit, but much harm, could result from the inclusion of prospective financial statements in stockholder disclosures in such an unsettled and dynamically changing System environment as the current one, no matter how "reasonable" the assumptions or other basis used to prepare and present such projections. However, the Board believes the suggestion merits further study and will consider any comments or recommendations it receives on this subject during its normal regulatory review process and will propose amendments to the regulations as appropriate.

M. Merger or Consolidation Agreements

The proposed regulations included amendments to § 611.1123 regarding the content of association merger agreements. Section 611.1123(a)(9) requires merger and consolidation agreements to include the capitalization plan and capital structure of the new institution and a statement that such plan would comply with all FCA regulations and be approved by the stockholders of the institution. The FCCA commented that the regulation appears to contemplate that the institution's capitalization plan, i.e., the board and management strategy for complying with the capital regulations, must be included in the bylaws and submitted for stockholder approval. The FCCA asserted that this is contrary to the requirements of section 4.3A of the Act, which does not require capitalization plans be included as part of the bylaws. The FCCA stated that section 4.3A only requires that the bylaws will "enable the institution to meet the capital adequacy standards." The FCCA asserted that an institution's capitalization plan is a key element of its business strategy and that requiring the institution's stockholders to approve the plan would be "intolerable."

The FCA Board agrees with the FCCA's comment that the Act does not require the institution to include its capitalization plan in the institution's bylaws and amended the final regulation to delete this requirement. However, the bylaws must comply with capitalization bylaw regulations at 12 CFR 615.5220–5240. The final regulation continues to require that the merger agreement include the capitalization plan of the resulting entity. This requirement is necessary to ensure that the parties to a merger agree on the capitalization plan which will be used by the institution to achieve its minimum capital standards. The FCA Board believes that the stockholders of the institutions involved in a merger must be provided access to this information in connection with their review of the disclosure documents to determine their position with respect to the merger. This regulation does not in any way alter the prerogative of the board of the new institution to make adjustments to its capitalization plan as it deems appropriate.

Section 611.1122(g) of the proposed regulations sets forth the procedures necessary to ensure that stockholders

can exercise their right to reconsider a vote. The FCCA commented that this section would have the effect of enabling the FCA to independently determine on what date a merger would be effective, and that such authority is not consistent with the provisions of section 7.9(b)(5) of the Act. That section provides that if a petition for reconsideration is not filed within 30 days following the notification of the merger vote, the merger shall be effective in accordance with the date specified in the plan of merger. The FCA Board agrees that the proposed regulation was subject to the interpretation advanced by the FCCA. Since that was not the intent of the regulation, it has been amended to address the concern. The intent of the proposed regulation was to ensure that the stockholders would be afforded the opportunity to file motions for reconsideration and to enable the FCA to process the documents and grant the final approval after the expiration of the reconsideration period. The proposed regulation was not intended to imply that the FCA could establish any effective date for a merger. However, there are instances in which the necessary documentation is not provided to the FCA in time to permit a final approval before the proposed effective date. The regulation must provide for this situation by enabling the FCA to delay the effective date when necessary. The FCA Board has amended § 611.1122(g) and added a new paragraph (k) which address these issues by providing that the effective data of a merger or consolidation shall be a date which is not less than 50 days after the date of mailing of the notification of results of the stockholder vote. This 50-day period takes into consideration the statutory 30-day waiting period, a period of 5 days from the date the notification is mailed to provide for delivery, and 15 days for FCA's reviews of the documents. If no petition to reconsider the vote is filed within 35 days after the date of mailing of the notification to stockholders, the merger or consolidation shall be effective upon final approval by the FCA on the date specified in the merger agreement, or at such later date as may be required by the FCA to grant final approval. For the same reasons, the FCA Board has amended § 611.505 (d) and (e) to provide the same requirements with respect to the effective dates for transfers of lending authority between FCBs and FLBAs.

Section 611.1123(c) authorizes stockholders to file a petition to reconsider a vote and further provides that if such petition is approved by the FCA, a special stockholders meeting will be held to conduct the reconsideration vote. The FCCA sought a clarification of the extent of the "FCA's approval" of a stockholder petition and commented that such approval should be limited to determining whether the petition complies with statutory requirements. The FCA Board agrees that the FCA approval set forth in the proposed regulations is limited to determining whether the petition meets the requisite statutory standards and did not intend to expand such approval to other areas. In light of the FCCA comment, the FCA Board amended the final regulation to provide that FCA review of a stockholder petition is for the purpose of determining whether the petition complies with the requirements of section 7.9 of the Act.

Section 611.1123(c) provides that if a proposed merger is disapproved upon reconsideration by the majority of the stockholders of any one of the institutions that is a constituent to the merger, the merger shall not take place. The FCCA stated that this provision is inconsistent with section 7.9 of the Act. In support of its position, the FCCA stated that section 7.9(b)(4) of the Act provides that a majority of stockholders voting, in person or by written proxy, may disapprove a previously approved merger. The FCA Board notes that it was not intended that the proposed regulation establish a different standard than is specified in the statutes and has amended the final regulation to clarify this point.

The FCCA also commented that § 611.1123(c) purports to authorize all stockholders to vote on a reconsideration vote rather than limiting such voting to "stockholders eligible to vote." The FCA Board does not agree that this is a reasonable interpretation of the regulation. There are references to stockholder votes in numerous FCA regulations and in most instances the regulations do not repeat the words "stockholders eligible to vote." There is no need to continually restate this phrase because the Act and the bylaws of the institutions specify the voting eligibility requirements for stockholders. This section is not designed to, nor does it, confer eligibility to vote on stockholders who are not authorized to vote under the Act or the bylaws of the institutions.

The FCCA commented that the proposed regulations do not clarify what the effective date of a merger would be if a reconsideration vote were held and the merger were approved upon reconsideration. In response to this comment, the Board notes that since the parties proposing the merger are responsible for proposing a merger date, it is assumed that they would also be responsible for proposing a second effective date for the merger after a reconsideration vote. For this reason, this matter was not specifically addressed in the proposed regulation. However, in light of the FCCA comment, the Board determined that this matter should be specifically addressed in the regulation. Accordingly, the final regulations include a new § 611.1122(k) which provides that if a petition for reconsideration is timely filed, the constituent institutions shall agree on a second effective date to be used in the event the merger or consolidation is approved on reconsideration. To ensure that the FCA has an opportunity to review the documents and grant final approval, the regulation further provides that such an effective date shall be not less than 15 days after the date of the reconsideration vote.

The FCCA commented that § 611.1123(c) does not clarify that only stockholders eligible to vote on a merger can be eligible to sign a reconsideration petition. The FCCA noted that the statute also does not clarify this point and requested that the FCA use its regulatory authority to address this concern. As discussed earlier, the FCA believes it is clear that when the statute and regulations refer generally to an event that requires stockholder approval, those statutory or regulatory authorities do not confer eligibility to vote on stockholders who are not otherwise eligible under the Act or the bylaws of the institution. Similarly, it would be incongruous to permit a stockholder to sign a petition for reconsideration if such stockholder were not eligible to vote on the merger or the reconsideration of the merger vote. However, the FCA Board believes that there may be some ambiguity regarding this question and has amended the final regulation to clarify that the petition must be signed by 15 percent of the stockholders who are eligible to vote of one or more of the constituent institutions.

N. Territorial Adjustments

Section 433 of the 1987 Act permits the stockholders of an FLBA or PCA whose chartered territory adjoins the territory of an FCB that the association is not affiliated with to petition the FCA to incorporate the petitioning association into the territory of the adjoining FCB. The FCA did not propose regulations governing this process because the statutory provisions are clear and the

FCA's existing regulation § 611.1124 adequately addresses the requirements for transfers of territory. Section 611.1124 sets forth the requirements and procedures to be followed in order for associations to modify charters for the purpose of tranferring territories to other associations. In its comments, the Farm Credit Bank of Texas (Texas FCB) agreed that the requirements of section 433 of the 1987 Act are clear, and that § 611.1124 provides guidance for voluntary reassignment of an association to an adjoining FCB. However, the Texas FCB suggested that the FCA should clarify the extent to which the individual requirements of § 611.1124 apply to section 433 reassignments, and recommended a number of clarifying amendments to § 611.1124.

The FCA Board agrees that not all of the provisions of § 611.1124 apply to section 433 reassignments. The FCA Board notes, however, that the opportunity for an association to petition for a section 433 reassignment is a temporary one that will end on January 6, 1989. In light of this abbreviated timeframe, the FCA has provided requesting associations with specific instructions which clarify the applicability of the § 611.1124 requirements to section 433 reassignments. The FCA took into consideration the recommendation of the Texas FCB and other parties in developing those instructions.

O. Special Reconsideration of Mergers

Sections 611.1190 and 611.1191 provide for the reconsideration of the voluntary mergers and consolidations of associations that occurred after December 23, 1985 and prior to January 6, 1988. The proposed regulations provide that a reconsideration can be initiated by a stockholder petition or by the adoption of a resolution by the existing association board of directors. Petitions can provide for either the withdrawal of one or more predecessor associations from the current association, or for the general reorganization of an existing association that was formed by the merger of three or more predecessor associations. Director resolutions can provide for the adoption of a general reorganization of the existing association.

Section 611.1192 establishes that petitions must be signed by at least 15 percent of the voting stockholders of the existing association who were stockholders of each of the predecessor associations that seek to withdraw, or by 5 percent of the total number of voting stockholders of the existing association if the petition seeks a general reorganization of the existing association that was formed by three or more predecessor associations. In their comments, the FCCA and South Atlantic PCA agreed that the board of directors should be authorized to adopt a resolution proposing a general reorganization, but expressed the view that no statutory basis exists for allowing 5 percent of the stockholders to seek a general reorganization of the existing association. The South Atlantic PCA went on to state its concern regarding the disruption to operations and added expense that would result from these special reconsideration petitions. The Fourth District PCA and FLBA commented that the 5 percent initiative was an arbitrary expansion of the specific criteria provided in the Act.

The FCA Board does not agree with the commenters that no basis exists for allowing 5 percent of the stockholders to seek a general reorganization of the existing association. The FCA has general rulemaking authority to ensure that the overall intent of the statute is given effect. Toward that end, the FCA Board has determined that it is appropriate to provide a mechanism by which the expression of a substantial interest among the stockholders of an existing association to reorganize their association can be realized. The FCA Board believes that if a substantial interest for reorganization exists among an existing association's stockholders, a petition of 5 percent of the total voting membership would give a more cost-effective and less disruptive mechanism for allowing the realization of that interest than by requiring the stockholders to file numerous petitions for the individual withdrawal of many associations from the merged associations. It is also noted that this 5 percent threshold only applies to an association formed by the merger of three or more associations. In those instances, the number of shareholders who have to sign such a petition would approximate the number of shareholders who have to sign a petition for the withdrawal of an association using the 15 percent requirement. The FCA Board also notes that a proposal to withdraw or reorganize, whether initiated by a 5 percent petition, a 15 percent petition, or the adoption of a resolution by the board of directors, can only be consummated if it is agreed to by a majority of the stockholders who would be served by the separating or reorganizing association.

Section 611.1192(c) requires each petition to describe the manner in which the existing association will be reorganized and the territory in which each proposed separate association would operate. The FCCA suggested that the regulation should more clearly indicate what flexibility there is for petitions to create a new territory that is different from the territory of a predecessor association. The FCA Board believes that the present language addresses this concern by placing no limits on the flexibility that a petitioning group of stockholders has in proposing the new territories for the associations that would result from a reorganization of the entire association. However, the Board agrees that the regulation should clarify that, consistent with the intent of section 7.9 of the Act, when an association withdraws from a merged association, it will have the same territory it had prior to the merger.

Section 611.1192(d) requires a special reconsideration petition to be certified and forwarded to the FCA within 5 working days of its receipt by the association. The South Atlantic PCA expressed the view that since § 611.1193 requires the petition to be accompanied by the stockholder information statement and other documentation, 5 days is not sufficient time to complete the process. The FCA Board agrees with this concern, which resulted from the requirement in § 611.1193 that the petition be accompanied by the disclosure materials at the time it is filed with the FCA. To address this matter, § 611.1193 has been amended to provide that the association shall have 60 days after the filing of the petition to submit the disclosure materials and other documentation to the FCA for approval. The Board made a conforming change to § 611.1195 relating to the date of the stockholder vote.

Section 611.1192(e) provides that no petition will be considered by the FCA if filed later than 1 year from the effective date of the regulations. The South Atlantic PCA has assumed that the non-statutory initiatives included in the regulations on special reconsideration would also be limited to the 1-year period. The assumption made by the South Atlantic PCA is correct—no petitions would be considered by the FCA Board under Subpart O after the 1-year period. The FCA Board notes, however, that Subpart O only refers to special reorganization petitions or resolutions related to mergers or consolidations that occurred after December 23, 1985 and before January 6, 1988, and that the opportunity for association boards of directors to submit reorganization proposals to the FCA for review and approval in anticipation of stockholder votes is

neither limited nor removed by § 611.1192(e).

Section 611.1194 sets forth the procedures for FCA review and approval regarding special reconsideration requests. The FCCA commented that the FCA should incorporate standards for FCA review and approval. Rather than include evaluative criteria in the regulations, the FCA Board continues to believe that each transaction should be evaluated according to the specific circumstances presented. For the reasons set forth in response to the same comment regarding § 611.1010, the FCA Board believes that no change to the regulation is necessary or appropriate. The FCCA also commented that the term "promptly" be inserted to appropriately clarify each phase of the notification process. The FCA Board agrees with the intent expressed by the FCCA, but does not believe that a specific amendment to the regulation is required. The FCA makes every effort to process requests for approval and any other documents requiring FCA action as expeditiously as possible and subject to applicable statutory requirements.

Section 611.1195 sets forth the requirements for stockholder votes related to special reconsideration petitions or resolutions. The Fourth District PCA and FLBA and the FCCA expressed the view that Congress imposed a more stringent voting requirement for special reconsideration votes, which would require that a majority of all of the stockholders eligible to vote must approve the reconsideration, not just a majority of the stockholders voting on the proposal. The FCCA based its view on the fact that the specific language of the Act regarding the voting requirements on special reconsideration is somewhat different from the language used elsewhere in the Act concerning other stockholder votes. The FCA Board agrees with this comment and has amended the final regulation accordingly.

Section 611.1197 of the proposed regulations provides that the notice of meeting to consider and act upon petitions must be accompanied by an information statement that shall be prepared by the existing association with the assistance of the petitioners, or at their discretion, by the petitioners. The Fourth District PCA and FLBA, the FCCA, and the South Atlantaic PCA commented that this section was unclear as to who would have the ultimate responsibility to prepare the notice and information statement. Each suggested that the existing association should have the responsibility or, at least, the right to finally review and approve the documents before their submission to the FCA. The South Atlantic PCA expressed the view that the costs associated with conducting a stockholder meeting, such as the preparation of notices and disclosure materials, should be borne by the petitioners.

The FCA Board agrees with the commenters that the regulations should clarify who has ultimate responsibility and accountability for the notice, information statement and plan of reorganization submitted to the FCA for approval. However, the FCA Board recognizes that potential conflicts could surface between the existing association and the petitioning stockholders since a withdrawal action initiated by petitioners may not be supported by the board of directors of the existing association. For this reason, the FCA Board believes that the rights and interests of both parties must be treated as fairly and equitably as possible, while permitting petitioning stockholders their right to reconsider association mergers completed between December 24, 1985 and January 5, 1988. Accordingly, the FCA Board has determined that the petitioning stockholders must select a proposed initial board of directors who will be responsible for signing the notice, information statement, and plan of reorganization submitted to the FCA for approval. Additionally, the existing association must provide whatever assistance the petitioners may request to develop the aforementioned documents and to assure completeness and accuracy. Section 611.1193(a), and § 611.1197 have been amended to incorporate these requirements.

Regarding the issue of who should pay the costs incurred in connection with a special reconsideration, the FCA Board believes that the stockholders of the resulting association(s) should bear these expenses in those circumstances where a reconsideration vote is approved. However, in those situations where the reconsideration is disapproved, the FCA Board believes that the expenses involved must be borne by the existing association. The Board understands that the enactment of section 7.9 was motivated in part by a concern that shareholders of some former associations may have been unduly influenced to approve a merger proposal during the affected time period and that those shareholders should be given an opportunity to fully reconsider their earlier votes. The FCA Board believes that the only way to give full effect to this right is for shareholders to be able to initiate a petitioning action without having to bear the expenses of the vote if the proposal to withdraw is defeated. The FCA Board also believes the existing association should view the payment of expenses noted above as the cost of doing business to retain the benefits it already enjoys. Additionally, the existing association will benefit materially if the predecessor association does not withdraw because it will have the opportunity to provide credit services to the borrowers of the predecessor association. Accordingly, § 611.1196 has been revised in its entirety to provide that, unless the parties to a reconsideration agree otherwise, the costs shall be borne by the existing association if the reconsideration is disapproved, or by the resulting association if the reconsideration is approved. In addition, a technical correction has been made in § 611.1193(b)(5) to include the provision relating to the notice of meeting that was previously contained in § 611.1196.

Section 611.1197 sets forth the requirements for an information statement to be prepared in conjunction with a special reconsideration petition. The FCCA suggested that the statement enumerating the advantages and disadvantages required by § 611.1197(b)(3) should address "anticipated" advantages and "potential" disadvantages. The FCCA also stated that the regulation should clarify whether each of the areas of advantages and disadvantages specified in the regulation must be addressed in the disclosure documents. The FCA Board agrees that the addition of descriptive modifiers such as "anticipated" and "potential" would enhance the understanding of the regulation's requirements and has amended the final regulation accordingly. In response to the FCCA's second comment, the FCA Board notes that the list of potential advantages and disadvantages was not intended to be exhaustive or mandatory, but only illustrative. The final regulation has been amended to clarify this point.

Section 611.1198 provides for the development of a plan of reorganization that shall accompany a petition for special reconsideration under Subpart O, and enumerates the requirements of the reorganization plan, including a provision for the distribution of assets and liabilities of the existing association and a description of the basis upon which the distribution is to be made. The FCCA and the South Atlantic PCA suggested that the regulation should be amended to provide more specific

VOL 53 ISS 241 DE 15 1988 UMI

guidance concerning the manner in which assets and liabilities will be valued and distributed, and the manner in which the parties should negotiate areas of dispute. The Board disagrees with the need for regulations addressing these concerns. As with the case of a merger, valuation methods and allocations of assets are matters that must be agreed to by the parties to the transaction. However, unlike a regular merger proposal, the Act gives the stockholders of petitioning associations the right to reconsider past mergers. If the existing association and the petitioning stockholders are unable or unwilling to agree to the essential terms for the reconsideration, the FCA Board may be required to determine whether one of the parties is attempting to preclude the other from exercising its statutory rights. The FCA Board hopes that this situation does not arise and encourages all parties to cooperate in giving maximum effect to the intent of Congress.

P. Disclosure Statement Requirement for Bank Director Candidates

Section 620.30 establishes the requirements for the preparation and distribution of disclosure statements regarding candidates for election to the board of directors of a bank. The FCCA commented that this section should be amended to clarify that it applies only to directors elected by stockholders, and not to the outside director elected by the other members of the board. The FCA Board agrees that this point should be clarified and has amended the final regulation accordingly. However, the FCA Board would encourage the elected directors of an institution to obtain the same type of information specified in § 620.30 regarding candidates for the outside director(s) position to assist them in selecting the best possible candidate for that position.

Q. Contents of Disclosure Statements

Section 620.31 sets forth the requirements for the contents of disclosure statements submitted to stockholders in connection with the election of bank directors. The FCCA agreed with the intent of the proposed regulation to make the disclosure requirements for bank director candidates consistent with existing disclosure requirements for association director candidates. To achieve that end, the FCCA commented that proposed § 620.31(d) does not include a provision comparable to § 620.3(j)(3)(i)(C). The FCA Board notes that the proposed regulation is consistent with § 620.3(j) since that section was amended on February 5, 1988 to delete the provision referenced by the FCCA (53 FR 3334). The FCCA also commented that proposed § 620.31(e)(1) is not consistent with § 620.3(k)(1) because it does not require disclosure related to "any corporation or business association of which (the candidate) was a senior officer at or within 2 years before the time of such filing," which provision is contained in the comparable § 620.3(k)(1). This was an inadvertent omission from the proposed regulation, and the final regulation has been amended to include this provision. The FCCA also commented that the proviso in proposed § 620.31(d)(2), which exempts from certain disclosure requirements directors who resign or whose term of office expires, would not be applicable to the disclosure statements required by this section. The FCA Board agrees that the proviso would not be operative within the context of the disclosure requirement contained in this regulation, and the final regulation has been amended to delete this inoperative language.

List of Subjects in 12 CFR Parts 611, 612, 618, and 620

Accounting, Agriculture, Archives and records, Banks, banking, Conflict of interests, Insurance, Organizations and functions (Government agencies), Reporting and recordkeeping requirements, Rural areas, Technical assistance.

For the reasons stated in the preamble, Parts 611, 612, 618 and 620 of Chapter VI, Title 12, of the Code of Federal Regulations are amended as follows:

PART 611—ORGANIZATION

1. The authority citation for Part 611 continues to read as follows:

Authority: Secs. 1.3, 1.13, 2.0, 2.10, 3.0, 3.21, 4.12, 4.15, 5.0, 5.9, 5.10, 5.17, 7.0–7.13; 12 U.S.C. 2011, 2031, 2071, 2091, 2121, 2142, 2183, 2203, 2221, 2243, 2244, 2252, 2279a–2279f–1; secs. 411 and 412 of Pub. L. 100–233.

Subpart A—[Removed and Reserved]

2. Part 611, Subpart A, consisting of § 611.100, is removed and reserved.

3. Part 611, Subpart C, consisting of §§ 611.310 through 611.340, is added to read as follows:

Subpart C—Election of Directors

Sec.

611.310 Eligibility for membership on bank and association boards and subsequent employment.
611.320 Impartiality in the election of directors.
611.330 Confidentiality in the election of directors.
611.340 Security in the election of directors.

Subpart C—Election of Directors

§ 611.310 Eligibility for membership on bank and association boards and subsequent employment.

(a) No person shall be eligible for membership on a bank or association board who is or has been, within 1 year preceding the date the term of office begins, a salaried officer or employee of any bank or association in the System.

(b) No bank or association director shall be eligible to continue to serve in that capacity and his or her office shall become vacant if after election as a member of the board, he or she becomes legally incompetent or is convicted of a felony or held liable in damages for fraud.

(c) No bank director shall, within 1 year after the date when he or she ceases to be a member of the board, serve as a salaried officer or employee of such bank, or any association with which the bank has a discount of agent relationship.

(d) No director of an association shall, within 1 year after he or she ceases to be a member of the board, serve as a salaried officer or employee of such association.

§ 611.320 Impartiality in the election of directors.

(a) Each System institution shall adopt policies and procedures that are designed to assure that the elections of board members are conducted in an impartial manner.

(b) No employee or agent of a System institution shall take any part, directly or indirectly, in the nomination or election of members to the board of directors of a System institution, or make any statement, either orally or in writing, which may be construed as intended to influence any vote in such nominations, or elections. This paragraph shall not prohibit employees or agents from providing biographical and other similar information or engaging in other activities pursuant to policies and procedures for nominations and elections. This paragraph does not affect the right of an employee or agent to nominate or vote for directors of an institution in which the employee or agent is a voting member.

(c) No property, facilities, or resources of any System institution shall be used by any candidate for nomination or election or by any other person for the benefit of any candidate for nomination or election, unless the same property,

facilities, or resources are simultaneously available and made known to be available for use by all declared candidates.

(d) No director, employee, or agent of a System institution shall, for the purpose of furthering the interests of any candidates for nomination or election, furnish or make use of records that are not made available for use by all declared candidates.

(e) No System institution shall distribute or mail either directly or at the expense of the institution, any campaign materials for director candidates. Institutions shall request biographical information from all declared candidates who certify that they are eligible, restate such information in a standard format, and distribute or mail it with ballots or proxy ballots.

§ 611.330 Confidentiality in the election of directors.

(a) Each System institution shall adopt policies and procedures that assure that all information regarding how or whether individual stockholders have voted and all materials such as ballots, proxy ballots, election records, and other relevant documentation related to the votes of stockholders shall be held in strict confidence. Such information and materials shall not be disclosed to any person, except as required by the Farm Credit Administration in the event an election is contested, or otherwise.

(b) Except as provided in this paragraph, System institutions shall not use ballots or proxy ballots that must be signed by the stockholder or that contain an identifying character or mark that can be used to identify how an individual stockholder's vote is cast. Institutions may adopt procedures which require the stockholders to sign or otherwise verify their eligibility to vote on an envelope which contains a marked ballot in a sealed envelope. Institutions may also use signed proxy statements or eligibility certificates which will accompany a ballot or instructions on how to vote the proxy in a separate sealed envelope. Where the identity of the voting stockholders is necessary to determine the voting weight of ballots, the institution shall use a form of identity code on the ballot and shall require that the votes are tabulated by an independent party.

(c) When an institution receives a ballot by mail or at a meeting, the vote of such stockholder shall be final. When proxy voting is permitted, a stockholder voting by proxy may revoke the proxy prior to balloting at the stockholders meeting.

§ 611.340 Security in the election of directors.

(a) Each System institution shall adopt policies and procedures that assure the security of all records and materials related to the election of board members including, but not limited to, ballots, proxy ballots, and other related materials.

(b) Bank and association procedures shall assure that ballots and proxy ballots are provided only to stockholders who are eligible to vote.

(c) Ballots and proxy ballots shall be physically safeguarded before the time of distribution or mailing to voting stockholders and after the time of receipt by the banks and associations until disposal. Ballots, proxy ballots, and election records shall be retained until the end of the term of office of the director and promptly destroyed thereafter.

(d) The election procedures of each institution shall provide for the establishment of a tellers committee or other designated group of persons which shall be responsible for validating ballots and proxies and tabulating election results. An institution and its officers, directors and employees shall make no public announcement of the results of an election before the tellers committee or other designated persons have validated the results of the election.

§ 611.400 [Removed]

§ 611.1020 [Redesignated as § 611.400]

4. Part 611 is amended by revising the heading of subpart D, removing existing § 611.400, revising the heading of § 611.1020 of Subpart F and redesignating it as new § 611.400 of Subpart D to read as follows:

Subpart D—Rules for Compensation of Board Members

§ 611.400 Compensation of Bank Board members.

5. Part 611, Subpart E, consisting of §§ 611.500 through 611.525, is revised to read as follows:

Subpart E—Transfer of Authorities

Sec.

611.500 General.
611.501 Procedures.
611.505 Farm Credit Administration review.
611.510 Approval procedures.
611.515 Information statement.
611.520 Plan of transfer.
611.525 Stockholder reconsideration.

Subpart E—Transfer of Authorities

§ 611.500 General.

Each Farm Credit Bank or Agricultural Credit Bank is authorized, in accordance with § 7.6 of the Act, to transfer certain authorities to Federal land bank associations. The regulations in this subpart set forth the procedures and voting and approval requirements applicable to such transfers.

§ 611.501 Procedures.

(a) The boards of directors of a bank and an association which seek to transfer authorities may adopt appropriate resolutions approving such transfer and providing for the submission of such a proposal to their respective stockholders for a vote.

(b) The resolutions accompanied by the following information shall be submitted to the Farm Credit Administration for review and approval:

(1) Any proposed amendments to the charters of the institutions;

(2) A copy of the transfer plan as required under § 611.520 of this part;

(3) An information statement that complies with the requirements of § 611.515;

(4) The proposed bylaws of the bank and the association, as applicable; and

(5) Any additional information the boards of directors wish to submit in support of the request or that the Farm Credit Administration requests.

§ 611.505 Farm Credit Administration review.

(a) Upon receipt of the board of directors resolution and the accompanying documents, the Farm Credit Administration shall review the request and either deny or give its preliminary approval to the request.

(b) If the request is denied, written notice stating the reasons for the denial shall be transmitted to the chief executive officer of the bank and the association who shall promptly notify their respective boards of directors.

(c) Upon approval of the proposed transfer of authorities by the stockholders as provided in § 611.510, the secretary of the bank and the secretary of the association shall forward to the Farm Credit Administration a certified record of the results of the stockholder votes.

(d) Each institution shall notify its stockholders not later than 30 days after the stockholder vote of the final results of the vote. If no petition for reconsideration is filed with the Farm Credit Administration in accordance with § 611.525, the transfer shall be effective on the date specified in the transfer plan, or at such later date as may be required by the Farm Credit Administration to grant final approval. Notice of final approval shall be transmitted to the institutions involved.

(e) The effective date of a transfer shall be a date which is not less than 50

days after the notification of the results of the stockholder vote. If a petition for reconsideration is filed within 35 days after the date of mailing of the notification of stockholder vote, the constituent institutions shall agree on a second effective date to be used in the event the transfer is approved on reconsideration. The second effective date shall not be not less than 15 days after the date of the reconsideration vote.

§ 611.510 Approval procedures.

(a) Upon receipt of approval of a resolution by the Farm Credit Administration, the bank and the association shall call a meeting of their voting stockholders. Each institution shall notify each stockholder that the resolution has been filed and that a meeting will be held in accordance with the institution's bylaws. The stockholders meeting of the bank and the association shall be held within 60 days of receipt of the approval from the Farm Credit Administration.

(b) The notice of meeting to consider and act upon the directors' resolution shall be accompanied by an information statement that complies with the requirements of § 611.515.

(c) The proposal shall be approved if agreed to by:

(1) A majority of the stockholders of the bank voting in person or by proxy, with each association entitled to cast a number of votes equal to the number of its voting stockholders;

(2) A majority of the stockholders of the association voting, in person or by proxy;

(3) the Farm Credit Administration.

§ 611.515 Information statement.

(a) The bank and association shall prepare an information statement which will inform stockholders about the provisions of the proposed transfer of authorities and the effect of the proposal on the bank and the association.

(b) The information statement for each institution involved shall contain the following materials as applicable to the institution:

(1) A statement either on the first page of the materials or on the notice of the stockholders meeting, in capital letters and boldface type, that:

THE FARM CREDIT ADMINISTRATION HAS NEITHER APPROVED NOR PASSED UPON THE ACCURACY OR ADEQUACY OF THE INFORMATION ACCOMPANYING THE NOTICE OF MEETING OR PRESENTED AT THE MEETING AND NO REPRESENTATION TO THE CONTRARY SHALL BE MADE OR RELIED UPON.

(2) A description of the material provisions of the plan under § 611.520 and the effect of the transaction on the institution, its stockholders, and the territory to be served.

(3) A statement enumerating the potential advantages and disadvantages of the proposed transfer including, but not limited to, changes in operating efficiencies, one-stop service, branch offices, local control, and financial condition.

(4) A summary of the provisions of the charter and bylaws following the transfer that differ materially from the charter or bylaws currently existing.

(5) A brief statement by the board of directors of the institution setting forth the board's opinion on the advisability of the transfer.

(6) A presentation of the following financial data:

(i) An audited balance sheet and income statement and notes thereto of the bank or the association, as applicable, for the preceding 2 fiscal years.

(ii) If the transfer of authority includes any material transfer of assets, a balance sheet and income statement of the bank and the association showing its financial condition before the transfer of authority and a pro forma balance sheet and income statement for the bank or association, as applicable, showing its financial condition after the transfer. The statements shall meet the following conditions:

(A) Such financial statements shall be presented in columnar form, showing the financial condition as of the end of the most recent quarter of the institution, and operating results since the end of the last fiscal year through the end of the most recent quarter of the institution.

(B) If the request is made within 90 days after the end of the fiscal year, the institution's financial statements shall be as of the most recent fiscal yearend.

(C) If the request is made within 45 days after the end of the most recent quarter, the institution's financial statements shall be as of the end of the quarter preceding the quarter just ended.

(D) If the request is made more than 45 days after the end of the most recent quarter, the institution's financial statements shall be as of the end of that quarter.

(E) The financial statements must be accompanied by appropriate notes, describing any assets being transferred and including data relating to nonperforming loans and related assets, allowance for loan losses, and current year-to-date chargeoffs.

(F) The amount and nature of start-up costs estimated to be associated with the transfer.

(7) A description of the type and dollar amount of any financial assistance that has been provided to the bank or the association, as applicable, during the past year; the conditions on which the financial assistance was extended, the terms of repayment or retirement, if any; and, the liability for repayment of this assistance by the bank or the association if the transfer were approved.,

(8) A statement as to whether the bank or the association, as applicable, would require financial assistance during the first 3 years of operation, the estimated type and dollar amount of the assistance, and terms of repayment or retirement, if known.

(9) A statement indicating the possible tax consequences to stockholders and whether any legal opinion, ruling or external auditor's opinion has been obtained on the matter.

(10) A presentation of the association's interest rate and fee programs, interest collection policy, capitalization plan and other factors that would affect a borrower's cost of doing business with the association.

(11) A description of any event subsequent to the date of the last quarterly report, but prior to the stockholder vote, that would have a material impact on the financial condition of the bank or the association.

(12) A statement of any other material fact or circumstances that a stockholder would need in order to make an informed and responsible decision, or that would be necessary in order to provide a disclosure that is not misleading.

(13) A form of written proxy, together with instructions on its purpose, use and authorization by the stockholder. The proxy instructions must ensure the secrecy of the stockholder's ballot if the stockholder votes by proxy.

(14) A copy of the plan of transfer provided for in § 611.520 of this part.

(c) No bank or association director, officer, or employee shall make any untrue or misleading statement of a material fact, or fail to disclose any material fact necessary under the circumstances to make statements made not misleading, to a stockholder of the association in connection with a transfer under this subpart.

§ 611.520 Plan of transfer.

The transfer of authorities and assets, as appropriate, shall occur pursuant to a written plan which shall be agreed to by the bank and the association involved. The written plan shall include the following:

(a) An explanation of the value of the equity ownership as of the last monthend held by stockholders of the bank and the association and the impact, if any, of the transfer on the value of that equity.

(b) If the plan provides for a transfer of assets, a description of the terms and conditions upon which such transfer will occur, including, but not limited to, any warranties or representations regarding the value of such assets.

(c) A description of how the association would obtain loan funds after the transfer.

(d) A statement on how the expenses connected with the transfer are to be borne by the affected parties.

(e) A statement of any conditions which must be satisfied prior to the effective date of the transfer, including but not limited to approval by stockholders and approval by the Farm Credit Administration.

(f) A statement that prior to the effective date of the transfer the board of directors of the bank or the association may rescind its resolution and void the transfer, with the concurrence of the Farm Credit Administration, on the basis that:

(1) The information disclosed to stockholders contained material errors or omissions;

(2) Material misrepresentations were made to stockholders regarding the impact of the transfer;

(3) Fraudulent activities were used to obtain the stockholders' approval; or,

(4) An event occurred between the time of the vote and the transfer that would have a significant adverse impact on the future viability of the association.

(g) A designation of those persons who have authority to carry out the plan of transfer, including the authority to execute any documents necessary to perfect title, on behalf of the bank and the association.

§ 611.525 Stockholder reconsideration.

(a) Stockholders have the right to reconsider the approval of the transfer provided that a petition signed by 15 percent of the stockholders of either institution involved in the transfer is filed with the Farm Credit Administration within 35 days after the date of mailing of the notification of the final results of the stockholder vote required under § 611.505(d) and such petition is approved by the Farm Credit Administration.

(b) A special stockholders meeting shall be called by the institution to vote on the reconsideration following the Farm Credit Administration's approval of a stockholder petition to reconsider the transfer. If a majority of stockholders of any institution involved in the transfer votes against the transfer, the transfer is not approved.

6. Part 611, Subpart F, consisting of §§ 611.1000 through 611.1040, is revised to read as follows:

Subpart F—Bank Mergers, Consolidations and Charter Amendments

Sec.

611.1000 General authority.
611.1010 Bank charter amendment procedures.
611.1020 Requirements for mergers or consolidations of banks.
611.1030 Board of directors of an Agricultural Credit Bank.
611.1040 Creation of new associations.

Subpart F—Bank Mergers, Consolidations and Charter Amendments

§ 611.1000 General authority.

(a) An amendment to a bank charter may relate to any provision that is properly the subject of a charter, including, but not limited to, the name of the bank, the location of its offices, or the territory served.

(b) The Farm Credit Administration may make changes in the charter of a bank as may be requested by that bank and approved by the Farm Credit Administration pursuant to § 611.1010 of this part.

(c) The Farm Credit Administration may, in accordance with the provisions of the Act, make changes in the charter of a bank as may be necessary or expedient to implement the provisions of the Act.

§ 611.1010 Bank charter amendment procedures.

(a) A bank may recommend a charter amendment to accomplish any of the following actions:

(1) A merger or consolidation with any other bank or banks operating under Title I or III of the Act;

(2) A transfer of territory with any other bank operating under the same title of the Act;

(3) A change to its name or location;

(4) Any other change that is properly the subject of a bank charter;

(b) Upon approval of an appropriate resolution by the bank board, the certified resolution, together with supporting documentation, shall be submitted to the Farm Credit Administration for preliminary or final approval, as the case may be.

(c) The Farm Credit Administration shall review the material submitted and either approve or disapprove the request. The Farm Credit Administration may require submission of any supplemental materials it deems appropriate. If the request is for merger, consolidation, or transfer of territory, the approval of Farm Credit Administration will be preliminary only, with final approval subject to a vote of the bank's stockholders.

(d) Following receipt of the Farm Credit Administration's written preliminary approval, the proposal shall be submitted for approval to the voting stockholders of the bank. A proposal shall be approved if agreed to by a majority of the stockholders of each bank voting, in person or by proxy, at a duly authorized stockholder meeting with each association entitled to cast a number of votes equal to the number of the association's voting shareholders.

(e) Upon approval by the stockholders of the bank, the request for final approval and issuance of the appropriate charter or amendments to charter for the banks involved shall be submitted to the Farm Credit Administration.

§ 611.1020 Requirements for mergers or consolidations of banks.

(a) As authorized under sections 7.0 and 7.12 of the Act, a bank may merge or consolidate with one or more banks operating under the same or different titles of the Act.

(b) Where two or more banks plan to merge or consolidate, the banks shall jointly submit to the Farm Credit Administration the documents itemized in §§ 611.1122(a)(1)–(4), (6), (7), 611.1122(e), and 611.1123. In interpreting those sections, the word "bank" shall be read for the word "association."

(c) No bank director, officer, or employee shall make any untrue or misleading statement of a material fact, or fail to disclose any material fact necessary under the circumstances to make statements made not misleading, to any stockholder of the bank in connection with a bank merger or consolidation.

(d) Upon approval of a proposed bank merger or consolidation by the stockholders of each constituent bank, the following documents shall be submitted from the constituent banks to the Farm Credit Administration for final approval and issuance of the appropriate charters or amendments to charter:

(1) A certified copy of the stockholders' resolution, on which the stockholders cast their votes, from each constituent bank;

(2) A certification of the stockholder vote from the corporate secretary of each bank or from an independent third party;

VOL
53
ISS
241
DE
15
1988
UMI

(3) An Agreement of Merger or Consolidation duly executed by those authorized to sign on behalf of each constituent bank.

§ 611.1030 Board of directors of an Agricultural Credit Bank.

Each Agricultural Credit Bank formed by the consolidation of a Farm Credit Bank and a bank for cooperatives shall elect a board of directors of such number, for such term, in such manner, and with such qualifications, as may be required in its bylaws, except that at least one member shall be elected by the other directors, which member shall not be a director, officer, employee, or stockholder of a System institution. In electing such directors each association shall be entitled to cast a number of votes equal to the number of its voting stockholders.

§ 611.1040 Creation of new associations.

Any application for the issuance of a charter to a new production credit association or Federal land bank association shall meet the requirements of sections 2.0 or 2.10, respectively, of the Act. Any application for the issuance of a charter for an agricultural credit association shall meet the requirements of section 2.0 of the Act.

Subpart G—Mergers, Consolidations, and Charter Amendments of Associations

7. Section 611.1122 is amended by redesignating paragraphs (a)(5) and (a)(6) as paragraphs (a)(6) and (a)(7) and paragraphs (e)(11) through (e)(16) as paragraphs (e)(16) through (e)(21); adding new paragraphs (e)(11) through (e)(15); revising paragraph (g); and by adding new paragraphs (a)(5) and (k) to read as follows:

§ 611.1122 Requirements for mergers or consolidations.

* * * * *

(a) * * *

(5) Two signed copies of the continuing or proposed Articles of Association;

* * * * *

(e) * * *

(11) A management discussion and analysis of the financial condition and results of operation for the past 2 fiscal years for each constituent institution. This requirement can be satisfied by including the materials contained in the management discussion and analysis of each institution's most recent annual report.

(12) A discussion of any material changes in financial condition of each constituent institution from the end of the last fiscal year to the date of the interim balance sheet provided.

(13) A discussion of any material changes in the results of operations of each constituent institution with respect to the most recent fiscal-year-to-date period for which an income statement is provided.

(14) A discussion of any change in the tax status of the new institution from those of the constituent institutions as a result of merger or consolidation. A statement on any adverse tax consequences to the stockholders of the institution as a result of the change in tax status.

(15) A statement on the proposed institution's relationship with an independent public accountant, including any change that may occur as a result of the merger or consolidation.

* * * * *

(g) Upon approval of a proposed merger or consolidation by the stockholders of the constituent associations, a certified copy of the stockholders' resolution shall be forwarded to the Farm Credit Administration. Each constituent association shall notify its stockholders not later than 30 days after the stockholder vote of the final results of the vote. If no petition is filed with the Farm Credit Administration to reconsider the vote, upon final approval by the FCA, the merger or consolidation shall be effective on the date specified in the merger agreement or at such later date as may be required by the Farm Credit Administration to grant final approval. Notice of final approval shall be transmitted to the associations and a copy provided to the affiliated bank.

* * * * *

(k) The effective date of a merger or consolidation shall be a date which is not less than 50 days after the date of mailing of the notification of the results of the stockholder vote. If a petition for reconsideration is filed within 35 days after the date of mailing of the notification of the stockholder vote, the constituent institutions shall agree on a second effective date to be used in the event the merger or consolidation is approved on reconsideration. The second effective date shall be not less than 15 days after the date of the reconsideration vote.

8. Section 611.1123 is amended by redesignating paragraph (a)(9) as paragraph (a)(11), adding new paragraphs (a)(9) and (a)(10), and by adding paragraph (c) to read as follows:

§ 611.1123 Merger or consolidation agreements.

(a) * * *

(9) The capitalization plan and capital structure for the new institution and a statement that the capitalization plan shall comply with applicable FCA regulations.

(10) Provision for the employee benefits plan, its subsequent continuation or adaptation by the board of directors of the proposed institution following the merger or consolidation.

* * * * *

(c) Stockholders have the right to reconsider the approval of the merger provided that a petition signed by 15 percent of the stockholders eligible to vote of one or more of the constituent institutions is filed with the Farm Credit Administration within 35 days after the date of mailing the notification of the final results of the stockholder vote required under § 611.1122(g). The Farm Credit Administration will review the petition to determine whether it complies with the requirements of section 7.9 of the Act. Following a determination that the petition complies with the applicable requirements, a special stockholders meeting shall be called by the institution to reconsider the vote. If a majority of the stockholders voting, in person or by proxy, of any one of the constituent institutions that is a party to the merger vote against the merger, the merger shall not take place.

9. Subpart O, consisting of §§ 611.1190 through 611.1198, is added to read as follows:

Subpart O—Special Reconsideration of Mergers

Sec.

611.1190 General.
611.1191 Petitions and resolutions.
611.1192 Requirements for petitions.
611.1193 Filing date—additional materials.
611.1194 Farm Credit Administration review.
611.1195 Stockholder vote.
611.1196 Payment of expenses.
611.1197 Information statement.
611.1198 Plan of reorganization.

Subpart O—Special Reconsideration of Mergers

§ 611.1190 General.

The regulations in this Subpart O implement the provisions of the Agricultural Credit Act of 1987 relating to special reconsideration of voluntary mergers and consolidations that occurred after December 23, 1985 and prior to January 6, 1988. The regulations establish the procedures for petitions, disclosures, and stockholder votes for reconsideration of such mergers and consolidations and, if approved by stockholders, for the establishment of

separate associations. The regulations shall apply to any request to reorganize an association that was created by merger or consolidation and became effective during the period, December 24, 1985 to January 5, 1988. For the purposes of this part, the term "merger" includes a merger or consolidation. The regulations in this subpart are applicable only to those associations that were created by the merger of two or more associations after December 23, 1985 and before January 6, 1988.

§ 611.1191 Petitions and resolutions.

(a) The voting stockholders of an association who were stockholders of a predecessor association may seek to have the stockholders reconsider their association's participation in such merger by filing a petition for reconsideration with the Farm Credit Administration. The purpose of the petition shall be either:

(1) The withdrawal of one or more predecessor associations from the existing association; or

(2) The general reorganization into two or more separate associations of the existing association that was formed by the merger of three or more predecessor associations.

(b) The board of directors of an association may adopt a resolution proposing the general reorganization of the association into two or more separate associations and the submission of such proposal to the stockholders for a vote.

§ 611.1192 Requirements for petitions.

(a) In order for a petition to be acted upon, the petition must be signed by 15 percent or more of the voting stockholders of the existing association who were stockholders of each of the predecessor associations that seeks to withdraw from the existing association, or 5 percent of the total number of voting stockholders of the existing association if the petition seeks to reorganize the existing association that was formed by the merger of three or more associations.

(b) Each petition shall include the signature, printed name and the full address of each voting stockholder on the petition. If the petition proposes the withdrawal of one or more predecessor associations, the association shall certify that the signatures on the petition are the signatures of persons who were voting stockholders of such predecessor associations and that such persons continue to have their farming operations in the territory that was served by the predecessor association. If the petition proposes the reorganization of the entire association, the association shall certify that the signatures are from voting stockholders of the association.

(c) The petition shall describe the manner in which the existing association will be reorganized and the territory in which each proposed separate association would operate. In the case of a withdrawal of an association, the withdrawing association shall have the same chartered territory it had prior to the merger.

(d) The certification process shall be completed and the petition forwarded to the Farm Credit Administration within 5 working days of the date of its receipt by the association. The filing date of a petition or resolution shall be the date the petition or resolution is received by the FCA.

(e) No petition will be considered by the Farm Credit Administration if filed later than (*1 year after the effective date of this section*).

§ 611.1193 Filing date—additional materials.

(a) The persons who are designated as directors of the initial board(s) of directors of the resulting association(s) shall prepare the additional materials provided for in this section. The existing association shall provide such assistance to the initial board(s) as the initial board(s) shall reasonably request in the preparation of these additional materials. Not later than 60 days after the filing of a petition or resolution, the initial board(s) shall transmit the additional materials provided for in this section to the Farm Credit Administration.

(b) The additional materials submitted in connection with a petition or resolution shall include the following:

(1) The proposed charter for each of the separate associations and the proposed effective date of the withdrawal or reorganization;

(2) A statement of the reasons for the proposed reorganization of the existing association or the proposed withdrawal of one or more associations from the existing association;

(3) A copy of the reorganization plan as required under § 611.1198 of this part;

(4) An information statement that complies with the requirements of § 611.1197.

(5) A notice of meeting to act upon the petition or resolution.

(6) Any additional information that the petitioning stockholders or the board of directors wishes to submit in support of its request or that the Farm Credit Administration requests.

§ 611.1194 Farm Credit Administration Review.

(a) Upon receipt of the petition or resolution and the accompanying documents, the Farm Credit Administration shall review the request and either deny or give its approval to the request.

(b) If the request is denied, written notice stating the reasons for the denial shall be transmitted to the chief executive officer of the association who shall notify the board of directors and the stockholders of such denial.

(c) Upon approval of the proposed withdrawal or reorganization by the stockholders as provided for in § 611.1195, the secretary of the association shall forward to the Farm Credit Administration a certification of the stockholder vote and a signed copy of the Articles of Association.

(d) On receipt of the certification and Articles of Association as required in paragraph (c) of this section, the Farm Credit Administration shall issue charters or amended charters as are necessary to reflect the territory to be served by the resulting associations.

§ 611.1195 Stockholder vote.

(a) Upon approval of a petition or resolution by the Farm Credit Administration, the association shall call a meeting of its voting stockholders. The association shall notify each stockholder that a petition or resolution has been filed and that a meeting will be held in accordance with the association's bylaws. The stockholders meeting shall be scheduled for a date which is no later than 60 days after the date the Farm Credit Administration gives preliminary approval.

(b) In the case of a petition to withdraw from the existing association, ballots shall be sent to each stockholder of a existing association who would be a stockholder of one of a separate association. The petition, as it applies to each such separate association, shall be approved, by stockholders who vote in person or by proxy, if agreed to by a majority of the stockholders who would be served by the separate association.

(c) Approval of the resolution or petition to reorganize the entire association into two or more associations shall require the affirmative vote of a majority of the stockholders voting, in person or by proxy, of the existing association.

§ 611.1196 Payment of expenses.

(a) The expenses associated with the consideration of a petition or resolution will be borne as provided for in this section unless an agreement that

VOL 53 ISS 241 DE 15 1988 UMI

otherwise designates how these expenses will be paid has been agreed to by the parties, in which case that agreeement will prevail.

(b) The expenses associated with the consideration of a petition or resolution to reorganize the existing association into two or more associations will be borne by the existing association.

(c) The expenses associated with the consideration to withdraw a predecessor association from the existing association will be borne as follows:

(1) If the petition is approved, the resulting association will pay the expenses associated with the petition and vote.

(2) If the petition is disapproved, the existing association will pay the expenses associated with the petition and vote.

§ 611.1197 Information statement.

(a) An information statement shall be prepared which discloses certain information regarding the existing association and (1) each association that is proposed to be withdrawn from the existing association, or (2) each association that would result from the total reorganization of the existing association.

(b) The information statement shall be certified as true, complete and accurate by the persons designated as directors of the initial boards(s) of directors of the resulting association(s) and shall contain the following materials:

(1) A statement either on the first page of the materials or on the notice of the stockholders' meeting, in capital letters and bold face type, that:

THE FARM CREDIT ADMINISTRATION HAS NEITHER APPROVED NOR PASSED UPON THE ACCURACY OR ADEQUACY OF THE INFORMATION ACCOMPANYING THE NOTICE OF MEETING OR PRESENTED AT THE MEETING AND NO REPRESENTATION TO THE CONTRARY SHALL BE MADE OR RELIED UPON.

(2) A description of the material provisions of the reorganization plan and the effect of the reorganization on each proposed association, their stockholders, and the territory to be served.

(3) A statement enumerating the anticipated advantages and potential disadvantages of the proposed reorganization which may include, but are not limited to, changes in operating efficiencies, one-stop service, branch offices, local control, financial condition, etc.

(4) A summary of the provisions of the charter and bylaws of the proposed association that differ materially from the charter or bylaws of the existing association.

(5) A brief statement by the board of directors of the existing association setting forth the board's opinion on the advisability of the separation or reorganization.

(6) A presentation of the following financial data:

(i) An audited balance sheet and income statement and notes thereto of the existing association for the preceding 2 fiscal years.

(ii) A balance sheet and income statement of the existing association showing its financial condition before the separation or reorganization and the pro forma balance sheet and income statement of each proposed association showing its financial condition which meet the following conditions:

(A) The financial statements of the existing and each proposed association (collectively, "constituent financial statements") shall be presented in columnar form, showing the financial condition as of the end of the most recent quarter of the existing association, and operating results since the end of the last fiscal year through the end of the most recent quarter of the existing association.

(B) If the request is made within 90 days after the end of the fiscal year, the constituent financial statements shall be based on the most recent fiscal yearend financial statements of the existing association.

(C) If the request is made within 45 days after the end of the most recent quarter, the constituent financial statements shall be based on the financial statements of the existing association as of the end of the quarter preceding the quarter just ended.

(D) If the request is made more than 45 days after the end of the most recent quarter, the constituent financial statements shall be based on the financial statements of the existing association as of the end of that quarter.

(E) The financial statements must be accompanied by appropriate notes, including data relating to nonperforming loans and related assets, allowance for loan losses, and current year-to-date chargeoffs.

(7) A description of the type and dollar amount of any financial assistance that has been provided to the existing association during the past year; the conditions on which the financial assistance was extended; the terms of repayment or retirement, if any; and the liability for repayment of this assistance by the existing and proposed associations if the withdrawal or reorganization were approved.

(8) A statement as to whether the proposed association would require financial assistance during the first 3 years of its operation as a new association, the estimated type and dollar amount of the assistance, and terms of repayment or retirement, if known.

(9) A statement indicating the possible tax consequences to stockholders and to the proposed associations, and whether any legal opinion, ruling or external auditor's opinion has been obtained on the matter.

(10) A presentation of each proposed association's interest rate and fee programs, interest collection policy, capitalization plan and other factors that would affect a borrower's cost of doing business with the association.

(11) A description of any event subsequent to the date of the last quarterly report, but prior to the stockholder vote, that would have a material impact on the financial condition of each proposed association as of its effective date.

(12) A statement of any other material fact or circumstance that a stockholder would need in order to make an informed and responsible decision, or that would be necessary in order to provide a disclosure that is not misleading.

(13) A form of written proxy, together with instructions on its purpose, use and authorization by the stockholder. The proxy instructions must ensure the secrecy of the stockholder's ballot if the stockholder votes by proxy.

(14) A copy of the plan of reorganization provided for in § 611.1198 of this part.

(c) No bank or association director, officer, or employee shall make any untrue or misleading statement of a material fact, or fail to disclose any material fact necessary under the circumstances to make statements made not misleading, to a stockholder of the association in connection with a reorganization under this subpart.

§ 611.1198 Plan of reorganization.

(a) The withdrawal of an association or other reorganization under this subpart shall occur pursuant to a written plan. There shall be a written plan of reorganization for each association to be withdrawn from an existing association or each association to be created by the complete reorganization of an existing association.

(b) A written plan shall include, but not be limited to, all of the following provisions:

(1) The proposed Articles of Association which shall contain the following:

(i) The proposed name and headquarters of the association.

(ii) The territory to be served by the association.

(iii) The purposes for which the association is being formed.

(iv) The powers and authorities to be exercised by the association in carrying out its functions under Title II of the Act.

(v) A statement which shall provide that the corporate existence of the association shall commence upon issuance of its charter by the Farm Credit Administration and shall continue until dissolved in accordance with the Act.

(vi) The signatures of those persons who choose to establish the association and a statement signed by each such person establishing eligibility to borrow from the association in which such person will become a stockholder.

(2) As an attachment to the Articles of Association, the proposed bylaws of the new association.

(3) An explanation of the value of the equity ownership as of the last monthend held by stockholders of the existing association who would be served by the proposed association.

(4) A statement on the formula for the retirement and transfer of stock, participation certificates and equities held by stockholders of the existing association who would become stockholders of the proposed association, and the issuance of an equivalent amount of stock, participation certificates and equities by the proposed association to its stockholders.

(5) A provision for the distribution of assets and liabilities of the existing association and a description of the basis upon which the distribution is to be made to the proposed association.

(6) A statement on how the expenses connected with the reorganization are to be borne by the affected parties in accordance with § 611.1196.

(7) The names of the persons who will serve as the initial board of directors until the first annual meeting of stockholders following the reorganization. Any director of an existing association who is eligible to serve as a director of the proposed association may be designated as a member of the initial board of directors for a period not to exceed his or her current term, after which he or she must stand for reelection.

(8) A statement of any conditions which must be satisfied prior to the effective date of the proposed reorganization, including but not limited to, approval by stockholders and issuance of a charter by the Farm Credit Administration.

(9) A statement that prior to the effective date of the reorganization, the petitioning stockholders may withdraw their petition or the board of directors of the existing association may rescind its resolution, with the concurrence of the Farm Credit Administration, on the basis that:

(i) The information disclosed to stockholders contained material errors or omissions;

(ii) Material misrepresentations were made to stockholders regarding the impact of the reorganization;

(iii) Fraudulent activities were used to obtain the stockholders' approval; or,

(iv) An event occurred between the time of the vote and the reorganization that would have a significant adverse impact on the future viability of the proposed association.

(10) A designation of those persons who have authority to carry out the plan of reorganization, including the authority to execute any documents necessary to perfect title, on behalf of the proposed association.

PART 620—DISCLOSURE TO SHAREHOLDERS

14. The authority citation for Part 620 is revised to read as follows:

Authority: Secs. 5.17, 5.19; 12 U.S.C. 2252, 2254; sec. 424 of Pub. L. 100-233.

15. Subpart D, consisting of §§ 620.30 through 620.32, is added to read as follows:

Subpart D—Bank Director Disclosure Requirements

Sec.

620.30 Disclosure statement for bank director candidates.
620.31 Contents of disclosure statements.
620.32 Prohibition against incomplete, inaccurate, or misleading disclosure.

Subpart D—Bank Director Disclosure Requirements

§ 620.30 Disclosure statement for bank director candidates.

Each bank shall adopt policies and procedures that assure that a disclosure statement is prepared by each candidate for election by the stockholders to the bank board. The banks shall provide a form providing for the information required and distribute or mail copies of completed and signed disclosure statements to stockholders with the election ballots. No person may be a candidate for bank director who does not make the disclosures required by this subpart.

§ 620.31 Contents of disclosure statements.

Disclosure statements shall include the following information:

(a) A statement of the institution's policies, if any, on loans to and transactions with directors of the bank.

(b) Candidate's name, residential address, business address if any, citizenship, business experience during the last 5 years including principal occupation and employment during the last 5 years, a list of any business entities on whose board of directors the candidate serves and state the principal business in which the entities are engaged, and any information pertinent to the creation of a nepotistic relationship upon election to the bank board.

(c) Transactions other than loans. The disclosure statement should describe briefly any transaction or series of transactions other than loans that occurred since the last annual meeting between the bank and the candidate, any member of the immediate family of such person, or any organization with which such person is affiliated, the nature of the person's interest in the transaction, and the terms of the transaction. No information need be given where the purchase price, fees, or charges involved were determined by competitive bidding or where the amount involved in the transaction (including the total of all periodic

payments) does not exceed $5,000, or the interest of the person arises solely as a result of his or her status as a stockholder of the institution and the benefit received is not a special or extra benefit not available to all stockholders.

(d) Loans to director candidates.

(1) To the extent applicable, state that the bank has had loans outstanding during the last full fiscal year-to-date to the candidate, his or her immediate family members, and any organizations with which such persons are affiliated that:

(i) Were made in the ordinary course of business;

(ii) Were made on the same terms, including interest rate, amortization schedule, and collateral, as those prevailing at the time for comparable transactions with other persons.

(2) To the extent applicable, state that no loan to a candidate, or to any organization affiliated with the candidate, or to any immediate family member who resides in the same household as the candidate or in whose loan or business operation the candidate has a material financial or legal interest, involved more than the normal risk of collectibility;

(3) If the conditions stated in paragraphs (d) (1) and (2) of this section do not apply to the loan(s) of the candidates or organizations specified therein with respect to such loans, state:

(i) The name of the candidate to whom the loan was made or to whose relative or affiliated organization the loan was made;

(ii) The largest aggregate amount of each indebtedness outstanding at any time during the last fiscal year;

(iii) The nature of the loan(s);

(iv) The amount outstanding as of the latest practicable date;

(v) The reasons the loan does not comply with the criteria contained in this section;

(vi) If the loan does not comply with this section, the rate of interest payable on the loan and the repayment terms;

(vii) If the loan does not comply with this section, the amount past due, if any, and the reason the loan is deemed to involve more than a normal risk of collectibility.

(e) Involvement in certain legal proceedings. The disclosure statement should describe any of the following events that occurred during the past 5 years and that are material to an evaluation of the ability or integrity of the candidate:

(1) A petition under the Federal bankruptcy laws or any State insolvency law was filed by or against, or a receiver, fiscal agent, or similar officer was appointed by a court for the business or property of the candidate, or any partnership in which the candidate was a general partner at or within 2 years before the time of such filing, or any corporation or business association of which the candidate was a senior officer at or within 2 years before the time of such filing;

(2) The candidate was convicted in a criminal proceeding or is a named party in a pending criminal proceeding (excluding traffic violations and other misdemeanors);

(3) The candidate was the subject of any order, judgment, or decree, not subsequently reversed, suspended, or vacated, by any court of competent jurisdiction, permanently or temporarily enjoining or otherwise limiting the candidate from engaging in any type of business practice.

§ 620.32 Prohibition against incomplete, inaccurate, or misleading disclosure.

No employee or director or candidate for director of the bank shall make any disclosure to stockholders with respect to an election that is incomplete, inaccurate, or misleading. When any such person makes disclosure, that, in the judgment of the Farm Credit Administration is incomplete, inaccurate, or misleading, whether or not such disclosure is made pursuant to this subpart, the Farm Credit Administration may direct such institution or person to make such additional or corrective disclosure as is necessary to provide stockholders with full and fair disclosure.

Dated: December 8, 1988.

David A. Hill,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Monensin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Elanco Products Co. providing for safe and effective use of a Type A medicated article containing monensin in manufacturing a Type C feed. The feed will be used as a supplement to the total ration to improve the feed efficiency of mature reproducing beef cows.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Jack C. Taylor, Center for Veterinary Medicine (HFV-126), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

SUPPLEMENTARY INFORMATION: Elanco Products Co., a Division of Eli Lilly & Co., Lilly Corporate Center, Indianapolis, IN 46285, is sponsor of NADA 95-735. The NADA currently provides for use of a Type A medicated article containing 60 grams of monensin (as monensin sodium) per pound in manufacturing Type C medicated feeds for the following production claims: (1) Improved feed efficiency for feedlot cattle fed in confinement for slaughter (50 to 360 milligrams of monensin per head per day), and (2) increased rate of weight gain for pasture cattle—slaughter, stocker, feeder, and dairy and beef replacement heifers weighing more than 400 pounds (50 to 200 milligrams of monensin per head per day). The firm has filed a supplemental NADA providing for addition of a third production claim to the labeling of the Type A article. The supplement would permit manufacture of a Type C medicated feed (25 to 400 grams per ton) which when used to supplement (50 to 200 milligrams of monensin per head per day) the total ration of reproducing beef cows, will improve their feed efficiency.

The supplemental NADA is approved and 21 CFR 558.355 is amended by adding a new paragraph (f)(3)(vi) to reflect the approval. The basis for the approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch

(address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. Section 558.355 is amended by adding a new paragraph (f)(3)(vi) to read as follows:

§ 558.355 Monensin.

* * * * *

(f) * * *

(3) * * *

(vi) *Amount per ton.* Monensin, 25 to 400 grams.

(*a*) *Indications for use.* Improved feeding efficiency for mature reproducing beef cows receiving supplemental feed.

(*b*) *Limitations.* Thoroughly mix the appropriate amount of Type A medicated article or Type B medicated feed with grain and roughage to provide a supplemental feed having a final concentration of 25 to 400 grams of monensin per ton. The final concentration should be contained in a minimum of 1 pound of feed. Either hand-feed or mix into the total ration. Feed continuously at a rate of not less than 50 nor more than 200 milligrams per head per day. During the first 5 days of feeding, cattle should receive no more than 100 milligrams per head per day.

BILLING CODE 4160–01–M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2610

Payment of Premiums; Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Interim rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's interim regulation on Payment of Premiums, which was published on June 30, 1988 (53 FR 24906). Appendix B to the interim regulation contains a table setting forth the interest rates that are required by statute to be used in valuing a plan's vested benefits for purposes of determining the amount of the premium due to the PBGC. This amendment adds to that table the interest rate applicable to plan years beginning in December 1988.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Harold J. Ashner, Senior Counsel, Office of the General Counsel (Code 22500), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006; telephone 202–778–8823 (202–778–8859 for TTY and TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Section 9331 of the Omnibus Budget Reconciliation Act of 1987, Pub. L. 100–203, amended section 4006 of the Employee Retirement Income Security Act of 1974 ("ERISA") to establish a two-part premium structure for single-employer plans, *i.e.*, a flat rate per capita assessment and a variable rate assessment based on a plan's unfunded vested benefits, effective for plan years beginning on or after January 1, 1988. Under amended ERISA section 4006(a)(3)(E)(iii)(II), the interest rate use in valuing a plan's vested benefits for purposes of determining the amount of the plan's unfunded vested benefits must equal 80% of the annual yield on 30-year Treasury securities for the month preceding the month in which the plan year begins.

The Pension Benefit Guaranty Corporation's (the "PBGC's") interim regulation on Payment of Premiums (53 FR 24906 (June 30, 1988)) implements these new premium rules. Under § 2610.23(b)(1) of the regulation, the interest rate for valuing vested benefits is determined by reference to the annual yield for 30-year Treasury constant maturities as reported in Federal Reserve Statistical Release G.13 and H.15. The required interest rate for a given "premium payment year" (the plan year for which the premium is being paid) is 80% of this rate for the calendar month preceding the calendar month in which the premium payment year begins. As a convenience, the PBGC established an Appendix B to the interim regulation containing a table setting forth the required interest rates for premium payment years beginning in January 1988 and thereafter.

The PBGC is amending Appendix B to add the required interest rate for premium payment years beginning in December 1988. Appendix B to the interim regulation does not prescribe the required interest rates for valuing vested benefits. These rates are prescribed by section 4006(a)(3)(E)(iii)(II) of ERISA and § 2610.23(b)(1) of the regulation. The purpose of Appendix B is merely to collect and to republish these rates in a convenient place. Thus, the interest rates in Appendix B are informational only. Accordingly, the PBGC finds that notice of and public comment on this amendment would be unnecessary and contrary to the public interest. See 5 U.S.C. 553(b). For these same reasons, the PBGC also finds that good cause exists for making these amendments effective immediately. See 5 U.S.C. 553(d)(3).

The PBGC has determined that this amendment is not a "major rule" within the meaning of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; nor create a major increase in costs or prices for consumers, individual industries, or geographic regions, nor have significant adverse effects on competition, employment, investment, innovation or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply. See 5 U.S.C. 601(2).

List of Subjects 29 CFR Part 2610

Employee Benefit Plans, Pension Insurance, and Pensions.

In consideration of the foregoing, Appendix B to Part 2610 of Chapter XXVI of Title 29, Code of Federal Regulations, is hereby amended as follows:

APPENDIX B—INTEREST RATES FOR VALUING VESTED BENEFITS

The following table lists the required interest rates to be used in valuing a plan's vested benefits under § 2610.23(b) and in calculating a plan's adjusted vested benefits under § 2610.23(c)(1):

For premium payment years beginning in—	Required interest rate [1]
• • • • •	
December 1988	7.22

[1] The required interest rate listed above is equal to 80% of the annual yield for 30-year Treasury constant maturities, as reported in Federal Reserve Statistical Release G.13 and H.15, for the calendar month preceding the calendar month in which the premium payment year begins.

Issued in Washington, DC, on this 13th day of December, 1988.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 88-28990 Filed 12-14-88; 8:45 am]

BILLING CODE 7708-01-M

29 CFR Part 2621

Limitation on Guaranteed Benefits

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This amendment to the Limitation on Guaranteed Benefits regulation contains the maximum guaranteeable pension benefit that may be paid by the Pension Benefit Guaranty Corporation under Title IV of the Employee Retirement Income Security Act of 1974 ("ERISA") to a plan participant in a covered single-employer pension plan that terminates in 1989. Section 4022(b)(3) of ERISA provides that the maximum benefit guaranteeable by the PBGC is based on the contribution and benefit base determined under section 230 of the Social Security Act. An increase in the contribution and benefit base increases the dollar amount of the maximum guaranteeable benefit. This amendment is needed to include the dollar amount of the increased maximum guaranteeable benefit for 1989 in the regulation.

EFFECTIVE DATE: January 1, 1989.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006, 202-778-8850 (202-778-8859 for TTY and TTD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The regulation of the Pension Benefit Guaranty Corporation ("PBGC") entitled Limitation on Guaranteed Benefits (29 CFR Part 2621) describes the limitations on benefits guaranteed by the PBGC in terminating single-employer pension plans covered under Title IV of the Employee Retirement Income Security Act of 1974, *as amended* ("ERISA"). One of the limitations, set forth in section 4022(b)(3) of ERISA, is a dollar ceiling on the amount of the monthly benefit that may be paid by the PBGC. Subparagraph (B) of section 4022(b)(3) provides that the amount of monthly benefit payable in the form of a life annuity beginning at age 65 shall not exceed

$750 multiplied by a fraction, the numerator of which is the contribution and benefit base (determined under section 230 of the Social Security Act) in effect at the time the plan terminates and the denominator of which is such contribution and benefit base in effect in calendar year 1974 [$13,200].

In the Social Security Amendments of 1977, special increases were added to the contribution and benefit base. However, the amended Social Security Act specifically states that, for the purpose of section 4022(b)(3)(B) of ERISA, the contribution and benefit base for each year after 1976 will be the base that would have been determined for each year if the law in effect immediately before the amendment had remained in effect without change. 42 U.S.C. 430(d) (1982).

The PBGC has been notified by the Social Security Administration that the contribution and benefit base for 1989 that is to be used to calculate the PBGC maximum guaranteeable benefit is $35,700. Accordingly, the formula under section 4022(b)(3)(B) of ERISA and 29 CFR 2621.3(a)(2) is: $750 multiplied by $35,700/$13,200. Thus, the maximum benefit guaranteeable by the PBGC in 1989 will be $2,028.41 per month in the form of a life annuity commencing at age 65. If a benefit is payable in a different form or begins at a different age, the maximum guaranteeable amount will be the actuarial equivalent of $2,028.41 per month.

Appendix A to Part 2621 lists the maximum guaranteeable benefit payable by the PBGC to participants in single-employer plans that have terminated in each year from 1974 through 1988. This amendment updates Appendix A for plans that terminate in 1989.

Because the maximum guaranteeable benefit is determined according to the formula in section 4022(b)(3)(B) of ERISA, and this amendment makes no change in its method of calculation but simply lists the 1989 maximum guaranteeable benefit amount for the public's knowledge, general notice of proposed rulemaking is not required. Moreover, because the 1989 maximum guaranteeable benefit is effective, under the statute, at the time that the Social Security contribution and benefit base is effective, *i.e.*, January 1, 1989, and is not dependent on the issuance of this regulation, the PBGC finds that good cause exists for making this amendment effective less than 30 days after publication (5 U.S.C. 553).

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291, because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

Because no general notice of proposed rulemaking is required for this regulation, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

List of Subjects in 29 CFR Part 2621

Employee benefit plans, Pension insurance, and Pensions.

In consideration of the foregoing, Part 2621 of Subchapter C, Chapter XXVI, Title 29, Code of Federal Regulations, is hereby amended as follows:

PART 2621—LIMITATION ON GUARANTEED BENEFITS

1. The authority citation for Part 2621 continues to read as follows:

Authority: 29 U.S.C. 1302, 1322, 1322b.

2. Appendix A to Part 2621 is amended by adding a new entry in chronological order to read as follows. The introductory text is reproduced for the convenience of the reader and remains unchanged.

Appendix A to Part 2621—Maximum Guaranteeable Monthly Benefit

The following table lists by year the maximum guaranteeable monthly benefit payable in the form of a life annuity commencing at age 65 as described by § 2621.3(a)(2) to a participant in a plan that terminated in that year:

Year	Maximum guaranteeable monthly benefit

29 CFR Part 2676

Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal; Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits and Plan Assets Following Mass Withdrawal (29 CFR Part 2676). The regulation prescribes rules for valuing benefits and certain assets of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month. On or about the fifteenth of each month, the PBGC publishes a new entry in the table for the following month, whether or not the rates are changing. This amendment adds to the table the rate series for the month of January 1989.

EFFECTIVE DATE: January 1, 1989.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006; 202-778-8820 (202-778-8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 533(b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

BILLING CODE 7708-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD8-88-17]

Anchorage Grounds; Lower Mississippi River

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard believes that due to the critical revetment work conducted by the Corps of Engineers and the subsequent loss of deep draft anchorage space in Upper Sunshine Anchorage, the enlargement of Lower Sunshine Anchorage and La Place Anchorage is needed to increase anchorage space. The Coast Guard is amending the anchorage regulations on the Lower Mississippi River by enlarging Lower Sunshine Anchorage upriver 0.1 mile and enlarging La Place Anchorage upriver 0.4 mile.

Extending the two anchorages will provide for much needed deep draft anchorage space and is in the best interest of navigation safety.

EFFECTIVE DATE: January 17, 1989.

FOR FURTHER INFORMATION CONTACT: LTJG J.D. Irino, Project Officer, Commander, Eighth Coast Guard District (oan), Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130-3396, Tel. (504) 589-4686.

SUPPLEMENTARY INFORMATION: On September 20, 1988, the Coast Guard published a notice of proposed rulemaking in the **Federal Register** for these regulations (53 FR 36470). Interested persons were requested to submit comments and one comment was received.

Drafting Information

The drafters of these regulations are LTJG J.D. Irino, Project Officer, c/o Commander, Eighth Coast Guard District Aids to Navigation Branch, and CDR J.A. Unzicker, Project Attorney, Eighth Coast Guard District Legal Office.

Discussion of Comments

This regulation is issued pursuant to 33 U.S.C. 471 as set out in the authority citation for all of Part 110. A letter of no objection was received from the Bureau

of Mines of the Department of the Interior on the notice of proposed rulemaking. They commented that mineral resources would not be impacted by the proposed rule.

Economic Assessment and Certification

The changes to the regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. This regulation will extend Lower Sunshine Anchorage and La Place Anchorage. The added length is not expected to have any significant effect on navigation, and, therefore, it is determined that the impact will be minimal.

Since the impact of this change is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 33 CFR Part 110

Anchorage grounds.

Final Regulations

In consideration of the foregoing, the Coast Guard is amending Part 110 of Title 33, Code of Federal Regulations as follows:

PART 110—[AMENDED]

1. The authority citation for Part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035 and 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. Section 110.195(a) (21) and (25) are revised to read as follows:

§ 110.195 Mississippi River below Baton Rouge, LA, including South and Southwest Passes.

(a) * * *

(21) *La Place Anchorage.* An area 0.7 mile in length along the left descending bank of the river, 600 feet wide, extending from mile 134.7 to mile 135.4 above Head of Passes.

* * * * *

(25) *Lower Sunshine Anchorage.* An area 1.0 mile in length along the left descending bank of the river, 800 feet wide, extending from mile 165.0 to mile 166.0 above Head of Passes.

* * * * *

Dated: December 5, 1988.

A.E. Henn,

Captain, U.S. Coast Guard, Acting Commander, 8th Coast Guard District.

BILLING CODE 4910–14–M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1270

Regulations Implementing the Presidential Records Act

AGENCY: National Archives and Records Administration (NARA).

ACTION: Final rule.

SUMMARY: This rule implements the provisions of the Presidential Records Act of 1978 (Pub. L. No. 95–591, 92 Stat. 2523–27, as amended by Pub. L. No. 98–497, 98 Stat. 2287), codified at 44 U.S.C. 2201–07. As required by the Act, this rule contains:

1. Provisions for advance public notice and description of any Presidential records determined by the Archivist of the United States to have insufficient administrative, historical, informational, or evidentiary value to warrant their continued preservation.

2. Provisions for providing notice to a former President when materials to which access would otherwise be restricted are to be made available in accordance with 44 U.S.C. 2205(2) in response to judicial process, to an incumbent President, or to Congress.

3. Provisions for notice to the former President when disclosure of a document may adversely affect the former President's rights or privileges.

4. Provisions for establishing procedures for consultation between the Archivist and appropriate Federal agencies concerning materials which may be subject to 5 U.S.C. 552(b)(7).

This rule implements only the statutory scheme established by the Presidential Records Act, and does not establish policies or procedures governing the assertion of or response to any constitutionally based privileges that may be asserted by an incumbent or former President.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Gary L. Brooks or Christopher Runkel, Legal Services Staff, (202) 523–3618.

SUPPLEMENTARY INFORMATION: NARA published a notice of proposed rulemaking on October 12, 1988 (53 FR 39747). No comments were received on the proposed rule. Accordingly, the proposed rule is adopted without change in this final rule.

This rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981. As required by the Regulatory Flexibility Act, it is hereby certified that this rule will not have a significant impact on small business entities.

List of Subjects in 36 CFR Part 1270

Presidential records.

For the reasons set forth in the preamble, Chapter XII of Title 36 is amended by adding a new Part 1270 to Subchapter E to read as follows:

PART 1270—PRESIDENTIAL RECORDS

Subpart A—General Provisions

Sec.
1270.10 Scope of part.
1270.12 Application.
1270.14 Definitions.

Subpart B—Actions Taken on Behalf of Former Presidents

1270.20 Designation of person or persons to act for former President.
1270.22 When Archivist may act for former President.

Subpart C—Disposal of Presidential Records

1270.30 Disposal of Presidential Records by incumbent President.
1270.32 Disposal of Presidential Records in the custody of the Archivist.

Subpart D—Access to Presidential Records

1270.40 Identification of restricted records.
1270.42 Denial of access to public; right to appeal.
1270.44 Exceptions to restricted access.
1270.46 Notice of intent to disclose Presidential Records.

Subpart E—Presidential Records Compiled for Law Enforcement Purposes

1270.50 Consultation with law enforcement agencies.

Authority: The Presidential Records Act of 1978, Pub. L. 95–591, 92 Stat. 2523–27, as amended by the National Archives and Records Administration Act of 1984, Pub. L. 98–497, sec. 107(b)(7), 98 Stat. 2287 (1984) (codified at 44 U.S.C. 2201–07).

Subpart A—General Provisions

§ 1270.10 Scope of part.

These regulations implement the provisions of the Presidential Records Act of 1978, Pub. L. No. 95–591, 92 Stat. 2523–27, as amended by Pub. L. No. 98–497, sec. 107(b)(7), 98 Stat. 2287 (1984) (codified at 44 U.S.C. 2201–07), by setting forth the policies and procedures governing preservation, protection, and

disposal of, and access to Presidential and Vice-Presidential records created during a term of office of the President or Vice President beginning on or after January 20, 1981. Nothing in these regulations is intended to govern procedures for assertion of, or response to, any constitutionally based privilege which may be available to an incumbent or former President.

§ 1270.12 Application.

(a) These regulations apply to all Presidential records created during a term of office of the President beginning on or after January 20, 1981.

(b) Vice-Presidential records shall be subject to the provisions of this part in the same manner as Presidential records. The Vice President's duties and responsibilities, with respect to Vice-Presidential records, shall be the same as the President's duties and responsibilities with respect to Presidential records. The Archivist's authority with respect to Vice-Presidential records shall be the same as the Archivist's authority with respect to Presidential records, except that the Archivist may, when he determines it to be in the public interest, enter into an agreement with a non-Federal archival repository for the deposit of Vice-Presidential records.

§ 1270.14 Definitions.

For the purposes of this Part—

(a) The terms "documentary material", "Presidential records", "personal records", "Archivist", and "former President" have the meanings given them by 44 U.S.C. 2201 (1)–(5), respectively.

(b) The term "agency" has the meaning given it by 5 U.S.C. 551(1) (A)–(D) and 552(f).

(c) The term "Presidential archival depository" has the meaning given it by 44 U.S.C. 2101(1).

(d) The term "Vice-Presidential records" means documentary materials, or any reasonably segregable portion thereof, created or received by the Vice President, his immediate staff, or a unit or individual of the Office of the Vice President whose function is to advise and assist the Vice President, in the course of conducting activities which relate to or have an effect upon the carrying out of the constitutional, statutory, or other official or ceremonial duties of the Vice President. The term includes documentary materials of the kind included under the term "Presidential records."

(e) The term "filed" means the date something is received in the office of the official to whom it is addressed.

Subpart B—Actions Taken on Behalf of Former Presidents

§ 1270.20 Designation of person or persons to act for former President.

(a) A President or former President may designate some person or persons to exercise, upon death or disability of the President or former President, any or all of the discretion or authority granted to the President or former President by chapter 22 of Title 44, United States Code.

(b) When a President or former President designates a person or persons to act for him pursuant to paragraph (a) of this section, this designation shall be effective only if the Archivist has received notice of the designation before the President or former President dies or is disabled.

(c) The notice required by paragraph (b) of this section shall be in writing, and shall include the following information:

(1) Name(s) of the person or persons designated to act for the President or former President;

(2) The current addresses of the person or persons designated; and

(3) The records, identified with reasonable specificity, over which the designee(s) will exercise discretion or authority.

§ 1270.22 When Archivist may act for former President.

In those instances where a President has specified, in accordance with 44 U.S.C. 2204(a), restrictions on access to Presidential records, but has not made a designation under § 1270.20 of this subpart, the Archivist shall, upon the death or disability of a President or former President, exercise the discretion or authority granted to a President or former President by 44 U.S.C. 2204.

Subpart C—Disposal of Presidential Records

§ 1270.30 Disposal of Presidential records by incumbent President.

A President may, while in office, dispose of any Presidential records which in his opinion lack administrative, historical, informational, or evidentiary value if one of the following two sets of requirements is satisfied:

(a)(1) The President has obtained the written views of the Archivist concerning the proposed disposal; and

(2) The Archivist states in his written views to the President that he does not intend to request, with respect to the President's proposed disposal of Presidential records, the advice of the Committees on Rules and Administration and Governmental Affairs of the Senate, and the Committees on House Administration and Government Operations of the House of Representatives because he does not consider—

(i) The records proposed for disposal to be of special interest to the Congress; or

(ii) Consultation with the Congress concerning the proposed disposal to be in the public interest; or

(b)(1) The President has obtained the written views of the Archivist concerning the proposed disposal;

(2) The Archivist states in his written views either—

(i) That the records proposed for disposal may be of special interest to the Congress; or

(ii) That consultation with the Congress concerning the proposed disposal is in the public interest; and

(3) The President submits copies of the proposed disposal schedule to the Committees on Rules and Administration and Governmental Affairs of the Senate and the Committees on House Administration and Government Operations of the House of Representatives at least 60 calendar days of continuous session of Congress in advance of the proposed disposal date. For the purpose of this section, continuity of session is broken only by an adjournment of Congress *sine die*, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the days in which Congress is in continuous session.

§ 1270.32 Disposal of Presidential Records in the custody of the Archivist.

(a) The Archivist may dispose of Presidential records which he has appraised and determined to have insufficient administrative, historical, informational, or evidentiary value to warrant their continued preservation.

(b) When Presidential records are scheduled for disposal pursuant to paragraph (a) of this section, the Archivist shall publish a notice of this disposal in the **Federal Register** at least 60 days before the proposed disposal date.

(c) The notice required by paragraph (b) of this section, shall include the following:

(1) A reasonably specific description of the records scheduled for disposal; and

(2) A concise statement of the reason for disposal of the records.

(d) Publication in the **Federal Register** of the notice required by paragraph (b) of this section shall constitute a final agency action for purposes of review

VOL
53
ISS
241
DE

1988
UMI

under chapter 7 of Title 5, United States Code (5 U.S.C. 701–06).

Subpart D—Access to Presidential Records

§ 1270.40 Identification of restricted records.

(a) If a President, prior to the conclusion of his term of office or last consecutive term of office, as the case may be, specifies durations, not to exceed 12 years, for which access to certain information contained in Presidential records shall be restricted, in accordance with 44 U.S.C. 2204, the Archivist or his designee shall identify the Presidential records affected, or any reasonably segregable portion thereof, in consultation with that President or his designated representative(s).

(b) The Archivist shall restrict public access to the information contained in those records identified as affected until—

(1) The date on which the former President waives the restriction on disclosure of the record or information contained within;

(2) The expiration of the period of restriction specified under 44 U.S.C. 2204(a) for the category of information under which a certain record, or a portion thereof, was restricted; or

(3) The Archivist has determined that the former President or an agent of the former President has placed in the public domain through publication a restricted record or a reasonably segregable portion thereof, if this date is earlier than either of the dates specified in paragraphs (b)(1) or (2) of this section.

§ 1270.42 Denial of access to public; right to appeal.

(a) Any person denied access to a Presidential record (hereinafter "the requester") because of a determination that the record or a reasonably segregable portion thereof was (1) properly restricted under 44 U.S.C. 2204(a), and (2) not placed in the public domain by the former President or his agent, may file an administrative appeal with the Assistant Archivist for Presidential Libraries (NL), Washington, DC 20408.

(b) Appeals shall be filed no later than 10 working days after the requester receives written notification that access to Presidential records has been denied.

(c) Appeals shall be in writing and shall set forth the reason(s) why the requester believes access to the records sought should be allowed. The requester shall identify the specific records sought.

(d) Upon receipt of an appeal, the Assistant Archivist for Presidential Libraries shall have 30 working days from the date an appeal is filed to consider the appeal and to respond in writing to the requester. The Assistant Archivist's response shall state whether or not the Presidential records requested are to be released and the basis for this determination. The decision of the Assistant Archivist to withhold release of Presidential records is final and not subject to judicial review.

§ 1270.44 Exceptions to restricted access.

(a) Notwithstanding any restrictions on access imposed pursuant to section 2204 or these regulations, and subject to any rights, defenses, or privileges which the United States or any agency or person may invoke, Presidential records shall be made available in the following instances:

(1) Pursuant to subpoena or other judicial process properly issued by a court of competent jurisdiction for the purposes of any civil or criminal investigation or proceeding;

(2) To an incumbent President if the records sought contain information which is needed for the conduct of current business of his office and is not otherwise available;

(3) To either House of Congress, or, to the extent of matter within its jurisdiction, to a Congressional committee or subcommittee if the records sought contain information which is needed for the conduct of business within its jurisdiction and is not otherwise available.

(b) Requests by an incumbent President, a House of Congress, or a Congressional committee or subcommittee pursuant to paragraph (a) of this section shall be addressed to the Archivist. All requests shall be in writing and, where practicable, identify the records sought with reasonable specificity.

(c) Presidential records of a former President shall be available to the former President or his designated representative upon request.

§ 1270.46 Notice of intent to disclose Presidential records.

(a) The Archivist or his designee shall notify a former President or his designated representative(s) before any Presidential records of his Administration are disclosed.

(b)(1) The notice given by the Archivist or his designee shall:

(i) Be in writing;

(ii) Identify the particular records with reasonable specificity;

(iii) State the reason for the disclosure; and

(iv) Specify the date on which the record will be disclosed.

(2) In the case of records to be disclosed in accordance with § 1270.44, the notice shall also:

(i) Identify the requester and the nature of the request;

(ii) Specify whether the requested records contain materials to which access would otherwise be restricted pursuant to 44 U.S.C. 2204(a) and identify the category of restriction within which the record to be disclosed falls; and

(iii) Specify the date of the request.

(c) If, after receiving the notice required by paragraph (a) of this section, a former President raises rights or privileges which he believes should preclude the disclosure of a Presidential record, and the Archivist nevertheless determines that the record in question should be disclosed, in whole or in part, the Archivist shall notify the former President or his representative of this determination. The notice given by the Archivist or his designee shall:

(1) Be in writing;

(2) State the basis upon which the determination to disclose the record is made; and

(3) Specify the date on which the record will be disclosed.

(d) The Archivist shall not disclose any records covered by any notice required by paragraphs (a) or (c) of this section for at least 30 calendar days from receipt of the notice by the former President, unless a shorter time period is required by a demand for Presidential records under § 1270.44.

(e) Copies of all notices provided to former Presidents under this section shall be provided at the same time to the incumbent President.

Subpart E—Presidential Records Compiled for Law Enforcement Purposes

§ 1270.50 Consultation with law enforcement agencies.

(a) For the processing of Presidential records compiled for law enforcement purposes that may be subject to 5 U.S.C. 552(b)(7), the Archivist shall request specific guidance from the appropriate Federal agency on the proper treatment of a record if there is no general guidance applicable, if the record is particularly sensitive, or if the type of record or information is widespread throughout the files.

(b) When specific agency guidance is requested under paragraph (a) of this section, the Archivist shall notify the appropriate Federal agency of the decision regarding disclosure of the specific documents. Notice shall include the following:

(1) A description of the records in question;

(2) Statements that the records described contain information compiled for law enforcement purposes and may be subject to the exemption provided by 5 U.S.C. 552(b)(7) for records of this type; and,

(3) The name of a contact person at NARA.

(c) Agency guidance under this section is not binding on the Archivist. The final determination on whether Presidential records may be subject to the exemption in 5 U.S.C. 552(b)(7) is the Archivist's responsibilty.

Dated: December 2, 1988.

Don W. Wilson,

Archivist of the United States.

BILLING CODE 7515-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 57

Grants for Residency Training in General Internal Medicine and General Pediatrics

AGENCY: Public Health Service, HHS.

ACTION: Final regulations.

SUMMARY: These final regulations revise the regulations governing the Grants for Residency Training in General Internal Medicine or General Pediatrics, authorized by section 784 of the Public Health Service Act (the Act), to conform the regulations with amendments made by the Omnibus Budget Reconciliation Act of 1981. These amendments added a provision for grants for projects to plan, develop, and operate programs for the training of physicians who plan to teach in general internal medicine or general pediatrics training programs and to provide traineeships or fellowships to participants in such programs. In addition, these final regulations conform the existing regulations with amendments made by the Health Professions Training Assistance Act of 1985, and the Compact of Free Association Act of 1985, as well as other changes which are clarifying and ministerial in nature.

DATE: These regulations are effective December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Donald L. Weaver, M.D., Director, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C-25, 5600 Fishers Lane, Rockville, Maryland 20857; telephone number: 301 443-6190.

SUPPLEMENTARY INFORMATION: On May 3, 1988, the Assistant Secretary for Health, Department of Health and Human Services, with the approval of the Secretary, published in the **Federal Register** (53 FR 15710), a Notice of Proposed Rulemaking (NPRM) to amend the existing regulations governing the Grants for Residency Training in General Internal Medicine and General Pediatrics, authorized by section 784 of the Public Health Service Act (the Act). The Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35, amended section 784 by expanding the authority to support projects to plan, develop, and operate a program for the training of physicians who plan to teach in a general internal medicine or general pediatrics training program and to provide for financial assistance in the form of traineeships and fellowships to physicians who are participants in any such program and who plan to teach in a general internal medicine or general pediatrics training program.

In accordance with this provision, the Department proposed to amend the existing regulations by including the following major revisions:

1. Adding the following terms to § 57.3102, entitled "*Definitions.*":

"Faculty development program" means a systematic training program to increase faculty competence in teaching skills and in other areas related to academic responsibility.

"Trainee" means an allopathic or osteopathic general internist or general pediatrician participating in a faculty development training program supported by a grant under section 784 and receiving stipend support from such grant.

2. Adding to § 57.3105, entitled "*Project requirements.*", the following new project requirements for a faculty development program:

(a) Applicants would be required to have a curriculum which emphasizes improvement of teaching skills and techniques, uses both didactic and experimental teaching strategies, and directly applies to general internal medicine and/or general pediatrics.

(b) Training programs of 9 or more months duration would be required to include both a research and administrative component.

(c) Financial assistance to trainees would be required to be limited to a minimum of 3 months (full time) and a maximum of 24 months.

3. Adding to § 57.3106, entitled "*How will applications be evaluated?*", an additional review criterion for the evaluation of the faculty development program to assure that potential applicants have a training program which is consistent with the definition of a "practice of general internal medicine or general pediatrics", as defined under § 57.3102.

As part of a newly implemented policy, the Department recently revised § 57.3106 to remove all non-statutory funding priorities and included in the regulations only those funding priorities that are in the statute. In accordance with this policy, the Department will announce, and solicit public comment on, any special funding factors related to national needs in periodic notices in the **Federal Register**. Further, the removal of the funding priorities previously codified does not necessarily preclude the announcement of all or a part of the funding priorities in a forthcoming **Federal Register** notice.

In addition to the above changes, the NPRM included a number of technical and clarifying changes to conform the regulations with amendements made by Pub. L. 97-35, Pub. L. 99-129, the Health Professions Training Assistance Act of 1985, and Pub. L. 99-239, the Compact of Free Association Act of 1985.

The public comment period on the proposed regulations closed on July 5, 1988. The Department received no comments. Therefore, the amendments set out in the May 3, 1988, NPRM are adopted as proposed.

These final regulations also include an additional technical change to amend the existing regulations by adding the Form PHS application number and the OMB approval number for the application form and insructions in the footnote of § 57.3103, entitled "*Who is entitled to apply for a grant?*" Since this amendment is of a technical nature, the Secretary has determined pursuant to 5 U.S.C. 553 and departmental policy that it is unnecessary and impractical to follow proposed rulemaking procedures.

Regulatory Flexibility Act and Executive Order 12291

These regulations govern financial assistance programs in which participation is voluntary. The rule will not exceed the threshold level of $100 million established in section (b) of Executive Order 12291. For these reasons, the Secretary has determined that this rule is not a major rule under Executive Order 12291 and a regulatory impact analysis is not required. Further, because the rule does not have a significant economic impact on a substantial number of small entities, a regulatory flexibility analysis under the

BEST COPY AVAILABLE

Regulatory Flexibility Act of 1980 is not required.

Paperwork Reduction Act

The recordkeeping and reporting requirements in § 57.3104 and § 57.3111 for this grant program have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (OMB Approval Number 0915–0060). Section 57.3105 does not require clearance and therefore, the approval number shown at the end of this section text is removed.

List of Subjects in 42 CFR Part 57

Dental health, Education of the disadvantaged, Educational facilities, Educational study program, Emergency medical services, Grant programs-education, Grant programs-health, Health facilities, Health professions, Loan programs-health, Medical and dental schools, Scholarships and fellowships, Student aid.

(Catalog of Federal Domestic Assistance, No. 13.900, Grants for Faculty Development in General Internal Medicine and/or General Pediatrics)

Accordingly, 42 CFR Part 57, Subpart FF is amended as set forth below:

Dated: October 21, 1988.

Robert E. Windom,

Assistant Secretary for Health.

Approved: November 23, 1988.

Otis R. Bowen,

Secretary.

PART 57—GRANTS FOR CONSTRUCTION OF TEACHING FACILITIES, EDUCATIONAL IMPROVEMENTS, SCHOLARSHIPS AND STUDENT LOANS

1. The title of 42 CFR Part 57, Subpart FF is revised to read as follows:

Subpart FF—Grants for Residency Training and Faculty Development in General Internal Medicine and/or General Pediatrics

2. The authority citation for Subpart FF is revised to read as follows:

Authority: Sec. 215, Public Health Service Act, 58 Stat. 690, 63 Stat. 35 (42 U.S.C. 216); sec. 784, Public Health Service Act, 90 Stat. 2315, as amended by 95 Stat. 922–923 and 99 Stat. 540 (42 U.S.C. 295g–4).

3. Section 57.3101 is revised to read as follows:

§ 57.3101 To what projects do these regulations apply?

The regulations of this subpart apply to grants to schools of medicine and osteopathy and pubic or private nonprofit hospitals and other public or private nonprofit entities under section 784 of the Public Health Service Act (42 U.S.C. 295g–4) to assist in meeting the cost of projects—

(a) To plan, develop and operate approved residency training programs in internal medicine and/or pediatrics which emphasize the training of residents for the practice of general internal medicine and/or general pediatrics;

(b) To provide financial assistance (in the form of traineeships and fellowships) to residents who are participants in this type of program, and who plan to practice general internal medicine and/or general pediatrics;

(c) To plan, develop and operate a program for the training of physicians who plan to teach in a general internal medicine and/or general pediatrics training program; and

(d) To provide financial assistance (in the form of traineeships or fellowships) to physicians who are participants in any such program and who plan to teach in a general internal medicine and/or general pediatrics training program.

4. Section 57.3102 is amended by adding the definitions for "faculty development program" and "trainee" in alphabetical order and by revising the definition for "school of medicine and osteopathy" and "State" to read as follows:

§ 57.3102 Definitions.

* * * * *

"Faculty development program" means a systematic training program to increase faculty competence in teaching skills and in other areas related to academic responsibility.

* * * * *

"School of medicine and osteopathy" means a public or private nonprofit school which provides training leading respectively to a degree of doctor of medicine or to a degree of doctor of osteopathy and which is accredited as provided in section 701(5) of the Act.

* * * * *

The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands (the Republic of Palau), the Republic of the Marshall Islands, and the Federated States of Micronesia.

"Trainee" means an allopathic or osteopathic general internist or general pediatrician participating in a faculty development training program supported by a grant under section 784 and receiving stipend support for such grant.

5. Section 57.3103 is revised to read as follows:

§ 57.3103 Who is eligible to apply for a grant?

Any school of medicine or osteopathy, public or private nonprofit hospital or any other public or private nonprofit entity, located in a State, may apply for a grant under this subpart. Each eligible applicant desiring a grant under this subpart shall submit an application in the form and at such time as the Secretary may prescribe.[1]

6. Section 57.3104 is amended by revising paragraphs (a), (d), (e), and (h) and the parenthetical statement at the end of the section text. Paragraph (c) of this section is amended by removing "(j) and (l)" in the parenthical statement and inserting "(10) and (12)" in its place.

§ 57.3104 What activities must be addressed in an application?

* * * * *

(a) A proposal for a project to plan, develop, and operate an approved residency training or faculty development program in internal medicine and/or pediatrics—

(1) Which emphasizes the training of residents for the practice of general internal medicine and/or general pediatrics and faculty for teaching in such programs, and

(2) Which may provide financial assistance to residents and trainees who are participants in the programs and who plan to practice or teach in general internal medicine and/or general pediatrics.

* * * * *

(d) In programs other than faculty development, a description of the type and amount of training to be offered to residents in each year of each residency program in accordance with the requirements of § 57.3105 with special attention to the requirements of § 57.3105(a)(11).

(e) In programs other than faculty development, the number of residents to be enrolled in each program, at each level of training, for each year of the project period.

* * * * *

(h) If stipend support is requested by an applicant to provide a portion of the salary of residents enrolled in the program, documentation showing that income available from alternative sources, including income derived from the services of the residents in the program, will be insufficient to pay their salaries and that grant funds will not be

[1] Application and instructions (Form PHS 6025–1, OMB #0915–0060) may be obtained from the Grants Management Officer, Bureau of Health Professions, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

used to supplant other available funds. Stipend support requested for trainees in the faculty development program must be paid in accordance with established Public Health Service postdoctoral stipend levels.

(Approved by the Office of Management and Budget under control number 0915-0060)

7. Section 57.3105 is amended by designating the introductory paragraph as paragraph (a); by redesignating paragraphs (a) through (n) as paragraphs (l) through (14); in newly redesignated paragraph (10) by redesignating paragraphs (1) through (5) as paragraphs (i) through (v); in newly redesignated paragraph (10)(v) by redesignating paragraphs (i) through (iii) as paragraphs (A) through (C); in newly redesignated paragraph (11) by redesignating paragraphs (1) through (3) as paragraphs (i) through (iii); in newly redesignated paragraph (13) by redesignating paragraphs (1) through (3) as paragraphs (i) through (iii); and in newly redesignated paragraph (13)(ii) by redesignating paragraphs (i) through (iii) as paragraphs (A) through (C); by adding a new paragraph (b); and by removing the parenthetical statement at the end of the section text. In § 57.3105, newly redesignated paragraph (a)(11) is amended by removing "(j)" and inserting "(a)(10)." Additionally, in § 57.3105, the phrase "general internal medicine or" is revised to read "general internal medicine and/or" in newly redesignated paragraphs (a)(3), (a)(5), (a)(6), (a)(10), (a)(10)(iii), (a)(10)(iv), (a)(10)(v)(A), (a)(12), and (a)(13)(ii)(C).

§ 57.3105 Project requirements.

* * * * *

(b) For each faculty development program, a project must:

(1) Have a project director who is employed by the grantee or training institution, has relevant training and experience, and has been approved by the Secretary to direct the project;

(2) Have an appropriate administrative and organizational plan and appropriate faculty, staff and facility resources to achieve the stated objectives;

(3) Have a curriculum which:

(i) Directly applies to general internal medicine and/or general pediatrics,

(ii) Emphasizes improvement of pedagogical skills and techniques for clinical teaching in classroom and ambulatory health care settings, and

(iii) Uses structured didactic and experiential teaching strategies.

(iv) With respect to training programs of 9 or more months duration, the curriculum must also include:

(A) A research component, with a research project to be completed by each trainee, and

(B) An administrative component which addresses the non-teaching roles and functions of faculty;

(4) Systematically evaluate the educational program, including trainees and faculty, the administration of the program, and the degree to which the program and educational objectives are met;

(5) Have as trainees only physicians who teach or plan teaching careers in general internal medicine and/or general pediatrics;

(6) To be eligible for stipend support from grant funds, a trainee must:

(i) Be a general internist or a general pediatrician,

(ii) Intend to teach in a general internal medicine and/or general pediatrics program on a full-time basis,

(iii) Be a full-time participant in the training project for at least 3 months, and

(iv) Receive less than full institutional salary during the period of Federal support of stipends; and

(7) Stipend support from grant funds may be no longer than 24 cumulative months for any trainee.

8. Section 57.3106 is amended by removing the period at the end of the sentence in paragraph (a)(4) and inserting a semicolon and the word "and"; by adding a new paragraph (a)(5); and by revising paragraph (b) to read as follows:

§ 57.3106 How will applications be evaluated?

(a) * * *

(5) For faculty development programs, the applicant must demonstrate the institution's commitment to general internal medicine and/or general pediatrics as defined under § 57.3102.

(b) In determining the funding of applications approved under paragraph (a) of this section, the Secretary shall give priority to applicants that demonstrate a commitment to general internal medicine and general pediatrics in their medical education training programs. However, should specific needs warrant, the Secretary will consider any other special factors relating to national needs as the Secretary may from time to time announce in the **Federal Register**.

9. Section 57.3107 is amended by removing paragraph (d), and by revising paragraph (c) to read as follows:

§ 57.3107 How long does grant support last?

* * * * *

(c) Neither the approval of any application nor the award of any grant shall commit or obligate the United States in any way to make any additional, supplemental, continuation or other award with respect to any approved application or portion of an approved application. For continuation support, grantees must make separate application at such times and in such a form as the Secretary may prescribe.

10. Section 57.3109 is amended by adding a new paragraph (c) to read as follows:

§ 57.3109 For what purposes may grant funds be spent?

* * * * *

(c) Any balance of federally obligated grant funds remaining unobligated by the grantee at the end of a budget period may be carried forward to the next budget period for use as prescribed by the Secretary, provided a continuation award is made. If at any time during a budget period it becomes apparent to the Secretary that the amount of Federal funds provided and made available to the grantee for that period, including any unobligated balance carried forward from prior periods, exceeds the grantee's needs for the period, the Secretary may adjust the amounts provided by withdrawing the excess. A budget period is an interval of time (usually 12 months) into which the project period is divided for funding and reporting purposes.

11. Section 57.3111 is amended by adding the following parenthetical statement at the end of the section text to read as follows:

§ 57.3111 What other audit and inspection requirements apply to grantees?

* * * * *

(Approved by the Office of Management and Budget under control number 0915-0060)

[FR Doc. 88-28885 Filed 12-14-88; 8:45 am]

BILLING CODE 4160-15-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6819]

List of Communities Eligible for the Sale of Flood Insurance, Delaware

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities were required to adopt

floodplain management measures compliant with the NFIP revised regulations that became effective on October 1, 1986. If the communities did not do so by the specified date, they would be suspended from participation in the NFIP. The communities are now in compliance. This rule withdraws the suspension. The communities' continued participation in the program authorizes the sale of flood insurance.

EFFECTIVE DATE: As shown in last column.

ADDRESS: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the NFIP at: P.O. Box 457, Lanham, Maryland 20706, Phone: (800) 638–7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The NFIP enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding.

In addition, the Director of FEMA has identified the Special Flood Hazard Areas in these communities by publishing a Flood Insurance Rate Map. In the communities listed where a flood map has been published, section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the Special Flood Hazard Area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, FEMA, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on these participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance and floodplains.

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, the suspension for each listed community has been withdrawn. The entry reads as follows:

§ 64.6 List of eligible communities.

State and community name	County	Community No.	Effective date
Delaware.			
Bethany Beach, Town of	Sussex	105083	Nov. 18, 1988. suspension Withdrawn.
Blades, Town of	Sussex	100031	Do.
Clayton, Town of	Kent	100005	Do.
Little Creek, Town of	Kent	100015	Do.
Rehoboth Beach, City of	Sussex	105086	Do.
Slaughter Beach, Town of	Sussex	100050	Do.
Wyoming, Town of	Kent	100020	Do.

Issued: December 7, 1988.

Harold T. Duryee,

Administrator Federal Insurance Administration.

DEPARTMENT OF DEFENSE

48 CFR Parts 204, 213, 215, 217, 219, 225, 227, 235, 237, 245, 252, 253, 270, and Appendix T

[Defense Acquisition Circular (DAC) 88–2]

Department of Defense, Federal Acquisition Regulation Supplement; Regulatory and Miscellaneous Amendments

AGENCY: Department of Defense (DoD).

ACTION: Final Rules and interim rules as indicated.

SUMMARY: Defense Acquisition Circular (DAC) 88–2 amends the DoD FAR Supplement (DFARS) with respect to contract reporting, information reporting to the Internal Revenue Service (IRS), contracting with contractors and subcontractors affected by the Intermediate-Range Nuclear Forces (INF) Treaty, Small Purchase Pricing Memorandum; Make-or-Buy Program, threshold for items and work included; field pricing support, options, contracting with small disadvantaged business concerns, small business set-asides, drug-free work force, excess and near-excess foreign currency, rights in technical data, progress payment rate change, advisory and assistance services; Government-Furnished mapping, charting and geodesy (MC&G) property; DD Form 1638, Report of Disposition of Contractor Inventory; revisions to Part 270, use of DD Form 1851. This DAC also includes a copy of a Memorandum of Understanding (MOU) between the Government of the French Republic and the Government of the United States.

EFFECTIVE DATE: December 1, 1988, unless otherwise noted in the

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, Defense Acquisition Regulatory Council, ODASD(P)/DARS, OASD(P&L), c/o OUSD(A)(M&RS), Room 3D139, The Pentagon, Washington, DC 20301–3062, telephone (202) 697–7266.

SUPPLEMENTARY INFORMATION:

A. Background

The DoD FAR Supplement is codified in Chapter 2, Title 48 of the Code of Federal Regulations.

The October 1, 1987 revision of the CFR is the most recent edition of that title. It reflects amendments to the 1986 edition of the DoD FAR Supplement

made by Defense Acquisition Circulars 86–1 through 86–5. Amendments made by DACs 86–6 through 86–16 were published in the **Federal Register** at 53 FR 38171, September 29, 1988, and will be included in the October 1, 1988 revision of the CFR.

B. Public Comments

DAC 88–2, Items I, II, IV Through VII, IX, XI, XIV, XVI, and XVII

Public comments were not solicited with respect to these revisions since such revisions do not alter the substantive meaning of any coverage in the DFARS having a significant impact on contractors or offerors, or do not have a significant effect beyond agency internal operating procedures. However, comments from small entities concerning the affected DoD FAR Supplement coverage will be considered. Please cite DAR Case 88–610D.

DAC 88–2, Item III

An interim rule was published in the **Federal Register** on June 6, 1988 (53 FR 20631), and public comments were solicited. Comments are being considered in formulating a final rule.

DAC 88–2, Item VIII

An interim rule was published in the **Federal Register** on June 6, 1988 (53 FR 20626), and public comments were solicited. Comments were considered in formulating this final rule.

DAC 88–2, Item X

An interim rule was published in the **Federal Register** on September 28, 1988 (53 FR 37763), and public comments were solicited. Comments are being considered in formulating a final rule.

DAC 88–2, Item XII

An interim rule was published in the **Federal Register** on October 28, 1988 (53 FR 43698), and a correction was published on November 7, 1988 (53 FR 44975). Public comments were solicited and are being considered.

DAC 88–2, Item XIII

An interim rule was published in the **Federal Register** on September 14, 1988 (53 FR 35511), and public comments were solicited. Comments are being considered in formulating a final rule.

DAC 88–2, Item XV

A proposed rule was published in the **Federal Register** on May 16, 1988, and public comments were solicited. Comments were considered in formulating this final rule.

DAC 88–2, Item XVIII

This item is for informational purposes and does not contain revisions to the DFARS.

C. Regulatory Flexibility Act

DAC 88–2, Items I, II, IV Through VII, IX, XI, and XVI Through XVIII

Comments were not solicited with respect to these items. The Regulatory Flexibility Act does not apply.

DAC 88–2, Item III

An interim rule was published in the **Federal Register** on June 6, 1988 (53 FR 20631), and public comments were solicited. Comments are being considered in formulating a final rule.

DAC 88–2, Item VIII

An Initial Regulatory Flexibility Analysis in connection with the implementation of sections 1207 and 806 was previously furnished to the Chief Counsel for Advocacy of the U.S. Small Business Administration (SBA) on February 17, 1988, in accordance with 5 U.S.C. 603. A Final Regulatory Flexibility Analysis was deferred pending resolution of comments on the interim portion of the June rule. Upon completion, it will be furnished to the Chief Counsel for Advocacy of the U.S. SBA. Interested parties desiring to obtain a copy of the Final Regulatory Flexibility Analysis upon its completion should contact Mr. Charles W. Lloyd, Executive Secretary, DAR Council, at the address shown above.

DAC 88–2, Item X

An interim rule was published in the **Federal Register** on September 28, 1988 (53 FR 37763), and public comments were solicited. Comments are being considered in formulating a final rule.

DAC 88–2, Item XII

A revised Regulatory Flexibility Analysis is necessary and is being provided to the Chief Counsel for Advocacy of the U.S. Small Business Administration. Interested parties may obtain a copy of the Analysis by submitting a written request to Mr. Charles W. Lloyd, at the address shown above.

DAC 88–2, Item XIII

This rule may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because the progress payment rate for small businesses will be increased, the retainage rate on military construction contracts will be lowered, and the basis for a payment on architect-engineer contracts will be increased. An Initial Regulatory Flexibility Analysis has been prepared and submitted to the Chief Counsel for Advocacy of the Small Business Administration (SBA). A copy of the Initial Regulatory Flexibility Analysis may be obtained from Mr. Charles W. Lloyd, Executive Secretary, DAR Council, at the address shown above.

DAC 88–2, Item XIV

This rule does not constitute a significant revision to the DFARS within the meaning of FAR 1.501 and Pub. L. 98–577 because the rule does nothing more than implement OMB policy promulgated in 53 FR 768, January 12, 1988.

DAC 88–2, Item XV

A proposed rule was published in the **Federal Register** on May 16, 1988, and public comments were solicited. Comments were considered in formulating this final rule.

D. Paperwork Reduction Act

DAC 88–2, Items I Through XI, and XIII Through XVII

The Paperwork Reduction Act does not apply because these rules do not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 *et seq.*

DAC 88–2, Item XII

This rule contains information collection requirements within the meaning of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* An information collection clearance request has been submitted to OMB pursuant to 5 CFR 1320.18. Public comments concerning that request will be invited by OMB through a subsequent Federal Register notice.

DAC 88–2, Item XVIII

The Paperwork Reduction Act does not apply because this item is for informational purposes.

List of Subjects in 48 CFR Parts 204, 213, 215, 217, 219, 225, 227, 235, 237, 245, 252, 253, 270, and Appendix T

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

[Defense Acquisition Circular No. 88–2]

December 1, 1988.

Unless otherwise specified, all DoD FAR Supplement and other directive material contained in this Defense

Acquisition Circular is effective December 1, 1988.

Defense Acquisition Circular (DAC) 88–2 amends the DoD Federal Acquisition Regulation Supplement (DFARS) 1988 Edition and prescribes procedures to be followed. The following is a summary of the amendments and procedures.

Item I—Contract Reporting

This DAC contains revisions to DFARS Subpart 204.6 and DD Forms 350 and 1057. Most of the revisions pertain to the data elements that were previously added to Part E of the DD Form 350 for fiscal year 1988. Coverage regarding Distribution of Defense Subcontracts Placed Overseas, formerly at 204.670–4, has been restructured and relocated at 204.674. The clause at 252.204–7005 has also been restructured. With respect to awards of $25,000 and less, revisions have been made to be consistent with the data collected on the DD Form 350 and in the Federal Procurement Data System. This coverage was provided through Departmental channels by Departmental Letter No. 88–29, dated September 2, 1988, and was published as a final rule in the **Federal Register** on September 2, 1988 (53 FR 34090), with an effective date of October 1, 1988.

Item II—Information Reporting to the Internal Revenue Service (IRS)

26 U.S.C. 6041 and 6041A, in part, require payers, including the Federal Government, to report to the IRS certain payments made in the course of business. 26 U.S.C. 6050M requires heads of Federal Executive agencies to report certain contract information to the IRS. FAR coverage, developed to comply with these statutes, was published in the **Federal Register** in FAC 84–40 on October 26, 1988. DFARS 204.6 has been revised and a new Subpart 204.9 has been added to accommodate the FAR and IRS directives. The DFARS coverage was provided through Departmental channels by Departmental Letter No. 88–34, dated October 26, 1988, and was published as a final rule in the **Federal Register** on October 26, 1988, effective November 25, 1988.

Item III—Contracting With Contractors and Subcontractors Affected by the Intermediate-Range Nuclear Forces (INF) Treaty

DFARS 209.103 is revised to prohibit denial of contract or subcontract awards in excess of $25,000 to defense contractors subject to on-site inspection under the Intermediate-Range Nuclear Forces (INF) Treaty solely or in part because of the presence of Soviet inspectors at the defense contractor's facility unless that decision is reviewed by the Senior Procurement Executive of the procuring Department or Agency and approved by the Under Secretary of Defense for Acquisiton. A related clause is added at 252.209–7001. This coverage was provided through Departmental channels by Departmental Letter No. 88–14, dated May 31, 1988, was published as an interim rule in the **Federal Register** on June 6, 1988 (53 FR 20631), and is effective for contracts resulting from solicitations issued on or after June 3, 1988.

Item IV—Small Purchase Pricing Memorandum

The coverage at 213.106(c) and DD Form 1784 are deleted. The coverage, which required a contracting officer to complete a DD Form 1784 to support a conclusion that a fair and reasonable price had been negotiated, unnecessarily duplicates the detailed guidance already provided at FAR 13.106(c).

Item V—Make-or-Buy Programs, Threshold for Items and Work Included

DFARS 215.704 is revised to raise the threshold for inclusion of items or work efforts to make-or-buy programs from $500,000 to $1 million.

Item VI—Field Pricing Support

DFARS 215.805–5(c)(1)(S–70)(A) is revised to set forth clearly the process used when only an audit report is requested by the contracting officer.

Item VII—Options

DFARS 217.204(e) and 235.007(S–70) are added to advise contracting officers of the restrictions in 10 U.S.C. 2352 concerning the term of research and development contracts.

Item VIII—Contracting With Small Disadvantaged Business Concerns

Departmental Letter No. 88–15, dated May 31, 1988, and an interim rule published in the **Federal Register** on June 6, 1988 (53 FR 20626), provided coverage to implement section 1207 of Pub. L. 99–661 and section 806 of Pub. L. 100–180. The coverage revised the DFARS to eliminate the application of the evaluation preference to total small business set-asides. This DAC adopts as a final rule the interim rule published on June 6, 1988, with editorial changes to that rule.

Item IX—Small Business Set-Asides

DFARS 219.508 is revised to clarify the applicability of amendments made to sections 8 and 15 of the Small Business Act by section 921, Pub. L. 99–661. This revision requires that the clause at FAR 52.219–14, which is to be inserted in contracts where any portion of the requirements is to be set aside for small business will be used by DoD also where the set-aside is for small disadvantaged business.

Item X—Drug-Free Work Force

A new Subpart 223.75 is added to set forth DoD policy concerning use of illegal drugs by the American work force as it affects defense contracts, and to provide guidance for use of a contract clause in those acquisitions involving access to classified information or where the contracting officer determines that such a clause is necessary in the interest of national security, health or safety. This coverage was provided through Departmental channels by Departmental Letter No. 88–32, dated September 29, 1988, and was published as an interim rule in the **Federal Register** on September 28, 1988 (53 FR 37763), effective October 31, 1988.

Item XI—Excess and Near-Excess Foreign Currency

DFARS 225.7607 is deleted because the coverage appears in the FAR. DFARS 225.7601 is revised to remove reference to 225.7607 and to provide reference to the OMB Bulletin concerning Excess Foreign Currencies.

Item XII—Rights in Technical Data

DFARS Subpart 227.4 is revised in its entirety. Related clauses in 252.227 are also revised. This coverage was provided through Departmental channels by Departmental Letter No. 88–35, dated October 24, 1988, was published as an interim rule in the **Federal Register** on October 28, 1988 (53 FR 43698), and corrected on November 7, 1988 (53 FR 44975), effective October 31, 1988.

Item XIII—Progress Payment Rate Changes

DFARS Part 232 is revised to change progress payment rates on defense contracts to the levels currently provided in the FAR. This coverage was provided through Departmental channels by Departmental Letter No. 88–30, dated September 16, 1988, and was published as an interim rule in the **Federal Register** on September 14, 1988 (53 FR 35511), effective October 1, 1988.

Item XIV—Advisory and Assistance Services

The current coverage at DFARS Subpart 237.204, 237.205–70, and 235.270 is deleted since FAR 37.2 has been rewritten to implement OMB Circular

A–120, "Guidelines for the Use of Advisory and Assistance Services", dated January 12, 1988. DFARS 237.205 is revised to implement management controls required by DoDD 4205.2, DoD Contracted Advisory and Assistance Services (CAAS), and 237.206 is added to implement requirements of Chapter 131 of 10 U.S.C., section 2212.

Item XV—Government-Furnished Mapping, Charting and Geodesy (MC&G) Property

DFARS 245.3 is revised to ensure control of MC&G property in the possession of Government contractors during performance of a contract, and to provide that such property is properly disposed of at the end of the contract performance period. A related clause is added at 252.245–7000. This coverage was published as a proposed rule in the **Federal Register** on May 16, 1988 (53 FR 17233).

Item XVI—DD Form 1638, Report of Disposition of Contractor Inventory

DD Form 1638 is revised to make the form compatible with SF 1424, Inventory Disposal Report.

Item XVII—Revisions to Part 270, Use of DD Form 1851

Based on Federal regulatory requirements, DoD policy requires that before computer equipment can be acquired from commercial sources, it must be determined that the requirement cannot be filled through the Automation Equipment Reutilization Program at a greater savings to the Government. Defense Automation Resources Management Manual, DoD 7950.1–M, Chapter 2, Paragraph D, prescribes the use of DD Form 1851 to initiate excess equipment to satisfy known requirements.

The revision to DFARS 270.602 prescribes the use of DD Form 1851, in lieu of DD Form 1419, by DoD contractors for reporting computer equipment requirements to the Defense Automation Resources Information Center (DARIC). The DD Form 1851 replaces the DD Form 1419 for such reporting purposes, although the DD Form 1419 is still used for its orginally intended purpose by the Defense Industrial Plant Equipment Center (DIPEC) as a requisition document. The DD Form 1851 also replaces a previous and no longer authorized version of DD Form 1851 which was used by DoD Components for requirements reporting. The revised version of the DD Form 1851 was designed specifically for requirements reporting and is easier to use than the DD Form 1419, which is not readily adaptable for automated screening. Additionally, the DD Form 1851 does not require extensive authorizations/approvals, can accommodate multiple line items per submission, contains all necessary data elements, and is compatible with DARIC's automated data base.

Item XVIII—Memorandum of Understanding (MOU) Between the Government of the French Republic and the Government of the United States

This DAC contains an MOU between the Government of the French Republic and the Government of the United States.

Adoption of Amendments

Therefore the DoD FAR Supplement is amended as set forth below.

1. The authority for 48 CFR Parts 204, 213, 215, 217, 219, 225, 227, 235, 237, 245, 252, 253, 270, and Appendix T continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

PART 204—ADMINISTRATIVE MATTERS

2. The final rule published on September 2, 1988 (53 FR 34090) is corrected as follows:

204.670–2 [Corrected]

3. On page 34091, section 204.670–2 is corrected in the definition for "Commercial and Government Entity (CAGE) Code", in paragraph (a) by removing the semi-colon after the word "manufacturer" and by adding before the word "or" the words "and published in the Commercial and Government Entity (CAGE) Handbook H4/H8;".

204.670–4 [Corrected]

4. On page 34092, section 204.670–4 is corrected by substituting in the first sentence the word "sections" in lieu of the word "section".

2204.671–3 [Corrected]

5. On page 34092, section 204.671–3 is corrected by adding in the first sentence of paragraph (d)(6) between the word "petroleum"; and the word "products" the words "and petroleum" and by substituting in the second sentence of paragraph (d)(7) between the word "These" and the word "shall" the word "transactions" in lieu of the word "translations".

2204.671–4 [Corrected]

6. On page 34093, section 204.671–4 is corrected by adding in the last sentence of paragraph (c) between the word "coding" and the word "items" the word "of"; and by substituting in the second sentence of paragraph (e) between the word "or" and the word "shall" the acronym "TCO" in lieu of the acronym "TOC"

204.671–5 [Corrected]

7. Beginning on page 34094, section 204.671–5 is corrected by substituting in paragraph (b), in the second sentence of paragraph (iii)(E) under Item B5B the reference in parentheses "253.303–70–DD–2051" in lieu of the reference "53.303–70–DD–2051"; by substituting in paragraph (b), in the first sentence of paragraph (i) under Item B6A between the word "the" and the word "and" the words "United States" in lieu of the abbreviation "U.S."; by adding in paragraph (b), in the fourth sentence of paragraph (i) under Item B6A between the acronym "FIPS" and the number "55–2" the abbreviation "PUB"; by substituting in paragraph (b), in the first sentence of paragraph (i) under Item B6B between the word "the" and the word "and" the words "United States" in lieu of the abbreviation "U.S."; by substituting in paragraph (b) in the title for Item B9, the word "Sale" in lieu of the word "Sales"; by substituting in paragraph (b), in the second sentence of paragraph (i) under Item B12A between the word "action" and the abbreviation "RDT&E" the word "for" in lieu of the word "or"; by substituting in paragraph (b), in paragraph (v) under Item B12B, the reference in parentheses "270" in lieu of the reference "70"; by substituting in paragraph (b), in the last sentence of the paragraph entitled "Code 4" in paragraph (ii) under Item B13 between the word "Codes" and the word "as" the words "A through G" in lieu of the abbreviation "A-G"; by substituting in paragraph (b) in the second sentence of the paragraph entitled "Code 5" in paragraph (ii) under Item B13 between the word "orders" and the word "against" the word "placed" in lieu of the word "place"; by substituting in paragraph (b), in the last sentence of the paragraph entitled "Code 5" in paragraph (ii) under Item B13 between the word "Codes" and the word "as" the words "A through G" in lieu of the abbreviation "A-G"; by substituting in the first sentence of paragraph (c)(4) between the number "7" and the word "Items" the word "complete" in lieu of the word "completer"; by placing in quotation marks in paragraph (c) in the first sentence of paragraph (i) of Code A under Item C4 between the word "as" and the word "if" the words "price competition"; by substituting in paragraph (c) at the end of the second sentence of paragraph (i) of Code A

under Item C4 the word "made" in lieu of the word "make"; by substituting in paragraph (c) in the title of Code E under Item C4 between the word "Catalog" and the word "Market" the word "or" in lieu of the word "of"; by changing in paragraph (c) in paragraph (iv) under Item C8 the reference in parentheses to read "206.270" in lieu of "206.207"; by adding in paragraph (c) in Code 1G under Item C9 between the word "if" and the word "action" the word "the"; by removing in paragraph (c) in Code A under Item C10 between the word "of" and the abbreviation "FAR" the word "the"; by removing in paragraph (c) in Code B under Item C10 between the word "of" and the abbreviation "FAR" the word "the"; by substituting in paragraph (c) in Code B under Item C10 the reference "22.6" in lieu of the reference "22.0"; by substituting in paragraph (c) in Code A under Item C12 between the word "the" and the word "at" the word "clauses" in lieu of the word "provisions"; by substituting in paragraph (c) under Item C13A between the word "end" and the word "as" the word "products" in lieu of the word "product"; by substituting in paragraph (d)(2) between the word "with" and the word "and" the reference "219.301–70" in lieu of the reference "FAR 19.301–70"; by substituting in paragraph (d) in the first sentence of Item D2 between the word "Item" and the word "is" the number "B13" in lieu of the number "B7"; by substituting in paragraph (d) between "Code Z" under Item D3 and Item D4A the title "Item D4, Preference Program" in lieu of the title "D4, Preference Program"; by adding in paragraph (d) in the first sentence of the introductory text of Item D4A between the word "in" and the number "D4C" the word "Item"; by adding in paragraph (d) in the last sentence of Code A under Item D4A between the word "in " and the number "D4C" and word "Item"; by substituting in paragraph (d) in Code C under Item D4A the reference "219.502–3(S–70)" in lieu of the reference "219.502–3(70)"; by adding in paragraph (d) in Code C under Item D4B between the word "to" and the word "as" the words "an SDB firm"; by substituting in paragraph (d) at the end of Code E under Item D4B the reference "219.502–3(S–70)" in lieu of the reference "219.502–3(70)"; by adding in paragraph (d) in Code B under Item D4D between the word "Labor" and the word "Area" the word "Surplus"; by substituting in paragraph (d) at the end of Code B under Item D4D the reference in parentheses "(220.7003)" in lieu of the reference "(FAR 20.7003)"; by substituting in paragraph (d) in the introductory text of Item D4E between the word "coded" and the word "or" the words "C through E" in lieu of the abbreviation "C–E"; by substituting in paragraph (d) in paragraph (i) of Item D4E between the word "coded" and the word "or" the words "C through E" in lieu of the abbreviation "C–3"; by substituting in paragraph (d) in paragraph (ii) of Item D4E between the word "coded" and the word "or" the words "1 through 4" in lieu of the abbreviation "1–4"; by substituting in paragraph (d) in paragraph (iii) of Item D4E between the word "or" and the word "enter" the words "B through G," in lieu of the abbreviation "B–G,"; by adding in paragraph (d) in the introductory text of Item D7 between the word "If" and the number "B13" the word "Item"; and in paragraph (e) between "Code N" under Item E1 and paragraph (f), the title is changed to read "Items E2 through E8" in lieu of the title "Item E2–E8".

204.672–1 [Corrected]

8. On page 34101, § 204.672–1 is corrected by removing the word "each" at the end of the first sentence.

204.672–5 [Corrected]

9. On page 34102, § 204.672–5 is corrected by substituting in pargraph (b) at the end of the first sentence of Line B3 the words " 'United States and Outlaying Areas' as defined in 204.672–4." in lieu of the words "U.S. and outlying areas as defined above."; by substituting in paragraph (b) at the end of the first sentence of Line B4 the words " 'United States and Outlying Areas' as defined in 204.672–4." in lieu of the words "U.S. and outlying areas as defined above."; by substituting in paragraph (b) at the end of the first sentence of Line B5 the words " 'United States and Outlying Areas' as defined in 204.672–4." in lieu of the words "U.S. and outlying areas as defined above." by substituting in paragraph (b) in the first sentence under line B6 between the word "listed" and the word "such" the words "in 204.672–4" in lieu of the word "above"; by substituting in paragraph (b) at the end of the first sentence of Line B6 the words " 'United States and Outlying Areas' as defined in 204.672–4." in lieu of the words "U.S. and outlying areas as defined above."; by substituting in paragraph (c) under Line C1C the words " 'United States and Outlying Areas.' " in lieu of the words "U.S. and outlying areas."; by substituting in paragraph (c)(iii) under Line C2C the words " 'United States and Outlying Areas.' " in lieu of the words "U.S. and outlying areas."; by substituting in paragraph (c)(iii) under Line C3C the words " 'United States and Outlying Areas.' " in lieu of the words "U.S. and outlying areas."; by substituting in paragraph (d) under Line D3 the words " 'United States and Outlying Areas.' " in lieu of the words "U.S. and outlying areas."; by substituting in paragraph (d) in the title for Line D4 between the word "Colleges" and the word "Universities" the word "and" in lieu of the word "or"; by substituting in paragraph (e) in the title for Line E1A between the word "Small" and the word "Set-Aside" the word "Purchase" in lieu of the word "Purchases"; and by substituting in paragraph (e) at the end of the sentence in Line E2B the reference "(see 219.502–3(S–70))" in lieu of the reference "(see 219.502–3(70))".

204.672–6 [Corrected]

10. On page 34104, § 204.672–6 is corrected by adding at the beginning of the first sentence the word "A" and changing the capital "M" to a lower-case "m" for the word "magnetic".

204.673 [Corrected]

11. On page 34104, §§ 204.673–1 through 204.673–4 are correctly added to read as follows:

204.673–1 Purpose.

The DD Form 1547 is the principal source document for maintaining a DoD-wide management information system on profit and fee statistics, as required under DoD Instruction 7730.27, "Reporting of Planned and Negotiated Contract Profit Rates" (see 215.970). The management information system is extensively used within the Office of the Secretary of Defense to serve a wide variety of purposes ranging from evaluating profit and fee policies to responding to information requests received from all branches of the Government, Congress, and the public.

204.673–2 Responsibilities.

The Heads of the Military Departments shall develop the necessary policies, procedures, and internal controls for implementing this reporting system. The contracting officer is responsible for properly preparing the DD Form 1547 and forwarding a copy of it to the designated office within 30 calendar days after the date of contract award. The contracting officer is also responsible for the correction of any errors detected by the system's auditing processes.

204.673–3 Applicability.

For the field contracting offices specified below, a copy of the completed DD Form 1547 shall be forwarded to the office designated for all contract actions

valued $500,000 or more where the contracting officer employed either the Weighted Guidelines Method (215.970), an alternate structured approach (215.971), or the Modified Weighted Guidelines Method (215.972). Offices located outside the United States, its possessions, and Puerto Rico are exempt from this reporting requirement.

(a) *Army.* Contracting officers from all field contracting offices shall forward completed DD Forms 1547 directly to the Office of the Assistant Secretary for Research, Development and Acquisition (SARD-KS), Washington, DC 20310-0600 or through intermediate office shown below:

(1) For Army Materiel Command field contracting offices, send through Army Materiel Command, ATTN: AMCPP-SC, 5001 Eisenhower Avenue, Alexandria, VA 22333-0001; and

(2) For U.S. Army Corps of Engineers contracting offices, send through Office of the Chief of Engineers, HQDA (DAEN-PRP), Washington, DC 20314-1000.

(b) *Navy.* (1) Contracting officers from the contracting offices specified below and all subordinate field offices shall forward completed DD Forms 1547 to the office designated in paragraph (b)(2) of this section:

(i) Naval Air Systems Command;
(ii) Naval Sea Systems Command;
(iii) Space and Naval Warfare Systems Command;
(iv) Naval Facilities Engineering Command;
(v) Naval Supply Systems Command;
(vi) Office of Naval Research;
(vii) Headquarters, United States Marine Corps; and
(viii) Strategic Systems Project Office.

(2) Designated Office: Commander, Naval Supply Systems Command (SUP 024B), Washington, DC 20376.

(c) *Air Force.* (1) Contracting officers from all field contracting offices in the Air Force Systems Command and Air Force Logistics Command shall forward completed DD Forms 1547 to HQ AFLC/LMSC/SORS, Wright-Patterson Air Force Base, Ohio 45433.

204.673-4 Procedures.

(a) All elements of the DD Form 1547 shall be completed by the contracting officer as instructed in 215.970-2, 215.971-3, and 215.972-2.

(b) Completed forms shall be sent to the designated office, as an unclassified document, within 30 days after contract award. Classified information shall not be entered into the management information system on profit. The designated office will perform the necessary audit tests to ensure that the information on the DD Form 1547 is accurate. Use of mechanized or automated systems is desirable.

(c) The designated offices shall transmit the DD Form 1547 information in the manner and format specified in DoD Instruction 7730.27.

(d) The reporting requirements of this part have been assigned RCS: P&L(Q) 1751.

PART 213—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

213.106 [Amended]

12. Section 213.106 is amended by removing paragraph (c).

PART 215—CONTRACTING BY NEGOTIATION

215.704 [Amended]

13. Section 215.704 is amended by substituting the dollar figure "$1 million" in lieu of the dollar figure "500,000".

14. Section 215.805-5 is amended by revising paragraph (c)(1)(S-70)(A), to read as follows:

215.805-5 Field pricing support.

* * * * *

(c)(1)(S-70) * * *

(A) The Plant Representative/Administrative Contracting Officer (Plant Rep/ACO) is the team manager for all contracting officer requests for field pricing support. The contracting officer shall send all requests for field pricing support to the cognizant field contract administration activity; generally, the Plant Rep for the Services and the ACO for DCAS (DLA). An advance copy of the contracting officer's request shall also be sent to the cognizant audit activity. When only an audit report is requested by the contracting officer, the auditor shall treat the advance copy of the contracting officer's request as a signal to begin the audit work. When an audit is completed, the audit activity shall: (*1*) Send the original of the audit report to the Plant Rep/ACO, and (*2*) send an advance copy of the audit report to the contracting officer. To expedite the pricing review process, these requests shall be marked in bold letters on the mailing envelope "**FIELD PRICING REQUEST.**" On urgent requests, provide facsimile numbers in the requests to facilitate sending the complete report.

* * * * *

PART 217—SPECIAL CONTRACTING METHODS

15. Section 217.204 is added to Subpart 217.2, to read as follows:

217.204 Contracts.

(e) The approving authority for actions under FAR 17.204(e) is the Chief of the Contracting Office. This approval authority shall not be delegated.

PART 219—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

16. The interim rule published on June 6, 1988 at 53 FR 20626), and corrected on June 15, 1988 (53 FR 22426) and on June 16, 1988 (53 FR 22609), is adopted as final with the following changes:

17. Section 219.202-5 is amended by revising the first sentence of paragraph (b), by substituting in the first word of the title of the format following paragraph (b) the word "Percentage" in lieu of the word "Premium"; by substituting in Item 2 of the format following paragraph (b) the words "Modification number (if appropriate)" in lieu of the words "Action date"; by removing the text in Item 3 and Items 3 a. through d. and substituting in Item 3 the words "Award date ———."; and by removing paragraph (c), to read as follows:

219.202-5 Data collection and reporting requirements.

* * * * *

(b) The contracting officer shall insert the following format in the contract file for each award of a letter contract, a definitive contract superseding a letter contract, an initial definitive contract, orders under a BOA, and additional work under a new agreement (including options exercised at time of award) * * *.

18. Section 219.508 is amended by adding paragraph (e) to read as follows:

219.508 Solicitation provisions and contract clauses.

* * * * *

(e) The contracting officer shall insert the clause at FAR 52.219-14, Limitations on Subcontracting, in solicitations and contracts, except those awarded using small purchase procedures in FAR Part 13, for supplies, services, and construction, if any portion of the requirement is to be set aside for small business (including small disadvantaged business), or if the contract is to be awarded under FAR Subpart 19.8.

PART 225—FOREIGN ACQUISITION

225.7601 [Amended]

19. Section 225.7601 is amended by revising the last sentence of the definition "Excess Foreign Currency" to read: "Countries in which the United States owns excess foreign currency are

listed in the OMB Bulletin, 'Excess Foreign Currencies', published annually in accordance with OMB Circular A–20. This Bulletin is distributed through agency procedures."; and by revising the last sentence of the definition "Near-Excess Foreign Currency" to read: "Countries in which the United States owns near-excess foreign currency are listed in the OMB Bulletin, 'Excess Foreign Currencies', published annually in accordance with OMB Circular A–20. This Bulletin is distributed through agency procedures."

225.7607 [Removed]

20. Section 225.7607 is removed.

PART 227—PATENTS, DATA, AND COPYRIGHTS

21. The interim rule published on October 28, 1988 (53 FR 43698) and corrected on November 5, 1988 (53 FR 44975) is corrected as follows:

227.471 [Corrected]

22. On page 43700, § 227.471 is corrected by substituting in the last sentence of the introductory text of the definition entitled "Limited rights" between the word "such" and the word "if" the word "persons" in lieu of the word "person".

227.472–1 [Corrected]

23. On pages 43700 and 43701, § 227.472–1 is corrected by substituting at the beginning of the second sentence of paragraph (a) the word "Its" in lieu of the word "It"; and by adding in the third sentence of paragraph (a) between the word "source" and the word "supply" the word "of".

227.472–3 [Corrected]

24. On page 43701, § 227.472–3 is corrected by substituting in the second sentence of the introductory text, between the word "rights," and the word "rights," the word "limited" in lieu of the word "limiting"; by substituting at the beginning of paragraph (a)(1)(iv) the word "Manuals" in lieu of the word "Manual"; and by substituting in paragraph (a)(1)(iv) between the word "any" and the word "contract" the word "Government" in lieu of the word "Governmental".

227.475–2 [Corrected]

25. On page 43706, § 227.475–2 is corrected by substituting in the second sentence of paragraph (b) between the word "all" and the word "(other" the word "items" in lieu of the word "item"; and by substituting in the last sentence of paragraph (b) between the word "delivery" and the word "the" the word "of" in lieu of the word "or".

227.475–3 [Corrected]

26. On page 43706, § 227.475–3 is corrected by substituting at the end of the last sentence the reference "246.708" in lieu of the reference "246.703".

227.481–2 [Corrected]

27. On page 43708, § 227.481–2 is corrected by substituting in the last sentence of paragraph (b)(4) between the word "software" and the word "at" the word "developed" in lieu of the word "development".

PART 235—RESEARCH AND DEVELOPMENT CONTRACTING

28. Section 235.007 is amended by adding paragraph (S–70) following paragraph (g), to read as follows:

235.007 Solicitations.

* * * * *

(S–70) 10 U.S.C. 2352 provides that, subject to availability of funds, contracts for services or for the use of facilities for research or development, or both, may be for a term of not more than five years and may be extended for no more than five years.

PART 237—SERVICE CONTRACTING

237.204 [Amended]

29. Section 237.204 is amended by removing paragraph (S–70) and by redesignating the existing paragraph (S–71) as paragraph (S–70).

30. Section 237.205 is revised to read as follows:

237.205 Management controls.

DoD Directive 4205.2, DoD Contracted Advisory and Assistance Services, contains these procedures.

237.205–70 [Removed]

31. Section 237.205–70 is removed.

237.205–71 [Removed]

32. Section 237.205–71 is removed.

33. Section 237.206 is added to read as follows:

237.206 Requesting office responsibilities.

(b) Departments shall further ensure that when there is a need for the use of the type of services in FAR 37.203, the approval authority for actions greater than $50,000 is not below the SES manager or General or Flag Officer level, except when 0–6 personnel are filling such command or management positions or have subordinate SES personnel.

237.270 [Removed]

34. Section 237.270 is removed.

PART 245—GOVERNMENT PROPERTY

35. Section 245.301 is amended by adding between the definition "Industrial Plant Equipment" and the definition "Other Plant Equipment" the following definition to read as follows:

245.301 Definitions.

* * * * *

"Mapping, Charting and Geodesy (MC&G) Property", as used in this subpart, means geodetic, geomagnetic, gravimetric, aeronautical, topographic, hydrographic, cultural, and toponymic data presented in the form of topographic, planimetric, relief, or thematic maps and graphics; nautical and aeronautical charts and publications; and in simulated, photographic, digital, or computerized formats.

* * * * *

36. Sections 245.310 and 245.310–1 are added to read as follows:

245.310 Providing mapping, charting and geodesy property.

(a) All Government-Furnished Mapping, Charting and Geodesy (MC&G) Property is under the control of the Director, Defense Mapping Agency (DMA). (See DoD Directive 5105.40.)

(b) The clause at 252.245–7000 provides that Government-Furnished MC&G Property shall not be duplicated, copied, or otherwise reproduced for purposes of other than those necessary for performance of the contract.

(c) At the completion of performance of the contract, the contracting officer shall contact HQ DMA (PP), Bldg. 56, U.S. Naval Observatory, Washington, DC 20305–3000, for disposition instructions and then direct the contractor to either destroy or return all DoD-furnished MC&G property not consumed in the performance of the contract. If the material is to be returned to the Government, the contracting officer shall specify the location and means of shipment.

245.310–1 Contract clause.

The contracting officer shall insert the clause at 252.245–7000, Government-Furnished Mapping, Charting and Geodesy Property, in solicitations and contracts when MC&G Property is to be furnished under the contract.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

37. The interim rule published on September 2, 1988 (53 FR 34090) is corrected as follows:

VOL 53 ISS 241 DE 15 1988 UMI

252.204-7005 [Corrected]

38. On page 34104, section 252.204-7005 is amended by substituting in paragraph (a) of the clause at the end of the last sentence the reference "253.303-70-DD-2139." in lieu of the reference "53.303-70-DD-2139."

252.204-7007 [Corrected]

39. On page 34104, section 252.204-7007 is amended by substituting in the introductory paragraph the reference "204.670-3(b)(1)" in lieu of the reference "204.670-3(b)(f)".

40. The interim rule published on June 6, 1988 (53 FR 20626), and corrected on June 15, 1988 (53 FR 22426) and on June 16, 1988 (53 FR 22609), is adopted as final with the following changes:

252.219-7007 [Amended]

41. Section 252.219-7007 is amended by adding at the end of the title the word in parentheses "(Unrestricted)"; and by adding in the title of the clause between the word "CONCERNS" and the date the word in parentheses "(UNRESTRICED)".

42. The interim rule published on October 28, 1988 (53 FR 43698) and corrected on November 5, 1988 (53 FR 44975) is corrected as follows:

252.227-7013 [Corrected]

43. On page 43712, section 252.227-7013 is corrected by substituting in the clause in the unnumbered paragraph between paragraph (e)(4) and paragraph (f) the reference "252.227-7013" in lieu of the reference "252.227-7031"; and by substituting in the clause in paragraph (i)(1) the reference "227.472-1" in lieu of the reference "252.227-472-1".

252.227-7020 [Corrected]

44. On page 43714, section 252.227-7020 is corrected by substituting in the clause in the second sentence of paragraph (b) between the word "any" and the word "to" the word "claim" in lieu of the word "claims".

252.227-7022 [Corrected]

45. On page 43715, section 252.227-7022 is corrected by substituting in the clause in the first sentence between the word "designs," and the word "notes" the word "specifications" in lieu of the word "specification".

252.227-7028 [Corrected]

46. On page 43715, section 252.227-7028 is corrected by substituting in the clause in paragraph (a) between the word "contract" and the word "subcontract" the word "or" in lieu of the word "of".

252.227-7037 [Corrected]

47. On page 43717, section 252.227-7037 is corrected by substituting in the clause in the first sentence of paragraph (f)(2)(iv) between the word "final" and the word "by" the word "disposition" in lieu of the word "deposition".

48. Section 252.245-700 is added to read as follows:

252.245-7000 Government-furnished mapping, charting and geodesy property.

As prescribed in 245.310-1, insert the following clause:

GOVERNMENT-FURNISHED MAPPING, CHARTING AND GEODESY PROPERTY (NOV 1988)

(a) *Definition.* "Mapping, Charting and Geodesy (MC&G) Property", as used in this clause, means geodetic, geomagnetic, gravimetric, aeronautical, topographic, hydrographic, cultural, and toponymic data presented in the form of topographic, planimetric, relief, or thematic maps and graphics; nautical and aeronautical charts and publications, and in simulated photographic, digital, or computerized formats.

(b) MC&G Property shall not be duplicated, or otherwise reproduced for purposes other than those necessary for performance of the contract.

(c) At the completion of performance of the contract, the Contractor, as directed by the Contracting Officer, shall either destroy or return to the Government all Government-Furnished MC&G Property not consumed in the performance of this contract.

(End of clause)

PART 253—FORMS

49. The list of forms following § 253.270 is amended by substituting the listing "253.303-70-DD-1851 DD Form 1851: Automation Equipment Requirement" in lieu of the listing "253.303-70-DD-1784 DD Form 1784: Small Purchase Pricing Memorandum".

PART 270—ACQUISITION OF COMPUTER RESOURCES

50. Section 270.602 is amended by revising the title of the section; by substituting in paragraph (a) between the word "Form" and the word "with" the designation "1851" in lieu of the designation "1419"; by revising paragraph (b); and by adding paragraphs (c) and (d) to read as follows:

270.602 Providing excess computer equipment to DoD contractors.

* * * * *

(b) The ACO shall forward the approved requirements to the Director, Defense Automation Resources Information Center (DARIC), ATTN: DARIC-R, Cameron Station, Alexandria, VA 22304-6100 in accordance with DoD 7950.1-M.

(c) The DARIC shall determine if excess computer equipment which has a potential to meet the requirement is available and the response shall be returned to the activity designated on the DD Form 1851.

(d) Acquisition of excess ADPE shall be in accordance with 245.302-72 and DoD 7950.1-M.

Appendix T to Chapter 2—[Amended]

51. Appendix T is amended by revising T-211, France Memorandum of Understanding, to read as follows:

T-211 France Memorandum of Understanding

Memorandum of Understanding Between the Government of the French Republic and the Government of the United States of America Concerning the Principles Governing Reciprocal Purchases of Defense Equipment

The Government of the United States of America and the Government of the French Republic hereinafter referred to as the Governments:

Noting that a previous agreement dated December 18, 1963 governs their cooperation in the field of research and development,

Noting that no agreement covers harmonization of mutual procurements, although specific compensation agreements bound them in the past,

Wishing to improve the present situation and to strengthen their military capability by a better organization of procurement of equipment meeting their defense needs, while taking into consideration cooperative activities undertaken between European nations within the I.E.P.G. and relationships between Europe and the United States in the field of armaments.

In order to achieve the above aims, the Governments have agreed on the following guidelines to ensure a balanced cooperation in defense equipment research, development, production, and purchasing and associated offset arrangements.

Article I—Principles Governing Reciprocal Defense Purchasing

1. Both Governments agree to achieve and maintain an equilibrium in their exchanges in terms of payments and technological levels to the maximum practicable extent consistent with their national policies.

2. The Governments will jointly determine the defense equipment to which the present MOU is applicable and the desirable level of the equilibrium.

3. Each Government will keep a record of defense equipment procurement from the other country either directly or through its defense industry.

4. Each Government will submit, as practicable, a periodic forecast of defense equipment that it may be able to undertake to procure from the other country or for which the other country may be able to compete. Each Government may propose to the other any particular item of equipment that could

meet the requirement of the other Government.

5. Both Governments will provide appropriate policy to guidance and administrative procedures within their respective defense procurement organizations to achieve and maintain the agreed upon equilibrium.

6. For the implementation of this MOU:

a. Offers will be evaluated without applying price differentials resulting from Buy National Laws (in the United States, the Buy American Act).

b. The Secretary of Defense or Minister of Defense shall, consistent with the law and policies of each country, attempt to obtain exemptions from all applicable customs duties or other restrictions which are designed to limit participation by industries of the other country.

c. It will be neccessary to take into consideration all qualified sources in each other's country in accordance with the policies and criteria of the purchasing office, it being understood that offers will satisfy requirements for performance, quality, delivery and cost.

7. To facilitate production programs set up in implementation of this MOU, the Governments understand that subject to their established policies, procedures, regulations and subject to privately owned proprietary rights, each Government will, so far as it is able, without incurring obligations to others, arrange for release to the other and to its agents, or if necessary, to its defense industries, of information and technology necessary for the purpose of such facilitation, taking into account security regulations.

8. Arrangements and procedures will be established concerning follow-on logistic support for defense material transferred under this MOU. Both governments will make their defense logistic systems and resources available for this purpose as required and mutually agreed.

9. The Governments, through their appropriate representatives, will consult concerning any problem which may inhibit the efficient operation of this arrangement. Such consultations will be conducted on the basis of Article II of this MOU.

Article II—Entry Into Force

1. Representatives of the two Governments will be appointed to determine in detail the implementation procedures of the MOU. Terms of reference will be proposed for an American-French Committee in charge of reciprocal purchases (including rules governing its work).

2. The Under Secretary of Defense for Research and Engineering in coordination with the Assistant Secretary of Defense (ISA), Assistant Secretary of Defense (MRA&L), the Director, Defense Security Assistance Agency and other appropriate Department of Defense Offices, will be responsible in the U.S. Government for the development of implementing procedures under this MOU and for the management of this MOU on a continuing basis.

3. The Director des Affaires Internationales, under the policy guidance of the Delegue General pour l'Armement, will be the responsible authority for the Government of the French Republic for any matter relating to the implementation procedures of this agreement.

Article III—Industry Participation

1. Each Government will be responsible for bringing to the attention of the defense industries within its country, the basic understanding of this MOU, together with appropriate guidance on its implementation. Both Governments will take all necessary steps so that the defense industries comply with the regulations pertaining to security and classified information safeguarding.

2. Implementation of this MOU will involve full industrial participation. Accordingly, the Governments will arrange that their respective procurement and requirements offices will be made familiar with the principles and objectives of this MOU. Notwithstanding the governmental procedures to facilitate implementation, it will be the basic responsibility of industry in each country to isolate, identify, and advise its Government of capabilities and to carry out the supporting actions to bring industrial participation to consummation.

Article IV—Duration

1. This agreement will remain in effect for a ten-year period following its signature unless otherwise agreed by both Governments.

2. If, however, either Government considers it necessary to discontinue its participation under this MOU before the end of the ten-year period, any withdrawal intention must be notified to the other Government six months in advance of its effective date and would be a matter of immediate consultation with the other Government to enable the Governments fully to evaluate the consequences of such termination and in the spirit of cooperation take such actions as necessary to alleviate problems that may result from the termination. In this connection, although the MOU may be terminated by the parties, any contract entered into consistent with the terms of this agreement shall continue in effect, unless the contract is terminated in accordance with its own terms.

Article V—Annexes

Annexes negotiated by the responsible services and approved by the appropriate Government authorities will be part of this agreement.

Article VI—Implementation

The present agreement, in both English and French, will come into effect at the date of signature by both Governments. It will not be disclosed to a third country unless otherwise mutually agreed.

Done in Paris, le 22 mai 1978.

Harold Brown,

For the Government of the United States.

Yvonne Bourges,

For the Government of France.

ANNEX I—IMPLEMENTING PROCEDURES

Implementing procedures to the Memorandum of Understanding between the Government of the United States of America and the Government of the French Republic concerning the principles of cooperation in the field of reciprocal purchases of Defense Equipment.

I. Introduction

On May 22, 1978, the Governments of the United States of America, represented by the Department of Defense (DoD) and the French Republic represented by the Ministry of Defense (MOD) signed a Memorandum of Understanding (MOU) concerning "The Principles Governing Reciprocal Purchases of Defense Equipment." The purpose of this Annex is to set forth the agreed implementing procedures for carrying out the MOU and to establish a Franco-American Committee for Defense Equipment (FACDE).

II. Major Principles

A. Both the DoD and MOD will consider for their defense requirements defense items *and services* developed and produced in the other country. It will be the responsibility of governments and/or industry representatives in each country to obtain information concerning the other country's requirements and prospective purchases and to respond to requests for proposals or offers in accordance with each other's prescribed procurement procedures and regulations. The responsible governmental purchasing agencies in each country will assist sources in the other country to obtain information concerning prospective purchases, necessary qualifications, and appropriate documentation. The responsible governmental purchasing agencies in each country will seek to inform themselves of the defense items and services which might be available from the other to meet specific requirements.

B. Offers will be evaluated without applying price differentials resulting from national laws. Consistent with the law and policies of each country, the Parties will attempt to obtain exemptions from all applicable duties or other restrictions which are designed to limit participation by industries of the other country.

C. Offers will satisfy requirements for cost, schedule, performance, quality, and continued logistics support.

D. In implementing the MOU, the DoD and the MOD will review and, where considered necessary, revise policies, procedures, and regulations to insure that they are consistent with the principles and objectives of this MOU.

E. With respect to Article I, paragraphs 2 and 4 of the MOU cited in paragraph I above, both countries agree that in general the principles of this MOU *will apply to defense purchases of both Governments on the broadest possible basis.* Some items *and services* will be excluded from consideration under this MOU in order to protect the defense mobilization base; because of legally imposed restrictions; or for other reasons to be discussed by the parties from time to time in meetings of the Franco-American Committee.

III. Action

Both countries will, on a reciprocal basis, and to the extent appropriate:

A. Ensure that activities responsible for requirements, research and development, and procurement are familiarized with the principles and objectives of this MOU.

B. Ensure appropriate dissemination of the basic principles of this MOU to the respective defense industries.

C. Assist industries in their respective countries to identify and advise the other government of their capabilities.

D. Review items *and services* as candidates to meet defense requirements. Identify requirements and prospective purchases soon enough to ensure adequate time for their respective industries to participate in the procurement process.

E. Ensure that those items *and services* excluded from consideration under this MOU for reasons of protecting national requirements, such as the maintenance of a defense mobilization base, are limited to a small percentage of total annual defense procurement spending. It is intended that such defense items and services, as well as those items and services that must be excluded from consideration under this MOU because of legally imposed restrictions on procurement from non-national sources, be identified as soon as possible by the MOD and the DoD, and that such defense items and services be kept under review by the Committee established pursuant to paragraph IV below.

F. Make best efforts to assist in negotiating licenses, royalties, and technical information exchanges with their respective industries.

IV. Franco-American Committee for Defense Equipment (FACDE)

The FACDE will consider development, production, procurement, and logistics needs of each country and the likely areas of cooperation and will recommend appropriate measures to facilitate a maintenance of an equilibrium in their exchanges in terms of value and technological levels to the maximum practicable extent consistent with their national policies.

V. Counting Procedures

The purchases to be counted within the framework of the MOU will be identified jointly by DoD and MOD. In principle all defense items and services purchased by DoD and MOD from the other country will be counted within the framework of the MOU as long as such purchases meet the following criteria.

A. Direct purchases by the MOD or DoD, including their respective agencies, from one another.

B. Direct purchases by either the MOD or DoD from the industry of the other country.

D. Purchases by a third country government from the governments of the United States or of France or from industries of the two countries as a direct result of effort of the other country.

E. Purchases resulting from common funded defense programs to which the United States and/or France are contributors, to be credited in proportion to each country's financial contribution to such programs and to work carried out in each country. The extent to which such purchases will be counted within the framework of the MOU will be agreed between MOD and DoD in each case.

F. License fees, royalties and other associated income resulting from orders placed by industry and/or DoD or MOD with a licensed company in the other country.

Types of contracts to be included for purposes of counting will consist of at least the following:

1. Research and development
2. Pre-production
3. Production
4. "Off-the-shelf" procurement
5. License agreements and technical assistance
6. Installation (other than construction)
7. Repair, overhaul and modification
8. Services

Types of contracts to be excluded for purposes of counting will be decided by the FACDE.

Exceptions to the above guidelines will be permitted only as agreed between the Governments as represented by the FACDE.

The following procedures will be used in considering current balances and long term trends of purchases between the two countries:

A. Annual Balances will be calculated based on a January 31 to December 31 time period. Longer term calculations can be made for intervals beginning on the effective date of the agreement to closing dates to be determined.

B. Subject to review and possible refinement by the Committee as indicated in Article VI below, the balance of purchases will be calculated using a single US-French monetary exchange rate for a given period to be applied to purchases by both sides. The details for determining the exchange rate will be formulated by the Committee.

VI. Administration

A. The FACDE will meet as frequently as necessary, but not less than once a year, to implement the agreement. It is intended that the meetings will alternate between Washington and Paris. The FACDE will agree to the basis of, and keep under review, the current balance and long term trends of purchases between the two countries.

B. Each country will designate points of contact at the Ministry of Defense level and in each purchasing service and agency for the transaction of routine business. The points of contact shall be:

1. For the French Ministry of Defense, the Sous-Director des Affaires Internationales pour la Cooperation.

2. For the US Department of Defense, the Deputy Under Secretary of Defense (Acquisition Policy).

C. Quality assurance procedures outlined in Stanag 4107 and 4108 will apply unless other provisions are mutually agreed to on any specific contract. Payment for services provided shall be made in accordance with the national laws and regulations of each country.

D. Audit of contracts will be accomplished in accordance with Annex 2 to the MOU.

VII. Security

A. To the extent that any items, plans, specifications or information furnished in the course of the implementation of this MOU are classified by either Government for security purposes, the other Government shall maintain a similar classification and employ all measures necessary to preserve such security equivalent to those measures employed by the classifying Government throughout the period during which the classifying Government may maintain such classification.

B. The provisions of the General Security of Information Agreement dated 7 September 1977 between the United States Government and the Government of France apply to activities under this MOU.

C. Information that has been provided by the MOD to the DoD in confidence, or produced by the DoD pursuant to a written joint arrangement with the MOD requiring confidentiality, shall either retain its original classification designation or be assigned a United States classification designation that shall ensure a degree of protection against disclosure equivalent to that required by the MOD. To assist in providing the desired protection, the MOD will mark such information furnished to the DoD with a legend indicating that the information is of French Government origin, that the information relates to this MOU, and that the information is furnished in confidence.

VIII. Procedure for Calculation of Exchanges Balance

A. Accounting Periods

The accounting period will be from January 1 to December 31 of each year.

B. Exchange Rate

A single exchange rate will be used to express the payment value for both parties. This rate will be calculated by averaging over the period the monthly means of average daily rates published in New York and Paris by the competent authorities. The exchange rate for the previous period will be submitted to the FACDE prior to the first meeting of each period.

C. Calculation of the Cumulated Balance of Exchanges

To calculate the cumulated exchange balance starting from the effective date of signature of the MOU, the following will be done:

1. Add to the cumulative balance of the preceding period the balance of the current period.

2. Valuate each country's balance in terms of its own currency.

An example of the cumulated balance calculation is shown in the appendix.

D. Balance Approval

To take into account the data obtained after the FACDE meeting it is agreed that the balance may be revised during the next FACDE meeting, at which date it will become definitive.

IX. Implementation

The present annex, English and French versions of which are equally authentic, will

BILLING CODE 3810-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 216

Taking of Marine Mammals Incidental to Commercial Fishing Operations

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of determination on the importation of Spanish Yellowfin Tuna.

SUMMARY: The Assistant Administrator for Fisheries, NMFS, in consultation with the Department of State, finds that the Government of Spain has not submitted documentation required by the regulations governing the importation of yellowfin tuna from the eastern tropical Pacific Ocean. As a result, yellowfin tuna from Spain may not be imported into the United States.

DATES: The prohibition on importation of Spanish yellowfin tuna is effective December 14, 1988.

FOR FURTHER INFORMATION CONTACT: E. Charles Fullerton, Regional Director, Southwest Region, NMFS (514-213-6196).

SUPPLEMENTARY INFORMATION: In 1984 the Congress of the United States reauthorized the Marine Mammal Protection Act and amended the Act to require that nations, whose vessels fish with purse seines in the eastern tropical Pacific Ocean (ETP), must have a marine mammal protection program and fleet porpoise safety performance comparable to that of the United States. In the ETP, yellowfin tuna are commonly caught in association with porpoise, leading to incidental porpoise mortality in purse seine fishing operations.

On March 18, 1988 (53 FR 8910), the NMFS promulgated interim final rules concerning the importation of yellowfin tuna caught by purse seines in the ETP. Under this rule, any nation which has purse seine vessels greater than 400 tons carrying capacity operating in the ETP, wishing to export yellowfin tuna to the United States must supply documentary evidence that the nation has adopted a regulatory program governing the incidental taking of marine mammals (porpoise) in the fishery which is comparable to the regulatory program of the United States. Each nation must also supply documentation on the incidental taking of marine mammals by its purse seine vessels for 1986 and 1987. Nations which had positive findings in effect on March 18, 1988 and which failed to submit the required documentation by August 17, 1988, were prohibited from exporting yellowfin tuna into the United States after October 15, 1988 (see 53 FR 39743, October 12, 1988).

Spain was not included among the nations whose yellowfin tuna was prohibited entry into the United States at that time because it was not clear under what nation's laws the single Spanish-flag vessel operates. The vessel is based in Ecuador but flies the flag of Spain. If the vessel is operating under the jurisdiction of the marine mammal laws of Ecuador under a formal declaration between Spain and Ecuador, the vessel is considered to be a vessel of Ecuador for the purposes of these regulations. Spain then would not need to submit the information required for ETP tuna purse seine fishing nations. The NMFS has inquired whether a formal agreement exists between the governments of Ecuador and Spain which would make the vessel subject to the marine mammal protection laws of Ecuador while purse seine fishing for tuna. Because no response has been forthcoming, the NMFS concludes that the vessel is operating under the laws of Spain. Therefore, Spain is subject to the requirements to demonstrate it has a marine mammal protection program that is comparable to that of the United States and to submit observer data on the marine mammal mortality performance in its tuna purse seine fishery.

This embargo of yellowfin tuna and yellowfin tuna products from Spain remains in effect until: (1) the Assistant Administrator determines that Spain has submitted the required information which demonstrates that their marine mammal program is comparable to that of the United States and that Spain's fleet meets the marine mammal mortality rate comparison test in effect at the time, (2) the governments of Ecuador and Spain by mutual agreement declare that the vessel is operating under the jurisdiction of Ecuador's marine mammal laws and regulations while fishing in the ETP, or (3) Spain meets the requirements as changed through future rulemaking.

Date: December 12, 1988.

James W. Brennan,

Assistant Administrator for Fisheries.

Proposed Rules

Federal Register
Vol. 53, No. 241
Thursday, December 15, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 88-ASW-48]

Proposed Revision of Transition Area; Lake Charles, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revise the transition area located at Lake Charles, LA. The development of a new VOR RWY 33 standard instrument approach procedure to the Chennault Industrial Airpark, utilizing the Lake Charles Very High Frequency Omnidirectional Radio Range/Tactical Air Navigation (VORTAC), has made this proposed revision necessary. The intended effect of this proposal is to provide adequate controlled airspace for aircraft executing the new VOR RWY 33 SIAP.

DATE: Comments must be received on or before January 25, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 88-ASW-48, Department of Transportation Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530; telephone: (817) 624-5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 88-ASW-48." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM'S

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Forth Worth, TX 76193-0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to §71.181 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Lake Charles, LA. The development of a new VOR RWY 33 SIAP to the Chennault Industrial Airpark, utilizing the Lake Charles VORTAC, has necessitated this proposed revision. The intended effect of this proposed revision is to provide adequate controlled airspace for aircraft executing the new VOR RWY 33 SIAP. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6D dated January 4, 1988.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAY, AREA LOW ROUTES CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§71.181 [Amended]

2. Section 71.181 is amended as follows:

Lake Charles, LA [Revised]

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of the Lake Charles Municipal Airport (latitude 30°07'32"N., longitude 93°13'22"W.); and within an 8.5-mile radius of the

Chennault Industrial Airpark (latitude 30°12'37"N., longitude 93°08'35"W), and within 5.0 miles each side of the 335° radial of the Lake Charles VOR (latitude 30°08'29"N, longitude 93°06'20"W.), extending from the 8.5-mile radius area of the Chennault Industrial Airpark to 15 miles northwest of the Chennault Industrial Airpark.

Issued in Fort Worth, TX, on December 2, 1988.

Larry L. Craig,

Manager, Air Traffic Division Southwest Region.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 206

Revision of Valuation Regulations Governing Gas Sales Under Percentage-of-Proceeds Contracts

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Proposed rulemaking.

SUMMARY: The Minerals Mangement Service (MMS) is proposing to amend its gas product valuation regulations to change the method of determining the value of gas sold under percentage-of-proceeds contracts. Since adoption of the final regulations, MMS has determined that little or no additional royalties are collected as a result of this provision. Also, MMS has experienced a significant increase in workload that is unnecessary for the valuation of gas sold under these contracts. Consequently, MMS is soliciting comments on a proposed alternative method which reduces lessee reporting requirements, produces the same revenue payments, and eliminates the unnecessary workload burden on MMS.

DATE: Comments should be submitted by January 17, 1989.

ADDRESS: written comments, suggestions, or objections regarding the proposed amendment should be mailed to: Minerals Management Service, Royalty Management Program, Rules and Procedures Branch, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop 662, Denver, Colorado 80225, Attention: Dennis C. Whitcomb.

FOR FURTHER INFORMATION CONTACT: Dennis C. Whitcomb, Chief, Rules and Procedures Branch, (303) 231-3432 or FTS 326-3432.

SUPPLEMENTARY INFORMATION: The principal authors of this proposed rule amendment are Susan Lupinski and Scott Ellis of the Royalty Valuation and Standards Division of the Royalty Management Program, MMS.

I. Background.

The subject of this proposed rulemaking is the manner in which gas production from Federal leases (including leases on the Outer Continental Shelf) and Indian Tribal and allotted leasses will be valued for royalty purposes where the lessee's contract for the sale of gas prior to processing provides for the sales value to be determined based upon a percentage of the purchaser's proceeds from selling the residue gas, liquids, and other gas plant products resulting from processing. The existence of these so called "percentage-of-proceeds" contracts is typically a direct result of oil well production where associated casinghead gas production occurs in sufficient volumes that venting or flaring of the gas is considered wasteful, or the volumes cannot be flared or vented due to environmental reasons. The volume of gas produced from any one lease is usually insufficient to justify the expense for each lessee to build a processing plant to handle its own lease production. Thus, a plant is built in a centralized location to handle the production from the various leases producing casinghead gas in the field or area.

The issue of whether to classify percentage-of-proceeds contracts as sales of unprocessed gas versus processed gas generated much controversy during the comment period prior to MMS's recent modifications to the product value regulations in 30 CFR Part 206 (53 FR 1230, January 15, 1988). Comments from industry generally recommended that MMS classify percentage-of-proceeds contracts under the unprocessed gas section. Industry commenters stated that classifying percentage-of-proceeds contracts as processed gas was unreasonable and unfair to the lessee and that the percentage-of-proceeds contracts were only the mechanism for arriving at wellhead value.

The MMS evaluated all the comments received but decided to retain percentage-of-proceeds contract valuation under the processed gas section. The MMS's main concern was that if the percentage-of-proceeds contracts were treated as unprocessed gas, limitations on processing allowances contained in the valuation regulations would be exceeded without review and approval by MMS. However, to address those instances where a lessee believed that its situation merited an exception to the limitations and requirements of the regulations, MMS adopted a provision at § 206.158(c)(3) allowing a lessee to apply for an exception to the processing allowance limitation.

Since the issuance of the revised gas valuation regulations, MMS has received many requests to (1) waive the valuation requirements under the processed gas section for percentage-of-proceeds contracts, (2) exceed the two-thirds processing allowance limitation, and (3) report royalties and allowances under alternate methods. The enormous burden placed on both payors and MMS to file new Payor Information Forms (Form MMS-4025) and Processing Allowance Forms (Form MMS-4109), and to convert from the previously used one-line entry on the Report of Sales and Royalty Remittance Form (Form MMS-2014) to multiple-line entries, was underestimated by MMS when considering whether or not to require valuation under the processed gas section. For example, the MMS received 2,000 Payor Information Forms from one company alone. Other companies have requested, and received approval of, the continued use of the one-line entry until their automated systems could be modified. Further, the burden on both payors to develop the supporting information and on MMS to process requests for allowances in excess of the two-thirds limit was also underestimated. In order to support a request for an allowance greater than two-thirds, payors had to demonstrate that the higher costs were actual, reasonable and necessary.

Based upon the experiences under the new regulations, MMS is now proposing to reconsider the valuation procedure for gas sold under percentage-of-proceeds contracts. Many percentage-of-proceeds contracts result in processing costs that exceed the two-thirds processing limitation. Due to the limited volumes from any given lease, and the fact that the costs of placing the gas in marketable condition are beyond what a lessee is ordinarily obligated to incur, MMS believes that most requests to exceed the two-thirds limit would be approved as the costs could be demonstrated by the lessee to have been actual, reasonable, and necessary. Given the prospect of approving the majority of the requests for exceptions, the proposal to allow gas sold under percentage-of-proceeds contracts to be valued as unprocessed gas should result in approximately the same revenues upon which royalty would be paid under the processed gas rules, but would eliminate a large amount of burdensome and unnecessary reporting, reviewing, and approval.

The proposed rule would only include arm's-length percent-of-proceeds contracts. As with other non-arm's-length contracts where the purchaser processes the gas, gas sold pursuant to a non-arm's-length percent-of-proceeds contract would be valued in accordance with § 206.153 of the regulations.

The MMS also believes that provisions already in place in the regulations that are applicable to the valuation of gas sold under arm's-length contracts will be a sufficient deterrent to lessees whose only objective was to circumvent the requirements and limitations of the regulations. The regulations generally provide that gas sold pursuant to an arm's-length contract will be valued for royalty purposes based on the lessee's gross proceeds. See 30 CFR 206.152(b). However, if MMS has reason to believe that revenues received under any percentage-of-proceeds contracts were unreasonably low owing to misconduct or breach of duty by the lessee to market production for the mutual benefit of the lessee and the lessor, or if gross proceeds received included a reduction in value for costs to place production in marketable condition (which are normally required to be performed at no cost to the lessor), MMS would not accept those gross proceeds for valuation purposes. See 30 CFR 206.152(b)(1)(iii) and 206.152(i) (53 FR 1274, 1275, January 15, 1988). Although MMS believes that these provisions will generally provide the necessary assurances that the valuation of this gas, as unprocessed gas, will not have results on royalties significantly different from the expected valuation under the processed gas section, including exceptions to allowance limitations, MMS is also proposing to modify § 206.152(h) to ensure that result. The MMS is proposing to modify § 206.152(h) by adding the requirement that the value for royalty purposes of the wet gas which is processed into liquids and residue gas and is disposed of under percentage-of-proceeds contracts shall never be less than a value equivalent to 100 percent of the value of the residue gas attributable to the processing of that gas.

It should be noted also for gas production from those Indian leases which require dual accounting for gas which is processed, this rule change would not affect the application of those lease provisions. See 30 CFR 206.155, 53 FR 1278 (January 15, 1988).

II. Proposed Amendments

For the reasons discussed in the above *Background* section, MMS is proposing to amend its regulations to clarify its intent and to provide for the valuation of gas under percentage-of-proceeds contracts to be under the provisions of § 206.152 rather than § 206.153.

The MMS proposes to amend § 206.152 by deleting the phrase "* * * or where the lessee's contract for the sale of gas prior to processing provides for the value to be determined based upon a percentage of the purchaser's proceeds resulting from processing the gas, * * *" from the second sentence of paragraph (a)(1) and placing that phrase at the end of the first sentence of that paragraph. The MMS proposes to further amend § 206.152 by adding the following sentence to paragraph (h):

> Also, notwithstanding any other provision of this section, where the lessee's contract for the sale of gas prior to processing provides for the value to be determined based upon a percentage of the purchaser's proceeds resulting from processing the gas, the value of production for royalty purposes shall never be less than a value equivalent to 100 percent of the value of the residue gas attributable to the processing of the lessee's gas.

The MMS proposes to amend § 206.153 by deleting the following phrases from the second sentence of paragraph (a)(1):

> * * * or where the lessee's contract for the sale of gas prior to processing provides for the value to be determined based upon a percentage of the purchaser's proceeds resulting from processing the gas (in which event these regulations will apply to determine value as if the person actually selling or disposing of the residue gas or gas plant products were the lessee of the Federal or Indian lease).

The public is invited to participate in this rulemaking action by submitting data, views, or arguments with respect to this notice. All comments must be received by 4 p.m. of the day specified in the **DATE** section at the address indicated in the **ADDRESS** section of this preamble.

III. Procedural Matters

Executive Order 12291

The Department of the Interior (Department) has determined that this document is not a major rule and does not require a regulatory analysis under Executive Order 12291. This proposed rulemaking is to clarify the Department's intent concerning the valuation of gas sold under percentage-of-proceeds contracts under the Federal and Indian gas royalty valuation regulations that were issued on January 15, 1988 (53 FR 1230).

Regulatory Flexibility Act

Because this rule clarifies existing regulations, there are no significant additional requirements or burdens placed upon small business entities as a result of implementation of this rule. Therefore, the Department has determined that this rulemaking will not have a significant economic effect on a substantial number of small entities and does not require a regulatory flexibility analysis under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Paperwork Reduction Act of 1980

The proposed amendment does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act of 1969

It is hereby determined that this rulemaking does not constitute a major Federal Action significantly affecting the quality of the human environment and a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is not required.

List of Subject in 30 CFR Part 206

Coal, Continental shelf, Geothermal energy, Government contracts, Indian lands, Mineral royalties, Natural gas, Petroleum, Public lands-mineral resouces, Reporting and recordkeeping requirements.

Date: November 14, 1988.

James E. Cason,

Deputy Assistant Secretary, Land and Minerals Management.

For the reasons set out in the preamble, 30 CFR Part 206 is proposed to be amended as follows:

TITLE 30—MINERAL RESOURCES

PART 206—PRODUCT VALUATION

1. The authority citation for Part 206 is revised to read as follows:

Authority: 25 U.S.C. 396 *et seq.*; 25 U.S.C. 396a *et seq.*; 25 U.S.C. 2101 *et seq.*; 30 U.S.C. 181 *et seq.*; 30 U.S.C. 351 *et seq.*; 30 U.S.C. 1001 *et seq.*; 30 U.S.C. 1701 *et seq.*; 31 U.S.C. 9701.; 43 U.S.C. 1301 *et seq.*; 43 U.S.C. 1331 *et seq.*; and 43 U.S.C. 1801 *et seq.*

2. Section 206.152 under Subpart D is amended by revising paragraph (a)(1) and paragraph (h) to read as follows:

§ 206.152 Valuation standards—unprocessed gas.

(a)(1) This section applies to the valuation of all gas that is not processed and all gas that is processed but is sold or otherwise disposed of by the lessee pursuant to an arm's-length contract prior to processing (including all gas where the lessee's arm's-length contract

for the sale of that gas prior to processing provides for the value to be determined based upon a percentage of the purchaser's proceeds resulting from processing the gas). This section also applies to processed gas which must be valued prior to processing in accordance with § 206.155. Where the lessee's contract includes a reservation of the right to process the gas and the lessee exercises that right, § 206.153 shall apply instead of this section.

* * * * *

(h) Notwithstanding any other provision of this section, under no circumstances shall the value of production for royalty purposes be less than the gross proceeds accruing to the lessee for lease production, less applicable allowances determined pursuant to this subpart. Also, notwithstanding any other provision of this section, where the lessee's contract for the sale of gas prior to processing provides for the value to be determined based upon a percentage of the purchaser's proceeds resulting from processing the gas, the value of production for royalty purposes shall never be less than a value equivalent to 100 percent of the value of the residue gas attributable to the processing of the lessee's gas.

* * * * *

3. Paragraph (a)(1) of § 206.153 under Subpart D is revised to read as follows:

§ 206.153 Valuation standards—processed gas.

(a)(1) This section applies to the valuation of all gas that is processed by the lessee and any other gas production to which this subpart applies and that is not subject to the valuation provisions of § 206.152 of this subpart. This section applies where the lessee's contract includes a reservation of the right to process the gas and the lessee exercises that right.

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 938

Pennsylvania Abandoned Mine Land Reclamation Plan; Opening of Public Comment Period and Opportunity for Public Hearing on Proposed Plan Amendment

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: On September 7, 1988, the Commonwealth of Pennsylvania submitted to the Office of Surface Mining Reclamation and Enforcement (OSMRE) a proposed amendment to its Abandoned Mine Land Reclamation (AMLR) Plan (hereinafter referred to as the Pennsylvania Plan). The amendment pertains to changes in the procedures for reclamation project ranking and selection. This notice sets forth the times and locations that the Pennsylvania Plan and the proposed changes will be available for public inspection, the comment period during which interested persons may submit written comments, and the procedures that will be followed regarding a public hearing, if one is requested.

DATES: Written comments must be received on or before 4:00 p.m. on January 17, 1989, to ensure consideration in the rulemaking process. If requested, a public hearing on the proposed amendment will be held at 9:00 a.m. on January 9, 1989. Requests to present testimony at the hearing must be received on or before 4:00 p.m. on December 30, 1988.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed to or hand delivered to Robert J. Biggi, Director, Harrisburg Field Office, at the address listed below. Copies of the Pennsylvania Plan, the proposed amendment and all written comments received in response to this notice will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendment by contacting OSMRE's Harrisburg Field Office.

Office of Surface Mining Reclamation and Enforcement, Harrisburg Field Office, Harrisburg Transportation Center, Third Floor, Suite 3C, 4th and Market Streets, Harrisburg, Pennsylvania 17101, Telephone: (717) 782-4036.

Office of Surface Mining Reclamation and Enforcement, Administrative Record Office, Room 5131, 1100 "L" Street, NW., Washington, DC 20240,Telephone: (202) 343-5492.

Pennsylvania Department of Environmental Resources (DER), Office of Environmental Energy Management, 10th Floor, Fulton Building, 3rd and Locust Streets, P.O. Box 2063, Harrisburg, Pennsylvania 17120, Telephone: (717) 787-4686.

A public hearing, if held, will be at the Penn Harris Motor Inn and Convention Center at the Camp Hill Bypass and U.S. Routes 11 and 15, Camp Hill, Pennsylvania.

FOR FURTHER INFORMATION CONTACT: Robert J. Biggi, Director, Harrisburg Field Office, (717) 782-4036.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Interior approved the Pennsylvania Plan as submitted on November 3, 1980. Information regarding the general background on the Pennsylvania Plan, including the Secretary's findings and the disposition of comments can be found in the July 30, 1982 **Federal Register** (47 FR 33081-33083).

II. Discussion of Amendment

By letter dated September 7, 1988, (OSMRE Administrative Record No. PA 717), the Pennsylvania DER submitted to OSMRE a proposed amendment to revise the AMLR plan. The proposal would change the procedures for ranking and selecting construction sites. In the current Pennsylvania Plan, potential project sites are to be ranked according to a Ranking Point System which takes into consideration criteria such as priority, real estate status, reclamation benefits, and coordination with other governmental agencies. Proposed construction sites are selected based on the numerical score of the Ranking Point System plus other criteria such as technical feasibility, effect on remaining coal reserves, program objectives, and priority. The proposal would change the current ranking and selection program by eliminating the Ranking Point System and relying on the professional judgement of DER personnel. DER personnel will evaluate proposed construction sites within projects based upon program objectives, priority, technical feasibility, and any potential remining efforts. Proposed construction sites will be placed into one of five categories which are based on priority and status in the National Abandoned Mine Lands Inventory System. Within each category, the sites will be ranked by severity. Severity will be determined through DER personnel experience and expertise.

III. Public Comment Procedures

In accordance with 30 CFR 884.14 and 30 CFR 884.15, OSMRE is now seeking comments on whether the proposed amendment to the Pennsylvania Plan satisfies the applicable State reclamation plan approval criteria under 30 CFR Part 884. If approved, the amendment would become part of the Pennsylvania Plan.

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or at locations other than the Harrisburg Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under **"FOR FURTHER INFORMATION CONTACT"** by 4:00 p.m. on December 30, 1988. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment, and who wish to do so, will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting at the OSMRE office listed under **"ADDRESSES"** by contacting the person listed under **"FOR FURTHER INFORMATION CONTACT."** All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **"ADDRESSES."** A written summary of each meeting will be made part of the Administrative Record.

List of Subjects in 30 CFR Part 938

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: December 8, 1988.

Carl C. Close,

Assistant Director, Eastern Field Operations.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-3492-3; SC-012]

Approval and Promulgation of Implementation Plans South Carolina; Approval of Plan Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In this action, EPA is proposing to approve revisions to the South Carolina State Implementation Plan (SIP) which were submitted by the South Carolina Department of Health and Environmental Control (SCDHEC) on June 5, 1985. EPA is deferring action on the revisions to Regulation 62.1, Section II (Permit Requirements). The entire section has been reorganized affecting each of the parts in this section collectively including Part B (Operating Permit). EPA does not currently have regulations for evaluating operating permit programs and consequently does not recognize such operating permit programs as being part of a SIP. Since the revisions to this section affect each of the parts including Part B, EPA is deferring action on the entire Section II until such time that the operating permit program issue is decided. EPA at this time is not taking action on the revisions to Regulations 62.5, Standard No. 6 (Alternative Emission Limitation Options) since EPA is presently evaluating this regulation for agreement with the new Emissions Trading Policy (ETP) published on December 4, 1986 (51 FR 43814). The changes and additions to the regulatory and nonregulatory parts of the South Carolina plan involve: Requirements concerning prohibition of open burning; emissions from fuel-burning operations; emissions from process industries; requirements concerning air pollution episodes; control of fugitive particulate matter; requirements concerning the prevention of significant deterioration of air quality in South Carolina; and the requirements concerning source evaluation contained in Chapter 7 of the narrative portion of the SIP.

EPA is aware that certain types of open burning allowed by Regulation 62.2 (Prohibition of Open Burning) of the South Carolina Air Pollution Control Regulations is not allowed by Subtitle D (State or Regional Solid Waste Plans) of the Resource Conservation and Recovery Act (RCRA), and implementing EPA regulations at 40 CFR 257.3-7(a) (Air). However, EPA is approving the revisions to Regulation 62.2 submitted on June 5, 1985, under the Clean Air Act, since the Clean Air Act does not prohibit such burning. EPA has previously approved other parts of Regulation 62.2 under the Clean Air Act. These provisions may also conflict with Subtitle D of RCRA.

DATES: Comments must be received on or before January 17, 1989.

ADDRESSES: Written comments should be addressed to Stuart D. Perry of EPA Region IV (address below). Copies of the materials submitted by South Carolina may be examined during normal business hours at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365.

Bureau of Air Quality Control, South Carolina Department of Health and Environmental Control, 2600 Bull Street, Columbia, South Carolina 29201.

FOR FURTHER INFORMATION CONTACT: Stuart D. Perry of the EPA Region IV Air Programs Branch at the address given above, telephone (404) 347-2864 (FTS 257-2864).

SUPPLEMENTARY INFORMATION: On June 5, 1985, the South Carolina Department of Health and Environmental Control submitted to EPA for approval revisions to the South Carolina State Implementation Plan, and EPA is today proposing to approve a number of them.

These revisions were adopted by the South Carolina Board of Health and Environmental Control on December 20, 1984, and were forwarded to the State Legislature for approval. The revisions became State-effective on May 24, 1985. This submittal contained certification that adoption of the revisions had been preceded by adequate notice and public hearing. A discussion of these revisions now follows.

- Regulation 62.1, Section I (Definitions) was amended by revising the definition of "Acid Mist." The definition of "acid mist" was revised to agree with the definition of "acid mist" found in the EPA guideline document EPA-450/2-77-019, pages 1-4, paragraph 1.2. Acid mist is defined to be "mist of droplets of sulfuric or other acids. Sulfuric acid mist includes sulfur trioxide (SO_3) and sulfuric acid vapor as well as liquid mist."
- Regulation 62.1, Section II (Permit Requirements) was amended by reorganizing and adding to the existing regulation. The regulation is split into six parts. Part A stipulates requirements for construction permits. Part B stipulates requirements for operating

permits. The remaining parts pertain to permit applications, special permit conditions, permit exemptions, and permit inspections. The entire section has been reorganized affecting each of the parts in this section collectively including Part B (Operating Permit). EPA currently has no regulations or guidance which specify the requirements for an approvable operating permit program and consequently does not recognize such operating permit programs as part of a SIP. Since the revisions affect each of the parts in this section including Part B, EPA is deferring action on the entire Section II. EPA is developing operating permit regulations as a result of the Chemical Manufacturers Association (CMA) rulemaking pursuant to the out of court settlement. If and when EPA promulgates the operating permit regulations, EPA will take action to approve or disapprove the revisions to Section II at that time.

• Regulation 62.1, Section III (Emissions Inventory) was amended to state that an emissions inventory, defined as "a study or compilation of pollutant emissions," may be required of a plant at any time in order for the State to determine the compliance status of the plant regardless of existing conditions at the plant. Previous policy was that the State could request that an emission inventory be conducted for any plant at any time in the event that significant operational changes had taken place or other conditions existed at a plant that would require a new inventory. This statement removes any ambiguity as to when the State can request an emissions inventory.

• Regulation 62.2 (Prohibition of Open Burning) was amended to further clarify when open burning is allowed. The revisions to this regulation are minor in nature and serve to strengthen the regulation. The most significant revisions are now described. (1) Paragraph A has been revised by removing the phrase "or dwellings of four families or less" which further restricts the open burning of leaves, tree branches or yard trimming. This type of burning now is only allowed for materials originating on the premises of private residences. (2) Paragraph C has been revised to specify that fires used solely for human warmth are allowable. Since such fires would of necessity be very small, EPA believes they would have a neglible impact on the National Ambient Air Quality Standards (NAAQS). (3) Paragraph G.4 has been revised to state that "No heavy oils, asphaltic materials, items containing natural or synthetic rubber, or any materials other than plant growth may be burned." Previously the paragraph provided that these materials could be burned if they did not produce smoke in excess of forty percent opacity. (4) Paragraph G.5 has been revised to state that open burning for the purpose of land clearing or right-of-way maintenance must be started between 9:00 a.m. and 3:00 p.m. Previously the paragraph stated the burning may be commenced between the hours of 9:00 a.m. and 3:00 p.m. (5) Paragraph G.6 has been revised to state that open burning for land clearing or right-of-way for maintenance will be burned in no more than two 30' x 30' piles at one time within a six-acre area. This further restricts the size of burning piles, which was formerly one pile 60' x 60' within a six-acre area. (6) Paragraph I was revised by replacing the phrase "rubbish and garbage" with "household trash" and by removing the phrase "or dwellings of four families or less." The opening provision now reads, "Open burning of household trash on the premises of and originating from private residences where services for the disposal of such materials are not available." This condition states when open burning is allowed. In addition a sentence has been added which states, "The location on such burning must be at least 500 feet away from any inhabited building."

EPA is aware that certain types of open burning allowed by Regulation 62.2 of the South Carolina Air Pollution Control Regulations is not allowed by Subtitle D of the Resource Conservation and Recovery Act, and implementing EPA regulations at 40 CFR 257.3–7(a) (Air). For instance, in Regulation 62.2 Paragraph I, South Carolina provides that open burning of household trash on the premises of and originating from private residences where services for the disposal of such materials are not available is allowed. However, in 40 CFR 257.3–7(a), open burning of residential, commercial, institutional or industrial solid waste is prohibited. Household trash fits this description. The types of open burning which are allowed is the infrequent burning of agricultural wastes in the field, silvicultural wastes for forest management purposes, land clearing debris, diseased trees, debris from emergency clean-up operations, and ordnance. EPA is proposing to approve the revisions to Regulation 62.2 submitted on June 5, 1985, pursuant to the Clean Air Act, since the Clean Air Act does not prohibit such burning.

• Regulation 62.3 (Air Pollution Expisodes) was amended by substituting the word "plant" for "facility" throughout this regulation. "Plant" is defined in Regulation 62.1, Section I as "except as otherwise provided, any stationary source or combination of stationary sources, which is located on one or more contiguous or adjacent properties and owned or operated by the same person(s) under common control." "Plant" is used consistently throughout the regulation. The same substitution was made in Regulation 62.6.

• Regulation 62.5, Standard No. 1 (Emissions From Fuel Burning Operations) was amended as follows: (1) Section IV, Part B (Reporting Requirements) was amended by changing its title to "Continuous Opacity Monitor Reporting Requirements." This part, originally one large paragraph, has also been broken into three subparts. The content of the subparts is the same as the original paragraph. One stipulation has been added by the State which will require all *quarterly* Continuous Opacity Monitor reports to be postmarked by the 30th day following the end of each calendar quarter. (2) Section V (Exemptions) was separated into two subparts of the original paragraph. (3) Section VII (Source Test Requirements) was amended to include a requirement that a source's compliance test shall be conducted while the source is operating at the expected maximum production rate or other production rate or operating conditions which would result in the highest emissions. This requirement has also been added to Regulation 62.5, Standard No. 4, Section X, Part A, and Regulation 62.5, Standard No. 5, Section I, Part E.

• Regulation 62.5, Standard No. 4 (Emissions from Process Industries) was amended to include a number of minor revisions. A sampling of the most significant changes are as follows: (1) The statement "Where Federal New Source Performance Standards apply, the more restrictive emission limits will be imposed" has been added to Standard No. 4 to clarify any ambiguity in applicability within this regulation. (2) The title of Section II is revised by adding the work "Kraft." This section is applicable to "Kraft Pulp and Paper Manufacturing Plants." (3) South Carolina has revised Section VII Part B (Non-enclosed Operations) by removing the option of a source to use oil treatment as a means to control dust generated from the premises of and the roadway controlled by the source. Section VII, Part B now states that "oil treatment is prohibited." (4) Section VIII, Part C (Case-by-Case Exceptions to Provisions of Part B) was amended to

state that case-by-case exceptions granted under this part are subject to EPA approval as State Implementation Plan revisions pursuant to section 111(d) of the Clean Air Act instead of section 110(a)(3)(A) as previously stated. This revision was necessary because total reduced sulfur (TRS) emissions, which are regulated by Section VIII, are covered in section 111(d) of the Clean Air Act instead of section 110(a)(3)(A). (5) Section VIII, Part I (Monitoring, Recordkeeping, and Reporting) was revised to agree with federal requirements. This section stated that a source shall have installed continuous emissions monitoring equipment within 18 months after promulgation of an approved TRS monitoring method by EPA or no later than the scheduled date for final compliance. A method has been promulgated by EPA, and the State is now changing this section to agree with the deadline of 18 months after promulgation, which was January 5, 1985.

• Regulation 62.5, Standard No. 6 (Alternative Emission Limitation Options) was revised to provide better clarity within the regulation. EPA is not taking action at this time on the revisions to this regulation since EPA is presently evaluating this regulation for agreement with the new Emissions Trading Policy (ETP) published on December 4, 1986 (51 FR 43814). These revisions will be acted upon in a separate notice.

• Regulation 62.5, Standard No. 7 (Prevention of Significant Deterioration) was amended to include some minor revisions to this regulation which are not considered to alter its meaning or intent. The changes to Section I (Definitions) are as follows: (1) Parts B(1)(a) and B(1)(b) are amended by adding the phrase "from the plant" to the sentences. The sentences states a "major modification" is "any physical change in or change in the method of operation of a major plant that: (a) Would cause, by itself, an emissions increase from the plant of any pollutant subject to regulation under the Federal Clean Air Act; (b) would result in a significant net emissions increase from the plant of any pollutant subject to regulation under the Federal Clean Air Act." (2) Part E, which is a definition of "plant," is revised by deleting the word "facility" from the definition. The definition of plant is "any building, structure, or installation which emits or may emit any air pollutant subject to regulation under the Federal Clean Air Act." (3) Part F, is revised by removing the word "facility" to agree with the change made in Part E. Also, so that there is no ambiguity regarding applicability, the word plant has been added to the Part F definition. Part F is the definition of "Building, structure, plant, or installation" and is defined as follows:

> "All of the pollutant-emiting activities which belong to the same industrial grouping, are located on one or more continguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities shall be considered as part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same first two digit code) as described in the *Standard Industrial Classification Manual, 1972*, as amended by the 1977 Supplement (U.S. Government Printing Office stock numbers 4101–0066 and 003–005–00176–0, respectively.

(4) Part Q (definition of "secondary emissions") is amended by changing paragraph (2). This paragraph, which provides an example of "secondary emissions", is revised by removing the word "facility" and replacing it with the word "operation". The word "operation" best fits this statement and now reads as follows:

> Emissions from any offsite support operation which would not otherwise be constructed or increase its emissions as a result of the construction or operation of the major plant or major modification.

The minor revisions are acceptable and do not alter the intent of the regulation.

• Regulation 62.6 (Control of Fugitive Particulate Matter) was amended as follows: (1) Section I (Control of Fugitive Particulate Matter in Non-attainment Areas), paragraphs (a) and (b) were revised by replacing the word "plant" for the word "facility". (2) Section III (Control of Fugitive Particulate Matter Statewide) was amended by replacing the word "plant" for the word "facility" in paragraph (c), and paragraph (d) has been revised by adding the statement "Oil treatment is also prohibited" as a means to control fugitive particulate matter. The State is further clarifying its position on what are and are not acceptable methods for dust control. These changes do not alter the meaning or intent of this regulation.

• Chapter 7 (Source Evaluation), which is part of the narrative portion of the South Carolina State Implementation Plan, was revised to provide minor wording and/or text changes which are not considered to alter the meaning or intent of this chapter. A sampling of the most significant changes are as follows: (1) In Part A.3, the word "rated" is substituted for the word "actual" in the sentence. The sentence now reads "woodwaste (or combination woodwaste) boilers greater than $20x10^6$ BTU/hr rated input." (This sentence is part of a section which states how often a source shall be tested.) (2) Part B has been revised to provide that the owner or operator of any woodwaste boiler not equipped with a wet scrubber will be required to install, calibrate, operate, and maintain continuous emission monitoring equipment for the measurement of opacity if it has 60,000 lb/hr steam rated output and/or has been in non-compliance with any State regulation.

Proposed Action

EPA proposes to approve the regulation changes which were submitted on June 5, 1985, as detailed in this notice. EPA is also proposing to approve the revisions to Regulation 62.2 (Prohibition of Open Burning) under the Clean Air Act, since the Clean Air Act does not prohibit such open burning. EPA is deferring action on revisions to Regulation 62.1, Section II (Permit Requirements). The entire section has been reorganized affecting each of the parts in this section collectively including Part B (Operating Permit). EPA does not currently have regulations for evaluating operating permit programs and consequently does not recognize such operating permit programs as part of a SIP. Since the revisions to this section affect each of the parts including Part B, EPA is deferring action on the entire Section II until such time that the operating permit program issue is decided. Also, EPA will take action on Regulation 62.5, Standard No. 6 (Alternative Emission Limitation Options) in a separate notice.

The public is invited to participate in this rulemaking by submitting written comments on the proposal.

Under 5 U.S.C., section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 87090.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

40 CFR Part 61

[AD-FRL-3491-9]

National Emission Standards for Hazardous Air Pollutants: Benzene Emissions From Maleic Anhydride Plants, Ethylbenzene/Styrene Plants, Benzene Storage Vessels, Benzene Equipment Leaks, and Coke By-Product Recovery Plants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Reopening of the public comment period.

SUMMARY: On July 28, 1988, EPA proposed rulemaking under section 112 of the Clean Air Act for five source categories of benzene emissions. That proposal included four policy approaches for setting national emission standards for hazardous air pollutants (NESHAP), consistent with the court's decision on the vinyl chloride standard [*Natural Resources Defense Council, Inc.* v. *EPA*, 824 F.2d 1146 (1987)] (hereafter referred to as *Vinyl Chloride*). The decisions that would result from the application of each of the policy approaches to the five benzene source categories were described, and alternative standards were proposed.

In response to requests from several commenters, the period for receiving written comments on the proposed standards is being reopened to provide an opportunity for rebuttal and additional comments on information previously submitted.

DATE: Comments must be postmarked on or before January 30, 1989.

ADDRESS: Comments should be sent (in duplicate if possible) to: Central Docket Section (LE-131), Attention (to the appropriate docket numbers), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. The applicable dockets are: Docket No. OAQPS 79-3, Part I for comments on benzene health effects and general policy issues; Docket No. OAQPS 79-3, Part II for comments addressing maleic anhydride process vents; Docket No. A-79-49 for comments addressing regulation of ethylbenzene/styrene (EB/S) process vents; Docket No. A-80-14 for comments addressing the regulation of benzene storage vessels; Docket No. A-79-27 for comments addressing benzene equipment leaks; or Docket No. A-79-16 for comments addressing coke by-product recovery plants. Comments on general policy issues and benzene health effects need only be sent to Docket No. OAQPS 79-3, Part I and not to the other five dockets.

FOR FURTHER INFORMATION CONTACT: For general information or information specific to coke by-product recovery plants or benzene storage vessels, contact Ms. Gail Lacy at (919) 541-5261, Standards Development Branch, Emission Standards Division, Research Triangle Park, North Carolina 27711. For information specific to benzene equipment leaks, EB/S process vents, or maleic anhydride process vents, contact Dr. Janet Meyer at the above address, telephone number (919) 541-5254.

SUPPLEMENTARY INFORMATION: On December 8, 1987, the DC Circuit Court granted the EPA's motion for a voluntary remand of the benzene equipment leaks standard and the withdrawal of proposed standards for EB/S and maleic anhydride process vents and benzene storage vessels in light of the same court's recent *Vinyl Chloride* decision. The court ordered EPA to propose action on the above standards within 180 days, and to promulgate action within 360 days. The order was subsequently modified to extend the proposal date by 45 days, and the EPA's proposal was published on July 28, 1988 (53 FR 28946). On October 26, 1988, EPA filed a motion with the court to extend the date for final action in the benzene rulemaking to August 31, 1989. On November 23, 1988, the court granted the EPA's request. This extension will allow reopening of the public comment period and more thorough analyses of issues raised in the comments.

The comment period for the benzene NESHAP proposal (53 FR 28946, July 28, 1988) closed on October 3, 1988. The EPA received requests from two States, one city, one company, several environmental groups, and several individuals for extensions of the comment period. In addition, several commenters have informed EPA that they will be submitting additional information they believe should be considered in the rulemaking.

The over 200 comment letters that have been submitted address many aspects of the proposal. Numerous comments concern the important policy issues raised by *Vinyl Chloride* and, as a related matter, the types and levels of risk that EPA should be addressing under section 112. The EPA also received comments concerning many technical aspects of the data and assumptions underlying the EPA's risk assessment.

Based on its review of the comments received and the requests for an extension, EPA believes that this rulemaking would be significantly enhanced by reopening the comment period to provide an opportunity for rebuttal and other comments on the information previously submitted.

40 CFR Part 81

[FRL-3492-1]

Designation of Areas For Air Quality Planning Purposes; Attainment Status Designations; Wisconsin

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Proposed rule.

SUMMARY: USEPA is proposing to approve a request from the state of Wisconsin to revise the attainment status designation for the Milwaukee carbon monoxide (CO) nonattainment area to attainment. The intent of this proposed notice is: (1) To discuss the results of USEPA's review of the State redesignation request, including the supporting data submitted by the State; and (2) to provide an opportunity for the public to comment. Under the Clean Air Act (CAA), a designation can be changed if sufficient data are available to warrant such a change.

DATE: Comments on this revision and on the proposed USEPA action must be received by January 17, 1989.

ADDRESSES: Copies of the redesignation request, technical support documents and the supporting air quality data are available at the following addresses:

U.S. Environmental Protection Agency, Region V, Air Programs Branch, 230 S. Dearborn Street, Chicago, Illinois 60604.

Wisconsin Department of Natural Resources, Bureau of Air

Management, 101 South Webster, Madison, Wisconsin 53707.

Comments on this proposed rule should be addressed to: (Please submit an original and three copies, if possible.) Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Air and Radiation Branch (5AR–26), Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6031.

SUPPLEMENTARY INFORMATION: Under section 107(d) of the CAA, the Administrator of USEPA has promulgated the national ambient air quality standards (NAAQS) attainment status for all areas within each State. See 43 FR 9062 (March 3, 1978), and 43 FR 45993 (October 5, 1978). An area designation may be revised whenever sufficient data become available to warrant a redesignation.

Milwaukee's current CO nonattainment area is defined (40 CFR 81.350) to be bounded by:

North 75th Street and West Beckett Street on the east; West Perkins Avenue on the south; North 77th Street on the West; and West Hope Avenue and Marion Street on the North.

Redesignation Criteria for CO

The NAAQS for CO is considered to be violated when CO concentrations exceed 9 parts per million (ppm), for an 8-hour average, or 35 ppm for an 1-hour average, more than once per calendar year.

Specific criteria for CO redesignation reviews are given in the following USEPA policy memoranda:

1. June 12, 1979, Memorandum from Richard G. Rhoads, to Directors of Air and Hazardous Materials Divisions, Region I–X, Subject: "Section 107 Redesignation Criteria."
2. April 21, 1983, Memorandum from Sheldon Meyers, to Directors of Air Management Divisions, Subject: "Section 107 Designation Summary Policy."
3. December 23, 1983, Memorandum from G.T. Helms, to Chiefs of Air Programs Branches, Region I–X, Subject: "Section 107 Questions and Answers."
4. May 27, 1983, Memorandum from Richard G. Rhoads, to Gary L. O'Neal, Subject: "Summary of NAAQS Interpretation."

These documents are also in the record for this rulemaking action and are available for public review at the Region V Office. The general USEPA policy relevant to this CO redesignation request is summarized as follows:

1. Generally, the most recent 2 years (eight consecutive quarters) of quality assured, representative air quality data are to be considered. Data are considered on a site-by-site basis.
2. Evidence must be provided to show that a control strategy fully approved by USEPA has been implemented. This must be done to show that the observed air quality improvement is due in part to real, enforceable emission reductions, rather than to temporary changes in emissions or meteorology.
3. Supplemental data, such as air quality modelling data, emissions data, etc., should be used to determine whether or not the monitoring data characterize the worst-case air quality in the area.
4. An entire urban core area should be designated as nonattainment, if NAAQS violations or the potential for such violations exist in the area.
5. Concentrations for CO are to be considered in units of parts per million. Eight-hour concentrations are to be running averages.

Redesignation Request

On May 4, 1987, pursuant to section 107(d)(5) of the CAA, the Wisconsin Department of Natural Resources (WDNR) requested that the Milwaukee CO nonattainment area be redesignated to attainment. This redesignation request is based on CO monitoring data from the period of March 1985 through March 1987, which covers the most recent eight quarters of available CO monitoring data. No CO standard violations have been monitored in the Milwaukee CO area.

USEPA believes that the improvement in CO air quality in the nonattainment area is primarily due to CO emissions reductions resulting from implementation of the Federal Motor Vehicle Emissions Control Program (FMVECP) and the State's vehicle Inspection and Maintenance (I/M) program in the Milwaukee area.

The current Wisconsin CO SIP approved by USEPA predicted that attainment of the CO standard would occur at an emission rate of 173,838 tons per year in the Milwaukee area. The Milwaukee CO emissions have decreased from 257,903 tons per year in 1980, to 160,605 tons per year in 1985; and the State expects the Milwaukee CO emissions to decrease to 132,720 tons per year or lower by the end of 1987.

USEPA approved Wisconsin's 1982 CO State Implementation Plan on March 9, 1984, (49 FR 8920) and Wisconsin's I/M program on February 25, 1985 (50 FR 7593). Therefore, there is a fully approved CO plan in Milwaukee which has resulted in air quality improvements.

Conclusion

The recent air quality improvement can be attributed to reductions required by the SIP, FMVECP, and I/M, which have been implemented and will continue to be implemented. USEPA believes that an adequate explanation of air quality improvement in the Milwaukee CO area has been provided to support the State's request. Therefore, USEPA is proposing to redesignate the Milwaukee CO area to attainment for CO.

All interested persons are invited to submit written comments on the proposed redesignation. Written comments received by the date specified above will be considered in determining whether USEPA will approve the redesignation.

After review of all comments submitted, the Administrator of USEPA will publish in the **Federal Register** the Agency's final action on the redesignation. Under 5 U.S.C. 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Authority: 42 U.S.C. 7401–7642.

Dated: August 17, 1987.

Valdas V. Adamkus,

Regional Administrator.

NOTE: This document was received by the Office of the Federal Register December 12, 1988.

BILLING CODE 6560–50–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Denial of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petition for rulemaking.

SUMMARY: This notice denies a petition for rulemaking by Land Rover UK

Limited (Land Rover), asking this agency to amend Standard No. 209, *Seat Belt Assemblies*. Standard No. 209 currently requires that all seat belt assemblies that meet the dynamic testing requirements to be permanently marked or labeled with information about the vehicles and seating positions in which it is appropriate to install the dynamically tested belt assembly. Dynamically tested belt assemblies are also exempted from the width, breaking strength, elongation, and assembly performance requirements of Standard No. 209. Land Rover expressed its opinion that the labeling requirements should apply to belt assemblies that meet the dynamic testing requirements *only* if those belts do not comply with all the requirements of Standard No. 209. According to Land Rover, belts that comply with all the requirements of Standard No. 209 are appropriate for use in any vehicle, so there is no reason to require special labeling on those belts.

The agency disagrees with this assertion. As NHTSA has explained in its recent notices on dynamic testing requirements for safety belts, the protection provided in a crash to vehicle occupants depends on both the performance of the belts themselves *and* on the structural characteristics and interior design of the vehicle. Because of this fact, dynamically tested belt systems that comply with all requirements of Standard No. 209 might not be appropriate for installation in all vehicles, since some vehicles may be designed for use only with a specific design or designs of dynamically tested belt systems. Requiring information about the vehicles and seating positions for which the belt is appropriate to be labeled on the belt itself minimizes the likelihood that dynamically tested belt systems will be installed in vehicles or seating positions for which those belts are not appropriate. Since the current labeling requirements for all dynamically tested safety belts serve to minimize the risk that needless injuries will result from improper applications of dynamically tested belts in particular vehicles or seating positions, Land Rover's petition to delete those labeling requirements for some dynamically tested safety belt is denied.

FOR FURTHER INFORMATION CONTACT: Mr. Clarke Harper, Office of Vehicle Safety Standards, NRM–12, NHTSA, 400 Seventh Street, SW., Washington, DC 20590 (202–366–4916).

SUPPLEMENTARY INFORMATION: On November 23, 1987, NHTSA published a final rule requiring light trucks and light multipurpose passenger vehicles equipped with manual lap/shoulder belts at the front outboard seating positions to comply with the injury reduction criteria of Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208), when tested in a 30 mile per hour barrier crash. As an adjunct to this new requirement, that rule also established a requirement that dynamically tested seat belt assemblies be labeled to show the vehicles and the seating positions in which the belt assembly can be installed. These labeling requirements for dynamically tested belt assemblies for light trucks and light multipurpose passenger vehicles were identical to those that had already been adopted for dynamically tested belt assemblies for passenger cars. In adopting the requirement for dynamically tested passenger car belt assemblies, NHTSA explained the reason for the requirement as follows:

> NHTSA believes that care must be taken to distinguish dynamically tested belt systems from other systems, since misapplication of a belt in a vehicle designed for use with a specific dynamically tested belt could pose a risk of injury. If there is a label on the belt itself, a person making the installation will be aware that the belt should be installed only in certain vehicles. 51 FR 9600, at 9604; March 21, 1986.

Land Rover asked NHTSA for an interpretation of the belt labeling requirements for dynamically tested belt assemblies for light trucks and light multipurpose passenger vehicles in a letter dated April 19, 1988. In this letter, Land Rover noted that S4.6(b) of Standard No. 209 provides that: "A seat belt assembly that meets [the dynamic testing requirements] of Standard No. 208 shall be permanently and legibly marked or labeled with the following statement: This dynamically-tested seat belt assembly is for use only in [insert specific seating position(s), e.g., "front right"] in [insert specific vehicle make(s) and model(s)]." Land Rover suggested that this labeling requirement was adopted primarily because of the provision in section S4.6.3 of Standard No. 208 that dynamically tested manual belt assemblies do "not have to meet the requirements of S4.2(a)–(c) and S4.4 of Standard No. 209."

Land Rover suggested that NHTSA intended to require dynamically tested belts to be labeled in accordance with S4.6(b) of Standard No. 209 *only* if the belts do not comply with *all* of the requirements of Standard No. 209. In these situations, Land Rover acknowledged that the labeling requirements help ensure that the belts will not be installed into inappropriate vehicles. However, Land Rover stated its belief that the labeling requirements in S4.6(b) of Standard No. 209 do *not* apply to dynamically-tested manual belts that also comply with all of the requirements of Standard No. 209. According to Land Rover, there is no reason to require labeling of belt assemblies that comply with all requirements of Standard No. 209, just because those belt assemblies also comply with the dynamic testing requirements when installed in a particular vehicle.

NHTSA responded to Land Rover's request for an interpretation of these requirements in an October 14, 1988 letter. In this letter, the agency explained that section S4.6(b) of Standard No. 209 provides that seat belt assemblies that *meet* the dynamic testing requirements in Standard No. 208 shall be marked or labeled with certain information. This section contains *no* exception for seat belt assemblies that meet the dynamic testing requirements *and* satisfy the performance requirements of Standard No. 209. The reason for not including any such exception was that the agency intended that *all* dynamically tested manual belts be marked or labeled with the information specified in S4.6(b).

The October 14, 1988 letter to Land Rover also explained in detail why the agency intended that *all* dynamically tested manual belts be marked or labeled with this information. The letter explained that NHTSA agrees with Land Rover's suggestion that a belt assembly that complies with all requirements of Standard No. 209 will provide very substantial protection to an occupant of any vehicle in a crash. However, the letter noted that the protection provided by safety belts to occupants of a particular vehicle depends on *more* than the performance of the belts themselves; it also depends on the structural characteristics and interior design of the vehicle. The dynamic testing requirements measure the performance of the safety belt/vehicle combination, while Standard No. 209 focuses on measuring the performance of the safety belts alone. For a more extensive discussion of this issue, *see* 52 FR 44899–44900; November 23, 1987.

The October 14, 1988 letter to Land Rover explained the need for labeling of all dynamically tested belts for light trucks and multipurpose passenger vehicles as follows. Even if Land Rover were to install dynamically tested belt systems that comply with all requirements of Standard No. 209 in all of its vehicles, those belt systems might not be appropriate for use in other light multipurpose passenger vehicles. This is particularly true if other light multipurpose passenger vehicles are

designed for use only with specific dynamically tested belt systems different from the Land Rover belt system. The chances of the Land Rover belt system being installed in a vehicle for which it would not be appropriate are minimized if there is a label on the belt system indicating that it should be installed only in specific seating positions in Land Rover models and any other vehicles for which the belt system is appropriate. Accordingly, the October 14, 1988 letter to Land Rover concluded that the belt labeling requirements in S4.6(b) of Standard No. 209 apply to *all* dynamically tested belts for use in light trucks and multipurpose passenger vehicles, regardless of whether those dynamically tested belts comply with all other requirements of Standard No. 209.

Land Rover requested that NHTSA treat its request for an interpretation as a petition for rulemaking if, as NHTSA did, the agency concluded that Land Rover's suggested interpretation was incorrect. NHTSA has conducted a technical review of the petition, in accordance with 49 CFR 552.6. After that review, the agency has concluded that the reasons set forth in past preambles are still valid and establish a safety need for requiring labeling of *all* dynamically tested manual belts. Because of this safety need, NHTSA has concluded that there is no reasonable possibility that a rule amending the belt labeling requirements in accordance with Land Rover's petition would be issued at the conclusion of the requested rulemaking proceeding. Therefore, Land Rover's petition is denied.

Authority: 15 U.S.C. 1392, 1407, and 1410a; delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.

Issued on December 12, 1988.

BILLING CODE 2210–01–M

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 9, 1988.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) title of the information collection; (3) form number(s), if applicable; (4) how often the information is requested; (5) who will be required or asked to report; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to provide the information; (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

BILLING CODE 3410–01–M

Forest Service

Forest Management Activities Associated With the Implementation of the Forest Plan in the Mill and Emigrant Drainages of the Absaroka Mountains; Livingston Ranger District, Park County, MT

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an Environmental Impact Statement to analyze and disclose the environmental impacts of forest management activities associated with the implementation of the Gallatin National Forest Plan, within the Mill and Emigrant drainages of the Absaroka Mountains, Livingston Ranger District, Park County, Montana. The agency invites written comments and suggestions on the proposed management activities. In addition, the agency gives notice of the full environmental analysis and decision making process that will occur on the proposal so that interested and affected parties are aware how they may participate and contribute to the final decision.

DATE: Comments concerning the proposed management activities must be received by January 6, 1989.

ADDRESS: Submit written comments and suggestions on the proposed management activities to Gordon Schofield, Acting District Ranger, Livingston Ranger District, Gallatin National Forest, Route 62, Box 3197, Livingston, Montana 59047.

FOR FURTHER INFORMATION CONTACT: Direct comments or questions about the proposed activities and the Environmental Impact Statement should be made to Rita E. Beard, Livingston Ranger District, Gallatin National Forest, Route 62, Box 3197, Livingston, Montana 59047.

SUPPLEMENTARY INFORMATION: The area under consideration covers approximately 110,000 acres. It can be described as including Mill and Emigrant Creeks, bounded by the hydrologic divides of these drainages and the forest boundary. Approximately 61,800 acres are within the Absaroka-Beartooth Wilderness. An additional 26,000 acres were identified as roadless by the Rare II process, and are within the North Absorka Roadless Area, 1–371, and Chico Peak Roadless Area, 1–547. There are approximately 2,600 acres of private land within the analysis area. The approximate legal description is as follows:

Sections 25, 26, 35, 36 Township 5 south (T5S), Range 10 east (R10E) Montana Prime Meridian (MPM)
Sections 28, 29, 30, 31, 32, 33, 34 T5S, R11E MPM
Sections 12, 13, 14, 23, 24, 25, 26, 35, 36 T6S, R8E MPM
Sections 1, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36 T6S, R9E MPM
All Sections in T6S, R10E MPM
Sections 4, 5, 6, 7, 8, 9, 17, 18, 19, 20, 28, 29, 30, 31, 32, 33 T6S, R11E MPM
Sections 1, 2, 12 T7S, R8E MPM
Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 21, 22, 23, 24, 25, 26, 27, 28, 33, 34, 35, 36 T7S, R9E MPM
Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 26, 27, 28, 29, 30, 31, 32, 33 T7S, R10E MPM
Sections 4, 5, 6, 7, 8, 9, 17, 18, 19 T7S, R11E MPM
Sections 1, 2, 3, 4, 5, 12 T8S, R9E MPM
Sections 4, 5, 6, 7, 18 T8S, R10E MPM.

The USDA Forest Service proposes to implement activities prescribed by the Gallatin National Forest Plan, approved September 23, 1987.

The proposed activities include, wildlife habitat improvement, noxious weed control, livestock grazing, trail construction and reconstruction and timber management. Timber management activities could include timber sales, firewood gathering, road construction, insect and disease control, reforestation and thinning. Approximately 8,870 acres (8.1 percent of the analysis area), have been identified as suitable and available for timber management by the Gallatin National Forest Plan.

The Forest Service will consider a range of alternatives from deferring management activities for the planning period, considering activities other than timber sales and road construction, and implementing all activities prescribed by the Forest Plan during this planning period. The EIS will analyze the cumulative effects of past, current and projected activities on both private and National Forest lands for each alternative. It will also analyze the effects of the recent wildfires and snow-damaged timber on the proposed management activities.

Public participation is an important part of the analysis, commencing with the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement (DEIS). The scoping process includes:

1. Identifying potential issues.
2. Indentifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis, such as the Gallatin National Forest Plan.
4. Identifying alternatives.
5. Identifying potential environmental effects of any proposed action and alternatives (i.e., direct, indirect, and cumulative effects, and connected actions).
6. Determining potential cooperating agencies and task assignments.

Scoping has already been initiated through individual and public meetings beginning in the spring of 1986. Several issues have been identified, including: Concern over additional timber harvest in the area, road construction, visual quality, maintaining security for big game species, impact of forest management activities on moose, maintaining a diversity of age and size classes within timber lands, supplying local economies and mills with timber and management of down and damaged timber caused by snow storms in the spring of 1988. Public participation and comment is welcomed throughout the process. Other Federal and State agencies such as, the Montana Department of Fish, Wildlife and Parks will be invited to cooperate in development of the issues and alternatives and their input will be solicited as the analysis continues.

The draft Environmental Impact Statement (DEIS) is expected to be filed with the Environmental Protection Agency (EPA) and available for public

1988
UMI

review in January of 1989. At that time, EPA will publish a notice of availability of the DEIS in the **Federal Register.**

The comment period on the draft environmental impact statement will be 45 days from the date of the EPA's notice of availability appears in the **Federal Register.** It is very important that those interested in management of the Mill/Emigrant area participate at that time. To be most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see the Council on Environmental Quality regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition Federal court decisions have established that reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions, *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978) and that environmental objections that could have been raised at that draft stage may be waived if not raised until after completion of the final Environmental Impact Statement, *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

After the comment period ends on the DEIS, the comments will be analyzed and considered by the Forest Service in preparing the final Environmental Impact Statement. The final EIS is scheduled to be completed by March 1989. In the final EIS the Forest Service is required to respond to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, environmental consequences discussed in the EIS, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to review under applicable Forest Service regulations.

Gordon Schofield, Acting District Ranger, Livingston Ranger District, Gallatin National Forest is the responsible official.

Date: December 5, 1988.

Gordon Schofield,

Acting District Ranger, Livingston Ranger District, Gallatin National Forest.

BILLING CODE 3410-11-M

Duncan And Sunflower Timber Sales; Tahoe National Forest, Placer County, CA; Intent To Prepare an Environmental Impact Statement; Correction

This document corrects the notice of intent to prepare an environmental impact statement that appeared at page 48569 in the **Federal Register** of Thursday, December 1, 1988. The action is necessary to correct a typographical error. That notice of intent incorrectly states that comments regarding this project should be received by January 15, 1988. That date is corrected as follows: January 15, 1989.

Date: December 9, 1988.

William P. Knispek,

Timber Management Officer.

BILLING CODE 3410-11-M

Soil Conservation Service

Finding of No Significant Impact; Yocona-Spybuck Watershed, AR

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Part 1500), and the Soil Conservation Service Guidelines (7 CFR Part 650), the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Yocona-Spybuck Watershed, St. Francis and Lee Counties, Arkansas.

FOR FURTHER INFORMATION CONTACT: Gene Sullivan, State Conservationist, Soil Conservation Service, 5404 Federal Office Building, 700 West Capitol Avenue, Little Rock, Arkansas 72201, Telephone: (501) 378-5445.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Gene Sullivan, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for flood prevention and watershed protection. Flood prevention measures include channel work on 6.83 miles of existing ditch. Accelerated technical and financial assistance for installing land treatment measures to control erosion will be provided. Land treatment measures include the no-tillage method of crop production, water disposal systems, and land use conversion.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Gene Sullivan.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Date: December 2, 1988.

Ronnie D. Murphy,

Acting State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

International Trade Administration

Short-Supply Review on Certain Steel Wire Strand; Request for Comments

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-Brazil Arrangement Concerning Trade in Certain Steel Products, with respect to certain steel wire strand used for prestressing concrete.

DATE: Comments must be submitted on or before December 27, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of

Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377–0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-Brazil Arrangement Concerning Trade in Certain Steel Products provides that if the U.S.:

> * * * determines that because of abnormal supply or demand factors, the United States steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors) an additional tonnage shall be allowed for such product or products * * *.

We have received a short-supply request for uncoated seven wire steel strand for prestressing concrete, meeting American Society of Testing Materials (ASTM) specification A 416, stress-relieved, Grade 270, measuring 0.5 inch in nominal diameter.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than December 27, 1988. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly so label the business proprietary portion of the submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B–099, Import Administration, U.S. Department of Commerce, at the above address.

Jan W. Mares,

Assistant Secretary for Import Administration.

December 5, 1988.

BILLING CODE 3510–DS–M

National Institute of Standard and Technology

[Docket No. 81015–8215]

Proposed Revision of Federal Information Processing Standard

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: The purpose of this notice is to announce the proposed revision of Federal Information Processing Standard (FIPS PUB) 21–2, COBOL.

SUMMARY: A revision to Federal Information Processing Standards Publication, FIPS PUB 21–2, COBOL, which adopts ANSI X3.23–1985, is being proposed for Federal use. This revision will adopt the forthcoming addendum (X3.23A–198x) to American National Standard for COBOL which adds an Intrinsic Function facility to the language. The proposed addendum is upwardly compatible with the standard except for the reserved word FUNCTION.

Prior to the submission of this proposed revision to FIPS PUB 21–2 to the Secretary of Commerce for review and approval, it is essential to assure that consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

This proposed revision contains two sections: (1) An announcement section, which provides information concerning the applicability, implementation, and maintenance of the standard; and (2) a specifications section which deals with the technical requirements of the standard. Only the announcement section of the standard is provided in this notice. Interested parties may obtain a copy of the proposed addendum to ANSI X3.23–1985 from the Standards Processing Coordinator (ADP), Technology Building, Room B–64, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone (301) 975–2816.

DATE: Comments on this proposed revision must be received on or before March 15, 1989.

ADDRESS: Written comments concerning the adoption of this proposed revision as FIPS 21–3 should be sent to: National Institute of Standards and Technology, ATTN: Proposed Revision of FIPS 21–2, Technology Building, Room B–154, Gaithersburg, MD 20899.

Written comments received in response to this notice will be made part of the public record and will be made available for inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Ms. Mabel Vickers, National Institute of Standards and Technology, Gaithersburg, MD 20899, telephone (301) 975–3277.

Date: December 9, 1988.

Raymond G. Kammer,

Acting Director.

FEDERAL INFORMATION PROCESSING STANDARDS PUBLICATION 21–3

Announcing the Standard for COBOL [proposed]

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Institute of Standards and Technology after approval by the Secretary of Commerce pursuant to section 111(d) of the Federal Property and Administrative Services Act of 1949 as amended by the Computer Security Act of 1987, Pub. L. 100–235.

1. *Name of standard.* COBOL (FIPS PUB 21–3).

2. *Category of standard.* Software Standard, Programming Language.

3. *Explanation.* This publication announces the adoption of American National Standard Programming Language, COBOL, ANSI X3.23–1985 and X3.23A–198x, as amplified herein, as a Federal Information Processing Standard (FIPS). This revision supersedes FIPS PUB 21–2 and reflects the addition of an Intrinsic Function facility to the COBOL specifications. The American National Standards define the elements of the COBOL programming language and the rules for their use. The purpose of the standards is to promote portability of COBOL programs for use on a variety of data processing systems. The standards are used by implementors as the reference authority in developing processors and by users who need to know the precise syntactic and semantic rules of the standard language.

4. *Approving authority.* Secretary of Commerce.

5. *Maintenance agency.* Department of Commerce, National Institute of Standards and Technology (NIST).

6. *Cross index.* a. American National Standard Programming Language COBOL, ANSI X3.23–1985, ISO 1989–1985.

b. Addendum X3.23A–198x to American National Standard Programming Language COBOL, ANSI X3.23–1985.

7. *Related documents.*[1] a. Federal Information Resources Management Regulation 201–8.1, Federal ADP and Telecommunication Standards.

b. Federal Information Processing Standards Publication 29, Interpretation

[1] Refers to most recent revision of FIPS PUBS.

Procedures for Federal Information Processing Standards for Software.

c. NBS Special Publication 500–117, Selection and Use of General-Purpose Programming Languages.

8. *Objectives.* Federal standards for high level programming languages permit Federal departments and agencies to exercise more effective control over the production, management, and use of the Government's information resources. The primary objectives of Federal programming language standards are:

—To encourage more effective utilization and management of programmers by insuring that programming skills acquired on one job are transportable to other jobs, thereby reducing the cost of programmer re-training.

—To reduce the cost of program development by achieving the increased programmer productivity that is inherent in the use of high level programming languages;

—To reduce the overall software costs by making it easier and less expensive to maintain programs and to transfer programs among different computer systems, including replacement systems;

—To protect the existing software assets of the Federal Government by insuring to the maximal feasible extent that Federal programming language standards are technically sound and that subsequent revisions are compatible with the installed base.

9. *Applicability.* a. Federal standards for high level programming languages should be used for computer applications and programs that are either developed or acquired for government use. FIPS COBOL is one of the high level programming language standards provided for use by all Federal departments and agencies. FIPS COBOL is especially suited for applications that emphasize the manipulation of characters, records, files, and input/output (in contrast to those primarily concerned with scientific and numeric computations).

b. The use of FIPS high level programming languages is strongly recommended when one or more of the following situations exist:

—It is anticipated that the life of the program will be longer than the life of the presently utilized equipment.

—The application or program is under constant review for updating of the specifications, and changes may result frequently.

—The application is being designed and programmed centrally for a decentralized system that employs computers of different makes, models and configurations.

—The program will or might be run on equipment other than for which the program is initially written.

—The program is to be understood and maintained by programmers other than the original ones.

—The advantages of improved program design, debugging, documentation and intelligibility can be obtained through the use of this high level language regardless of interchange potential.

—The program is or is likely to be used by organizations outside the Federal Government (i.e., State and local governments, and others).

c. Nonstandard language features should be used only when the needed operation or function cannot reasonably be implemented with the standard features alone. Although nonstandard language features can be very useful, it should be recognized that their use may make the interchange of programs and future conversion to a revised standard or replacement processor more difficult and costly.

d. It is recognized that programmatic requirements may be more economically and efficiently satisfied through the use of report generation, database management, or text processing languages. The use of any facility should be considered in the context of system life, system cost, data integrity, and the potential for data sharing.

e. Programmatic requirements may be also more economically and efficiently satisfied by the use of automatic program generators. However, if the final output of a program generator is a COBOL source program, then the resulting program should conform to the conditions and specifications of FIPS COBOL.

f. When it is determined that a programming language that has been adopted as a FIPS is to be used for an application or program, a processor conforming to the FIPS programming language shall be used, if available. It is not intended that existing programs be rewritten solely for the purpose of conforming to a FIPS programming language. If a program is to be part of an existing application written in a programming language not conforming to a FIPS programming language, the language processor used for the existing application may be used for the new program.

10. *Specifications.* FIPS COBOL specifications are contained in American National Standard Programming Language COBOL, ANSI X3.23–1985 and ANSI X3.23A–198x.

ANSI X3.23–1985 and ANSI X3.23A–198x specify the form of a program written in COBOL, formats for data, and rules for program and data interpretation.

The standards do not specify limits on the size of programs, minimum system requirements, the means of supervisory control of programs, or the means of transforming programs internally for processing.

In addition, the following requirements apply:

a. For purposes of FIPS COBOL, the modules defined in ANSI X3.23–1985 and ANSI X3.23A–198x are combined into three subsets and four optional modules. The three subsets are identified as Minimum, Intermediate, and High. The four optional modules are Report Writer, Communications, Debug, and Segmentation. These four optional modules may be associated with any of the subsets.

The high subset is composed of all language elements of the highest level of all required modules. The intermediate subset is composed of all language elements of level 1 of all required modules. The minimum subset is composed of all language elements of level 1 of the Nucleus, Sequential I–O, and Inter-Program Communication modules.

The following table reflects the composition of the required subsets and the relationship of the subsets and the optional modules. The numbers in the table refer to the level within a module as designated in ANSI X3.23–1985 and ANSI X3.23A–198x, and a dash denotes the corresponding module is omitted or may be omitted.

COBOL Subsets

Modules	Minimum	Intermediate	High
Required:			
Nucleus	1	1	2
Sequential I–O	1	1	2
Relative I–O	–	1	2

COBOL SUBSETS—Continued

Modules	Minimum	Intermediate	High
Indexed I–O	–	1	2
Inter-Program Communication	1	1	2
Sort-Merge	–	1	1
Source Text Manipulation	–	1	2
Intrinsic Function	–	–	1
Optional:			
Report Writer	–, or 1	–, or 1	–, or 1
Communication	–, 1, or 2	–, 1, or 2	–, 1, or 2
Debug	–, 1, or 2	–, 1, or 2	–, 1, or 2
Segmentation	–, 1, or 2,	–, 1, or 2	–, 1 or 2

b. A facility must be available in the processor for the user to optionally specify monitoring of the source program at compile time. The monitoring may be specified for a FIPS COBOL subset, for any of the optional modules, for all of the obsolete language elements included in the processor, or for a combination of a FIPS COBOL subset, optional modules, and all obsolete elements. The monitoring may be specified for any FIPS COBOL subset at or below the highest subset for which the processor is implemented and for a level of an optional module at or below the level of the optional module for which the processor is implemented. The monitoring is an analysis of the syntax used in the source program against the syntax included in the user selected FIPS COBOL subset and optional modules. Any syntax used in the source program that does not conform to that included in the user selected FIPS COBOL subset and optional modules will be diagnosed and identified to the user through a message on the source program listing. Any syntax for an obsolete language element included in the processor and used in the source program will also be diagnosed and identified through a message on the source program listing. The determination of the need to flag any given source program syntax in accordance with these requirements cannot be logically resolved until the syntactic correctness of the source program has been established. The message provided will identify:

—The clause, statement or header that directly contains the nonconforming or obsolete syntax. (For the purpose of this requirement the definitions of clause, statement and header contained in American National Standard Programming Language COBOL, ANSI X3.23–1985, Section III, Glossary, and the definition of syntax contained in American National Dictionary for Information Processing Systems, X3/TR–1–82, apply.)

—The source program line and an indication of the beginning location within the line of the clause, statement or header which contains the nonconforming of obsolete syntax.

—The syntax as "nonconforming standard" if the nonconforming syntax is included in the processor but is not within the user selected FIPS COBOL subset or optional modules except if monitoring is selected for the obsolete category then obsolete language elements are only flagged as "obsolete".

—The syntax as "nonconforming nonstandard" if the nonconforming syntax is a nonstandard extension included in the processor.

—The syntax as "obsolete" if the syntax identified is in the obsolete category within a FIPS COBOL subset or optional module included in the processor.

11. *Implementation.* The implementation of FIPS COBOL involves three areas of consideration: Acquisition of COBOL processors, interpretation of FIPS COBOL, and validation of COBOL processors.

11.1 *Acquisition of COBOL Processors.* This publication is effective June 15, 1989. COBOL processsors acquired for Federal use after this date should implement at least one of the required subsets of FIPS COBOL. If the functionality of one or more of the optional modules meets programmatic requirements, then those optional modules also should be acquired. Each optional module that is needed to meet programmatic requirements should be explicitly cited as a requirement in the order for the processor. Conformance to FIPS COBOL should be considered whether COBOL processors are developed internally, acquired as part of an ADP system procurement, acquired by separate procurement, used under an ADP leasing arrangement, or specified for use in contracts for programming services.

A transition period provides time for industry to produce COBOL processors conforming to the standard. The transition period begins on the effective date and continues for one (1) year thereafter. The following apply during the transition period:

a. The provisions of FIBS PUB 21–2 apply to processors ordered before the effective date but delivered subsequent to the effective date.

b. The provisions of this publication apply to orders placed after the effective date; however, a processor conforming to FIPS PUB 21–3, if available, may be acquired for use prior to the effective date. If a conforming processor is not available, a processor conforming to FIPS PUB 21–2 may be acquired for interim use during the transition period.

11.2 *Interpretation of FIPS COBOL.* NIST provides for the resolution of questions regarding FIPS COBOL specifications and requirements, and issues official interpretations as needed. All questions about the interpretation of FIPS COBOL should be addressed to: National Institute of Standards and Technology, ATTN: COBOL Interpretation, Technology Building, Room B–154, Gaithersburg, MD 20899.

11.3 *Validation of COBOL Processors.* NIST provides a service for the purpose of validating the conformance to this standard of processors offered for Federal procurement. The validation system reports the nature of any deviations that are detected. This service is offered on a reimbursable basis. Further information about the validation service can be obtained from the Software Standards Validation Group, COBOL Validation, National Institute of Standards and Technology, Gaithersburg, MD 20899 (301) 975–3247.

12. *Waivers.* Under certain exceptional circumstances, the heads of Federal departments and agencies may approve waivers to Federal Information Processing Standards (FIPS). The head of such agency may redelegate such authority only to a senior official designated pursuant to section 3506(b) of Title 44, United States Code.

Waivers shall be granted only when:

a. Compliance with a standard would adversely affect the accomplishment of

the mission of an operator of a Federal computer system, or

b. Cause a major adverse financial impact on the operator which is not offset by Government-wide savings.

Agency heads may act upon a written waiver request containing the information detailed above. Agency heads may also act without a written waiver request when they determine that conditions for meeting the standard cannot be met. Agency heads may approve waivers only by a written decision which explains the basis upon which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to: National Institute of Standards and Technology, ATTN: FIPS Waiver Decisions, Technology Building, Room B–154, Gaithersburg, MD 20899. In addition notice of each waiver granted and each delegation of authority to approve waivers shall be sent promptly to the Committee on Government Operations of the House of Representatives and the Committee on Governmental Affairs of the Senate and shall be published promptly in the **Federal Register**.

When the determination on a waiver applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the *Commerce Business Daily* as a part of the notice of solicitation for offers of an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver, any supporting documents, the document approving the waiver and any supporting and accompanying documents, with such eletions as the agency is authorized and decides to make under 5 U.S.C. 552(b), shall be part of the procurement documentation and retained by the agency.

13. *Where to Obtain Copies.* Copies of this publication are for sale by the National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161. (Sale of the included specifications document is by arrangement with the American National Standards Institute.) When ordering, refer to Federal Information Processing Standards Publication 21–3 (FIPS PUB 21–3), and title. Payment may be made by check, money order, or deposit account.

BILLING CODE 3510–CN–M

National Oceanic and Atmospheric Administration

Preliminary Determination To Approve Amendment of the Alaska Coastal Management Program

AGENCY: National Oceanic and Atmospheric Administration, National Ocean Service, Office of Ocean and Coastal Resource Management.

ACTION: Notice of preliminary approval of amendment.

Location: Aleutians East Coastal Resource Service Area, Alaska.

SUMMARY: The Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service, National Oceanic and Atmospheric Administration (NOAA) received a request from the Alaska Coastal Management Program (ACMP) to incorporate the Aleutians East Coastal Resource Service Area Coastal Management Program (AECMP). The State's request was made pursuant to section 306(g) of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 1455 (g) and the regulations implementing the CZMA at 15 CFR 923.81. The AECMP creates a new coastal boundary for the ACMP in the region and establishes goals and policies for activities taking place in the Aleutians East Coastal Resource Service Area. The AECMP follows the guidelines and standards for local program development set in the ACMP and will be administered by the Coastal Resource Service Area and the State.

The Director, OCRM, has reviewed the amendment request and has made a preliminary determination that the ACMP will still constitute an approvable program and that the procedural requirements of section 306(c) of the CZMA have been met.

The Director also determined that approval of the proposed change does not constitute a major Federal action having a significant effect on the environment. Therefore, approval of the proposed amendment does not require an environmental impact statement pursuant to the National Environmental Policy Act of 1969, as amended. Copies of the Finding of No Significant Impact (FONSI), including the supporting Environmental Assessment (EA) were distributed for public comment in June 1987 **Federal Register** Vol. 52, No. 118, p. 2331).

A Preliminary Determination to approve the AECMP was included with the EA in 1987; however, concerns over the AECMP boundary and Special Use Area designations were raised during the public comment period and the AECMP was not approved. The AECMP was resubmitted in October, 1988 based upon additional information and further justification, rather than major changes to either the enforceable policies or the coastal zone boundary. This new information addresses the concerns raised during public comment on the EA and, based on this latest submittal, the Director, OCRM, has issued a Preliminary Determination to approve the AECMP. The Director's Preliminary Determination of Approvability, as well as the latest submittal package, the FONSI, and the EA are available at the address below.

Comments on the Preliminary Determination to approve the Alaska amendment request should be made by January 27, 1989. Address comments to: James P. Burgess, Chief, Coastal Programs Division, Office of Ocean and Coastal Resource Management, 1825 Connecticut Avenue, NW., Washington, DC 20235, (202) 673–5158.

(Federal Domestic Assistance Catalog 11.419, Coastal Zone Management Program Administration.)

Date: December 9, 1988.

Thomas J. Maginnis,

Assistant Administrator for Ocean Services and Coastal Zone Management.

[FR Doc. 88–28795 Filed 12–14–88; 8:45 am]

BILLING CODE 3510–08–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products Produced or Manufactured in Pakistan

December 12, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: January 1, 1989.

Authority: E.O. 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

FOR FURTHER INFORMATION CONTACT: Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 343–6498. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION: A copy of the current bilateral textile agreement between the Governments of the United States and Pakistan is available from the Textiles Divsion, Bureau of Economic and Business Affairs, U.S. Department of State, (202) 647–1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 12, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement, effected by exchange of notes dated May 20, 1987 and June 11, 1987, as amended, between the Governments of the United States and Pakistan; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption, and withdrawal from warehouse for consumption, of cotton, man-made fiber, silk blend and other vegetable fiber textile products in the following categories, produced or manufactured in Pakistan and exported during the twelve-month period which begins on January 1, 1989 and extends through December 31, 1989, in excess of the following restraint limits:

	12-month restraint limit
Category Group I:	
226/313	67,216,794 square meters.
315	46,416,519 square meters.
331	744,185 dozen pairs.
334	45,339 dozen.
335	55,985 dozen.
336	150,073 dozen.
338	3,022,507 dozen.
339	693,687 dozen.
340	160,578 dozen.
341	277,653 dozen.
342	91,592 dozen.
347/348	361,300 dozen.
351	45,796 dozen.
352	228,980 dozen.
363	28,113,750 numbers.
369-D [1]	1,038,636 kilograms of which not more than 389,488 kilograms shall be in piled dish towels—tariff number 6302.60.00.10.
369-R [2]	5,694,556 kilograms.
Category Group II:	
300, 301, 314, 317, 326, 330, 332, 333, 345, 349, 350, 353, 354, 359, 360–362, 369-S [3] and 369-O, [4] as a group.	64,594,183 square meters equivalent.
Sublevels within Group II:	
317	5,016,764 square meters.
350	25,000 dozen.
369-S	385,554 kilograms.
Group III:	
218	2,257,544 square meters.
219	3,762,573 square meters.
220	3,344,509 square meters.
229	306,481 kilograms.
237	65,000 dozen.
607	453,592 kilograms.
613/614	13,246,565 square meters.
615	14,092,091 square meters.
617	3,511,735 square meters.
631	505,620 dozen pairs.
634	41,946 dozen.
635	16,949 dozen.
636	89,888 dozen.
638/639	224,720 dozen.
640	81,226 dozen.
641	90,123 dozen.
647/648	477,565 dozen.
650/850	55,000 dozen.
659	68,039 kilograms.
666	1,133,981 kilograms.

[1] In Category 369–D, dish towels in tariff numbers 6302.60.00.10 and 6320.91.00.20.
[2] In Category 369–R, only tariff number 6307.10.20.20.
[3] In Category 369–S, only tariff number 6307.10.20.10.
[4] In Category 369–O, all tariff numbers except 6302.60.00.10 and 6302.91.00.20 (369–D); 6307.10.20.20 (369–R) and 6307.10.20.10 (369–S).

Imports charged to these category limits for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for such goods during that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The levels set forth above are subject to adjustment in the future according to the provisions of the current bilateral textile agreement between the Governments of the United States and Pakistan.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRECTION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States Annotated (see **Federal Register** notice 53 FR 44937, published on November 7, 1988).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist

only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 12, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further amended on July 31, 1986; pursuant to the Bilateral Wool and Man-Made Fiber Textile Agreement of November 7 and 16, 1984, as amended, between the Governments of the United States and the Socialist Republic of Romania; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1989, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in the following categories, produced or manufactured in Romania and exported during the twelve-month period beginning on January 1, 1989 and extending through December 31, 1989, in excess of the following restraint limits:

	12-month restraint limit
Category Level not in a group:	
604	1,488,917 Kilograms.
Group II:	
410, 414, 464–469, 611–629, 665–670, as a group.	10,033,528 square meters equivalent.
Sublevels within the Group II:	
410	167,225 square meters.
465	129,600 square meters.
618	1,672,225 square meters.
666	116,306 kilograms.
Group III:	
431–459, 630–659, as a group.	40,225,428 square meters equivalent.
Sublevels within Group III:	
433/434	6,169 dozen.
435	5,028 dozen.
442	8,026 dozen.
443	98,196 numbers.
444	32,021 numbers.
448	6,500 dozen.
459	34,019 dozen.
633	44,199 dozen.
634	53,687 dozen of which not more than 17,083 dozen shall be in non-knit coats in Category 634pt.[1] and not more than 36,604 dozen shall be in knit coats in Category 634pt.[2]
635	64,704 dozen.
638/639	363,256 dozen.
640	70,150 dozen.
641	44,850 dozen.
642	39,326 dozen.
643pt./644pt. (not knit) [3].	498,462 numbers.
643pt./644pt. (knit) [4].	24,996 numbers.
645/646	240,962 dozen.
647	80,737 dozen.
648	57,746 dozen.
659	101,768 kilograms.

[1] In Category 634pt. (non-knit), only tariff numbers 6201.13.40.15, 6201.13.40.20, 6201.13.40.30, 6201.13.40.40, 6201.19.00.30, 6201.93.20.10, 6201.93.30.00, 6201.93.35.10, 6201.93.35.20, 6201.99.00.30, 6203.23.00.50, 6230.29.20.10, 6210.20.10.20, 6210.40.10.20, 6211.20.15.15, 6211.20.20.30, and 6211.33.00.35.

[2] In Category 634pt. (knit), only tariff numbers 6101.30.10.00, 6101.20.20.10, 6101.30.20.20, 6101.90.00.30, 6103.23.00.36, 6103.29.10.10, 6112.12.00.10, 6112.19.10.10, 6112.20.10.10, 6112.20.10.30 and 6113.00.00.25.

[3] In Category 643pt./644pt., (non-knit) only tariff numbers 6203.12.20.10, 6203.12.20.20, 6203.19.30.00 and 6203.19.40.50 in Category 643pt.; 6204.13.20.10, 6204.13.20.20, 6204.19.20.00 and 6204.19.30.60 in Category 644 pt.

[4] In Category 643pt./644pt., (knit), only tariff numbers 6103.12.20.00, 61.03.19.15.00 and 6103.19.40.50 in Category 643pt.; and 6104.13.20.00, 6104.19.15.00 and 6104.19.20.60 in Category 644pt.

Imports charged to the category limits, except Category 439, for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The levels set forth above are subject to adjustment in the future according to the provisions of the Bilateral Wool and Man-Made Fiber Textile Agreement of November 7 and 16, 1984, as amended, between the Governments of the United States and the Socialist Republic of Romania.

The conversion factors for Categories 433/434 and 638/639 are 35.2 and 12.96, respectively.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry of consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile agreements.

632	434,783 dozen pairs.
636	140,000 dozen.
642	186,104 dozen.
643	444,444 numbers.
644	444,444 numbers.
649	416,667 dozen.
650	39,216 dozen.
659–S	145,150 kilograms.
659–V	145,150 kilograms.
659–O	145,150 kilograms.
655	1,858,061 square meters.
666	115,306 kilograms.
669	116,306 kilograms.
670	453,592 kilograms.

[1] In Category 659–2, only tariff numbers 6112.31.00.10, 6112.31.00.20, 6112.41.00.10, 6112.41.00.20, 6112.41.00.30, 6112.41.00.40, 6211.11.10.10, 6211.11.10.20, 6211.12.10.10, 6211.12.10.20.

[2] In Category 659–V, only tariff numbers 6110.30.10.30, 6110.30.10.40, 6110.30.20.30, 6110.30.20.40, 6110.30.30.30, 6110.30.30.35, 6110.90.00.52, 6110.90.00.54, 6210.93.20.20, 6202.93.20.20, 6211.33.00.50 and 6211.43.00.80.

[3] In Category 659–O, all tariff numbers except 6112.31.00.10, 6112.31.00.20, 6112.41.00.10, 6112.41.00.20, 6112.41.00.30, 6112.41.00.40, 6211.11.10.10, 6211.11.10.20, 6211.12.10.10, 6211.12.10.20 in Category 659–S; and 6110.30.10.30, 6110.30.10.40, 6110.30.20.30, 6110.30.20.40, 6110.30.30.30, 6110.30.30.35, 6110.90.00.52, 6110.90.00.54, 6201.93.20.20, 6202.93.20.20, 6211.33.00.50 and 6211.43.00.80 in Category 659–V.

Imports charged to these category limits, except Category 439, for the period January 1, 1988 through December 31, 1988 shall be charged against the levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The conversion factor for Categories 352/652 is 11.3 square meters equivalent per dozen.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement, effected by exchange of notes dated May 31 and June 5, 1986, as amended, between the Governments of the United States and the Republic of Singapore.

In carrying out the above directions, the Commissioner of Customes should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–M

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Thailand

December 12, 1988.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 19, 1988.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port.

For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority. Ex. O. 11651 of March 3, 1972, as amended; sec. 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain cotton, wool and man-made fiber textile products are being adjusted, variously, for shift added, shift subtracted, carryforward and unused carryforward.

A description of the textile and apparel categories in terms of T.S.U.S.A. numbers is available in the Correlation: Textile and Apparel Categories with the Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, published on December 16, 1987). Also see 53 FR 60, published on January 4, 1988.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 12, 1988.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 29, 1987 by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Thailand and exported during the period which began on January 1, 1988 and extends through December 31, 1988.

Effective on December 19, 1988, the directive of December 29, 1987 is being amended further to adjust the limits for cotton, wool and man-made fiber textile products in the following categories, under the provisions of the current bilateral textile agreement between the Governments of the United States and Thailand:

Category	Adjusted 12-mo. limit [1]
200	921,215 pounds.
226/613/614/615	17,838,016 square yards.
300	5,707,411 pounds.
301pt.[2]	5,693,260 pounds.
315	16,635,342 square yards.
604	1,002,674 pounds.
Group II:	
239, 330–354, 359, 630–654 and 659, as a group.	84,690,114 square yards equivalent.
Sublevel in Group II:	
341	152,521 dozen.
Group III:	
410, 414, 431–448 and 459, as a group.	1,677,420 square yards equivalent.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.
[2] In Category 301pt., not wholly cotton in TSUSA numbers 300.6025, 300.6027 and 300.6028.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–28874 Filed 12–14–88; 8:45 am]

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement/ Environmental Impact Report (DEIS/ EIR) for the Tule River Basin Investigation, Tulare County, CA

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: The action being taken is to determine the feasibility of constructing additional facilities to control flooding along the Tule River and to provide additional water supply storage to meet other water resources needs of the area including irrigation, recreation, hydropower, and enhancement of fish and wildlife resources. Potential alternatives would help to alleviate flooding and provide additional water supplies to address other identified water related problems.

FOR FURTHER INFORMATION CONTACT: Suggestions and input from agencies, organizations and the general public are encouraged. Questions or comments about the proposed action and DEIS should be addressed to the District Engineer, U.S. Army Corps of Engineers, Sacramento District, (CESPK–PD–R), 650 Capitol Mall, Sacramento, California 95814–4794, or call Mr. Jeff Groska, at telephone (916) 551–1860. Responses specifically related to California Environmental Quality Act requirements of the EIR may be directed to Mr. Roger Robb of the Lower Tule River Irrigation District, P.O. Box 1388 Porterville, California 93258, (209) 686–4716.

SUPPLEMENTARY INFORMATION:

1. Proposed Action

The study will determine the feasibility of increasing flood protection and increasing irrigation storage space in the existing reservoir by modifying the spillway. The Corps of Engineers will prepare a report on its findings to be submitted to Congress.

2. Alternatives

Alternatives being considered are (a) no action plan and (b) the raising of the gross pool of Success Lake. Additional alternatives were considered but are not being studied in detail because they were found to not provide adequate flood protection, or are economically infeasible. They include the following: Indian Reservation Dam, North Fork Tule Dam, Middle Fork Tule Dam, South Fork Tule Dam, Springfield Dam, and Springfield Levees.

3. Scoping Process

a. The Corps completed a reconnaissance study in July 1987 which identified the acceptable alternatives to be carried into feasibility studies. Close coordination is being maintained with Federal, State, local sponsors, local agencies, environmental organizations, and concerned individuals. This is being accomplished through public meetings, public notices and inter-agency coordination. Through this Notice of Intent all segments of the affected public and agencies are invited to participate in the continuing planning process.

b. Significant issues that will be analyzed in depth in the EIS/EIR include: Displacement of people, land use, noise, air quality, endangered species, wildlife resources, fishery resources, cultural resources, riparian vegetation, flood protection, dam failure, water quality, recreation, and transportation.

c. The Lower Tule River Irrigation District is the local sponsor for the study and is providing 50 percent of the total study cost. Cost sharing partners to the study sponsor are: Tulare County, Kings County, and the State of California Department of Water Resources. The sponsor will participate with the Corps of Engineers in study management and plan formulation processes. Specific work items to be accomplished by the local interests include identification of environmental baseline conditions, identification of current land use, and assistance in the preparation of the Habitat Evaluation Procedure

evaluation of fish and wildlife impacts and enhancement potentials.

d. Significant review and consultation requirements to be conducted during the study include coordination with the U.S. Fish and Wildlife Service and California Department of Fish and Game under the Fish and Wildlife Coordination Act and Endangered Species Act, consultation with the State Historic Preservation Officer and Advisory Council on Historic Preservation under the National Historic Preservation Act, and coordination with the California Water Quality Control Board and Environmental Protection Agency on water quality issues under section 404 of the Clean Water Act. As this report will be a joint DEIS/EIR, coordination and review requirements both the National Environmental Policy Act and the California Environmental Quality Act will be completed.

4. Meeting Schedule

Additional public meetings for the specific purpose of scoping are not being considered. Scoping letters and prior public meetings during the reconnaissance study phase served to identify significant concerns and potential solutions. A July 1988 Notice of Initiation of Feasibility Study for flood control was mailed to interested agencies, organizations, and individuals. That notice and this Notice of Intent to Prepare a DEIS/EIR provide further opportunity for interested parties to provide input into the scope of the feasibility study and potential solutions.

5. Availability

The DEIS/EIR is scheduled to be available to the public in January 1990.

November 30, 1988.

Jack A. Le Cuyer,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 88-28814 Filed 12-14-88; 8:45 am]

BILLING CODE 3710-EZ-M

DEPARTMENT OF EDUCATION

[CFDA No. 84.003Q]

Invitation; Applications for New Awards Under the Bilingual Education; State Educational Agency Program for Fiscal Year 1989

Purpose: Provides financial assistance to State educational agencies (SEAs) to collect, aggregate, analyze, and report data and information on each State's population of limited English proficient persons, and the educational services provided or available to those persons. The program further provides assistance for activities designed to improve the effectiveness of programs for limited English proficient persons in their States.

Deadline for Transmittal of Applications: February 6, 1989.

Deadline for Intergovernmental Review Comments: April 5, 1989.

Applications Available: December 20, 1988.

Available Funds: It is expected that approximately $5,975,000 will be available for this program for fiscal year 1989.

Project Period: 36 months.

Applicable Regulations: (a) The Bilingual Education: State Educational Agency Program (34 CFR Part 548), and (b) the Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, 79 and 80 (except for § 75.217 (b) through (d)—relating to review of applications).

For Applications or Information Contact: Luis A. Catarineau, Office of Bilingual Education and Minority Languages Affairs, U.S. Department of Education, 400 Maryland Avenue SW. (Room 5086, Mary E. Switzer Building), Washington, DC 20202-6641. Telephone: (202) 732-5707.

Program Authority: 20 U.S.C. 3302.

Dated: December 8, 1988.

Alicia Coro,

Director, Office of Bilingual Education and Minority Languages Affairs.

[FR Doc. 88-28891 Filed 12-14-88; 8:45 am]

BILLING CODE 4000-01-M

[CFDA NO. 84.184B]

Invitation; Applications for New Awards Under the Drug-Free Schools and Communities Program; Federal Activities Grants Program for Fiscal Year 1989

Purpose: To award grants to State educational agencies, local educational agencies, institutions of higher education and other nonprofit agencies, organizations and institutions to support drug and alcohol abuse education and prevention activities.

Deadline for Transmittal of Applications: January 23, 1989.

Applications Available: December 23, 1988.

Available Funds: $3,000,000.

Estimated Range of Awards: $100,000-$200,000.

Estimated Average Size of Awards: $150,000.

Estimated Number of Awards: 20.

Project Period: 12-18 Months.

Applicable Regulations: (a) The final regulations governing the Drug-Free Schools and Communities Program—Federal Activities Grants Program, 34 CFR Parts 764 adn 766, published in the **Federal Register** on July 30, 1987 (52 FR 28526), and (b) the Education Department General Administrative Regulations, 34 CFR Parts, 74, 75, and 77.

Absolute Priority: In accordance with 34 CFR § 66.4(b) and 34 CFR 75.105(c)(3), the Secretary gives an absolute priority to projects that are designed for students in grades kindergarten through eight (K-8). The Secretary funds under this competition only applications that meet this absolute priority.

Invitational Priorities

The Secretary invites applications that address one or more of the following invitational priorities. However, under 34 CFR 75.105(c)(3), applications meeting these invitational priorities will not receive competitive or absolute preference over applications that do not meet one or more of these invitational priorities.

(1) Involve parent and school personnel in preventing drug and alcohol use by students though such activities as educating parents and school personnel about substance abuse and how it may be prevented, detected, and treated.

The Secretary is particularly interested in supporting projects that:

- Implement programs or workshops to educate parents about the impact of substance abuse on their children.
- Implement educational programs for students in grades K-8 that focus on preventing the use of "gateway drugs," i.e., tobacco and alcohol.

(2) Communicate to students the dangers of drug and alcohol use, including development of communication programs that effectively convey the dangers of drug and alcohol use to students.

The Secretary is particularly interested in supporting projects that:

- Integrate information on the harmful effects of alcohol and drugs throughout the regular curriculum in such subjects areas as health, science, physical education, and social studies.
- Disseminate information on the harmful effects of alcohol and drugs through such activities as student-generated theatrical presentations, literature, and other media as one part of a larger, comprehensive drug prevention program.

(3) Implement cooperative programs with local law-enforcement officials, judicial officials, community leaders, and government officials.

The Secretary is particularly interested in supporting projects that:

• Provide workshops involving law enforcement officials to educate parents, students and school personnel about such issues as improving discipline and security in the schools or on school premises as a means of preventing drug use.

Selection Criteria

The program regulations at § 766.20 authorize the Secretary to distribute an additional 15 points among the criteria described in the regulations at § 766.21 to bring the total to a maximum of 100 points. For the purpose of this competition, the Secretary will distributed the additional points as follows:

Evaluation Plan

(§ 766.21(d)) Five (5) additional points will be added for a possible total of 15 points for this criterion.

Contribution to Improving the Quality of Drug and Alcohol Abuse Education and Prevention Activities

(§ 766.21(f) Ten (10) additional points will be added for a possible total of 35 points for this criterion.

For Applications or Information Contact: The Drug-Free Schools and Communities Staff, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2135, Washington, DC, 20202–6151. Telephone: (202) 732–4599.

Program Authority: 20 U.S.C. 3212.

Dated: December 8, 1988.

Beryl Dorsett,

Assistant Secretary for Elementary and Secondary Education.

[FR Doc. 88–28890 Filed 12–14–88; 8:45 am]

BILLING CODE 4000–01–M

[CFDA NO: 84.184A]

Invitation; Applications for New Awards under the Drug-Free Schools and Communities Program—Training and Demonstration Grants to Institutions of Higher Education for Fiscal Year 1989

Purpose: To award grants to institutions of higher education for projects that provide preservice and inservice personnel training or curriculum demonstration in drug and alcohol abuse education and prevention for use in elementary and secondary schools.

Deadline For Transmittal of Applications: February 6, 1989.

Applications Available: December 23, 1988.

Available Funds: $13,900,000.

Estimated Range of Awards: $75,000—$250,000.

Estimated Average Size of Awards: $180,000.

Estimated Number of Awards: 77.

Project Period: 12- 24 months.

Applicable Regulations: (a) The final regulations governing the Drug-Free Schools and Communities Program—Training and Demonstration Grants to Institutions of Higher Education, 34 CFR Parts 764 and 765, published in the **Federal Register** July 30, 1987 (52 FR 28526), and (b) the Education Department General Administrative Regulations, 34 CFR Parts 74, 75 and 77.

Authorized Activities: In accordance with 45 CFR 75.3, the Secretary invites applications for projects that—

(a) Provide preservice training and instruction of teachers and other personnel in the field of drug abuse education and prevention in elementary and secondary schools;

(b) Provide inservice training and instruction of teachers and other personnel in the field of drug abuse education and prevention in elementary and secondary schools;

(c) Provide summer institutes and workshops to instruct teachers and other personnel in the field of drug abuse education and prevention in elementary and secondary schools;

(d) Carry out research and demonstration programs for teacher training and retraining in drug abuse education and prevention;

(e) Provide training for law enforcement officials, judicial officials, community leaders, parents, and government officials in drug abuse education and prevention; or

(f) Demonstrate model programs, coordinated with local elementary and secondary schools, for the development and implementation of quality drug abuse education curricula.

Absolute Priority: In accordance with 34 CFR 765.4 (d) and 34 CFR 75.105 (c) (3), for applications proposing to conduct activities (a) through (c), the Secretary will give absolute priority to applications that provide for coordinated and collaborative efforts with State educational agencies, local educational agencies, and the Regional Centers for Drug-Free Schools. The Secretary considers for funding applications proposing to conduct activities (a) through (c) only if they meet this absolute priority.

Selection Criteria: The program regulations at § 765.20 authorize the Secretary to distribute an additional 15 points among the criteria described in § 765.21 to bring the total to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Evaluation plan. (Section 765.21 (d)) Five (5) additional points will be added for a possible total of 15 points for this criterion; and

Contribution to improving the quality of drug and alcohol abuse education and prevention activities. (§ 754.21 (f)) Ten (10) additional points will be added for a possible total of 35 points for this criterion.

FOR APPLICATIONS OR INFORMATION CONTACT: The Drug-Free Schools and Communities Staff, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue S.W., Room 2135, Washington, DC 20202–6151. Telephone (202) 732–4599.

Program Authority: 20 U.S.C. 3211.

Dated: December 8, 1988.

Beryl Dorsett,

Assistant Secretary, for Elementary and Secondary Education.

[FR Doc. 88–2889 Filed 12–14–88; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Proposed Finding of No Significant Impact; SP–100 GES Test Site; Hanford Site, Richland, WA

Hanford Site, Richland, WA

AGENCY: Department of Energy.

ACTION: Proposed finding of no significant impact.

SUMMARY: The Department of Energy (DOE) has prepared an environmental assessment (EA) for the proposed ground testing of a prototype SP–100 space nuclear reactor in a modified reactor containment building, Building 309, at the Department of Energy Hanford Site, near Richland, Washington (DOE/EA–0318). The proposal is part of an overall program to develop nuclear reactor power system technology for use in space. Based on the analyses in the EA, the DOE believes that the proposed action to modify Building 309 and conduct ground tests of the prototype reactor therein is not a major Federal action significantly affecting the quality of the human environment, within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, and, as such, proposes to issue a finding of no significant impact (FONSI). The proposed FONSI and the supporting EA are being made available for public review for a period of 30 days following

the date of this notice. Following completion of the public review period, DOE will make its final determination on whether to issue a FONSI or to prepare an environmental impact statement (EIS) for the proposed SP–100 ground test.

Copies of the EA Are Available From: John R. Hunter, Director, Operations Division, U.S. Department of Energy, Richland Operations Office, P.O. Box 550, Richland, WA 99352, (509) 376–7471.

For Further Information About the Proposed Action Contact: Earl Wahlquist, Director, Office of Defense Energy Projects, U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20545, (301) 353–3321.

For Further Information About the NEPA Process Contact: Carol Borgstrom, Director, Office of NEPA Project Assistance, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, DC 20585, (202) 586–4600.

Description of the Proposed Action

The Department of Energy (DOE), the National Aeronautics and Space Administration (NASA), and the Department of Defense (DOD) have entered into an agreement to jointly develop nuclear reactor power system technology for use in space. The purpose of the overall SP–100 program is to develop safe, compact, light-weight, durable, space reactor power system technology that can provide electrical power in the range of 10s to 100s of kilowatts for a broad class of emerging military and civil space missions in the mid-1990s and beyond. DOE has primary responsibility for developing and ground testing the nuclear reactor power system within the Ground Engineering System (GES) element of the program.

DOE is planning a ground test of the nuclear reactor portions of the power system at the DOE Hanford Site near Richland, Washington. DOE is proposing to modify an existing 70 megawatt-thermal (MWt) reactor containment building (the decommissioned Plutonium Recycle Test Reactor containment building—Building 309) for the test. The total program duration consisting of facility engineering, construction, testing, and decommissioning is expected to be 9 years. The test facility (Building 309) will be designed for 2 years of reactor operation; however, it is anticipated that actual reactor operations will be less than 2 years.

The SP–100 nuclear reactor as designed is a low pressure 2.5 MWt fast reactor, fueled with uranium nitride as the heat source and cooled by liquid lithium. The nuclear reactor portions of the power system proposed for testing in Building 309 include the SP–100 nuclear reactor, instrumentation and controls, the primary heat transport loop, and radiation shield subsystems.

The reactor is designed to be used with thermoelectric cells as the technology for converting thermal energy to electrical power. The power system will be designed to ensure safety of the general public and mission personnel during normal operations and in the event of low probability launch vehicle accidents, flight malfunctions, and inadvertent reentry.

A ground test of the assembled nuclear reactor power subsystem described above will be conducted at Hanford to confirm the ability of the nuclear reactor power system to meet design requirements. The ground test will verify performance, lifetime, reliability, and safety parameters of the generic nuclear reactor power system design. The data acquired during ground testing will assist in improving safety and performance in the design of future flight systems.

Following the test the reactor and associated hardware will be disposed of as low-level waste at Hanford. If possible, the enriched fuel materials will be recycled; if recycling is not possible, the fuel materials will be handled as transuranic waste, with ultimate disposal at the Waste Isolation Pilot Plant. Test facility systems external to the reactor and associated hardware will be put in a safe condition pending future use or ultimate decommissioning. Alternatives for the post-operation decontamination and decommissioning are under consideration. Once an alternative is proposed, the appropriate environmental reviews will be conducted.

Alternatives

Consideration of alternatives to the proposed action (i.e., nuclear reactor ground test at Hanford) included evaluation of alternative power system concepts, sites other than Hanford, evaluation of other potential locations at Hanford, and evaluation of the no-action alternative (i.e., no ground test of the SP–100 reactor).

Four power system concepts were evaluated during Phase I of the SP–100 Program. Design characteristics identified as part of the SP–100 system selection process included surety, performance, growth (to accommodate varying mission power requirements), survivability, cost/schedule, user interface, and operations. Evaluation objectives of the surety characteristic included health, safety, and environmental factors.

Four of the seven competing design characteristics (surety, survivability, user interface, and operations criteria) were found to be essentially nondiscriminators among the four system concepts. All four concepts were found to exceed the surety requirements with substantial margin. Therefore, although safety and environmental considerations were thoroughly considered throughout the system concept selection process, the final selection was driven by the design characteristics relating to performance, growth and cost/schedule.

Five DOE laboratory sites were considered for ground testing of the prototype SP–100 reactor system. The site evaluation process considered facilities and equipment, ability to obtain approval to operate, personnel and organizational effectiveness, integration with other site and program activities, and management commitment. The approval-to-operate criterion addressed site-specific environmental considerations. The evaluation concluded that environmental considerations were not governing in the selection of the site. The evaluation narrowed the choice for the final selection to two sites, and the Hanford site was selected as the preferred test site based on programmatic considerations.

Building 309 was one of ten potential facilities considered at Hanford for the GES test. These facilities were examined for suitability based on operational, safety, safeguards, and environmental characteristics. Building 309 was identified as the best Hanford facility for this purpose based on the existing containment building, the ease with which the facility could be upgraded to meet current environmental and safety standards, and the overall ability to support program objectives.

The no-action alternative would not provide for ground testing of the SP–100 prototype flight reactor and associated systems. Onsite environmental effects would not exist, but the program would develop a flight system with inadequate ground-based verification of operational and safety functions.

Description of Impacts

The SP–100 ground reactor test (maximum rating of 2.5 megawatt-thermal, low pressure coolant system) will be located at the Hanford Site in the existing containment building, Building 309, that was designed and built as a high pressure containment for the now decommissioned pressurized water cooled, 70 megawatt-thermal, Plutonium Recycle Test Reactor (PRTR).

Reacter heat will be rejected by dump heat exchangers that will transfer heat from the secondary sodium coolant to air.

The 309 Building consists of the PRTR welded steel containment vessel, three below-grade process cells (A, B, and C), and the services and utilities building. The containment vessel is surrounded by a thick, cylindrical, shielding wall that is in common with each of three process cells. The SP–100 Ground Engineering System (GES) nuclear reactor assembly and vacuum vessel will be located in Cell A. Auxiliary systems will be in Cells A, B, and C, as well as outside containment, and in the basement of the attached service building. Existing Hanford 300 Area utilities are adequate or require only minor upgrades or extensions. The estimated peak work force is less than 100 people, which is less than 1 percent of current site employment (about 12,000) and local area employment (about 75,000). No significant construction impacts will occur.

The SP–100 GES Test Program, when operational, will routinely release small quantities of gaseous radioactive tritium (hydrogen-3) and argon-41. The projected annual airborne release of argon-41 is 3.7 Curies; the projected release of tritium is 0.047 Curies. The maximum whole body dose commitment to the nearest resident from these releases is projected to be 0.00045 mrem. The 50-year whole body dose commitment for the population within 83 km (50 mi) was projected to be 0.0027 person-rem. The maximum individual whole body dose commitment is significantly smaller than the regulatory (40 CFR 61.92) limit of 25 mrem/yr whole body dose commitment and the annual dose from background radiation of 100 mrem. The SP–100 GES Test Site is being designed with state-of-the-art technology, and the design objectives are such that no employee is expected to receive a dose greater than 1000 mrem/yr in normally occupied zones and during anticipated maintenance. Actual radiation exposures will be considerably less than 1000 mrem/yr as a result of the test site program to maintain radiation exposures as low as reasonably achievable (ALARA).

The SP–100 GES test activities will result in thermal discharges to the atmosphere. Reactor heat (up to 2.5 megawatts-thermal) will be dissipated to the atmosphere using forced-air dump heat exchangers. In addition, air conditioning will be provided to remove heat from support areas. The potential effects of thermal discharges were analyzed by comparing the quantities to those discharged by Fast Flux Test Facility (FFTF), also located at Hanford, in the 400 Area. The FFTF rejects 160 times as much reactor heat as that projected for SP–100 test facilities. No significant environmental consequences beyond the immediate FFTF area were projected for the thermal discharges of FFTF; operational experience has confirmed no adverse effect. Based on this comparison, minimal effect is expected even in the immediate vicinity of the SP–100 test area.

The test activities will generate hazardous, radioactive, and mixed waste. The estimated annual radioactive solid waste volume is less than 1000 cubic feet, which is 7 percent of the total presently generated in the Hanford 300 Area. Minimal radioactive liquid waste will be generated (less than 300 gallons per year); it will be solidified and disposed of as low-level solid radioactive waste (included in the amount discussed above). No liquid waste will be disposed of to the soil. Disposal of low-level radioactive and mixed solid waste will be accomplished by burial in the Hansford 200 Area Burial Ground. The amount of low-level radioactive and mixed solid waste projected amounts to less than 1 percent of the total volume presently handled by the Hanford 200 Area Burial Ground.

Hazardous material use will consist primarily of liquid alkali metals for cooling media and solid beryllium oxide as a reactor reflector. The containment building (Building 309) will be designed to contain liquid metals and to minimize the effects of liquid metal leakage. In addition, commonly used hazardous materials, such as ethylene glycol, may be selected as the cooling medium in air conditioning systems but no normal release mechanism resulting in environmental impact was identified for this substance.

The SP–100 GES Test Facility will be designed to preclude routine particulate material releases to the environment. Further, for accidents, particulate material in the form of liquid metal aerosols which might result from a sodium or lithium fire will be precluded. Design features will be incorporated to limit leakage of alkali metal and to prevent fire if a leak did occur, thereby precluding the generation and release of particulate material. Analyses show that no risk to the general public will result from particulate material.

Further, the analyses of accidental radionuclide releases, including extreme cases, show that the facility will meet the siting and safety criteria established by DOE. Three extremely low probability accidents (10^{-6} to 10^{-8} probability) were chosen as bounding events for assessing environmental impact. One of these accidents is a sodium leak and fire from the secondary coolant system. For this accident, the calculated offsite (public) maximum individual whole body dose is 0.021 rem and the calculated onsite (worker) individual maximum whole body dose is 0.19 rem. The corresponding whole body population calculated dose commitment is 0.53 person-rem. A second accident was accidental tritium release from the tritium removal system. For this accident, the calculated offsite maximum individual whole body dose is 0.22 rem, and the calculated onsite individual whole body dose is 2 rem. The corresponding whole body population calculated dose commitment is 5.6 person-rems. The third accident was an irradiated fuel handling accident following extended operation and cooldown. For this accident, the calculated offsite maximum individual whole body dose is 0.00048 rem and the calculated onsite individual whole body dose is 0.0042 rem. The corresponding calculated whole body population dose commitment is 0.17 person-rem.

In addition, a severe (beyond design basis) accident was considered to permit evaluation of the consequences of an extremely improbable event. The system failures that were assumed to reach severe accident consequences include failure of the primary reactor coolant boundary with substantial loss of coolant, failure of emergency core cooling, failure of the core to maintain structural integrity, relocation of the core to provide a high energy recriticality, failure of the vacuum vessel, and a concurrent nonmechanistic failure of containment by malfuction of the heating and ventilation containment isolation exhaust valve.

If this severe accident were to occur, for the Hanford Site boundary individual, the maximum whole-body dose would be 0.75 rem. This amounts to a single exposure dose for that individual of 7.5 times that of the annual background dose of 100 mrem. The corresponding whole body population calculated dose commitment is less than 6 person-rem. Onsite (worker) whole-body doses would not exceed 3.4 rem. Actual doses would be expected to be lower because of operator response and onsite personnel evacuation.

These results show that no significant radiological impacts on public health and safety or on the environment would result from the testing of the SP–100 nuclear reactor assembly at the Hanford site.

VOL 53 ISS 241 DE 15 1988 UMI

SP–100 Program

The SP–100 Program is laid out in three phases: (I) Technology assessment; (II) technology flight readiness; and (III) flight system production, qualification, and application.

Phase I, which ended in FY 1985, resulted in the selection of the uranium-nitride fueled, lithium-cooled reactor and thermoelectric power conversion concept for further development, and the selection of the proposed test site at Hanford.

Phase II was initiated in FY 1986 and consists of four functional SP–100 elements: (1) Ground Engineering System Development, (2) Advanced Aerospace Technology, (3) Civil Missions Analysis and Requirements Definition, and (4) Military Missions Analysis and Requirements Definition. Of these four functional elements, the first one is the subject of this EA and is the only element for which DOE has responsibility. This is managed within the DOE Office of Defense Energy Projects by the SP–100 GES Program Office.

Phase III may be initiated prior to the completion of Phase II activities, depending on mission decisions and funding levels. Initial planning for the first application of an SP–100 power system in space by other agencies may begin in 1989 for a proposed launch in 1996.

Potential mission applications for an SP–100 space reactor power system are many and diverse as a result of the flexibility and scalability in the system design. Missions that may employ the SP–100 power system include deep space probes, manned lunar and Mars bases, electrical propulsion for orbital transfer and interplanetary vehicles, space-based radar for surveillance, tracking and air/ocean traffic control, direct broadcasting, and global communications.

At this time, a specific mission has not been selected for the SP–100 nuclear reactor power system and flight system design and mission parameters are not available. However, it was appropriate to assess potential accident scenarios for reasonably foreseeable missions to provide insight into the possible environmental consequences of future space deployment of SP–100 reactors. Accordingly, DOE has performed a radiological risk assessment of these potential accident scenarios to ensure that the technology development efforts are directed towards reducing any potential impacts. When a specific mission is proposed by another Federal agency using the SP–100 nuclear reactor power system, potential environmental impacts of the specific mission will be evaluated further as part of the flight approval process by that Federal agency.

Three hypothetical mission scenarios representative of the range of missions for which the SP–100 is applicable were analyzed for potential accidents:

- Titan-launched high-orbit mission,
- Shuttle-launched nuclear electric propulsion (NEP) mission, and
- Shuttle-launched low-orbit mission.

The risk assessment was based on the analytical approach used for the safety analysis of past and current missions employing nuclear power sources.

Using assumed mission scenarios and the latest SP–100 design information, accident scenarios and associated probabilities were generated and potential radiological impacts were evaluated in terms of population doses. The results of the risk assessment for the three missions, expressed as statistically expected total population dose commitment, and the probabilities of population dose were 0.6 person-rem (probability 0.32), 0.5 person-rem (probability 0.01), and 3.0 person-rem (probability 0.0041) for the Titan launched high-orbit mission and the shuttle launched NEP and low-orbit missions, respectively. These doses represent the total dose that would be received by the total population that would potentially be exposed to radiation. The average individual would receive a dose that would be many thousands times smaller. Those individual doses, if detectable at all, would be much smaller than current regulatory standards for exposure of the general public to radiation.

Proposed Determination

Based on the information and analyses in the EA, the Department believes that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment, within the meaning of NEPA. Thus, DOE proposes to issue a finding of no significant impact and, therefore, not require the preparation of an environmental impact statement. DOE will make a final determination following the 30-day public review period.

Issued at Washington, DC, November 22, 1988.

Ernest C. Baynard, III,

Assistant Secretary, Environment, Safety and Health.

BILLING CODE 6450–01–M

Chicago Operations Office; Restricted Eligibility for Cooperative Agreement Award; Midwest Office of the Council of State Governments

AGENCY: Department of Energy.

ACTION: Notice of restricted eligibility for cooperative agreement award.

SUMMARY: The Department of Energy (DOE) Chicago Operations Office announces that pursuant to the DOE Financial Assistance Rules, 10 CFR 600.7(b)(2), it is restricting eligibility for award of a cooperative agreement to the Midwest Office of the Council of State governments (MOCSG) in order to (1) coordinate and convene a standing committee consisting of regional state members to address transportation issues; (2) maintain and update a regional nuclear waste transportation reference document; (3) initiate, coordinate, evaluate and present regional analyses of transportation issues as necessary; (4) provide the DOE analyses of transportation initiatives originating in its member states; (5) distribute DOE program information to their membership; and (6) facilitate special forums.

FOR FURTHER INFORMATION CONTACT: Steven C. Kouba, RTTD, U.S. Department of Energy, Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois 60439, (312) 972–2263.

SUPPLEMENTARY INFORMATION: Under the Nuclear Waste Policy Act (NWPA), the DOE is required to develop an integrated, publicly acceptable transportation network which will ensure the safe and efficient movement of civilian spent fuel and high-level waste between points of origin and destination. In order to accomplish this mandate, it is necessary that the DOE develop and maintain lasting institutional relationships with appropriate groups to provide technical analyses of and input into transportation issues as these issues are defined.

The MOCSG is an established, not-for-profit compact of state governments organized and convened to identify, address, and resolve economic, environmental, and transportation issues on a regional basis. The MOCSG cooperatively serves the states of North Dakota, South Dakota, Kansas, Minnesota, Iowa, Missouri, Wisconsin, Illinois, Michigan, Indiana, and Ohio. Due to the MOCSG's unique institutional relationships with member state governments and their demonstrated ability to identify and assist in resolving issues relating to the

1988
UMI

NWPA by convening these members on a regular basis, the MOCSG has distinguished itself as an organization that can effectively provide the regional leadership necessary to address transportation issues in a multi-state forum.

Eligibility for the cooperative agreement award is being restricted to MOCSG because of its unique institutional and representational capabilities. This cooperative agreement will cover an approximate five year period beginning January, 1989 and will provide MOCSG with approximately $950,000, if all renewal options are exercised.

Issued in Chicago, Illinois, on December 8, 1988.

Timothy S. Crawford,

Assistant Manager for Administration.

BILLING CODE 6450-01-M

Financial Assistance Award; Intent To Award Grant to the National Association of Regulatory Utility Commissioners (NARUC)

AGENCY: U.S. Department of Energy.

ACTION: Notice of Unsolicited Financial Assistance Award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it is making a financial assistance award based on an unsolicited application under Grant Number DE-FG01-89CE28301 to NARUC to update the current "NARUC Least-Cost Utility Planning Handbook" and expand on the knowledge base developed by the NARUC in least-cost utility planning under the previous DOE Grant with the NARUC which will further regulatory and technological transfer of Least-Cost Utility Planning (LCUP).

Scope: This Grant will aid in providing funding for LCUP as follows: (1) Research and preparation to update the current *NARUC LCUP Handbook* and study financial incentives to encourage utility participation; (2) to coordinate regional technical assistance workshops for regulators and staff; (3) to coordinate the Second National Conference fo Regulators; and (4) to research, catalog, abstract and input LCUP planning documents.

The purpose of this project will be to bring about expansion and further transfer of information and data among consumers and their representatives to assist in achieving dependable energy service at rates that are reasonable, as well as assuring utility services to the consumer at the least cost for future generating capacity.

Eligibility: Based on receipt of an unsolicited application to continue and expand the statement of work of their previous grant which expires December 31, 1988, eligibility of this award is being limited to NARUC, a non-profit quasi-governmental organization whose mission is to serve the consumer interest by seeking to improve the quality and effectiveness of public regulation in America. NARUC's membership consists of governmental bodies from the fifty States, District of Columbia, Puerto Rico and the Virgin Islands, engaged in the regulation of energy utilities. NARUC has the exclusive domestic capability to perform this activity successfully based upon previous performance, technical expertise and the unique nature of the organization. There is no known other regulatory entity which is conducting or planning to conduct such activities.

The term of this grant shall be two years from the effective date of award. The estimated cost of this grant is $135,000.

BILLING CODE 6450-01-M

Financial Assistance Award; Intent To Award Grant to the University of North Dakota

AGENCY: U.S. Department of Energy.

ACTION: Acceptance of an unsolicited application for Grant Award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.14, it intends to award based on an unsolicited action submitted by the University of North Dakota. The application is entitled "Performance Evaluation of a Novel Erosion-Resistant Pump Design".

Scope: The intended grant award is to assist the University of North Dakota Energy and Mineral Research Center, Grand Forks, North Dakota in conducting research for the "Performance Evaluation of a Novel Erosion-Resistant Pump Design".

The objective of the research proposed here is to compare the erosion rate of the Burly pump impeller with that of the most nearly similar pump of conventional design under controlled experimental conditions. The results, if positive, will substantiate the manufacturer's claims regarding the pump's durability and provide a quantitative prediction of the longer useful impeller life offered by this pump. A secondary objective is to observe, analyze, and simulate the internal hydrodynamics of this pump design to provide greater understanding of how its presumed advantages are attained. It is also possible that a study of this thoroughness may suggest further design improvements.

The project is anticipated to be of eleven months duration. The total estimated amount of the proposed cost is $39,944.00.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Pittsburgh Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921-165, Pittsburgh, PA 15236, *Attn:* Dona G. Sheehan, *Telephone:* AC 412/892-5918.

BILLING CODE 6450-01-M

Office of Fossil Energy, Coordinating Subcommittee on Petroleum Storage and Transportation Committee on Petroleum Storage and Transportation National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

Name: Coordinating Subcommittee on Petroleum Storage and Transportation of the Committee on Petroleum Storage and Transportation of the National Petroleum Council.

Date and Time: Monday, January 12, 1989, 1:00 p.m. Tuesday, January 13, 1989, 8:00 a.m.

Place: The Breakers, Flager Board Room, One South County Road, Palm Beach, Florida.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE-1), Washington, DC 20585, Telephone: 202/586-4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Review Committee's request for further work on the draft volumes.

Tentative Agenda

—Opening remarks by the Chairman and Government Cochairman.
—Review the draft of the System Dynamics Volume of the report.

—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Subcommittee on Petroleum Storage and Transportation is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisons will be made to include the presentation on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

J. Allen Wampler,

Assistant Secretary Fossil Energy.

BILLING CODE 6450–01–M

Economic Regulatory Administration

[ERA Docket No. 88–72–NG]

B.C. Gas Inc., Application To Import Natural Gas From Canada and Export Natural Gas to Canada and Request for an Interim Emergency Export Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application to import natural gas from and export natural gas to Canada and emergency order granting interim authority to export natural gas to Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on November 30, 1988, of an application filed by B.C. Gas Inc. (B.C. Gas) requesting authority beginning the date of first delivery until April 30, 1996, to import up to 2,164,122 Mcf of natural gas a year from Canada for injection into seasonal storage and authority to export this gas back to Canada after withdrawal from storage. Under the application, the gas would be imported from Westcoast Transmission Company Limited (Westcoast) at Sumas, Washington, and transported from the international border to Northwest Pipeline Corporation (Northwest) to Washington Water Power Company's (Water Power) storage facilities at Jackson Prairie, Washington. According to B.C. Gas' application, the gas would be imported for storage at Water Power's facilities during the non-heating season and exported back into Canada during the winter heating season for sale to B.C. Gas' customers. B.C. Gas states that none of the gas imported for storage would be sold in the U.S. B.C. Gas proposes to use existing facilities for the import/export of the gas if granted authority by the ERA.

Further, B.C. Gas requests that the ERA grant emergency interim authorization to export its existing stored gas to meet the peak requirements of B.C. Hydro's firm sales customers in Canada during the current winter heating months, until a final determination is made on its application. According to the application, the emergency authorization is necessary because Northwest has notified B.C. Gas that Northwest cannot return storage gas under the redelivery agreement between Northwest and Westcoast.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, notices of intervention and written comments are invited.

By this notice, the ERA is establishing a 30-day comment period to provide all interested persons the opportunity to submit comments in response to B.C. Gas' long-term import/export arrangement. The ERA also gives notice at this time of its decision to issue on December 12, 1988, an emergency order granting B.C. Gas an export authorization of limited duration on which comments may be filed within the same 30-day public comment period.

DATE: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed no later than January 17, 1989.

FOR FURTHER INFORMATION CONTACT:

Thomas Dukes, Natural Gas Division, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room 3F–070, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9590.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: B.C. Gas, a Canadian corporation located in Burnaby, British Columbia, is a local gas distribution company engaged in the transmission, storage and distribution of gas within the Province of British Columbia. Currently, B.C. Gas stores up to 2,164,122 Mcf of gas annually on behalf of its provincial customer, B.C. Hydro, at Water Power's facilities in Jackson Prairie, Washington. Pursuant to existing contracts between Northwest and Water Power, Westcoast and B.C. Gas, B.C. Gas and Water Power, Westcoast and B.C. Hydro, and Westcoast and Northwest, Westcoast transports the gas to the Northwest interconnection near Sumas, Washington. Under the terms of the arrangement, Northwest would then transport the gas to Water Power for B.C. Hydro's account. The gas is injected at Water Power's storage facility during the period of May to September; during the October to April months up to 60,115 Mcf per day may be drawn off for redelivery by Northwest to Westcoast for B.C. Hydro's peak winter heating needs. Based on Northwest's and Westcoast's deferred exchange agreement, Northwest would be able to withdraw B.C. Hydro's gas from storage for its own system supply use, but would have to redeliver such volumes to Westcoast. Further, for any B.C. Hydro gas taken by Northwest for system supply use, Westcoast would retain equivalent volumes for B.C. Hydro's account from any gas volumes Northwest purchases from Westcoast.

According to B.C. Gas' application, the net effect of the proposed import and export will be no different from the previously authorized arrangements. No Canadian gas is proposed to be sold into United States markets or visa versa. B.C. Gas only wishes to continue using storage facilities in the United States to store gas which it purchases in Canada during off-peak periods for subsequent sale and use in Canada during peak periods. Lastly, since the volumes are imported for storage and not sold in the U.S. market, the ERA will not consider the competitiveness of the arrangement in making either an emergency or long-term evaluation of B.C. Gas' authorization request.

B.C. Gas has contractual rights to use the Jackson Prairie storage site until April 30, 1986. However, on September 30, 1988, Northwest notified Westcoast that it was invoking "force majeure" under their service agreement. Northwest seeks to terminate its deferred exchange agreement with Westcoast and its obligation to transport gas withdrawn from storage to

the international border. In view of the above considerations, the Administrator has determined that granting an emergency order to B.C. Gas is not inconsistent with the public interest. Therefore, while the ERA determines whether to approve B.C. Gas' long-term import/export authorization request, the ERA will grant the applicant interim emergency authority, to April 30, 1989, to export to B.C. Hydro gas already held in storage for the 1988–89 winter heating season. While noting that the ERA does not ordinarily act on a request for authorization until after the expiration of the **Federal Register** notice and public comment period, the Adminstrator emphasizes the need to allow B.C. Gas to serve its provincial customers' peak requirements during the ongoing heating season with the gas in storage with Water Power and the short-term nature of the authorization and the protection offered by this notice which invites public participation. This order may be superseded pending issuance of a final decision on the application.

NEPA Compliance

On August 9, 1988, the DOE published in the **Federal Register** (53 FR 29934) a notice of proposed amendments to its guidelines for compliance with the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*, effective on an intrim basis upon publication. In that notice, the DOE proposed to amend the agency's NEPA guidelines to add to its list of categorical exclusions the approval or disapproval of an import/export authorization for natural gas in cases not involving new construction. Application of the categorical exclusion in any particular case raises a rebuttable presumption that the ERA's action is not a major Federal action under NEPA. Unless the ERA receives comments indicating the presumption does not or should not appy in this case, no further NEPA review will be conducted by the DOE.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room 3F–056, RG–23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9478. They must be filed no later than 4:30 p.m., EST, January 17, 1989.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to the decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of B.C. Gas' application is available for inspection and copying in the Natural Gas Division Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., EST, Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 12, 1988.

Constance L. Buckley,

Acting Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 88–28895 Filed 12–14–88; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

Application Filed With the Commission

November 8, 1988.

Take notice that the following hydroelectric application has been filed with the Federal Energy Reulatory Commission and is available for public inspection:

a. *Type of Application*: Preliminary Permit.

b. *Project No.*: 10631–000.

c. *Date Filed*: July 27, 1988.

d. *Applicant*: James River Hydro Project.

e. *Name of Project*: Twelfth Street Hydro Project.

f. *Location*: On the James River in the City of Richmond, Virginia.

g. *Filed Pursuant to*: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact*: David M. Coombe, Synergics, Inc., 410 Severn Avenue, Suite 313, Annapolis, MD 21403 (301) 268–8820.

i. *FERC Contract*: Mary Nowak, (202) 376–9634.

j. *Comment Date*: January 12, 1989.

k. *Description of Project*: The proposed project would consist of (1) an existing 1,760-foot-long diversion dam owned by the City of Richmond and Virginia Power Company; (2) a 92-acre reservoir having a negligible storage capacity; (3) an existing canal approximately 2,240 feet long, 12 feet deep, and 48 feet wide; (4) an existing concrete powerhouse containing six 1,960-kw horizontal tubular-type turbines for a total installed capacity of 11.5 MW; (5) a 120-foot-wide, 75-foot-wide, 15-foot-deep tailrace; (6) a proposed transmission line either 13.2 kV or 34.5kV; and (7) appurtenant facilities. The project would have an average annual generation of approximately 57 GWh. The applicant estimates that the studies under permit would be about $150,000.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

A5. Preliminary Permit

Any qualified applicant desiring to file a competing application for a preliminary permit for a proposed

project must submit to the Commission, on or before the specified comment date for the particular application, the competing application or a notice of intent to file such an application (see 18 CFR 4.36 (1985)). Submitting a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A7. Preliminary Permit

Any qualified applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either the competing development application or a notice of intent to file such an application. Submitting a timely notice of intent allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b) (1) and (9) and 4.36.

A9. Notice of Intent

A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies Under Permit

A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene

Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents

Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 204–RB, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

D2. Agency Comments

The Commission invites Federal, state, and local agencies to file comments on the described application. (Agencies may obtain a copy of the application directly from the applicant.) If an agency does not file comments within the time specified for filing comments, the Commission will presume that the agency has none. One copy of an agency's comments must also be sent to the applicant's representatives.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28875 Filed 12–14–88; 8:45 am]

BILLING CODE 6717–01–M

Application Filed With the Commission

November 8, 1988.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection:

a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10667–000.

c. *Date Filed:* September 27, 1988.

d. *Applicant:* Youghiogheny Hydroelectric Authority.

e. *Name of Project:* Tionesta Dam Hydro Project.

f. *Location:* On the Tionesta Creek, in Forest County, Pennsylvania.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a) 825(r).

h. *Applicant Contact:* Mr. Robert D. Rizzo, D/R Hydro Company, 10 Duff Road, Suite 300, Pittsburgh, PA 15235, (412) 242–7900.

i. *FERC Contact:* Mary Nowak, (202) 376–9634.

j. *Comment Date:* January 12, 1989.

k. *Competing Application:* Project No. 10626. *Date Filed:* July 15, 1988.

l. *Description of Project:* The proposed project would utilize the existing U.S. Corps of Engineers' Tionesta dam and would consist of: (a) A proposed penstock approximately 250 feet long and 18 feet in diameter connected to an existing intake structure located about 1,000 feet from the dam; (b) a proposed powerhouse containing one new turbine generator having a total installed capacity of 6 megawatts; (c) a 100-foot-long by 50-foot-wide tailrace; (d) a proposed transmission line approximately 200 feet long; and (e) appurtenant facilites. The proposed project would have an average annual generation of approximately 20,000,000 kilowatthours. The applicant estimates that the studies under permit would be about $150,000.

m. This notice also consists of the following standard paragraphs: A8, A10, B, C, and D2.

Standard Paragraphs

A8. Preliminary Permit

Public notice of the filing of the initial preliminary permit application, which has already been given, established the due date for filing competing preliminary permit and development applications or notices of intent. Any competing preliminary permit or development application, or notice of intent to file a competing application, must be filed in response to and in compliance with the public notice of the initial preliminary permit application. No competing applications or notices of intent may be filed in response to this notice.

A competing license application must conform with 18 CFR 4.30(b) (10 and 9) and 4.36.

VOL 53 ISS 241 DEC 15 1988 UMI

A10. Proposed Scope of Studies Under Permit

A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene

Anyone may submit comments, a protest, or a motio to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents

Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 204–RB, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

D2. Agency Comments

The Commission invites Federal, state, or local agencies to file comments on the described application. (Agencies may obtain a copy of the application directly from the applicant.) If an agency does not file comments within the time specified for filing comments, the Commission will presume that the agency has none. One copy of an agency's comments must also be sent to the applicant's representatives.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28876 Filed 12–14–88; 8:45 am]

BILLING CODE 6717–01–M

Application Filed With the Commission

November 9, 1988.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection:

a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 10669–000.

c. *Date Filed:* October 3, 1988.

d. *Applicant:* New York Irrigation District, Boise-Kuna Irrigation District, Wilder Irrigation District, Big Bend Irrigation District, Nampa and Meridian Irrigation District.

e. Name of Project: Twin Springs Irrigation Reservoir and Hydroelectric Project.

f. *Location:* At River Mile 94.3 on the Boise River partially within the Boise National Forest near Idaho City in Elmore County, Idaho.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a) through 825(r).

h. *Applicant Contact:* Mr. Carl Padour, 214 Broadway Avenue, Boise, ID 83702, (208) 344–1141.

i. *FERC Contract:* Ms. Julie Bernt, (202) 376–1936.

j. *Comment Date:* January 16, 1989.

k. *Description of Project:* The proposed project would consist of: (1) A 470-foot-high rockfill dam at elevation 3,860 MSL; (2) a reservoir which at maximum pool elevation of 3,850 feet would have a gross storage of 600,000 acre-feet and a surface area of 4,300 acres and at minimum pool elevation of 3,650 feet would have a gross storage of 110,000 acre-feet and a surface area of 1,100 acres; (3) a concrete-ogee-shaped 1,200-foot-long spillway; (4) a powerhouse containing four generating units two each having a rated capacity of 17,250 kW and two each having a rated capacity of 34,500 kW; and (5) a 36-mile-long transmission line. Applicant estimates the average annual energy production to be 317,000 MWh and the cost of the proposed studies to be $2,000,000.

l. *Purpose of Project:* The power produced would be sold to a local power company.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C and D2.

Standard Paragraphs

A5. Preliminary Permit

Any qualified applicant desiring to file a competing application for a preliminary permit for a proposed project must submit to the Commission, on or before the specified comment date for the particular application, the competing application or a notice of intent to file such an application (see 18 CFR 4.36 (1985)). Submitting a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30 (b)(1) and (9) and 4.36.

A7. Preliminary Permit

Any qualified applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either the competing development application or a notice of intent to file such an application. Submitting a timely notice of intent allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30 (b)(1) and (9) and 4.36.

A9. Notice of Intent

A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent of submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies Under Permit

A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a

study of environmental impacts. Based on the results of these studies, the applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene

Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents

Any filings must bear in all capital letters the title "Comments," "Recommendations for Terms and Conditions," "Notice of Intent To File Competing Application," "Competing Applications," "Protest" or "Motion To Intervene," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 204–RB, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

D2. Agency Comments

The Commission invites Federal, state, and local agencies to file comments on the described application. (Agencies may obtain a copy of the application directly from the applicant.) If an agency does not file comments within the time specified for filing comments, the Commission will presume that the agency has none. One copy of an agency's comments must also be sent to the applicant's representatives.

Lois D. Cashell,

Secretary.

[FR Doc. 88–28877 Filed 12–14–88; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP89–332–000 et al.]

Tennessee Gas Pipeline Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Tennessee Gas Pipeline Company

[Docket No. CP89–332–000]

December 8, 1988.

Take notice that on December 5, 1988, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89–332–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for ANR Gathering Company (ANR Gathering), a marketer, under the blanket certificate issued in Docket No. CP87–115–000 on June 18, 1987, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee states that pursuant to a transportation agreement dated September 22, 1988, under its Rate Schedule IT, it proposes to transport up to 50,000 dekatherms (dt) per day equivalent of natural gas for ANR Gathering from points of receipt listed in Exhibit "A" of the agreement to delivery points also listed in Exhibit "A". Tennessee states that it would receive the gas at existing points on its system located in Potter County, Pennsylvania, and that it would transport and redeliver the gas at interconnections with Pennsylvania Gas & Water Company at Uniondale and Auburn in Susquehanna, Pennsylvania.

Tennessee advises that service under § 284.233(a) commenced October 1, 1988, as reported in Docket No. ST89–368 (filed October 27, 1988). Tennessee further advises that it would transport 50,000 dt on an average day and 18,250,000 dt annually.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. Natural Gas Pipeline Company of America

[Docket No. CP89–296–000]

December 8, 1988.

Take notice that on November 28, 1988, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP89–296–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas for Texaco Producing Inc. (Texaco), a producer of natural gas, under Natural's blanket certificate issued in Docket No. CP86–582–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Natural proposes to transport up to 100 billion Btu of natural gas per day, plus overrun volumes, on an interruptible basis for Texaco. It is indicated that the receipt points would be in Oklahoma, Texas, New Mexico, Louisiana and offshore Louisiana, and that the delivery points would be in Oklahoma, Louisiana, New Mexico, Iowa, Kansas, and Illinois.

Natural states that this transportation commenced October 1, 1988, pursuant to § 284.223(a)(1) of the Commission's Regulations as reported in Docket No. ST89–937.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. Texas Gas Transmission Corporation

[Docket No. CP89–336–000]

December 8, 1988.

Take notice that on December 5, 1988, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP89–336–000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Conoco Inc. (Conoco), under Texas Gas' blanket certificate issued in Docket No. CP88–686–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Gas proposes to transport on an interruptible basis up to 15,000 MMBtu equivalent of natural gas on a peak day for Conoco, 15,000 MMBtu equivalent on an average day and 5,475,000 MMBtu equivalent on an annual basis. It is stated that the transportation service would be effected using existing facilities and would not

VOL
53
ISS
241
DE
15
1988
UMI

require any construction of additional facilities. It is explained that the service commenced October 14, 1988, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89–689.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

4. Mississippi Valley Gas Company, Complainant, vs. Gulf Fuels, Inc. and ANR Pipeline Company, Respondents

[Docket No. CP89–252–000]

December 8, 1988.

Take notice that on November 21, 1988, Mississippi Valley Gas Company (Complainant), 711 West Capitol Street, Jackson, Mississippi 39203–2608, filed a complaint in Docket No. CP89–252–000 pursuant to § 385.206 of the Commission's Rules of Practice and Procedure (18 CFR 385.206) against Gulf Fuels, Inc. and ANR Pipeline Company (Respondents) to prohibit them from engaging in Natural Gas Policy Act (NGPA) section 311 transportation. Complainant states that, because Gulf Fuels, a local gas broker, misrepresented to ANR that it is an intrastate pipeline within the meaning of section 2(16) of the NGPA, the contract underlying ANR's purported NGPA section 311 transportation on behalf of Gulf Fuels should be declared void as a matter of law and no NGAP section 311 transportation service lawfully may be provided under that contract, all as more fully set forth in the complaint which is on file with the Commission and open to public inspection.

Complainant states that on August 30, 1988, Baxter Healthcare Corporation (Baxter), an MVG industrial customer which manufactures hospital and pharmaceutical equipment at a plant in Cleveland, Bolivar County, Mississippi, informed MVG that beginning October 1, 1988, it would meet its gas supply requirements from its own gas supply line. According to Complainant, following a September 8, 1988, inquiry by the Mississippi Public Service Commission (MPSC), the MPSC discovered that Baxter's gas supply requirements were being met by means of an NGPA transportation service rendered by ANR on behalf of Gulf Fuels pursuant to a March 21, 1988, transportation agreement. Complainant indicates that the March 21, 1988, contract contains a representation and warranty by Gulf Fuels that it is an intrastate pipeline company within the meaning of the NGPA.

Complainant asserts that Gulf Fuels does not appear to be an intrastate pipeline as defined in the NGPA, and as represented by Respondents. Complainant notes that affidavits of various officials of the MPSC indicate that Gulf Fuels (1) does not hold any certificate from the MPSC as an intrastate pipeline, (2) has no pending application for certification before the MPSC, and (3) has never been regulated or certificated in any manner by the MPSC. Complainant explains that on November 17, 1988, it filed a petition for a declaratory order (Docket No. U–5269) at the MPSC seeking an order determining the jurisdictional status of Gulf Fuels. In its petition Complainant states that it expects to show that if Gulf Fuels is an intrastate pipeline operating in Mississippi, that it is in violation of Mississippi law or in the alternative, if Gulf Fuels is not an intrastate pipeline, then it is obtaining interstate gas transmission service under the NGPA by means of a misrepresentation of fact.

Complainant asserts that Gulf Fuels is simply a local gas broker in Jackson, Mississippi and lacks the indicia of an intrastate pipeline performing transportation service in Mississippi to qualify it as an intrastate pipeline under the NGPA. Accordingly, Complainant seeks Commission action to rule that the agreement between ANR and Gulf Fuels dated March 21, 1988, is void at law, since no NGPA intrastate pipeline is involved in the transaction and therefore no NGPA section 311 transportation service may be accomplished pursuant to that contract.

Comment date: January 9, 1989, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

5. United Gas Pipe Line Company

[Docket No. CP89–340–000]

December 9, 1988.

Take notice that on December 5, 1988, United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89–340–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport natural gas on a firm basis for Arkla Energy Marketing Company (AEM). United explains that the service commenced November 1, 1988, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–855. United explains that the peak day quantity would be 103,000 MMBtu, the average daily quantity would be 103,000 MMBtu, and that the annual quantity would be 37,595,000 MMBtu. United explains that it would receive natural gas for AEM's account at existing interconnections in the states of Texas and Louisiana, and Offshore Louisiana. United States that it would redeliver the gas for AEM's account at existing or proposed interconnections in the state of Louisiana.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Tennessee Gas Pipeline Company

[Docket No. CP89–327–000]

December 9, 1988.

Take notice that on December 2, 1988, Tennessee Gas Pipeline Company (Applicant), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89–327–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide a transportation service for Cornerstone Production Corporation, a marketer, under Applicant's blanket certificate issued in Docket No. CP87–115–000 on June 18, 1987, pursuant to section 7(c) of the Natural Gas Act, all as more fully set out in the request on file with the Commission and open to public inspection.

Applicant states that pursuant to a transportation agreement dated October 31, 1988, as amended November 3, 1988, it proposes to transport natural gas for Cornerstone Production Corporation from points of receipt located in offshore Louisiana, offshore Texas, and in the states of Louisiana, Texas, Mississippi, New Jersey, Massachusetts, Pennsylvania, West Virginia, New York, and Ohio. Applicant states that the points of delivery are located in the states of Massachusetts, Mississippi, Tennessee, West Virginia, Connecticut, Pennsylvania, and Alabama. It is stated that the ultimate points of delivery are located on the states of Tennessee, Connecticut, Massachusetts, and Alabama. It is stated further that no new facilities will be constructed to provide the transportation service.

The applicant states that the maximum daily quantity transported is 50,000 dekatherm (dt) equivalent of natural gas, an average day is 50,000 dt equivalent of natural gas, and the anual quantity is 18,250,000 dt equivalent of natural gas. It is further stated that service under § 284.223(a) commenced

November 5, 1988, as reported in Docket No. ST89–870 (filed November 23, 1988).

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Panhandle Eastern Pipe Line Company

[Docket No. CP89–299–000]

December 9, 1988.

Take notice that on November 29, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP89–299–000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to partially abandon sales service to Ohio Valley Gas Company (Ohio Valley), an existing jurisdictional sales customer under Panhandle's Rate Schedule G–1, all as more fully set forth in the application on file with the Commission and open to public inspection.

Panhandle states that the proposed abandoment would reduce the total annual quantity of gas delivered to Ohio Valley from 3,294,600 Mcf to 2,127,300 Mcf. Panhandle states that the term of its existing agreement with Ohio Valley expired October 31, 1988 and accordingly, Panhandle requests that authority for the partial abandonment to be effective November 1, 1988 for a term through October 31, 1990.

Panhandle states that the partial abandonment of sales service reflects the result of contract renegotiation between Panhandle and Ohio Valley that will allow Ohio Valley to realign its sales service contract demand to match its actual requirements.

Comment date: December 30, 1988, in accordance with Standard Paragraph F at the end of this notice.

8. Williams Natural Gas Company

[Docket No. CP89–330–000]

December 9, 1988.

Take notice that on December 2, 1988, Williams Natural Gas Company (Williams) P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89–330–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CER 157.205) for authorization to abandon by reclaiming regulating, measuring and appurtenant facilities serving the Cloyce R. Sturdy Grain Company (Sturdy) in Osage County, Kansas, and the transportation of gas through said facilities, under its blanket authorization issued in Docket No. CP82–479–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is stated that Williams seeks authorization to abandon by reclaiming regulating, measuring and appurtenant facilities located in the Southeast (SE/4) of Section 1, Township 17 South, Range 15 East, Osage County, Kansas, installed to serve Sturdy's grain company and certificated in Docket No. CP70–166, 43 FPC 538 (1970).

It is alleged that by letter dated July 12, 1988, Sturdy has requested that Williams reclaim its facilities. It is averred that the total cost to reclaim these facilities is approximately $150 with an estimated salvage value of $0.00.

It is asserted that this proposal would not significantly affect a sensitive environmental area since the facilities to be reclaimed are all above ground.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. United Gas Pipe Line Company

[Docket No. CP89–339–000]

December 9, 1988.

Take notice that on December 5, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP89–339–000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act, for authorization to provide a transportation service for Chevron U.S.A., a producer, under United's blanket certificate issued in Docket No. CP88–6–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United states that pursuant to a transportation agreement dated October 1, 1988, it proposes to transport up to 77,250 Mcf of natural gas per day on an interruptible basis. United proposes to transport the gas from an existing interconnection between United and Sea Robin Pipeline Company near Erath, Vermilion Parish, Louisiana to any of nine specific redelivery points located in St. Landry, Ouachita, Rapides, and LaSalle Parishes, Louisiana.

United states that no new facilities would be required to implement the service. United further states that the maximum day, average day, annual volumes would be approximately 77,250 Mcf, 77,250 Mcf, and 28,196,250 Mcf, respectively. United indicates that it would charge the rates and abide by the terms and conditions provided by its Rate Schedule ITS.

United advises that service under § 284.223(a) of the Commission's Regulations commenced on November 4, 1988, as reported in Docket No. ST89–788.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

10. Northern Natural Gas Company, Division of Enron Corp.

[Docket No. CP89–343–000]

December 9, 1988.

Take notice that on December 6, 1988, Northern Natural Gas Company, Division of Enron Corp., (Northern), 1400 Smith Street, P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP89–343–000, a request for authorization pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act and Northern's blanket certificate issued in Docket No. CP86–435–000 pursuant to section 7 of the Natural Gas Act, for authorization to transport natural gas on behalf of Phillips Natural Gas Company (Phillips), a producer of natural gas, on an interruptible basis, all as more fully set forth in the application on file with the Commission and open to public inspection.

Northern states that it would transport natural gas for Phillips, through existing facilities, as follows:

100,000 MMBtu on a peak day
75,000 MMBtu on an average day
36,500,000 MMBtu on an annual basis

It is further stated that the requisite filings, under the 120 day automatic authorization provisions of § 284.223(a), have been made in Docket No. ST89–442.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

11. Tennessee Gas Pipeline Company

[Docket No. CP89–338–000]

December 9, 1988.

Take notice that on December 5, 1988, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252 filed in Docket No. CP89–338–000 a request pursuant to § 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP89–115–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee proposes to transport natural gas on an interruptible basis for Entrade Corporation (Entrade).

Tennessee explains that service commenced October 28, 1988 under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89–892370. Tennessee further explains that the peak day quantity would be 150,000 dekatherms, the average daily quantity would be 150,000 dekatherms, and that the annual quantity would be 54,750,000 dekatherms. Tennessee explains that it would receive natural gas for the account of Entrade at points of receipt located Offshore Louisiana and in the states of Louisiana, Alabama, Mississippi and Texas. Tennessee states that the points of delivery and the ultimate points of delivery are located in the states of Mississippi, Alabama, and Tennessee.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Williams Natural Gas Company

[Docket No. CP89–329–000]

December 9, 1988.

Take notice that on December 2, 1988, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP89–329–000, a request for permission and approval to abandon certain pipeline delivery facilities, pursuant to §§ 157.205 and 157.216(b) of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216(b)), under Williams blanket certificate issued in Docket No. CP82–479–000 on September 30, 1982, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

By its request, Williams proposes to abandon by dismantling and reclaiming certain regulating, measuring and related facilities (delivery point) used for the purpose of selling gas to the following customers:

(1) Delivery point located in section 31, Township 3 North, Range 16 East, Texas County, Oklahoma, installed to serve TELNS Broadcasting Company (TELNS).

(2) Delivery point located in section 16, Township 29 South, Range 4 East, Butler County, Kansas, installed to serve Douglas Alfalfa Plant (Douglas).

(3) Delivery point located in section 2, Township 30 South, Range 40 West, Stanton County, Kansas, installed to serve Barber Farms, Inc. (Barber).

(4) Delivery point located in section 11, Township 19 South, Range 10 West, Rice County, Kansas, installed to serve Prospect Oil and Gas Company (Prospect).

TELNS, Barber and Prospect have each requested that Williams reclaim its facilities, it is stated. Williams also states that it has been unsuccessful in its efforts to contact Douglas, as the alfalfa plant is dismantled.

It is indicated, that the total cost to reclaim the subject facilities will be $1,340, with an estimated salvage value of $175.

Comment date: January 23, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. Panhandle Eastern Pipe Line Company

[Docket No. CP89–281–000]

December 9, 1988.

Take notice that on November 23, 1988, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas, 77001, filed in Docket No. CP89–281–000, a request pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon part of a sales service to Indiana Gas Company, Inc. (Indiana Gas), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Panhandle states that pursuant to section 284 of the Commission's Regulations, Panhandle and Indiana Gas have entered into a sales agreement which provides for a 15% reduction of Indiana Gas' contract demand (CD) level under Rate Schedule G–1, which was converted to firm transportation service effective November 1, 1988.

Specifically, Panhandle would abandon part of Indiana Gas' daily sales contract quantity, which would reduce the annualized CD total from 91,391,850 Mcf to 77,683,058 Mcf.

Panhandle explains that the firm transportation service would be provided for in accordance with the terms and conditions of Panhandle's Rate Schedule PT-Firm.

Pursuant to 18 CFR 284.10(d)(2) the exercise of the customer's option to convert constitutes consent to the proposed abandonment.

Comment date: December 30, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Project No. 10531–001, Washington, Oregon, Idaho]

Asotin Hydro Co., Inc.; Surrender of Preliminary Permit

December 12, 1988.

Take notice that Asotin Hydro Company, Inc., Permittee for the Upper

Asotin Hydropower Project No. 10531, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 10531 was issued May 16, 1988, and would have expired April 30, 1991. The project would have been located on the Snake River near Asotin, Washington, in Asotin County, Washington, Nez Perce County, Idaho, and Wallowa County, Oregon.

The Permittee filed the request on November 25, 1988, and the preliminary permit for Project No. 10531 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR § 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Lois D. Cashell,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–3492–51]

Contractor Indemnification Review Panel

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: The Contractor Indemnification Review Panel will meet at the EPA Headquarters Building, 401 M Street SW., Washington, DC, on December 16, 1988. The meeting will be held in Room SE363 from 9 a.m. to 12 noon. The Contractor Indemnification Review Panel was formed by the EPA to provide the Agency with outside expertise on pollution liability insurance issues. Panel membership is open to all interested persons. The Agency will use the Panel's input when it develops contractor indemnification guidance and regulations under CERCLA section 119. December 16 will be the final opportunity for Panel members to provide input to the Agency prior to the Agency's development of guidance on contractor indemnification.

FOR FURTHER INFORMATION CONTACT: Tom Gillis of the Environmental Protection Agency, Office of Waste Programs Enforcement (OS–510), Washington, DC 20460; telephone 202/382–4524.

Lloyd S. Guerci,

Director, CERCLA Enforcement Division.

BILLING CODE 6560–50–M

FEDERAL CROP INSURANCE CORPORATION

[Doc. No. 6435S]

Selection of the Federal Crop Insurance Commission

On Wednesday, November 2, 1988, the Federal Crop Insurance Corporation (FCIC) published a Notice in the **Federal Register** at 53 FR 44214, soliciting nominations for membership on the Federal Crop Insurance Commission.

The 25 member commission, authorized by the Federal Crop Insurance Commission Act (Pub. L. 100–546, October 28, 1988), is composed of 20 representatives of the agriculture and crop insurance industries, the Manager of FCIC, and 4 ex officio non-voting members from the House and Senate. Members of the commission serve without compensation.

Commission members representing the agriculture industry include three from the largest general farm organizations and seven growers. Insurance industry members include representatives from large and small insurance companies reinsured by FCIC, sales and service contractors selling federally underwritten crop insurance, and agent trade associations.

The commission is required by law to hold its first meeting within 30 days of its appointment, and to file reports to Congress on April 1 and July 1, 1989. The commission is also required to file monthly reports on its progress until its termination on December 31, 1990.

This notice serves to advise all interested parties that on November 25, 1988, in accordance with the provisions of the ACT, the Secretary of Agriculture appointed the following representatives of the agriculture and crop insurance industries to the commission:

Richard A. Bill
Willard D. Classen
Raymond L. Davis
James D. Deal
M.K. Felt
Robert E. Fulwider
Richard Garabedian
Richard C. Gibson
Thomas Giessel
Franklin T. Johnson
John C. Kintzle
John G. Laurie
Terrence O. Miller
Myrl D. Mitchell
Doyle D. Rahjes
Ernest L. Ross
Wayne A. Showers
Stanley L. Stephenson
Donald E. Suhr
George F. Vohs

David W. Gabriel,

Acting Manager, Federal Crop Insurance Corporation.

[FR Doc. 88–28812 Filed 12–14–88; 8:45 am]

BILLING CODE 3410–08–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–000093–048.

Title: North Europe-U.S. Pacific Freight Conference.

Parties:

Hapag-Lloyd AG
Compagnie Generale Maritime
P&O Containers (TFL) Limited
Incotrans BV
Sea-Land Service, Inc.

Synopsis: The proposed modifcation would permit common carriers serving the North Europe-U.S. West Coast trades to become Conference members on an associate membership basis. The parties have requested a shortened review period.

Agreement No.: 202–009831–010.

Title: New Zealand/U.S. Atlantic and Gulf Shipping Lines Rate Agreement.

Parties:

Columbus Line
Pacific America Container Express Line (PACE Line)

Synopsis: The proposed modification would permit the Conference to enter into loyalty contracts in accordance with the antitrust laws of the United States. It would also prohibit any party,

VOL 53 ISS 241 DE 15 1988 UMI

either individually or jointly with any other carrier or carriers, from entering into an individual loyalty contract in the Agreement trade. It would further prohibit any party from taking independent action with respect to loyalty contracts.

Agreement No.: 202–010636–053
Title: U.S. Atlantic-North Europe Conference
Parties:
Atlantic Container Line, B.V.
Orient Overseas Container Line (UK) Ltd.
Hapag-Lloyd AG
Sea-Land Service, Inc.
A.P. Moller-Maersk Line
Gulf Container Line (GCL), B.V.
P&O Containers (TFL) Limited
Compagnie Generale Maritime (CGM)
Nedlloyd Lijnen, B.V.

Synopsis: The proposed modification would delete the commencement date provision concerning the authority of the Conference with respect to loyalty contracts.

Agreement No.: 202–010637–036.
Title: North Europe-U.S. Atlantic Conference.
Parties:
Atlantic Container Line, B.V.
Hapag-Lloyd AG
Sea-Land Service, Inc.
Nedlloyd Lijnen, B.V.
Gulf Container Line (GCL), B.V.
P&O Containers (TFL) Limited
Compagnie Generale Maritime (CGM)

Synopsis: The proposed modification would delete the commencement date provision concerning the authority of the Conference with respect to loyalty contracts.

Agreement No.: 226–010916–002.
Title: Global Equipment Management Agreement.
Parties:
The East Asiatic Co. Ltd. A/S
Johnson Line AB
Rederiaktiebolaget Transocean
Wilhelmsen Lines A/S
Barber Blue Sea (Wilhelmsen Lines A/S)
Barber West Africa Line (Wilhelmsen Lines A/S)
EAC–PNSL Service Ltd.
EAC Lines Trans Pacific Service Ltd.
EAC–West Africa Service
Johnson Scanstar
Global Equipment Manager
Johnson South America Lines AB
Portulloyd
Rosa Line
ScanCarriers (Wilhelmsen Lines A/S)
Streamline
Swedish Orient Line
Transatlantic-Southern Africa Services
Pacific Australia Direct Line
Willine (Wilhelmsen Lines A/S)

Synopsis: The proposed modification would substitute Rederiaktiebolaget Transocean for Rederiaktiebolaget Transatlantic, change the name Wilh. Wilhelmsen Limited A/S to Wilhilmsen Lines A/S and delete Pacific Australia Direct Line as a party to the agreement. It would also reflect Barber Blue Sea and ScanCarriers as a service of Wilhelmsen Lines A/S rather than as a joint service. The parties have requested a shortened review period.

Agreement No.: 203–011222.
Title: Barber Blue Sea/Leif Hoegh Discussion Agreement.
Parties:
Barber Blue Sea (Wilhelmsen Lines A/S)
Leif Hoegh & Co., A/S

Synopsis: The proposed agreement would authorize the parties to discuss and agree upon rates, charges, service contracts, and other matters in the table between U.S. and Canadian ports (and inland and coastal ports via such ports) and ports and points worldwide (excluding Japan). It would also permit the parties to charter space to or from one another, and to rationalize sailing. Adherence to any agreement reached by the parties would be voluntary.

Agreement No.: 203–011223.
Title: Transpacific Stabilization Agreement.
Parties:
American President Lines, Ltd.
Evergreen Marine Corp. (Taiwan) Ltd.
Hanjin Shipping Co., Ltd.
Hyundai Merchant Marine Co., Ltd.
Kawasaki Kisen Kaisha, Ltd.
A.P. Moller-Maersk Line
Mitsui O.S.K. Lines, Ltd.
Neptune Orient Lines, Ltd.
Nippon Liner System, Ltd.
Nippon Yusen Kaisha
Orient Overseas Container Line, Inc.
Sea-Land Service, Inc.
Yangming Marine Transport Corp.

Synopsis: The proposed agreement would permit the parties to create a capacity management program among the parties in connection with their existing waterborne operations in the trade from ports and points in the Far East to ports and points in North America.

By Order of the Federal Maritime Commission.

Dated: December 12, 1988.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

First Independence Corp. et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in §225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 5, 1989.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Independence Corporation,* Detroit, Michigan; to engage *de novo* through its subsidiary, First Independence Courier Services, Detroit, Michigan, in providing courier services pursuant to § 225.25(b)(10) of the Board's Regulation Y. These activities will be conducted in the State of Michigan.

2. *Irwin Union Corporation,* Columbus, Indiana; to engage *de novo* through its subsidiary, Irwin Union Capital Corporation, Columbus, Indiana, in consumer financial counseling pursuant to § 225.25(b)(20) of the Board's Regulation Y.

2. *Irwin Union Corporation,* Columbus, Indiana; to engage *de novo* through its subsidiary, Irwin Union Capital Markets, Inc., Columbus, Indiana, in securities brokerage pursuant to § 225.25(b)(15) of the Board's Regulation Y.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Peoples National Bancshares of Checotah, Inc.,* Checotah, Oklahoma; to engage *de novo* through its subsidiary, Cantwell Insurance Agency, Inc., Checotah, Oklahoma, in insurance-agency activities pursuant to § 225.25(b)(8)(iii) of the Board's Regulation Y. These activities will be conducted in the city of Checotah, Oklahoma, which has a population of less than 5,000. Comments on this application must be received by December 29, 1988.

Board of Governors of the Federal Reserve System, December 9, 1988.

James McAfee,

Associate Secretary of the Board.

Midconn Bancorp, Inc., et al., Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for

immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute an summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 5, 1989.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *MidConn Bancorp, Inc.*, Kensington, Connecticut; to become a bank holding company by acquiring 100 percent of the voting shares of MidConn Bank Kensington, Connecticut.

B. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Omega Financial Corporation*, State College, Pennsylvania; to acquire 9.99 percent of the voting shares of Mifflinburg Bancorp, Inc., Mifflinburg, Pennsylvania.

C. **Federal Reserve Bank of St. Louis** (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *First of Searcy, Inc.*, Searcy, Arkansas; to acquire 24.15 percent of the voting shares of Baxter County Bancshares, Inc., Mountain Home, Arkansas, and thereby indirectly acquire People's Bank Corporation, Mountain Home, Arkansas, and its subsidiary, Peoples Bank & Trust Company, Mountain Home, Arkansas. In connection wtih this application, Baxter County Bancshares, Inc., has filed an application to become a bank holding company by acquiring 80 percent of the voting shares of Peoples Bank Corporation, Mountain Home, Arkansas, and thereby indirectly acquire Peoples Bank & Trust Company, Mountain Home, Arkansas.

Board of Governors of the Federal Reserve System, December 9, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE: 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 88N-0394]

Generic Animal Drug and Patent Term Restoration Act; Letter Setting Forth Agency Policies; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a policy letter on the implementation of the Generic Animal Drug and Patent Term Restoration Act (the new law). The letter announces the agency policy in implementing certain aspects of the new law. The agency is soliciting comments on the letter and other aspects of implementing the new law.

DATE: Comments by February 13, 1989.

ADDRESSES: Written requests for copies of the letter to Industry Information Staff (HFV-12), Center for Veterinary Medicine, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. (Send two self-addressed adhesive labels to assist the Staff in processing your requests.) Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Richard Talbot, Office of New Animal Drug Evaluation (HFV-100), Center for Veterinary Medicine, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4313.

SUPPLEMENTARY INFORMATION: On November 16, 1988, the President signed into law the Generic Animal Drug and Patent Term Restoration Act (the new law) (Pub. L. 100-670, 102 Stat. 3971). The new law follows enactment of the Drug Price Competition and Patent Term Restoration Act of 1984, signed by the President on September 24, 1984 (Pub. L. 98-417). Title I of that act provided a system for abbreviated new human drug applications, and Title II of that act amended the U.S. patent laws to provide patent term extension for certain human drug products, including biologics, antibiotics, medical devices, food additives, and color additives.

The new law signed November 16, 1988, amends the Federal Food, Drug, and Cosmetic Act (the act) by extending the generic approval system to copies of new animal drugs that were approved after October 1962 and provides patent extension for certain animal drugs. Under the provision of the new law: (1) FDA must within 60 days of enactment publish a list of the animal drugs that the agency has approved for safety and effectiveness, and update the list every 30 days; (2) sponsors can obtain approvals for generic drugs without submission of safety and effectiveness data, provided they show that their drugs are bioequivalent to listed drugs and meet certain other requirements including assurance of human food safety; (3) sponsors of listed drugs may obtain certain exclusive marketing periods during which generic applications may not be submitted or approved, and patents for listed drugs may be extended; (4) pioneer sponsors must submit certain patent information, in some instances as early as 30 days after enactment of the new law, and generic sponsors must, when they submit applications, make certifications with respect to the patent status of the listed drugs; (5) generic sponsors may submit applications starting 60 days after the enactment date, but FDA cannot approve generic applications under the new law until January 1, 1991, and the agency is precluded from approving generic equivalents of drugs that are primarily manufactured using biotechnology; (6) FDA is required to promulgate implementing regulations for the generic approval and patent extension provisions of the new law but in the meantime is to follow the provision of the act, as amended, and existing regulations; and (7) the agency is required to approve or disapprove generic applications within 180 days unless the agency and the sponsor agree on a different period of time.

FDA has issued a letter concerning certain aspects of implementing the new law to the animal drug industry and to other interested persons. The letter discusses the list of approved drugs that the agency must publish, patent certifications that must be made by generic applicants, and submission of patent information and exclusivity claims by pioneer sponsors.

Until regulations are promulgated, the information in the letter (unless revoked or modified) may be relied upon with assurance of its acceptability to FDA. The letter, however, does not state legal requirements beyond those found in the statute and existing regulations, nor does the letter bind FDA should events occur prior to the issuance of a rule that require a change in FDA policy. Additional policy information concerning implementation of the new law and changes in FDA policy will be announced in future letters or notices.

Interested persons may, on or before February 13, 1989, submit to the Dockets Management Branch (address above)

written comments regarding information in the letter and implementation of the new law in general. Two copies of any comments should be submitted, except that individuals may submit one copy. Comments and other information on this topic have been placed on file with the Dockets Management Branch and may be seen between 9 a.m. and 4 p.m., Monday through Friday.

Written requests for single copies of the letter should be sent to the Industry Information Staff (address above).

Dated: December 9, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Technical Electronic Product Radiation Safety Standards Committee; Recharter

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration announces the rechartering of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC), by the Commissioner of Food and Drugs. This notice is issued under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)).

DATE: The new charter for this committee will extend to December 24, 1990.

FOR FURTHER INFORMATION CONTACT: Richard L. Schmidt, Committee Management Office (HFA-306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2765.

Dated: December 8, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Health Care Financing Administration

Statement of Organization, Functions and Delegations of Authority

Part F. of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services, Health Care Financing Administration (HCFA) **Federal Register**, Vol. 48 No. 198 pp. 46434-46448, dated Wednesday, October 12, 1983) is amended to reflect organizational changes within the Office of the Associate Administrator for Operations for the Bureau of Program Operations. The Bureau's functional statement will remain unchanged. However, the Office of Financial Operations and the Division of Reports and Analysis will have new functional statements. Also, within the Division, there will be a new branch.

The specific changes to Part F. are described below:

- Section FP.20.A.4., the functional statement for the Office of Financial Operations is deleted and replaced by a new functional statement.
- Section FP.20.A.4.d., the functional statement for the Division of Reports and Analysis is deleted and replaced by a new functional statement. The Program Data Management Branch is added to the Division of Reports and Analysis.

The Office of Financial Operations Division of Reports and Analysis will keep the same administrative codes. The new functional statements are as follows:

4. Office of Financial Operations (FPA7).

Establishes the policies and procedures by which contractors and Regional Offices prepare and submit periodic budget estimates. In consultation with other HCFA and BPO components, develops and negotiates the national budget for Medicare contractors, including workload and funds estimates. Controls and manages the Medicare cash flow and related banking activities. Reviews periodic contractor expenditure reports to evaluate budget execution and determine the allowability of costs. Prepares analyses of Medicare expenditure trends and patterns. Reviews contractor performance in determining the correct amount of provider, physician, and supplier overpayments, and assists contractors in negotiations related to the acceptability of the technique for determining the amount of overpayment and the methods of recovery. Prepares cases when compromises are not appropriate and overpayments are uncollectable and assists the HCFA Claims Collection Officer in preparing such cases for disposition. Prepares manual instructions concerning the procedures for the recovery of provider cost report overpayments. Designs, implements, and maintains a Medicare/Medicaid overpayment tracking system. Directs the processing of all Medicare (Part A) beneficiary appeals and beneficiary overpayments. Plans, directs, and coordinates the processing of claims submitted for reconsideration and hearings. Reviews Office of Hearings and Appeals, Social Security Administration, decisions. Establishes procedures and guidelines to target the audit activities of Medicare contractors. Assures that audit funds are utilized to provide a high rate of return in program savings. Directs special audit projects. Compiles operational and performance data for recurring and special reports to reflect the status and trends in program operations effectiveness. Directs and coordinates the Bureau's program data management activities.

d. Division of Reports and Analysis (FPA78).

Designs and develops a system of reports that generates Medicare contractor data regarding program administration. Reviews contractors' reporting systems for consistency and the ability to transmit the required information and prepares the appropriate reporting changes. Prepares written interpretations and analyses of operating data to provide other Bureau components with information necessary in conducting performance evaluations. Develops the specifications for an automated operational data system for Medicare. Prepares recurring and special reports on the status and trends in program administration and operational effectiveness. Provides technical assistance to Regional Offices and contractors on reporting requirements. Directs the Bureau's program data management activities including: Developing BPO automation strategy based on long term needs and new initiatives; identifying needs, documenting requirements and coordinating design, development, and implementation activities with Bureau of Data Management and Strategy; and providing technical assistance to the Bureau components in mainframe and microcomputer applications.

Date: December 1, 1988.

William L. Roper,

Administrator.

BILLING CODE 4160–15–M

National Institutes of Health

Public Health Service; Academic Research Enhancement Award

The National Institutes of Health (NIH) is making a special effort to stimulate research in educational institutions that provide the baccalaureate training for a significant number of our nation's research scientists but that historically have not been major recipients of NIH support. Since Fiscal Year (FY) 1985, Congressional appropriations for the NIH have included funds for this initiative which NIH has implemented through the Academic Research Enhancement Award (AREA) Program. In FY 1985, the NIH made 75 awards, totalling $5 million. In FY 1986, 146 such grants were awarded, amounting to $9.57 million. In FY 1987, a total of 152 AREA grants were awarded from the Congressional appropriation of $10 million. In FY 1988, 173 awards were made, totalling approximately $11 million.

This award is designed to enhance the research environment of educational institutions that have not been traditional recipients of NIH research funds. The AREA funds are intended to support new research projects or expand ongoing research activities proposed by faculty members of these institutions in areas related to the health sciences. Applications for FY 1989 AREA grants are currently undergoing review for scientific merit. Since it is anticipated that additional funds will be available next year the NIH is inviting grant applications for the FY 1990 competition for AREA grants.

Eligibility requirements of the AREA Program include the following:

Applicant Institutions

- All domestic institutions offering baccalaureate or advanced degrees in the sciences related to health are eligible, except those that have received an NIH Biomedical Research Support Grant (BRSG) of $20,000 or more per year for four or more years during the period from FY 1982 through FY 1988.
- Health professional schools (e.g., schools of medicine, dentistry, nursing, osteopathy, pharmacy, veterinary medicine, public health, allied health, optometry, and podiatry) as well as organizationally discrete campuses of a university system are eligible if they meet the above criterion.
- Multiple applications proposing different research projects may be submitted by an applicant institution.

Applicant Principal Investigators

- Must not have active research grant support (including an AREA) from either NIH or the Alcohol, Drug Abuse and Mental Health Administration ADAMHA) at the applicant institution at the time of award of an AREA grant.
- May not submit a regular NIH or ADAMHA research grant application for essentially the same project as a pending AREA application.
- Are expected to conduct the majority of their research at their own institution, although limited access to special facilities or equipment at another institution is permitted.
- May not be awarded more than one AREA grant at a time nor be awarded a second AREA grant to continue the research initiated under the first AREA grant.

Those in doubt about eligibility should consult their institution's Office of Sponsored Research, or the Director, Special Programs and Initiatives, Office of Extramural Programs, (Building, 31, Room 1B54, NIH, Bethesda, MD 20892, 301/496-1968).

Funding decisions will be based on the proposed research project's scientific merit and relevance to NIH programs, and the institution's contribution to the undergraduate preparation of doctoral-level health professionals. Among projects of essentially equivalent scientific merit and program relevance, preference will be given to those submitted by institutions that have granted baccalaureate degrees to 25 or more individuals who, during the period 1978–1988, obtained academic or professional doctoral degrees in the health related sciences.

AREAs are awarded on a competitive basis. Applicants may request support for up to a total of $75,000 in direct costs (plus applicable indirect costs) for a period not to exceed 36 months. Although this award is non-renewable, it will enable qualified individual scientists within the eligible institutions to receive support for feasibility studies, pilot studies and other small-scale research projects preparatory to seeking more substantial funding from the regular NIH research grant programs.

Applications for this award will be accepted under the regular application submission procedures of the Division of Research Grants (DRG) of NIH. Grant applications must be prepared and submitted on Form PHS 398 (Rev. 9/86) Grant Application. An abbreviated format and simplified instructions will be provided for use in preparing these applications. The receipt date is June 22, 1989.

Those individuals and institutions meeting eligibility requirements and wishing to receive further information and/or application materials should write to: AREA, Office of Grants Inquiries, Division of Research Grants, National Institutes of Health, Westwood Building—Room 449, Bethesda, Maryland 20892, (301) 496–7441.

(*Catalog of Federal Domestic Assistance* Program No. 13.390, Academic Research Enhancement Award (AREA), National Institutes of Health.)

Dated: December 7, 1988.

James B. Wyngaarden,

Director, National Institutes of Health.

[FR Doc. 88–28805 Filed 12–14–88; 8:45 am]

BILLING CODE 4140–01–M

Social Security Administration

Social Security Disability Program Demonstration Project United Cerebral Palsy Associations; Project Incentive

SUMMARY: The Commissioner of Social Security announces the following demonstration project to be conducted under the authority of section 1110(b) of the Social Security Act (the Act). Through its project entitled, "Project Incentive," the United Cerebral Palsy Associations, Inc. (UCPA), will demonstrate the effectiveness of using rehabilitation engineering in adapting worksites with assist devices in enhancing employment outcomes for Supplemental Security Income (SSI) recipients with physical disabilities due to cerebral palsy. Section 1615 of the Act

is waived to conduct this project, permitting direct referral of SSI recipients from the Social Security Administration (SSA), or State agencies that make disability determinations for SSA to UCPA. We are publishing this notice to comply with the Code of Federal Regulations, Title 20, Part 416, section 250(e), which requires such notification.

FOR FURTHER INFORMATION CONTACT: Malcolm H. Morrison, Ph.D., Social Security Administration, Office of Disability, 2223 Annex Building, 6401 Security Boulevard, Baltimore, Maryland 21235, Phone (301) 965–0091.

Background Information

Section 1110(b) of the Act authorizes the Secretary to develop and conduct experimental, pilot, and demonstration projects to promote the objectives or improve the administration of the SSI program. These projects are intended to test the advantages of altering certain requirements, conditions, or limitations for recipients and test different administrative methods that apply to SSI applicants and recipients. This section also authorizes the Secretary to waive certain provisions of the Act as is necessary to conduct these experiments and demonstration projects.

Project Objectives

The objectives of this project are to:

- Create competitive job opportunities for persons with cerebral palsy and;
- Determine the effectiveness of adapting work sites with modifications and strategies through the use of rehabilitation engineering in enhancing the employment outcomes of the participants.

Description of the Demonstration Project

Survey information and group interviews have shown that many of SSA's disability recipients, including those suffering from cerebral palsy, would prefer to work if the conditions were favorable. Many individuals with cerebral palsy suffer from severe motor and/or mental disabilities which prevent their successful employment in customary work environments. Project Incentive will create a model program for employing such individuals by adapting worksites with individualized assist devices and strategies that allow them to perform work functions despite their limitations. UCPA will provide accommodations and place 50 to 60 SSI recipients by the end of the 2-year project. An additional 20 individuals will be similarly placed in a nongrant-funded replication site in year 2 of the project to further test the efficacy of the project.

The project is based on the cooperative efforts of several agencies and thus offers a combination of services. Local rehabilitation agencies, SSA district offices, and the grantee will identify potential participants in the Baltimore, Maryland, metropolitan area and the rural western Maryland area. In order to serve efficiently this broad catchment area, a demonstration site will be employed in each of these areas. Participants will be chosen with an emphasis on those individuals with one or more of the following characteristics:

- Job training that has not resulted in job placement;
- A history of repeated job terminations, particularly those related to performance capability/skills;
- A history of job-seeking activities that have not resulted in securing a job; and/or
- Documentation of motivation for remaining unemployed due to past disincentives (e.g., loss of medical benefits), either on the part of the client or his/her family.

UCPA will promote SSA's 1619 (a) and (b) work incentive program to encourage participation. Potential employers will be identified using existing central Maryland UCPA and State of Maryland Division of Vocational Rehabilitation business contacts and systematic review of advertised job openings in newspapers and civil service circulars. Individualized placement will occur following an intake process in which a participant's job history, job preferences, prior training, and job-related support needs are ascertained. Participant productivity will be measured before and after installation of the accommodations. Success of the project will be based on whether the accomplishments match the projected tasks and objectives; whether the effort required to effect the changes is cost-efficient; and whether the participants are satisfied with the project's activities and outcomes.

Statutory Provisions Waived

Section 1615 of the Act, which requires that SSA refer disabled persons directly to State vocational rehabilitation agencies, is waived for the purpose of conducting this project. This waiver authorizes SSA to refer SSI recipients directly to UCPA.

(Catalogue of Federal Domestic Assistance Program No. 13.812 Social Security Research and Demonstration)

Dated: November 29, 1988.

Dorcas R. Hardy,

Commissioner of Social Security.

Final Supplemental Environmental Impact Statement Devers-Palo Verde No. 2 500 kV Transmission Line

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared a Final Supplemental Impact Statement concerning construction of 500 kV transmission line.

FOR FURTHER INFORMATON CONTACT: Gerald E. Hillier, District Manager,

California Desert District, 1695 Spruce Street, Riverside, California 92507.

SUPPLEMENTARY INFORMATION: The Southern California Edison Company (SCE) proposes to build a 500 kV transmission line from the Devers Substation near Palm Springs, California, to the vicinity of the Palo Verde Nuclear Generating Station about 40 miles west of Phoenix, Arizona. The Draft Supplemental Environmental Impact Statement described and evaluated four routing alternatives and the no-action alternative with respect to the transmission line. The SCE's proposed route, parallel to the existing Devers-Palo Verde No. 1500 kV Transmission Line, is the preferred alternative of the Bureau of Land Management.

A limited number of individual copies of the Final Environmental Impact Statement may be obtained from the above address.

Dated: November 29, 1988.

Bruce Blanchard,

Director, Office of Environmental Project Review.

[C-47721]

Realty Action; Direct Sale of Public Lands in Teller County, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action C-47721, Direct Sale of Public Lands in Teller County, Colorado.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1701, 1713) at no less than the appraised fair market value:

Sixth Principal Meridian, Colorado

T.14S., R.70W.,
Sec. 25, M.S. 14357
6.89 acres
T.15S., R.70W.,
Sec. 3
Lots 76, 83, 85, 89, 93, 95, 100, 101, 102, 105 and 111
36.19 acres

The total acreage in this sale is 43.08 acres. The specific descriptions and acreages may change slightly upon approval of the final survey plat. These lands are hereby segregated from appropriation under the public land laws, including the mining laws, until patent issues or for a period of 270 days. The land will be offered by direct sale to Golden Cycle Land Corporation. Golden Cycle and any other interested parties will be notified of the sale price upon completion of the appraisal.

Any parcel not sold by direct sale will be reoffered for sale by competitive bidding to the general public beginning April 5, 1989 and the 1st and 3rd Wednesdays each month thereafter until sold or the sale is canceled.

A more detailed sales prospectus providing specific information on each sale parcel, including patent reservations and restrictions will be available upon request.

DATES: Comment period ends January 30, 1989.

FOR FURTHER INFORMATION: Contact the District Manager, Canon City District Office, 3170 East Main Street, P.O. Box 311, Canon City, Colorado 81212, (719) 275-0631. Comments will be evaluated by the District Manager, who may cancel or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become final.

Donnie R. Sparks,

District Manager.

BILLING CODE 4310-JB-M

Bureau of Land Management; Montana

[MT-070-09-4050-91-47D; M-76985]

Realty Action: Exchange; Montana

AGENCY: Bureau of Land Management, Butte District, Interior.

ACTION: Exchange of public land in Madison County for private land in Beaverhead and Madison Counties.

SUMMARY: The following described land has been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716.

Principal Meridian, Montana

T. 3 S., R. 9 W.,
Sec. 12, SW¼NE¼, W½SE¼, E½SE¼SW¼
Containing 140 acres of public land.
In exchange for these lands, the United States will acquire the following land owned by McCullough Ranches, Inc.

Principal Meridian, Montana

T. 3 S., R. 9 W.,
Sec. 14, W½SW½W¼, SW¼SW¼ NE¼SW¼SW¼, W½SE¼SW¼SW¼.
Sec. 23, E½W½NE¼NW¼NW¼, W½W½E½NW¼, W½W½NW¼, NE¼NW¼NW¼SW¼, W½W½W ½SW¼, E½SW¼SW¼SW¼.
Containing 125.625 acres.

DATES: On or before January 30, 1989 interested parties may submit comments to the Bureau of Land Management at the address shown below. Any adverse comments will be evaluated by the BLM, Montana State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Information related to the exchange, including the environmental assessment/land report, is available for review at the Dillon Resource Area Office, Ibey Building, P.O. Box 1048, Dillon, Montana 59725.

SUPPLEMENTARY INFORMATION: The publication of this notice segregates the public lands described above from settlement, sale, location and entry under the public land laws, including the mining laws, but not from exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976 for a period of two years from the date of first publication. The exchange will be made subject to:

1. A reservation to the United States of a right-of-way for ditches or canals in accordance with 43 U.S.C. 945.

2. Both the surface and mineral estates will be exchanged on an equal value basis.

3. The lands will be exchanged subject to all valid, existing rights (e.g., rights-of-way, easements, and leases of record.)

4. The exchange must meet the requirements of 43 CFR 4110.4-2.

This exchange is consistent with Bureau of Land Management policies and planning and has been discussed with State and local officials. The estimated completion date is April, 1989. The public interest will be served by this exchange because it will enable the Bureau of Land Management to acquire riverfront lands with high public values and will increase management efficiency of public lands in the area.

December 6, 1988.

Paul E. Peek,

Acting District Manager.

Establishment of Supplementary Rules for Designated Recreation Sites, Special Recreation Management Areas, and Other Public Land in the Las Cruces District, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Rules of conduct and supplemental rules.

SUMMARY: The purpose of these supplementary rules is to provide for the protection of person, property, and public land and resources. More specifically, the purpose falls into the following categories.

a. Implementation of Management Plans—Certain prohibited activities have been recommended as supplemental rules for designated recreation sites and Special Recreation Management Areas (SRMAs). Some plan amendments and recommendations are not enforceable as published. In order to implement these recommendations, they must be published as specific prohibited acts in the **Federal Register**. Use of the supplemental rules section of 43 CFR, Subpart 8365, is the most appropriate way of implementing these recommendations. Rationale for these recommendations are presented in their entirety in the resource management plan or recreation management plan for the specific area.

b. Mitigation of User Conflict—Certain other supplementary rules are recommended because of specific user conflict problems in the field. Prohibiting the reservation of camping space in developed campgrounds will allow such space to be available on a first come first serve basis. This will prevent a few persons from monopolizing the use of limited developed camping space. Prohibition of motorized vehicle freeplay (operation of any 2-wheel, 3-wheel, or 4-wheel motor vehicle for purposes other than accessing a campsite) is recommended to minimize the noise and nuisance factor that such activity represents in a developed recreation site.

c. Public Health and Safety—The erection and maintenance of unauthorized toilet structures on the public land could represent a major threat to public safety and health due to the concentration of human wastes. The erection and maintenance of toilet structures may be permitted by the authorized officer on a case-by-case basis and only when appropriate State and local permits have been obtained. It should be noted that all of the shooting restrictions recommended do not prohibit legitimate hunting activities except within ¼ mile of developed sites. Recreational shooters will be encouraged to use public land where such shooting restrictions do not apply and this use does not significantly conflict with other uses.

d. Complementary Rules—Some supplementary rules, such as parking or camping near water sources, are recommended to complement those of State and local agencies. Because these rules provide for the protection of persons and resources and in the interest and spirit of cooperation with the responsible agencies, these supplementary rules are deemed necessary.

The degree to which these rules will be enforced will not change normal patrol procedures. As always, violations will be handled by Rangers on a case-by-case basis.

Special Recreation Management Areas and Designated Recreation Sites

A Special Recreation Management Area (SRMA) is an area where special or more intensive types of recreation management are needed. There are two primary types of SRMAs: Those Congressionally recognized and those administratively recognized by the BLM.

A designated recreation site is a smaller area or an enclave of a SRMA where recreation is the principal management objective for which the Bureau manages, and facilities are provided. Development within designated recreation sites may vary from limited development for protection of the resource values and the safety of users to a site with definite developed facilities that meet the Land and Water Conservation Fund Act criteria for a fee collection site.

The following areas are considered designated recreation sites and SRMAs for the purpose of applying the rules of conduct contained in 43 CFR 8365.2:

1. Aguirre Spring (Recreation Site—Mimbres Resource Area).
2. La Cueva (Recreation Site—Mimbres Resource Area).
3. Three Rivers (Recreation Site—White Sands Resource Area).
4. Datil Well (Recreation Site—Socorro Resource Area).
5. Organ Mountains Recreation Lands (SRMA—Mimbres Resource Area).
6. Gila Lower Box (SRMA—Mimbres Resource Area).

In addition to the regulations contained in 43 CFR 8365.2, the following supplemental rules will be applied to the recreation sites and areas listed above.

1. Reserving camping space is prohibited. Camping space will be allocated on a first come first served basis.

2. Persons may group or occupy any specific location within designated campgrounds, designated recreation sites or on public land within SRMAs in the Las Cruces District, New Mexico for a period of not more than 7 days within any period of 28 consecutive days unless otherwise authorized. Exceptions which will be posted would include areas closed to camping and areas with specially designated camping stay limits. The 28-day period will begin when a camper initially occupies a specific location on public land. The 7-day limit may be reached either through a number of separate visits or through 7 days of continuous occupation during the 28-day period. After the 7th day of occupation, campers must move outside of a 25-mile radius of the previous location. Camping means the erection and use of a tent or shelter of natural or synthetic material, preparing a sleeping bag or other bedding material for use, or use of a vehicle or trailer/camper for the apparent purpose of overnight ocupancy. Occupancy is defined as the taking or holding possession of a camp or residence on public land.

3. Motorized vehicle freeplay is prohibited within designated recreation sites. Motorized vehicles will be used for access to and from campsites only.

4. Cutting or gathering of green or dead wood is prohibited within the designated recreation sites and SRMAs. Open fires are restricted to fire rings provided within designated sites. Open fires along the Baylor Pass and Pine Tree Trails are restricted to the designated primitive campsites.

5. Equestrian use is prohibited at campgrounds and picnic areas unless facilities have specifically been provided for such use or unless otherwise authorized.

6. The discharge of firearms is prohibited within ¼-mile of designated recreation sites. Possession and use of fireworks are prohibited within designated recreation sites.

7. Aguirre Spring Campground use is limited to overnight campers after 10:00 p.m. The entrance gate will be closed at 10:00 p.m. during summer hours and at 8:00 p.m. during winter hours.

8. Within all designated recreation sites, quiet hours are in effect from 10:00 p.m. to 6:00 a.m.

9. Pets must be confined to leashes at all times within designated recreation sites and on designated trails.

10. The gate located in T. 23 S., R. 3 E., Section 2 on the Dripping Springs Road

will remain locked and all public access will be restricted for a period of not less than 6 months from the date of this notice. Authorized permittees are exempt from this closure. This closure is in accordance with the Memorandum of Understanding between the BLM and the Nature Conservancy to allow for an orderly transition of the A. B. Cox Estate property before public use is allowed within the area known as "The Cox Ranch."

11. The gate located in T. 23 S., R. 3 E., Section 12, on the road from the Cox Ranch headquarters to Dripping Springs will be locked to restrict vehicle access in upper Ice Canyon. Vehicle access will be futher restricted in this area by means of a locked gate along the powerline road in T. 23 S., R. 3 E., Section 11. The purpose of these closures is to protect significant historic and natural values. These closures will remain in effect indefinitely. Exceptions are authorized permittees and (for the road from the headquarters to Dripping Springs) handicapped or otherwise physically disabled persons who obtain prior authorization.

Other Public Land

In addition to the regulations contained in 43 CFR 8365.1–2, the following supplemental rules will be applied to all public land in the Las Cruces District, New Mexico.

1. Persons may camp on any specific location on public land outside SRMAs or designated recreation sites within the Las Cruces District, New Mexico for a period of not more than 14 days within any 28 consecutive days unless otherwise authorized. Exceptions which will be posted would include areas closed to camping and areas with specially designated camping stay limits. The 28-day period will begin when a camper initially occupies a specific location on public land. The 14-day limit may be reached either through a number of separate visits or through 14 days of continuous occupation during the 28-day period. After the 14th day of occupation, campers must move outside of a 25-mile radius of the previous location. Camping means the erection and use of a tent or shelter of natural or synthetic material, preparing a sleeping bag or other bedding material for use, use of a vehicle or trailer/camper, or morring of a vessel for the apparent purpose of overnight occupancy. Occupancy is defined as the taking or holding possession of a camp or residence on public land.

2. It is prohibited to erect or maintain any semi-permanent or permanent toilet, shower, or other sanitary facilities or structures on public land without authorization.

3. It is unlawful to park any motor vehicle or to camp within 300 yards of any manmade water hole, water well, or watering tank used by wildlife or domestic stock, without authorization.

4. On public land where off-road vehicle use is permitted, all vehicles must be equipped with an approved spark arrester and muffler.

5. Use of fireworks is prohibited.

6. Public vehicular access will be restricted by means of a locked gate in T. 22 S., R. 1 e., Section 19 to protect significant natural values. This restriction will remain in effect indefinitely. Authorized permittees are exempt from this closure.

DATES: These rules will be in effect December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Dwayne Sykes, Outdoor Recreation Planner, Bureau of Land Management, Las Cruces District, 1800 Marquess, Las Cruces, NM 88005, (505) 525–8228 (FTS 571–8350).

SUPPLEMENTARY INFORMATION: The authority for establishing supplemental rules is contained in 43 CFR 8365.1–6. The authority for establishing closures and restrictions is contained in 43 CFR 8364.1. These rules and closures have been recommended and adopted through development of resource management plans and recreation management plans. These rules and closures will be available in each local office having jurisdiction over the lands, sites, or facilities affected.

H. James Fox,
District Manager.

BILLING CODE 4310-FB-M

[CA–050–09–4410–10]

Intent To Prepare Resource Management Plan; Redding Resource Area, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare Resource Management Plan.

SUMMARY: The Bureau of Land Management, Redding Resource Area, California, is preparing a Resource Management Plan (RMP) which will include an Environmental Impact Statement (EIS). The plan will guide and control future management actions on approximately 400,000 acres of public land and mineral resources in the Redding Resource Area. The Code of Federal Regulations, Title 43, Subpart 1600, will be followed for the planning effort. The public is invited to participate in the planning process, beginning January 1, 1989, with the identification of issues and planning criteria.

DATE: Comments relating to the identification of issues and planning criteria will be accepted until February 21, 1989.

ADDRESS: Send comments to BLM, Redding Resource Area, RMP Team, 355 Hemsted Drive, Redding, California 96002.

FOR FURTHER INFORMATION CONTACT: Mark Morse, Area Manager, or Barron Bail, Chief of Lands and Resources, Redding Resource Area, (916) 246–5325.

SUPPLEMENTARY INFORMATION: The planning area will include the public land and Federal mineral ownership in all or parts of Shasta, Butte, Trinity, Siskiyou, and Tehama Counties. This encompasses approximately 240,000 acres of BLM administered surface and 400,000 acres of Federal minerals under Federal, State or Private surface in the five counties. Anticipated issues to be addressed during the development of the RMP include, but are not limited to the following: (1) Which commercial forest land should be managed on a sustained yield basis for wood products?; (2) What should be done to provide recreation opportunities, including access, while resolving conflicts between recreationists and between recreationists and other users of public land?; (3) Which land in the Redding Resource Area would be beneficial to BLM progress if acquired, and which land could be transferred to other than BLM administration or may require further study?; These preliminary issues are not final and may be further refined, dropped, or new issues added by direct input through active public participation. The RMP will be developed by an interdisciplinary team, using representation from the team leader, technical coordinator, realty specialists, wildlife and fisheries biologists, foresters, geologists, and outdoor recreation planner, an archaelogist, and additional technical support to be provided by other specialists as needed.

A comprehensive public participation plan has been prepared. It is intended to involve all interested or affected parties early and continuously throughout the planing process. An individual may protest approval of a Proposed Plan only with respect to those items submitted in writing to the District manager during the planning process. The plan emphasizes localized one-to-one contacts, media coverage, direct

mailings, and continual coordination with local, state and other Federal agencies. Meetings to determine the scope of the RMP, and to obtain input on issues and planning criteria will be held in Redding, at the Red Lion Inn at 7:00 p.m. on January 5, 1989; in Red Bluff, at the City Council chambers at 7:00 p.m. on January 10, 1989; in Chico, at the Holiday Inn, at 7:00 p.m. January 12, 1989; in Yreka, at the Community Center Theatre, at 7:00 p.m. on January 17, 1989; and in Weaverville, at Lowden Recreation Hall, at 7:00 p.m. on January 18, 1989.

Compete records of all phases of the planning process will be available for public review at the Redding Resource Area Office throughout development of the RMP. Draft and final documents will be published and distributed to the public.

John E. Borgic,

Acting Area Manager.

Partial Termination of Classification for Multiple Use Management; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action terminates a land classification for multiple use management as to 37.83 acres of public lands. This action also opens the lands to disposition by public sale only.

EFFECTIVE DATE: December 15, 1988.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503–231–6905.

SUPPLEMENTARY INFORMATION: 1. By order of Oregon State Director, Bureau of Land Management, which was published in the **Federal Register** on September 19, 1968 (33 FR 14182), the following described public lands were classified for multiple use management pursuant to the Act of September 19, 1964 (78 Stat. 986, 43 U.S.C. 1411–18):

Willamette Meridian

T. 16 S., R. 16 E.,
- Sec. 13, tract 37;
- Sec. 14, tract 40;
- Sec. 21, tracts 41 and 42;
- Sec. 24, tract 38;
- Sec. 25, tract 39;
- Sec. 26, tract 43;
- Sec. 35, tracts 46 and 47.

T. 16 S., R. 17 E.,
- Sec. 19, tract 37.

The areas described aggregate 37.83 acres in Crook County, Oregon.

2. Pursuant to 43 CFR 2461.5(C)(2), the classification as to the lands described in paragraph 1 is terminated upon publication of this notice in the **Federal Register.**

3. Upon publication of this notice in the **Federal Register,** the lands described in paragraph 1 are open to disposition by public sale only.

Charles W. Luscher,

State Director.

Dated: December 9, 1988.

Arizona and California; Temporary Closure of Selected Public Lands in La Paz County, AZ, and San Bernardino County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Temporary closure of selected public lands in La Paz County, Arizona, and San Bernardino County, California, during the operation of the 1989 SCORE Parker 400 Off-Road Vehicle Race.

SUMMARY: The District Managers of the Yuma District, the California Desert District, and the Phoenix District jointly announce the temporary closure of selected public lands under their respective administration. This action is being taken to provide for public safety and prevent unnecessary environmental degradation during the official permitted running of the 1989 SCORE Parker 400 off-road vehicle race.

DATES: January 26, 1989, through January 29, 1989.

FOR FURTHER INFORMATION CONTACT: Merv Boyd, Concession Management Specialist, Havasu Resource Area, 3189 Sweetwater Avenue, Lake Havasu City, Arizona 86403, 602 855–8017; Phil Damon, Outdoor Recreation Planner, Needles Resource Area, P.O. Box 888, Needles, California 92363, 619 326–3897; or Mike Feeney, Natural Resource Specialist, Lower Gila Resource Area, 2015 West Deer Valley Road, Phoenix, Arizona 85027, 602–863–6711.

SUPPLEMENTARY INFORMATION: Specific restrictions and closure periods are as follows:

California Loop

1. The entire course is closed to public vehicle use from 6 a.m., Thursday, January 26, 1989, to 6 p.m., Sunday, January 29, 1989 (PST).

2. Between noon, Friday, January 27, 1989, and 3 p.m., Saturday, January 28, 1989 (PST), vehicles are prohibited within 1 mile of either side of existing roads making up the California Loop of the officially approved course. Access routes leading to the course are also closed. All closed routes will be posted throughout the closure period.

3. Spectator viewing is limited to four designated spectator areas located at:

a. Start/Finish area (approximately 5 miles east of Vidal Junction off State Route 62).

b. Vidal Junction (approximately 2 miles north of Vidal Junction adjacent to U.S. Highway 95).

c. Rice (approximately 18 miles west of Vidal Junction off State Route 62).

d. Thunder Alley (approximately 25 miles west of Vidal Junction off Cadiz Road).

Vehicle travel or parking outside these designated locations is prohibited. All vehicles operated within these four locations shall be legally registered for street and highway operation.

4. The previously used spectator viewing area located adjacent to U.S. Highway 95, aproximately 18 miles north of Vidal Junction, is open *only* to official pitting activity. No spectators will be allowed at this location.

5. Spectators and vehicle parking along U.S. Highway 95 is prohibited.

6. All vehicles operated within designated pit areas shall be legally registered for street and highway operation.

Arizona Loop

1. The portion of the course comprised of BLM roads and ways is closed to public vehicle use from 6 a.m., Thursday, January 26, 1989, to 6 p.m. Sunday, January 29, 1989 (MST).

2. Vehicles are prohibited from the following five Wilderness Study Areas:

a. AZ—050–12 (Gibraltar Mountain)
b. AZ—050–14A/B (Cactus Plain)
c. AZ—050–15A (Swansea)
d. AZ—050–17 (East Cactus Plain)

e. AZ—050–71 (Buckskin Mountains)

3. The entire area encompassed by the Arizona Loop and all areas within 1 mile outside the Arizona Loop are closed to vehicles unless otherwise posted. Access routes leading to the course are closed to vehicles. All closed routes will be posted throughout the closure period.

4. Spectator viewing is limited to two designated spectator areas located at:

a. Arizona Start/Finish area (along Shea Road east of Parker, Arizona).

b. Bouse Road (about 1½ miles north of Bouse, Arizona).

Camping is allowed only in the two designated spectator areas. Vehicle travel or parking outside these designated locations is prohibited. All vehicles operated within these two locations shall be legally registered for street and highway operation.

5. Spectators and vehicle parking along Bouse Road, Shea Road, and Swansea Road is prohibited except for the two designated spectator areas.

6. All vehicles operated within designated pit areas shall be legally registered for street and highway operation.

Signs and maps directing the public to the Arizona and California spectator areas will be provided by the Bureau of Land Management and the event sponsor.

The above restrictions do not apply to emergency vehicles and vehicles owned by the United States, the States of Arizona and California, or the Counties of La Paz and San Bernardino. Vehicles under permit for operation by event participants must follow the race permit stipulations. Operators of permitted vehicles shall maintain a maximum speed limit of 30 mph on all BLM roads and ways. This speed limit shall not apply to vehicles entered in the race during race day, Saturday, January 28, 1989.

Authority for closure of public lands is found in 43 CFR Part 8340, Subpart 8341; 43 CFR Part 8360, Subpart 8364.1, and 43 CFR Part 8372. Persons who violate this closure order are subject to arrest and, upon conviction, may be fined not more than $1,000 and/or imprisoned for not more than 12 months.

[ID–050–08–4351–11]

Emergency Closure of Public Lands (Western Portion of the Shoshone BLM District, ID)

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that effective immediately all public lands located in the western portion of the Shoshone BLM District are closed to off road motorized travel. The closed area is bounded and generally described as follows:

That portion of Idaho Department of Fish and Game Unit 45, West of the Bliss-Hill City Road to the Snake River, downstream to the confluence of King Hill Creek with the Snake River, up King Hill Creek to the Idaho Power Two pole power line, East along the powerline to White Arrow ponds on the Bliss-Hill City Road, the point of the beginning.

All public lands administered by the Bureau of Land Management within the above described area are closed to off road motorized vehicle use, from the date of the notice until April 1, 1989.

Exemptions from this closure for Federal, State, and local government personnel on official duty, emergency service personnel including medical, search and rescue, utility services, and all other licensed/permitted individuals may be approved by the authorized officer.

The described area is currently experiencing high concentrations of Mule Deer hunters during a late season muzzleloader hunt season. The hunting activity has encouraged off road motorized use which is opening tracks for excessive soil erosion during snowmelt or seasonal rains. The purpose of the closure is to protect the natural resources from excessive soil erosion caused by disturbances from off road vehicle use.

The authority for this closure is 43 CFR 8364.1. The closure will remain in effect until April 1, 1989.

DATE: Thursday, December 8, 1988.

ADDRESS: BLM District Office, 400 West F Street, Shoshone, ID 83352.

FOR FURTHER INFORMATION AND APPLICATION FOR EXCLUSION PERMITS CONTACT: Robert D. Cordell, Bennett Hills Resource Area Manager, P.O. Box 2–B, Shoshone, Idaho 83352, Telephone (208) 886–2206.

Realty Action; Sale of Public Lands in Washington County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: The following land has been found suitable for direct sale to John Miles under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at not less than the fair market value of $6,000:

Salt Lake Base and Meridian, Utah

T. 41 S., R. 14 W.
Sec. 12: Lot 30,
Containing 2.12 acres.

The land described is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from the date of publication of this notice, whichever occurs first.

SUMMARY: The purpose of the sale is to dispose of public land that is difficult and uneconomic to manage by a government agency. This determination was made because of its location and uses associated with it and adjacent private land.

DATES: The land will not be offered for sale until at least 60 days after the date of this notice. For a period of up to and including January 30, 1989, interested parties may submit comments to the District Manager, Cedar City District, at the address listed below. In the absence of timely objections, this proposal shall become the final determination of the Department of the Interior.

ADDRESS: Detailed information concerning the sale is available at the Dixie Resource Area Office, 225 North Bluff, St. George, Utah 84770, (801) 673-4654. Written comments should be addressed to the District Manager, Cedar City District Office, 176 East D.L. Sargent Drive, Cedar City, Utah 84720.

SUPPLEMENTARY INFORMATION: The sale will be subject to the following reservations to the United States:

1. All minerals in the land above described, with the right to prospect for, mine and remove the same under applicable law and such regulations as the Secretary of Interior may prescribe.

2. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945).

Date: December 6, 1988.

Gordon Staker,

District Manager.

BILLING CODE 4310-DQ-M

Minerals Management Service

Development Operations Coordination Document; Union Texas Petroleum

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Union Texas Petroleum has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 3159, Block 384, Eugene Island Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Fourchon, Louisiana.

DATE: The subject DOCD was deemed submitted on December 7, 1988. Comments must be received within 15 days of the publication date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective May 31, 1988 (53 FR 10595).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: December 8, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

Bureau of Reclamation

Kellogg Unit Reformulation Study, Delta Division, Central Valley Project, Contra Costa County, CA

AGENCY: Bureau of Reclamation (USBR), Interior.

ACTION: Notice of public hearing on planning report/draft environmental statement (PR/DES); INT-DES-88-56.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Bureau of Reclamation has prepared a planning report/draft environmental statement (PR/DES) on the Kellogg Unit Reformulation Study of the Central Valley Project, California. The PR/DES (INT-DES-88-56) was made available to the public on December 1, 1988. A public hearing will be held to receive comments from interested organizations and individuals on the environmental impacts of the project.

DATE: The public hearing is scheduled for 7:30 p.m. on January 19, 1989, in Concord, California.

ADDRESSES: The hearing will be held at the following location: Contra Costa Water District Headquarters, 1331 Concord Avenue, Concord, California.

Addresses for Comments, Requests to Testify, and Further Information: Regional Director, Bureau of Reclamation, Mid-Pacific Regional Office, 2800 Cottage Way, Attention: MP-720, Sacramento, CA 95825-1898; Telephone: (196) 978-4957.

FOR FURTHER INFORMATION CONTACT: Mr. Richard M. Johnson (Team Leader, Mid-Pacific Region), (916) 978-4975.

SUPPLEMENTARY INFORMATION: Organizations and individuals wishing to present statements at the hearing should contact the Bureau of Reclamation, Mid-Pacific Regional Office, at the above address, to announce their intention to participate. Requests for scheduled presentations will be accepted through 4 p.m. on January 14, 1989.

Oral comments at the hearing will be limited to 10 minutes. The hearing officer may allow any speaker to provide additional oral comment after all persons wishing to comment have been heard. Whenever possible, speakers will be scheduled according to the time preference mentioned in their letter or telephone requests. Speakers not present when called will lose their privilege in the scheduled order, and will be recalled at the end of the scheduled speakers.

Written comments from those unable to attend or those wishing to supplement their oral presentations at the hearing should be received by Reclamation's Mid-Pacific Regional Office at the above address by January 27, 1989, for inclusion in the hearing record.

Date: December 8, 1988.

Joe D. Hall,

Deputy Commissioner.

Office of Surface Mining Reclamation and Enforcement

Information Collecton Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirements should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget, Interior Department Desk Office, Washington, DC 20503, telephone (202) 395-7340.

Title: Abandoned Mine Reclamation Funds—30 CFR Part 872.

OMB Number: 1029-0054.

Abstract: Sections 401 and 402 of the Surface Mining Control and Reclamation Act of 1977, Pub. L. 95-87, provide for the creation of the Abandoned Mine Reclamation Fund and require the Secretary to make a determination regarding the use of these allocated State/Indian tribe funds which have not been expended in a three-year period. Part 872 establishes requirements for information collection to be used by the regulatory authority to determine whether delays in the use of allocated funds were due to unavoidable delays in program approval or are not necessary to carry out approved reclamation activities. These requirements serve as safeguards to protect States/Indian tribes against automatic or indiscriminate funds withdrawal.

Bureau Form Number: None.

Frequency: As required.

Description of Respondents: State and Indian tribes.

Annual Responses: One.

Annual Burden Hours: One.

Estimated Completion Time: One.

Bureau Clearance Office: Nancy Anna Baka (202) 343-5981.

Date: December 2, 1988.

Brent Wahlquist,

Assistant Director, Program Policy.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Public Information Collection Requirements Submitted to OMB for Review

The Agency for International Development (A.I.D.) submitted the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Comments regarding these information collections should be addressed to the OMB reviewer listed at the end of the entry no later than ten days after publication. Comments may also be addressed to, and copies of the submissions obtained from the Reports Management Officer, John H. Elgin, (703) 875-1608, IRM/PE, Room 1100B, SA-14, Washington, DC 20523.

Date Submitted: December 8, 1988.

Submitting Agency: Agency for International Development.

OMB Number: 0412-0506.

Type of Submission: Extension of Approved Collection.

Title: Information Collection Elements in the A.I.D. Consultant Registry Information System (ACRIS).

Purpose: A.I.D. procuring activities are required to establish bidders mailing lists "to assure access to sources and to obtain meaningful competition." (CFR 1-2.205). In compliance with this requirement, A.I.D.'s Office of Small and Disadvantaged Business Utilizations/Minority Resource Center has responsibility for "developing and maintaining a Contractor's Index of bidders/offerors capable of furnishing services for use by A.I.D. procuring activities" (AIDPR 7-1.704-2(b)(4)). Respondents will have a submission burden of one response per year.

Reviewer: Francine Picoult (202) 395-7340, Office of Management and Budget, Room 3201, New Executive Office Building, Washington, DC 20503.

Date: December 8, 1988.

Wayne H. Van Vechten,

Planning and Evaluation Division.

BILLING CODE 6116-01-M

DEPARTMENT OF LABOR

Office of the Assistant Secretary for Administration and Management

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Labor has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Adoption of Employee Retirement Income Security Act Class Exemptions for Purposes of the Federal Employees' Retirement System Act; No Form: and No OMB Control Number.

Type of Request: Expedited Submission—approval date requested (December 27, 1988).

Average Burden Hours/Minutes Per response: 1 hour.

Frequency of Response: On occasion.

Number of Respondents: 1.

Annual Burden Hours: 1 hour.

Annual Responses: 1.

Needs and Uses: This document adopts, for purposes of the prohibited transaction provisions of FERSA, certain prohibited transaction class exemptions granted pursuant to section 408(a) of the Employee Retirement Income Security Act of 1974. Pursuant to section 408(a) of the Employee Retirement Income Security act of 1974. Pursuant to the adoption, the prohibited transaction restrictions of section 8477(c)(2) of

FERSA or the relevant subsections thereunder will not apply to certain transactions described in the Class Exemptions, provided that the conditions of the exemptions are satisfied.

Affected Public: Business or other for profit.

Respondents Obligation: Mandatory.

Requests for Which Paperwork Reduction Act Approval is Being Sought:

PTE 75–1 Exemptions From Prohibitions Respecting Certain Classes of Transactions Involving Employee Benefits Plans and Certain Broker-Dealers, Reporting Dealers and Banks (40 FR 50845, October 31, 1975)

II. Principal Transactions Exemption

(e) The plan maintains or causes to be maintained for a period of six years form the date of such transaction such records as are necessary to enable the persons described in paragraph (f) of this exemption to determine whether the conditions of this exemption have been met, except that—

(1) Such broker-dealer, reporting dealer, or bank shall not be subject to the civil penalty which may be assessed under section 502(i) of the act, or to the taxes imposed by section 4975 (a) and (b) of the Code, if such records are not maintained, or are not available for examination as required by paragraph (f) below; and

(2) A prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

(f) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (e) are unconditionally available for examination during normal business hours by duly authorized employees of (1) the Department of Labor, (2) the Internal Revenue Service, (3) plan participants and beneficiaries, (4) any employer of plan participants and beneficiaries, and (5) any employee organization any of whose members are covered by such plan. For purposes of this exemption, the terms "broker-dealer," "reporting dealer" and "bank" shall include such persons and any affiliates thereof, and the term "affiliate" shall be defined in the same manner as that term is defined in 29 CFR 2510.3–21(e) and 26 CFR 54.4975–9(e).

III. Underwritings Exemption

(f) The plan maintains or causes to be maintained for a period of six years form the date of such transaction such records as are necessary to enable the persons described in paragraph (g) of this exemption to determine whether the conditions of this exemption have been met, except that a prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

(g) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (f) are unconditionally available for examination during normal business hours by duly authorized employees of (1) the Department of Labor, (2) the Internal Revenue Service, (3) plan participants and beneficiaries, (4) any employer of plan participants and beneficiaries, and (5) any employee organization any of whose members are covered by such plan.

If such securities are purchased by the plan from a party in interest or disqualified person with respect to the plan, such party in interest or disqualified person shall not be subject to the civil penalty which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975 (a) and (b) of the Code, if the conditions of this exemption are not met. However, if such securities are purchased from a party in interest or disqualified person with respect to the plan, the restrictions of section 406(a) of the Act shall apply to any fiduciary with respect to the plan and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code, shall apply to such party in interest or disqualified person, unless the conditions for exemption of Part II of this notice (relating to certain principal transactions) are met.

IV. Market-Making Exemption

(e) The plan maintains or causes to be maintained for a period of six years from the date of such transaction such records as are necessary to enable the persons described in paragraph (f) of this exemption to determine whether the conditions of this exemption have been met, except that a prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six year periods.

(f) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (e) are unconditionally available for examination during normal business hours by duly authorized employees of (1) the Department of Labor, (2) the Internal Revenue Service, (3) plan participants and beneficiaries, (4) any employer of plan participants and beneficiaries, and (5) any employee organization any of whose members are covered by such plan.

V. Extension of Credit Exemption

(c) The plan maintains or causes to be maintained for a period of six years from the date of such transaction such records as are necessary to enable the persons described in paragraph (d) of this exemption to determine whether the conditions of this exemption have been met, except that—

(1) If such party in interest or disqualified person is not a fiduciary with respect to any assets of the plan, such party in interest or disqualified person shall not be subject to the civil penalty which may be assessed under section 502(i) of the Act or to the taxes imposed by section 4975 (a) and (b) of the Code, if such records are not maintained, or not available for examination as required by paragraph (d) below; and

(2) A prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the plan fiduciaries, such records are lost or destroyed prior to the end of such six-year period.

(d) Notwithstanding anything to the contrary in subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (c) are unconditionally available for examination during normal business hours by duly authorized employees of (1) the Department of Labor, (2) the Internal Revenue Service, (3) plan participants and beneficiaries, (4) any employer of plan participants and beneficiaries, and (5) any employee organization any of whose members are covered by such plan.

PTE 78–19—Class Exemptions for Certain Transactions Involving Insurance Company Pooled Separate Accounts (43 FR 59915, Decemer 22, 1978)

Section III—General Conditions

(b) The insurance company maintains for a period of six years from the date of the transaction the records necessary to enable the persons described in paragraph (c) of this section to determine whether the conditions of this exemption have been met, except that (1) a prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of the

insurance company, the records are lost or destroyed prior to the end of the six-year period, and (2) no party in interest shall be subject to the civil penalty which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975 (a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (c) below.

(c)(1) Except as provided in subsection 2 of this paragraph and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (b) of this section are unconditionally available at their customary location for examination during normal business hours by:

(i) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,

(ii) Any fiduciary of a plan who has authority to acquire or dispose of the interest of the plan in the separate account, or any duly authorized employee or representative of such fiduciary,

(iii) Any contributing employer to any plan which has an interest in the pooled separate account or any duly authorized employee or representative of that employer,

(iv) Any participant or beneficiary of any plan which has an interest in the pooled separate account or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in subparagraph (ii) through (iv) of this paragraph shall be authorized to examine an insurance company's trade secrets or commercial or financial information which is privileged or confidential.

PTE 80–51—Class Exemption for Certain Transactions Involving Bank Collective Investment Funds (45 FR 49709, July 25, 1980, as technically corrected at 45 FR 52949, August 8, 1980)

Section III. General Conditions

(b) The bank maintains for a period of six years from the date of the transaction, the records necessary to enable the persons described in paragraph (c) of this section to determine whether the conditions of this exemption have been met, except that (1) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the bank's control, the records are lost or destroyed rior to the end of the six-year period, and (2) no party in interest shall be subject to the civil penalty that may be assessed under 502(i) of the Act, or to the taxes imposed by section 4975 (a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (c) below.

(c)(1) Except as provided in subsection 2 of this paragraph and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (b) of this section are unconditionally available at their customary location for examination during normal business hours by:

(A) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,

(B) Any fiduciary of a plan who has authority to acquire or dispose of the interests of the plan in the collective investment fund, or any duly authorized employee or representative of such fiduciary,

(C) Any contributing employer to any plan that has an interest in the collective investment fund or any duly authorized employee or representative of such employer,

(D) Any participant or beneficiary of any plan that has an interest in the collective investment fund, or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in subparagraphs (B) through (D) of this paragraph shall be authorized to examine a bank's trade secrets or commercial or financial information which is privileged or confidential.

PTE 82–63—Class Exemption To Permit Payment of Compensation to Plan Fiduciaries for the Provision of Securities Lending Services (47 FR 14804, April 6, 1982, as Technically Corrected at 47 FR 16437, April 16, 1982)

I. Transactions

(c) The compensation is reasonable and is paid in accordance with the terms of a written instrument, which may be in the form of a master agreement covering a series of securities lending transactions;

(d) Except as otherwise provided in paragraph (f), the arrangement under which the compensation is paid: (1) Is subject to the prior written authorization of a plan fiduciary (the "authorizing fiduciary"), who is (other than in the case of a plan covering only employees of the lending fiduciary or affiliates of such fiduciary) independent of the lending fiduciary and of any affiliate thereof, and (2) may be terminated by the authorizing fiduciary within: (i) The time negotiated for such notice of termination by the plan and the lending fiduciary, or (ii) five business days, whichever is lesser, in either case without penalty to the plan;

(e) No such authorization is made or renewed unless the lending fiduciary shall have furnished the authorizing fiduciary with any reasonably available information which the lending fiduciary reasonably believes to be necessary to determine whether such authorization should be made or renewed, and any other reasonably available information regarding the matter that the authorizing fiduciary may reasonably request; and

(f) (Special Rule for Commingled Investment Funds) In the case of a pooled separate account maintain by an insurance company qualified to do business in a state or a common or collective trust fund maintained by a bank or trust company supervised by a state or federal agency, the requirements of paragraph (d) of this exemption shall not apply: *Provided,* that

(1) The information described in paragraph (e) (including information with respect to any material change in the arrangement) shall be furnished by the lending fiduciary to the authorizing fiduciary described in paragraph (d) with respect to each plan whose assets are invested in the account or fund, not less than 30 days prior to implementation of the arrangement or material change thereto, and, where requested, upon the reasonable request of the authorizing fiduciary;

(2) In the event any such authorizing fiduciary submits a notice in writing to the lending fiduciary objecting to the implementation of, material change in, or continuation of the arrangement, the plan on whose behalf the objection was tendered is given the opportunity to terminate its investment in the account or fund, without penalty to the plan, within such time as may be necessary to effect such withdrawal in an orderly manner that is equitable to all withdrawing plans and to the nonwithdrawing plans. In the case of a plan that elects to withdraw pursuant to the foregoing, such withdrawal shall be effected prior to the implementation of, or material change in, the arrangement; but an existing arrangement need not be discontinued by reason of a plan electing to withdraw; and

(3) In the case of a plan whose assets are proposed to be invested in the account or fund subsequent to the implementation of the compensation arrangement and which has not authorized the arrangement in the manner described in paragraphs (f)(1) and (f)(2), the plan's investment in the account or fund shall be authorized in the manner described in paragraph (d)(1).

PTE 86–128—Class Exemption for Securities Transactions Involving Employee Benefit Plans and Broker-Dealers (51 FR 41686, November 18, 1986, as Amended at 53 FR 8676, March 19, 1987)

Section III. Conditions

(b) The covered transaction is performed under a written authorization executed in advance by a fiduciary of each plan whose assets are involved in the transaction, which plan fiduciary is independent of the person engaging in the covered transaction.

(c) The autorization referred to in paragraph (b) of this section is terminable at will by the plan, without penalty to the plan, upon receipt by the authorized person of written notice of termination. A form expressly providing an election to terminate the authorization described in paragraph (b) of this section with instructions on the use of the form must be supplied to the authorizing fiduciary not less than annually. the instructions for such form must include the following information:

(1) The authorization is terminable at will by the plan, without penalty to the plan, upon receipt by the authorized person of written notice from the authorizing fiduciary or other plan official having authority to terminate the authorization; and

(2) Failure to return the form will result in the continued authorization of the authorized person to engage in the covered transactions on behalf of the plan.

(d) Within three months before an authorization is made, the authorizing fiduciary is furnished with any reasonably available information that the person seeking authorization reasonably believes to be necessary for the authorizing fiduciary to determine whether the authorization should be made, including (but not limited to) a copy of this exemption, the form for termination of authorization decribed in section III(c), a description of the person's brokerage placement practices, and any other reasonably available information regarding the matter that the authorizing fiduciary requests.

(e) The person engaging in a covered transaction furnishes the authorizing fiduciary with either:

(1) A confirmation slip for each securities transaction underlying a covered transaction with ten business days of the securities transaction containing the information described in Rule 10b-10(a)(1–7) under the Securities Exchange Act of 1934, 17 CFR 240.10b-10; or

(2) At least once every three months and not later than 45 days following the period to which it relates, a report disclosing:

(A) A compilation of the information that would be provided to the plan pursuant to subparagraph (e)(1) of this section during the three-month period covered by the report;

(B) The total of all securities transaction related charges incurred by the plan during such period in connection with such covered transactions; and

(C) The amount of the securities transaction-related charges retained by such person and the amount of such charges paid to other persons for execution or other services.

For purposes of this paragraph (e), the words "incurred by the plan" shall be construed to mean "incurred by the pooled fund" when such person engages in covered transactions on behalf of a pooled fund in which the plan participates.

(f) The authorizing fiduciary is furnished with a summary of the information required under paragraph (e)(1) of this section at least once per year. The summary must be furnished within 45 days after the end of the period to which it relates, and must contain the following:

(1) The total of all securities transaction-related charges incurred by the plan during the period in connection with covered securities transactions.

(2) The amount of the securities transaction-related charges retained by the authorized person and the amount of these charges paid to other persons for execution or other services.

(3) A description of the person's brokerage placement practices, if such practices have materially changed during the period covered by the summary.

(4)(i) A portfolio turnover ratio, calculated in a manner which is reasonably designed to provide the authorizing fiduciary with the information needed to assist in discharging its duty of prudence. The requirements of this paragraph (f)(4)(i) will be met if the "annualized portfolio turnover ratio", calculated in the manner described in paragraph (f)(4)(ii), is contained in the summary.

(ii) The "annualized portfolio turnover ratio" shall be calculated as a percentage of the plan assets consisting of securities or cash over which the authorized person had discretionary investment authority, or with respect to which such person rendered, or had any responsibility to render, investment advice (the "portfolio") at any time or times ("management period(s)") during the period covered by the report. First, the "portfolio turnover ratio" (not annualized) is obtained by dividing (A) the lesser of the aggregate dollar amounts of purchases or sales of portfolio securities during the management period(s) by (B) the monthly average of the market value of the portfolio securities during all management period(s). Such monthly average is calculated by totaling the market values of the portfolio securities as of the beginning and end of each management period and as of the end of each month that ends within such period(s), and dividing the sum by the number of valuation dates so used. For purposes of this calculation, all debt securities whose maturities at the time of acquisition were one year or less are excluded from both the numerator and the denominator.

The "annualized portfolio turnover ratio" is then derived by multiplying the "portfolio turnover ratio" by an annualizing factor. The annualizing factor is obtained by dividing (C) the number twelve by (D) the aggregate duration of the management period(s) expressed in months (and fractions thereof).

Examples of the use of this formula are provided in section V of this exemption.

(iii) The information described in this paragraph (f)(4) is not required to be furnished in any case where the authorized person has not exercised discretionary authority over trading in the plan's account during the period covered by the report.

For purposes of this paragraph (f), the words "incurred by the plan" shall be construed to mean "incurred by the pooled fund" when such person engages in covered transactions on behalf of a pooled fund in which the plan participates.

(g) If an agency cross transaction to which section IV(b) does not apply is involved, the following conditions must also be satisfied:

(1) The information required under section III(d) or IV(d)(1)(B) of this exemption includes a statement to the effect that with respect to agency cross transactions the person effecting or executing the transactions will have a potentially conflicting division of loyalties and responsibilities regarding the parties to the transactions;

(2) The summary required under section III(f) of this exemption includes a statement identifying the total number of agency cross transactions during the period covered by the summary and the total amount of all commissions or other remuneration received or to be received from all sources by the persons engaging

in the transactions in connection with those transactions during the period.

Section IV: Exceptions From Conditions

(a) *Certain plans not covering employees.* Section III of this exemption does not apply to covered transactions to the extent they are engaged in on behalf of individual retirement accounts meeting the conditions of 29 CFR 2510.3–2(d), or plans, other than training programs, that cover no employees within the meaning of 29 CFR 2510.3–3.

(b) *Certain agency cross transactions.* Section III of this exemption does not apply in the case of an agency cross transaction, provided that the person affecting or executing the transaction:

(1) Does not render investment advice to any plan for a fee within the meaning of section 3(21)(A)(ii) of ERISA with respect to the transaction;

(2) is not otherwise a fiduciary who has investment discretion with respect to any plan assets involved in the transaction, see 29 CFR 2510.3–21(d); and

(3) does not have the authority to engage, retain or discharge any person who is or is proposed to be a fiduciary regarding any such plan assets.

(d) *Special rules for pooled funds.* In the case of a person engaging in a covered transaction on behalf of an account or fund for the collective investment of the assets of more than one plan (pooled fund):

(1) Section III(b), (c) and (d) of this exemption do not apply if—

(A) The arrangement under which the covered transaction is performed is subject to the prior and continuing authorization, in the manner described in this paragraph (d)(1), of a plan fiduciary with respect to each plan whose assets are invested in the pooled fund who is independent of the person. The requirement that the authorizing fiduciary be independent of the person shall not apply in the case of a plan covering only employees of the person, if the requirements of section IV(d)(2)(A) and (B) are met.

(B) The authorizing fiduciary is furnished with any reasonably available information that the person engaging or proposing to engage in the covered transactions reasonably believes to be necessary to determine whether the authorization should be given or continued, not less than 30 days prior to implementation of the arrangement or material change thereto, including (but not limited to) a description of the person's brokerage placement practices, and, where requested, any reasonably available information regarding the matter upon the reasonable request of the authorizing fiduciary at any time.

(C) In the event an authorizing fiduciary submits a notice in writing to the person engaging in or proposing to engage in the covered transaction objecting to the implementation of, material change in, or continuation of, the arrangement, the plan on whose behalf the objection was tendered is given opportunity to terminate its investment in the pooled fund, without penalty to the plan, within such time as may be necessary to effect the withdrawal in an orderly manner that is equitable to all withdrawing plans and to the nonwithdrawing plans. In the case of a plan that elects to withdraw under this subparagraph (d)(1)(C), the withdrawal shall be effected prior to the implementation of, or material change in, the arrangement; but an existing arrangement need not be discontinued by reason of a plan electing to withdraw.

(D) In the case of a plan whose assets are proposed to be invested in the pooled fund subsequent to the implementation of the arrangement and that has not authorized the arrangement in the manner described in subparagraphs (d)(1)(B) and (C) of this section, the plan's investment in the pooled fund is subject to the prior written authorization of an authorizing fiduciary who satisfies the requirements of subparagraphs (d)(1)(A).

OMB Desk Officer: Ms. Diana Rowen.

Written comments and recommendations on the information collection should be sent to Ms. Diana Rowen at Office of Management and Budget, Desk Officer, Room 3001, New Executive Office Building, Washington, DC., 20503, telephone 202/395–6880 by December 27, 1988.

A copy of the information collection proposal may be obtained from Mr. Paul Larson, Director, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N–1301, Washington, DC 20210, telephone number: 202/523–6331.

Signed at Washington, DC, this 13th day of December 1988.

Marizetta Scott,

Acting Departmental Clearance Officer.

SF–83A Request for OMB Review—Pension and Welfare Benefits Administration, U.S. Department of Labor

Subject: The adoption of certain prohibited transaction class exemptions under section 408(a) of the Employee Retirement Income Security Act (ERISA) for purposes of section 8477(c)(2) of the Federal Employees' Retirement System Act of 1986 (FERSA).

Supporting Statement

1. Statutory Authority for Information Collection

Section 408(a) of the Employee Retirement Income Security Act of 1974 (ERISA) establishes the Secretary of Labor's authority to grant a conditional or unconditional exemption of any fiduciary, disqualified person, or transaction from all or part of the prohibitions imposed by section 406(b) of ERISA. Section 406(b) of ERISA prohibits, unless exempted, a fiduciary's dealing with the assets of a plan in his or her own interest, acting on behalf of a party whose interests are adverse to the interests of the plan, its participants or beneficiaries, or receiving consideration for his or her own personal account from any party dealing with the plan in connection with a transaction involving the assets of the plan.

The Secretary has authority pursuant to ERISA section 408(a) to grant either individual or class exemptions. In order to grant a class exemption, the Secretary must determine that it is: (1) Administratively feasible; (2) in the interest of the plan, as well as the interest of the plan's participants and beneficiaries; and (3) protective of the rights of participants and beneficiaries.

Section 8477(c)(3)(E) of the Federal Employees' Retirement System Act of 1986 (FERSA) provides that the Secretary of Labor may determine that a class exemption granted under section 408(a) of ERISA shall, upon publication of a notice in the **Federal Register**, also constitute a class exemption for the purposes of section 8477(c)(2) of FERSA.

FERSA section 8477(c)(2) parallels ERISA section 406(b) in its application to the FERS Thrift Savings Fund (the Fund) established under FERSA. Section 8477(c)(2)(A) prohibits a fiduciary with respect to the Fund from dealing with the assets of the Fund in his or her own interests. Section 8477(c)(2)(B) prohibits fiduciaries with respect to the Fund from acting, in an individual or any other capacity, in any transaction involving the Fund on behalf of a party, or representing a party, whose interests are adverse to the interests of the Fund or the interests of participants and beneficiaries. Section 8477(c)(2)(C) prohibits a fiduciary with respect to the Fund from receiving any consideration for his or her own personal account from any party dealing with sums credited to the Fund in connection with a transaction involving the assets of the Fund.

The following prohibited transaction class exemptions (PTEs) under ERISA

section 408(a) are being adopted for FERSA purposes:

- PTE 75–1—exempting certain classes of transactions involving employee benefit plans and certain broker dealers, reporting dealers, and banks;
- PTE 79–19—exempting certain transactions involving insurance company pooled separate accounts;
- PTE 80–26—exempting certain interest free loans to employee benefit plans;
- PTE 80–51—exempting certain transactions involving bank collective investment funds;
- PTE 82–63—exempting certain payments of compensation to plan fiduciaries for the provision of securities lending services; and
- PTE 86–128—exempting certain securities transactions involving employee benefit plans and broker-dealers.

The adoption of these exemptions would permit fiduciaries with respect to the Fund to engage in certain transactions that would otherwise be prohibited under section 8477(c)(2) of FERSA. The class exemptions will be adopted only to the same extent that they provide exemptive relief from the restrictions of sections 406(b) of ERISA, which are parallel to those of section 8477(c)(2) of FERSA. The Department is adopting these class exemptions on its own motion in accordance with the procedures set forth in section 3.01 of ERISA Procedure 75–1 (40 Fed. Reg. 18471, April 28, 1975).

2. Purpose of the Information Collection

The information collection requirements incorporated within certain of these class exemptions are intended to ensure that a class exemption is not abused, that the rights of participants and beneficiaries are protected, and that affected fiduciaries comply with a class exemption's conditions.

3. Use of Improved Information Technology

This is not applicable to the adoption of the requirements of these class exemptions.

4. Efforts to Identify Duplication

The information collection requirements contained in certain of these class exemptions are only triggered when plan fiduciaries elect to utilize that class exemptions; there are no annual reporting requirements under the exemptions.

Some of the information collection requirements contained in certain of the class exemptions resemble in limited respects information collection requirements under Rule 10b–10 of the Securities Act of 1984 (17 CFR 2240.10b–10). The supporting statement for individual class exemptions describe in detail the efforts taken to avoid duplication, and may be referred to for additional information.

5. Similar Information

Because this information is specific to the transaction for which an exemption is sought, there is no alternative source of similar information.

6. Small Businesses

Due to the size and nature of the FERS Thrift Savings Fund, it is unlikely that small businesses will act as asset managers or fiduciaries for the Fund. Nevertheless, it should be noted that each individual class exemption was drafted (for ERISA purposes) to minimize the impact on small businesses.

7. Frequency of Information Collection

The information collection requirements relating to these class exemptions are only imposed when a Fund fiduciary chooses to engage in a transaction which necessitates the utilization of a class exemption. The frequency is thus dependent on the occurrence of a particular transaction, rather than a predetermined time period (see item 13 for further discussion).

8. Special Circumstances

There are no special circumstances applicable within the meaning of 5 CFR 1320.6.

9. Consultations With Outside Agencies

The adoption of these class exemptions is in response to a request by Wells Fargo Bank, which serves as the (only) current qualified professional asset manager retained by the FERS Thrift Investment Board, pursuant to section 8438 of FERSA, with respect to the fixed income fund and the common stock index fund. In particular, Ms. Judith Nolte, Vice President and Senior Counsel, Legal Department, Wells Fargo Bank, N.A., 111 Sutter Street, San Francisco CA 94163, conferred with the Pension and Welfare Benefits Administration and provided the estimated frequency of transactions under these class exemptions upon which the Department's cost and burden hour estimates are based.

10. Confidentiality

No information is required to be sent to the government under the conditions of the class exemptions; therefore, this section is not applicable.

11. Questions of a Sensitive Nature

No sensitive questions are asked of fiduciaries utilizing the class exemptions.

12. Annualized Cost to the Federal Government

The information collection requirements contained in certain of these class exemptions will not result in costs to the government.

For reasons discussed in detail in item 13, the Department of Labor anticipates that the adoption of these class exemptions for FERSA purposes will not result (under prevailing circumstances) in any actual burden hours imposed on the public. Consequently, the Department does not anticipate that there will be any additional costs imposed on the public, unless there is a change in the current manner in which Thrift Savings Fund assets are invested.

13. Estimate of the Information Collection Burden

Under current circumstances, the adoption of these class exemptions for FERSA purposes will not result in any increased burden for the public, for the following reasons.

Presently, the FERS Thrift Investment Board has delegated investment authority to only one qualified plan asset manager: the Wells Fargo Bank, N.A. According to the bank's Vice President and Senior Legal Counsel, Wells Fargo's current practice is to invest these FERS assets in pooled investments funds, together with assets received from private pension plans for investment. Thus, while the addition of FERS assets to Wells Fargo's pooled investment funds may increase the size of any given investment transaction in which Wells Fargo engages, the total number of transactions engaged in by Wells Fargo would remain the same (according to counsel).

In the event that any of these pooled investment fund transactions necessitated that Wells Fargo utilize one of the class exemptions described, the information collection requirements under FERSA (if any) would be no greater than those under ERISA. Since Wells Fargo would already be subject to the same information collection under ERISA (by virtue of the participation of private pension plan assets in the pooled investment funds), no additional information would be necessary under FERSA.

Although the Department does not anticipate any change in circumstance for the immediate future, at some point it is possible—as a result of new investment practices that differ from

VOL 53 ISS 241 DEC 15 1988 UMI

those currently engaged in by Wells Fargo Bank (e.g., a second qualified plan asset manager is retained, or Wells Fargo establishes a separate investment fund for FERS assets that are not pooled with private pension plan assets)—that an increase in burden may occur. Therefore, the Department of Labor presumes that the adoption of these class exemptions for purposes of FERSA will result in a nominal burden increase of 1 burden hour annually, even though current practices would not give rise to any actual information collection burden.

14. Reason for Change in Burden

The change in burden is the result of a statutory enactment under FERSA (and subsequent technical corrections) which has created additional regulatory, oversight and enforcement authority and responsibilities in the Department of Labor.

This information collection burden does not appear as a separate item in the PWBA FY89 Information Collection Budget because the adoption of the class exemptions was only initiated in response to a public request.

15. Collection of Information for Statistical Use

This paperwork requirement is not a collection of information for statistical use; therefore, no statistical methods have been used.

NATIONAL SCIENCE FOUNDATION

Permit Application Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit application received under the Antarctic Conservation Act of 1978. Pub. L. 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF published regulations under the Antarctic Conservation Act of 1978 at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to the permit application by January 17, 1989. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESS: Comments should be addressed to Permit Office, Room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357–7934.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States Citizens. The Agreed measures, developed in 1964 by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations established such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest. Additional information was published in the **Federal Register** on June 21, 1988. The application received is as follows:

Applicant

William J.L. Sladen
P.O. Box 367
The Plains, VA 22171

Activity for Which Permit Requested

Take; Enter Site of Special Scientific Interest; Enter Specially Protected Area. The applicant requests permission to collect data on penguins (weights, sex, physiological condition) for a publication. He also requests permission to salvage dead specimens for educational purposes.

Location

Antarctic Peninsula Area

Dates

January–February 1989

Charles E. Myers,
Permit Office.

BILLING CODE 7555–01–M

Materials Submitted for OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting this notice of information collection that will affect the public.

Agency Clearance Officer: Herman G. Fleming, (202) 357–9520.

OMB Desk Officer: Written comments to: Office of Information and Regulatory Affairs, ATTN: Jim Houser, Desk Officer, OMB, 722 Jackson Place, Room 3208, NEOB, Washington, DC 20503.

Title: Evaluation of Presidential Young Investigators Program

Affected Public: Individuals.

Responses/Burden Hours: 2113 respondents; an average of 20 minutes each.

Abstract: In the last five fiscal years NSF has made 847 Presidential Young Investigator awards, a comparatively large five-year grants (with industry matching potential) made on the basis of nominations of "star" young faculty. NSF, OMB and Congress are interested in impact of the program on faculty retention, research productivity, academic-industry cooperation.

Dated: December 9, 1988.

Herman G. Fleming,
NSF Clearance Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–416]

Mississippi Power and Light Co. et al.; Issuance of Amendment to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 52 to Facility Operating License No. NPF–29, issued to Mississippi Power and Light Company, System Energy Resources, Inc., and South Mississippi Electric Power Association, which revised the Technical Specifications for the operation of the Grand Gulf Nuclear Station, Unit 1, located in Claiborne County, Mississippi. The amendment is effective as of the date of issuance.

The amendment changes the Technical Specifications by separating the 24-hour surveillance test of emergency diesel generators from the surveillance test simulating loss of offsite power in conjunction with an ECCS acutation signal.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 25, 1988 (53 FR 32487). No request for a hearing or petition for

leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the Environmental Assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action see: (1) The application for amendment dated July 26, 1988, (2) Amendment No. 52 to License No. NPF-29, and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555 and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154. A copy of items (2) and (3) may be obtained upon request, addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects I/II.

Dated at Rockville, Maryland this 6th day of December 1988.

For the Nuclear Regulatory Commission

Elinor G. Adensam,

Director, Project Directorate II-1, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-416]

Mississippi Power and Light Co. et al.; Issuance of Amendment to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 53 to Facility Operating License No. NPF-29, issued to Mississippi Power and Light Company, System Energy Resources, Inc., and South Mississippi Electric Power Association, which revised the Technical Specifications for the operation of the Grand Gulf Nuclear Station, Unit 1, located in Claiborne County, Mississippi. The amendment is effective as of the date of issuance.

The amendment changes the Technical Specifications by separating the 24-hour surveillance test of emergency diesel generators from the surveillance test simulating loss of outside power in conjunction with an ECCS acutation signal.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on August 25, 1988 (53 FR 32487). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the Environmental Assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment.

For further details with respect to the action see: (1) The application for amendment dated July 1, 1988, (2) Amendment No. 53 to License No. NPF-29, and (3) the Commission's related Safety Evaluation and Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555 and at the Hinds Junior College, McLendon Library, Raymond, Mississippi 39154. BILLING CODE 7590-01-M

[Docket No. 50-309]

Maine Yankee Atomic Power Co.; Environmental Assessment and Finding of No Significant Impact

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-36 issued to Maine Yankee Atomic Power Company (the licensee), for operation of the Maine Yankee Atomic Power Station, located in Lincoln County, Maine.

Environmental Assessment

Identification of Proposed Action

The proposed amendment would modify Technical Specification 1.1, "Fuel Storage". Technical Specification 1.1 describes and defines those aspects of fuel storage which relate to the prevention of criticality in the fuel storage facility. The proposed amendment changes specification D from "Spent fuel shipping casks shall not be lifted over the spent fuel storage pool", to "Spent fuel shipping casks shall not be lifted over the spent fuel storage pool until all irradiated fuel within 10 rows of the cask laydown area has cooled a minimum of 60 days."

The proposed action is in accordance with the licensee's application for amendment dated November 8, 1988.

The Need for the Proposed Action

The proposed change to TS is required in order to permit the lifting of spent fuel shipping casks over the spent fuel storage pool once the irradiated fuel within 10 rows of the cask laydown area has cooled a minimum of 60 days.

Environmental Impacts of the Proposed Action

The Commission has completed its initial evaluation of the proposed revision to the Technical Specifications. The results are summarized below:

1. Any lift of a spent fuel shipping cask at Maine Yankee will be performed in accordance with the heavy load handling guidelines specified in NUREG-0612, Section 5.1.1, thus assuring an extremely low drop probability.

2. If a drop were to occur, and the shipping cask were to fall into the spent fuel pool, a maximum pool leak rate of 5 gpm has been conservatively calculated. The Chemical Volume Control System (CVCS) has borated water make-up capabilities much greater than the postulated leak rate (i.e., 150 gpm to 200 gpm).

3. Radiological analyses (which demonstrate that doses would be well within 10 CFR, Part 100 limits, i.e., less than 25 percent of the Part 100 limits) have been performed. The analyses determined that the anticipated release from 100 fuel assemblies (i.e., the shadow area of the largest available shipping cask) would not exceed the prescribed limits providing the spent fuel had decayed for 60 days.

4. A bounding criticality analysis, assuming 4.1 weight percent U-235, pool water at 68 °F and a 2-D infinite array,

has demonstrated that K_{eff} is less than .95 even under conditions of a collapsed flux trap and optimum lattice pitch, provided credit is taken for the 1,720 ppm soluble boron. This analysis bounds consolidated fuel assemblies.

5. The travel path for the spent fuel shipping cask will not pass over any safety-related equipment.

Accordingly, the Commission concludes that this proposed action would result in no significant radiological environment impact.

With regard to potential non-radiological impacts, the proposed change to the Technical Specification involves systems located within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no significant non-radiological environmental impacts.

The Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on December 8, 1988 (53 FR 49619). No request for hearing or petition for leave to intervene was filed following this notice.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the requested amendment. This would not reduce environmental impacts of plant operation and would result in reduced operational flexibility.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement for the Maine Yankee Atomic Power Station dated July 1972.

Agencies and Persons Consulted

The NRC staff has reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for the amendment dated November 8, 1988, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the Local Public Document Room, Wiscasset Library, High Street, P.O. Box 367, Wiscasset, ME 04578.

Dated at Rockville, Maryland, this 8th day of December, 1988.

For the Nuclear Regulatory Commission.

Richard H. Wessman,

Director, Project Directorate I–3, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 88–28868; Filed 12–14–88; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–424]

Georgia Power Co. et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–68, issued to Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and City of Dalton, Georgia (the licensee), for operation of the Vogtle Electric Generating Plant, Unit 1, located in Burke County, Georgia.

The licensee proposes to amend Technical Specifications (TS) Sections 4.8.1.1.2.a.4, 4.8.1.1.2.g.1, 4.8.1.1.2.h.5, and 4.8.1.1.2.h.7 which require that diesel generator voltage be within a specified range, 4160, +170, −410 volts, during surveillance testing. The proposed change would raise the minimum voltage for tests not requiring circuit breaker closure to ensure that the generator "ready-to-load" condition is met during surveillance.

The minimum voltage currently required by TS 4.8.1.1.2, based on worst-case loading of the diesel generators, is 3750 volts. Before a diesel generator can be loaded, however, a ready-to-load interlock must be satisfied. This interlock, internal to the diesel generator package, initiates diesel generator circuit breaker closure and acts as a signal from the diesel generator that it is ready to accept load. It has been set by the manufacturer at a voltage of 4025 volts.

The intent of these surveillance requirements is to ensure that a component will respond as required in an accident situation. The tests requiring measurement of diesel generator voltage with the breaker closed are acceptable as written, since the allowable voltage range was determined for loaded conditions. The tests which require voltage measurement with the breaker open need to be revised, because a reading between 3750 and 4025 volts, while meeting test acceptance criteria, would not satisfy the ready-to-load condition. The licensee is, therefore, proposing to raise the minimum allowable voltage in the TS for those tests not requiring breaker closure to 4025 volts (i.e., 4160 −135 volts). The licensee's application for amendment was dated December 6, 1988.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed changes in the plant TS in accordance with the standards of 10 CFR 50.92(c) and has determined that operation of Vogtle, Unit 1, in accordance with these changes would not

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change would raise the minimum required voltage for diesel generator surveillance tests where the generator circuit breaker is open. The change would not affect the method in which testing will be performed. It would merely revise one of the acceptance criteria to a more conservative value. The change would not involve any physical alteration of the plant, setpoint change, or change to an operating parameter. Since the change would not affect plant equipment involved in the initiation or mitigation of previously evaluated accidents, the probability or consequences of such accidents would not be increased.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated. The change would not introduce any new equipment into the plant or require any

existing equipment to be operated in a different manner from which it was designed to operate. Since the change would not create a new failure mode, a new or different type of accident would not be possible.

(3) Involve a significant reduction in a margin of safety. The change would not affect safety limits or limiting safety system settings. Surveillance testing of the diesel generators would continue to satisfy the basis of Technical Specification 3/4.8.1. Raising the minimum required voltage for unloaded diesel generator surveillance would assure that the ready-to-load condition is satisfied during testing. The change would reduce the probability of diesel generator degradation going undetected, hence margins of safety would not be reduced.

The NRC staff believes that the proposed changes to the Technical Specifications meet the criteria specified in 10 CFR 50.92(c), and hence, proposes to determine that they involve no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P–216, Phillips Building, 7920, Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene are discussed below.

By January 17, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rule of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no signficant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–800–325–6000 (in Missouri 1–800–342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to David B. Matthews: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Chandler Building, Suite 1400, 127 Peachtree

Street, NE., Atlanta, Georgia 30043, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i) through (v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Burke County Public Library, 412 Fourth Street, Waynesboro, Georgia 30830.

Dated at Rockville, Maryland, this 9th day of December 1988.

For the Nuclear Regulatory Commission.

Jon B. Hopkins,

Project Manager Project Directorate II-3 Division of Reactor Projects I/II Office of the Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Dockets Nos. 50-315 and 50-316]

Indiana Michigan Power Co.; Issuance of Amendments to Facility Operating Licenses

The United States Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 119 and 105 to Facility Operating Licenses Nos. DPR-58 and DPR-74, issued to the Indiana Michigan Power Company (the licensee), which revised the Technical Specifications (TSs) for operation of the Donald C. Cook Nuclear Plant, Units Nos. 1 and 2, located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

These amendments revise the TSs to make them more consistent with NRC guidelines concerning obtaining milk samples for analysis. In addition, the TS bases change to be more consistent with the Westinghouse Standard TSs with regard to the thyroid dose release pathway for a child, and an editorial error is corrected by removing redundant < signs.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commissioner's rules and regulations. The Commission has made appropriate findings, as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Hearing in connection with this action was published in the **Federal Register** on July 14, 1988 (53 FR 26695). No request for hearing or petition to intervene was filed following this notice.

Also in connection with this action, the Commission prepared an Environmental Assessment and Finding of No Significant Impact which was published in the **Federal Register** on November 16, 1988, at 53 FR 46132.

For further details with respect to this action, see (1) the application for amendments dated February 1, 1988, (2) Amendment Nos. 119 and 105 to Licenses Nos. DPR-58 and DPR-74, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555, and at the Maude Preston Palenski Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V, and Special Projects.

Dated at Rockville, Maryland, this 6th day of December 1988.

For the Nuclear Regulatory Commission.

Wayne Scott,

Project Manager, Project Directorate III-1, Division of Reactor Projects—III, IV, V & Special Projects.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Request for Approval of SF 2800 Submitted to OMB for Clearance

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request to extend an information collection from the public. SF 2800, Application for Death Benefits, under the Civil Service Retirement System, is completed by the survivor of an employee, former employee, or annuitant who believes he/she is eligible for death benefits. These are two types of death benefits: Survivor annuity benefits and lump sum payments. These benefits cannot be paid unless application for the benefits is made to the Office of Personnel Management. Annual use by these individuals is estimated at 57,000. The estimated average burden per respondent is 30 minutes for a total annual burden of 28,500 hours. For copies of this proposal, call Lawrence F. Dambrose on (202) 632-0199.

DATE: Comments on this proposal should be received on or before December 29, 1988.

ADDRESSES: Send or deliver comments to—

C. Ronald Trueworthy, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, NW., Room 6410, Washington, DC 20415.

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Managment and Budget, New Executive Office Building, NW., Room 3235, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: James L. Bryson, (202) 632-5472.

U.S. Office of Personnel Management.

Constance Horner,

Director.

BILLING CODE 6325-01-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC-16685; (812-7103)]

Structured Asset Funding Corporation; Application

December 8, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for an amended order under the Investment Company Act of 1940 (the "1940 Act").

Applicant: Structured Asset Funding Corporation ("Depositor") (formerly E.F. Hutton Mortgage Capital Inc.) and certain trusts ("Trusts") created by the Depositor (collectively as "Applicant").

Relevant 1940 Act Section: Exemption requested under Section 6(c) from all provisions of the 1940 Act.

Summary of Application: The Applicant seeks an order amending an existing order (Investment Company Act Release No. 15694, April 21, 1987), and exempting the Depositor and certain Trusts that it may create from all provisions of the 1940 Act in connection with their issuance of collateralized mortgage obligations and sale of residual interests.

Filing Dates: The application was filed on August 8, 1988, amended on October 19, November 17 and December 8, and a letter was submitted on November 23, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on December 29, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549; Applicant, 3131 One Main Place, Dallas, TX 75270.

FOR FURTHER INFORMATION CONTACT: James E. Banks, Staff Attorney (202) 272–2190, or Brion R. Thompson, Branch Chief (202) 272–3016 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. The Depositor is an indirect, wholly-owned, limited-purpose financing subsidiary of Shearson Lehman Hutton Inc., a Delaware corporation. The Depositor was organized for certain limited purposes, including issuing one or more series of collateralized mortgage, and serving as the depositor of existing or future Trusts which will issue one or more series of Bonds and sell the beneficial interests therein. The Depositor will also invest in certain mortgage certificates (the "Mortgage Certificates") which will be used to collateralize the Bonds.

2. The Mortgage Certificates will consist of (1) "fully-modified" pass-through mortgage-backed certificates guaranteed by the Government National Mortgage Association ("GNMA Certificates"), (2) mortgage participation certificates issued by the Federal Home Loan Mortgage Corporation ("FHLMC Certificates"), and (3) guaranteed mortgage pass-through securities issued by the Federal National Mortgage Association ("FNMA Certificates"). In addition to the Mortgage Certificates directly securing the Bonds, a series may have additional collateral which may include certain collection accounts and reserve funds as specified in the related indenture.

3. In connection with the acquisition of E.F. Hutton Group Inc., the Applicant's former parent, by Shearson Lehman Hutton Inc. (formerly Shearson Lehman Brothers Inc.), the Applicant requests an order amending its prior order to (i) change its name and the identity of its parent, (ii) change the name of the variable rate Bonds to "Floating Interest Rate Short Tranche Securities" ("FIRSTS"), and (iii) change references in the limitations on future ownership of the Applicant's stock to Shearson Lehman Hutton Inc. or an affiliate of Shearson Lehman Hutton Inc.

4. Each Trust will be established under a separate deposit trust agreement (the "Deposit Trust Agreement") between the Depositor and a bank or trust company or other fiduciary acting as owner-trustee ("Owner Trustee"). Applicant will issue one or more series of Bonds under the terms of a trust indenture (the "Indenture") between the Depositor (the Owner Trustee in the case of a Trust) and an independent trustee ("Trustee"), as supplemented by one or more series supplements. The Indenture will be qualified under the Trust Indenture Act of 1939 unless an appropriate exemption is available.

5. In the case of each series of Bonds: (a) The Applicant will hold no substantial assets other than the Mortgage Certificates; (b) the Bonds will be secured by Mortgage Certificates having collateral value determined under the Indenture, at the time of issuance and following each payment date, equal to or greater than the outstanding principal balance of the Bonds; (c) distributions of principal and interest received on the Mortgage Certificates securing the Bonds and any applicable reserve funds, plus reinvestment income thereon, will be sufficient to pay all interest on the Bonds and to retire each class of Bonds by its stated maturity; and (d) the Mortgage Certificates will be assigned to the Trustee and will be subject to the lien of the related Indenture.

6. In addition to the issuance and sale of the Bonds, Applicant intends to sell the residual interests representing rights to receive excess cash flows under the conditions listed below. The Applicant will own all excess cash flows not required to pay principal of and interest on the Bonds. However, the Applicant may sell the residual interests in the right to receive such excess cash flows. If Bonds are issued by the Depositor directly rather than through a Trust, the Indenture will provide that excess cash flows that are not used to pay amounts due on the Bonds will be paid directly by the Trustee, after payment of expenses under the Indenture, to holders of residual interest certificates authorized under the Indenture. Such certificates represent beneficial ownership of the excess cash flows. If Bonds are issued by a Trust, excess cash flows will be released from the lien of the Indenture and remitted, net of expenses of the Trust to the owners of the certificates of beneficial interest in the Trusts. (For a more complete description of the Bonds and the residual interests, see the application).

Applicant's Legal Conclusion

1. The requested order is necessary and appropriate in the public interest because: (a) The Applicant should not be deemed to be an entity to which the provisions of the 1940 Act were intended to be applied; (b) the Applicant may be unable to proceed with its proposed activities if the uncertainties concerning the applicability of the 1940 Act are not removed; (c) the Applicant's activities are intended to serve a recognized and critical public need; (d) granting of the requested order will be consistent with the protection of investors because they will be protected during the offering and sale of the Bonds by the registration or exemption provisions of the 1933 Act and thereafter by the Trustee representing their interests under the Indenture; and (e) the residual interests will be held entirely by the Applicant or offered only to a limited number of sophisticated institutional investors through private placements.

Applicant's Conditions

Applicant agrees that if an order is granted it will be expressly conditioned on the following conditions:

A. Conditions Relating to the Bonds

(1) Each series of Bonds will be registered under the Securities Act of 1933, as amended (the "1933 Act"), unless offered in a transaction exempt from registration pursuant to section 4(2) of the 1933 Act.

(2) The Bonds will be "mortgage related securities" within the meaning of section 3(a)(41) of the Securities Exchange Act of 1934, as amended. The mortgage collateral directly securing the Bonds will be limited to the Mortgage Certificates.

(3) If new Mortgage Certificates are substituted, the substitute Mortgage Certificates will: (i) Be of equal or better quality than the Mortgage Certificates replaced; (ii) have similar payment terms and cash flow as the Mortgage Certificates replaced; (iii) be insured or guaranteed to the same extent as the Mortgage Certificates replaced; and (iv) meet the conditions set forth in paragraphs (2), and (5). In addition, new Mortgage Certificates may not be substituted for more than 40% of the aggregate face amount of the Mortgage Certificates initially pledged as mortgage collateral. In no event may any new Mortgage Certificates be substituted for any substitute Mortgage Certificates.

(4) Without the written consent of each Bondholder to be affected, neither the Applicant nor the holders of any residual interests in any series of Bonds will be able to impair or adversely affect the Mortgage Certificates securing such series (including, without limitation, selling the Mortgage Certificates while a series of Bonds remains outstanding).

(5) All Mortgage Certificates, funds, accounts or other collateral securing a series of Bonds ("Collateral") will be held by a Trustee, or on behalf of a Trustee by an independent custodian. Neither the Trustee nor the custodian may not be an affiliate (as the term "affiliate" is defined in Rule 405 under the 1933 Act, 17 CFR 230.405) of the Applicant. The Collateral pledged to the Trustee will be registered in the name of the Trustee or its nominee, and the Trustee will be provided with a first priority perfected security or lien interest in and to all Collateral.

(6) Each series of Bonds will be rated in one of the two highest bond rating categories by at least one nationally recognized statistical rating agency that is not affiliated with the Applicant. The Bonds will not be considered "redeemable securities" within the meaning of section 2(a)(32) of the 1940 Act.

(7) So long as applicable law requires, no less often than annually, an independent public accountant will audit the books and records of the Applicant and, in addition, will report on whether the anticipated payments of principal and interest on the Mortgage Certificates continue to be adequate to pay the principal and interest on the Bonds in accordance with their terms. Upon completion, copies of the auditor's reports will be provided to the Trustee.

B. Conditions Relating to FIRSTS

(1) Each Class of FIRSTS will have a set maximum interest rate (an interest rate cap) which, in each case, may vary from period to period.

(2) At the time of the deposit of the Collateral securing a series of Bonds with the Trustee, as well as during the life of such series of Bonds, the scheduled payments of principal and interest to be received by the Trustee on all Mortgage Certificates pledged to secure the Bonds of such series, plus reinvestment income thereon, and funds, if any, pledged to secure the Bonds will be sufficient to make all payments of principal and interest on the Bonds then outstanding, assuming the maximum interest rate for each specified period on each class of FIRSTS.[1] Such Collateral will be paid down as the mortgages underlying the Mortgage Certificates are repaid, but will not be released from the lien of the Indenture prior to the payment of the Bonds, except as permitted by the Indenture.

C. Conditions Relating to REMIC Election

(1) The election by the Applicant to treat the arrangement by which the Collateral secures a series of Bonds as a real estate mortgage investment conduit ("REMIC") will have no significant effect on the level of the expenses that would be incurred by the REMIC. In the event of such REMIC election, the Applicant will provide for the payments of administrative fees and expenses as set forth in the application in a manner satisfactory to the agency or agencies rating the Bonds. The Applicant will ensure that the anticipated level of fees and expenses will be adequately provided for regardless of which method described in the application to provide for the payment of such fees and expenses is selected.

D. Conditions Relating to the Sale of the Residual Interests

(1) Notwithstanding the sale of residual interests in excess cash flows, all of the Depositor's outstanding stock will continue to be owned by Shearson Lehman Hutton Inc. or an affiliate of Shearson Lehman Hutton Inc.

(2) Sales of the residual interests will be made only to a limited number, but in no event more than 100, of sophisticated institutional investors in transactions exempt from the registration requirements of the 1933 Act, pursuant to section 4(2) thereof. Such institutional investors may include, but are not limited to commercial and investment banks, mortgage lenders, savings and loan associations, employee benefit plans, insurance companies, real estate investment trusts, pension plans, mutual funds or other institutions that customarily engage in the purchase of mortgages and other types of mortgage collateral ("Eligible Institutions"). Each mutual fund purchasing a residual interest will be required to satisfy itself that any such purchase will comply with the provisions of section 12(d)(1) of the 1940 Act or any order of the Commission exempting such mutual fund from such provision in connection with any such purchase. Eligible Institutions will have such knowledge and experience in financial and business matters as to be capable of evaluating the risk and volatility of interest rate fluctuations as they affect the value of mortgages, mortgage-related securities and residual interests in mortgage-related securities. The subsequent transfer of the residual interests will also be limited to private placements to such Eligible Institutions. Each Eligible Institution (other than a firm engaged in investment banking, mortgage banking or commercial banking or dealing in mortgage-related securities through which such interests are sold to Eligible Institutions) will be required to represent that it is purchasing such residual interests for investment purposes only and that it will hold such residual interests in its own name and not as nominee for undisclosed investors. The Indenture related to the Bonds or the Deposit Trust Agreement, as applicable, relating to any Trust will further prohibit the transfer of any certificates for such residual interests if there would be more than 100 owners of such certificates at any time.

(3) No holder of a controlling interest in the Applicant (as the term "control" is defined in Rule 405 under the 1933 Act), will be affiliated with either (a) any custodian which may hold the Collateral on behalf of the Trustee or (b) any nationally recognized statistical rating agency rating the Bonds. Neither the Applicant nor the owners of the residual interests will be affiliated with the Trustee.

[1] In the case of a series of Bonds that contains a class or classes of FIRSTS, a number of mechanisms exist to ensure that the representations above will be valid notwithstanding subsequent potential increases in the interest rate applicable to the FIRSTS. Procedures that have been identified to date for achieving this result are described in the application. It is expected that other mechanisms may be identified in the future. The Applicant will promptly notify the SEC by letter of the use of such additional mechanisms, and shall give the SEC reasonable opportunity to raise any questions as to the appropriateness of their use. In all cases, these mechanisms will be adequate to ensure the accuracy of the representations set forth in the application. No Bonds will be issued for which this is not the case.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Information Collection Under Review by the Office of Management and Budget (OMB)

AGENCY: Tennessee Valley Authority.

ACTION: Information collection under review by the Office of Management and Budget (OMB).

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), as amended by Pub. L. 99-591.

Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be directed to the Agency Clearance Officer and also to the Desk Officer for the Tennessee Valley Authority, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Telephone: (202) 395-3084.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 100 Lupton Building, Chattanooga, TN 37401; (615) 751-2523.

Type of Request: Regular submission.

Title of Information Collection: Power Distributors Monthly Report to TVA.

Frequency of Use: Monthly.

Type of Affected Public: Businesses or other for-profit and small businesses or organizations.

Small Businesses or Organizations Affected: Yes.

Federal Budget Functional Category Code: 721.

Estimated Number of Annual Responses: 1920.

Estimated Total Annual Burden Hours: 960.

Estimated Average Burden Hours Per Response: .5.

Need For and Use of Information: This monthly collection supplies TVA with financial information to assist in making timely management decisions on electric power rates, finances, and other long- and short-term plans.

John W. Thompson,

Vice President, Services, Senior Agency Official.

BILLING CODE 8120-01-M

DEPARTMENT OF TRANSPORTATION

[Docket 37554]

Order Adjusting the Standard Foreign Fare Level Index

The International Air Transportation Competition Act (IATCA), Pub. L. 96-192, requires that the Department, as successor to the Civil Aeronautics Board, establish a Standard Foreign Fare Level (SFFL) by adjusting the SFFL base periodically be percentage changes in actual operating costs per available seat-mile. Order 80-2-69 established the first interim SFFL and Order 88-10-14 set the currently effective two-month SFFL applicable through November 30, 1988.

In establishing the SFFL for the two-month period beginning December 1, 1988, we have projected nonfuel costs based on the year ended September 30, 1988 data, and have determined fuel prices on the basis of the latest experienced monthly fuel cost levels as reported to the Department.

By Order 88-12-24 fares may be increased by the following factors over the October 1, 1979, level:

Atlantic	1.1771
Latin American	1.2335
Pacific	1.6155
Canada	1.2377

FOR FURTHER INFORMATION CONTACT: Keith A. Shangraw (202) 366-2439 or Julien R. Schrenk (202) 366-2441.

By the Department of Transportation December 9, 1988.

Gregory S. Dole,

Assistant Secretary for Policy and International Affairs.

Coast Guard

[CGD-8-110]

Public Hearing Concerning the Pascagoula Railroad Bridge Across the Pascagoula River, Mile 1.5, at Pascagoula, MS

AGENCY: Coast Guard, DOT.

ACTION: Notice of public hearing.

SUMMARY: Notice is hereby given that the Commandant has authorized a public hearing to be held by the Commander, Eighth Coast Guard District, at Pascagoula, Mississippi. The purpose for the hearing is to provide an opportunity to all interested persons to present data, views and comments orally or in writing concerning the alteration of the railroad bridge across the Pascagoula River, mile 1.5, at Pascagoula, Mississippi.

DATE: February 16, 1989, commencing at 2:00 p.m., until all speakers in attendance wishing to comment have provided comments.

ADDRESS: The hearing will be held at the Jackson County Courthouse, Board of Supervisors Room, 3109 Canty Street, Pascagoula, Mississippi 39561.

FOR FURTHER INFORMATION CONTACT: Mr. Perry Haynes, Eighth Coast Guard District, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 10130–3396, (504) 589–2965.

SUPPLEMENTARY INFORMATION: Section 18 of Pub. L. 100–448 declared the bridge to be an unreasonable obstruction to be altered under the Truman-Hobbs Act. All interested parties shall have full opportunity to be heard and to present evidence as to what alterations are needed; giving due consideration to the necessities of free and unobstructed navigation, the necessities of land traffic and environmental concerns.

Any person who wishes may appear and be heard at this public hearing. Persons planning to appear and be heard are requested to notify the Commander, Eighth Coast Guard District, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 10130–3396, (504) 589–2965, any time prior to the hearing, indicating the amount of time required. Depending upon the number of scheduled statements, it may be necessary to limit the amount of time allocated to each person. Any limitations of time allocated will be announced at the beginning of the hearing. Written statements and exhibits may be submitted in place of or in addition to oral statements and will be made a part of the hearing record. Such written statements and exhibits may be delivered at the hearing or mailed in advance to the Commander, Eighth Coast Guard District, at the above address. Transcripts of the hearing will be made available for purchase upon request.

(33 U.S.C. 513; 33 CFR 116.20)

Dated: December 6, 1988.

Robert T. Nelson,

Real Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

Houston/Galveston Navigation Safety Advisory Committee; Inshore Waterway Management Subcommittee Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of the Inshore Waterway Management Subcommittee of the Houston/Galveston Navigation Safety Advisory Committee. The meeting will be held on Thursday, January 5, 1989 at Coast Guard Base Galveston, 1 Ferry Road, Galveston, Texas. The meeting is scheduled to begin at 9:00 a.m. and end at 10:30 a.m. The agenda for the meeting consists of the following items:

1. Call to order.

2. Discussion of previous recommendations made by the full Advisory Committee and the Inshore Waterway Management Subcommittee.

3. Presentation of any additional new items for consideration to the Subcommittee.

4. Adjournment.

Attendance is open to the public. With advance notice, members of the public may present oral statements at the meeting. Prior to presentation of their oral statements, but no later than the day before the meeting, members of the public shall submit, in writing, to the Executive Secretary of the Houston/Galveston Navigation Safety Advisory Committee, the subject of their comments, a general outline signed by the presenter, and the estimated time required for presentation. Individuals making the presentation shall also provide their name, address, and, if applicable, the organization they are representing. Any member of the public may present a written statement to the Advisory Committee at any time.

Additional information may be obtained from Commander G. A. Bird, USCG, Executive Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (oan), Room 1141, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130–3396, telephone number (504) 589–6234.

Dated: December 5, 1988.

A.E. Henn,

Captain, U.S. Coast Guard, Acting Commander, 8th Coast Guard District.

Houston/Galveston Navigation Safety Advisory Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of the nineteenth meeting of the Houston/Galveston Navigation Safety Advisory Committee. The meeting will be held on Thursday, January 26, 1989 in the conference room of the Houston Pilots Office, 8150 South Loop East, Houston, Texas. The meeting is scheduled to begin at approximately 9:30 a.m. and end at approximately 1:00 p.m. The agenda for the meeting consists of the following items:

1. Call to order.

2. Presentation of the minutes of the Inshore and Offshore Waterways Subcommittees and discussion of recommendations.

3. Discussion of previous recommendations made by the Committee.

4. Presentation of any additional new items for consideration of the Committee.

5. Adjournment.

The purpose of this Advisory Committee is to provide recommendations and guidance to the Commander, Eighth Coast Guard District on navigation safety matters affecting the Houston/Galveston area.

Attendance is open to the public. Members of the public may present written or oral statements at the meeting.

Additional information may be obtained from Commander G.A. Bird, USCG, Executive Secretary, Houston/Galveston Navigation Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (oan), Room 1141, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130–3396, telephone number (504) 589–6234.

Dated: December 5, 1988.

A.E. Henn,

Captain, U.S. Coast Guard, Acting Commander, 8th Coast Guard District.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: December 9, 1988.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed on the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545-0065.

Form Number: 4070, 4070PR, 4070-A, and 4070A-PR.

Type of Review: Extension.

Title: Employee's Report of Tips to Employer, Informe al Patrono de Propinas Recibidas por el Empleado; Employee's Daily Record of Tips, Registro Diario de Propinas Recibidas por el Empleado.

Description: Employees receiving at least $20 a month in tips must report the tips to their employers monthly for purposes of permitting employment taxes to be withheld. Forms 4070 and 4070PR (Puerto Rico only) are used for this purpose. Employees must maintain a daily record of tips received. Forms 4070-A and 4070A-PR (Puerto Rico only) are used for this purpose.

Estimated Number of Respondents: 525,000.

Estimated Burden Hours Per Response/Recordkeeping:

	4070	4070A	4070PR	4070A-PR
Recordkeeping	7 min	3 hours 23 min	7 min	3 hours 23 min
Learning about the law or the form	2 min	2 min	2 min	1 min
Preparing the form	8 min	69 min	8 min	56 min
Copying, assembling, and sending the form	10 min		10 min	

Frequency of Response: Monthly.

Estimated Total Recordkeeping/Reporting Burden: 31,497,000 hours.

Clearance Officer: Garrick Shear, (202) 535-4297, Internal Revenue

BILLING CODE 4810–25–M

Fiscal Service

Bureau of the Public Debt; Privacy Act of 1974; Computer Matching Program; Bureau of the Public Debt/Social Security Administration

AGENCY: Fiscal Service, Bureau of the Public Debt, Treasury.

ACTION: Notice of Matching Program—Department of the Treasury, Bureau of the Public Debt with Department of Health and Human Services, Social Security Administration.

SUMMARY: The Department of the Treasury, Bureau of the Public Debt, is providing notice of its plans to conduct a computer match of its records of ownership of United States Savings Bonds, Series E and EE, with Department of Health and Human Services, Social Security Administration, records of individuals who receive benefits under the Supplemental Security Income Program. This information is contained in systems of records subject to the provisions of the Privacy Act of 1974.

DATE: The match is expected to be completed early in 1989.

ADDRESS: Send any comments to Volney M. Taylor, Information Officer, Bureau of the Public Debt, E Street Building, Room 553, Washington, DC 20239–0001. Copies of all written comments will be available for public inspection and copying at the Treasury Department Library, Room 5030, Main Treasury Building, Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Volney M. Taylor, Information Officer, (202) 376–4300.

SUPPLEMENTARY INFORMATION: The Social Security Administration (SSA) requires information for purposes of verifying eligibility for, and amount of, Supplemental Security Income benefits (SSI). The Bureau of the Public Debt (BPD) has agreed to provide information by acting as a matching agency for a computer match that will compare its savings bond registration records for United States Savings Bonds, Series E and EE, against SSA records of individuals who receive SSI benefits. The disclosure of data through the match will provide SSA with information necessary to verify the accuracy of eligibility factors for the SSI program. This match and any follow up matches will be conducted as further described in the "Report" below.

Set forth below is the information regarding the matching program, including the authority for the program, a description of the matching program, a description of the records to be matched, the projected start and ending dates of the matching program, the security safeguards to be used, and plans for disposition of the records, that is required by paragraph 5.f.(1) of the Revised Supplemental Guidance for Conducting Computer Matching Programs issued by the Office of Management and Budget, (47 FR 21656, May 19, 1982). A copy of this notice has been provided to both Houses of Congress and the Office of Management and Budget.

Report of a Matching Program: Bureau of the Public Debt With the Social Security Administration

a. *Authority:* Section 1631(f) of the Social Security Act (42 U.S.C. 1383(f)).

b. *Program Description:* Under this program, BPD will conduct the following match. SSA will provide BPD with magnetic tape from SSA's system of records on individuals receiving Supplemental Security Income Benefits (SSI). The tape will contain identifying data including Social Security number (SSN) for approximately 4.8 million individuals currently receiving benefits. The magnetic tape will be IBM compatible and will adhere to the characteristics and data format requirements agreed upon by both parties. Using the SSNs provided by SSA, BPD will match the data on the magnetic tape against BPD's registration data for United States Savings Bonds, Series E and EE (Treasury/BPD.002, United States Savings-Type Securities). For those social security numbers common to both tapes (hits), BPD will provide to SSA the following information: For each SSN that shows a bond registered to it, BPD will provide the denomination, serial number, issue date, and current redemption value of the bond.

The validity of the information will be verified by SSA by contacting the individual under whose SSN the bond is registered to confirm ownership. In the event that the individual disputes ownership, SSA will obtain a signed authorization from the individual to obtain additional information concerning the bond's registration.

c. *Description of the Records:* Each match under this program will compare the records within the BPD's savings bond records (Treasury/BPD.002, United States Savings-Type Securities (most recently published in 53 FR 6471, March 1, 1988)). Disclosure of information for purposes of this program is authorized by that system's routine use number 15 (published in 53 FR 1885, January 22, 1988).

d. *Projected Starting and Ending Dates:* The initial match will be a single one in fiscal year 1989 and is expected to be initiated before the end of 1988 and completed shortly thereafter. The agreement between SSA and BPD may be renewed each year and, if done, future matches will be conducted as described in this report.

e. *Security Safeguards:* (1) Access to the information will be restricted to only those authorized employees and officials who need it to perform their official duties in connection with the uses authorized under the agreement signed by BPD and SSA; (2) information exchanged between SSA and BPD will be stored by each agency in rooms with controlled access and which are locked when authorized personnel are not present; (3) the information will be processed under the immediate supervision and control of authorized personnel in a manner which will protect the confidentiality of the information, and in such a way that unauthorized persons cannot retrieve the information by means of a computer, remote terminal, or other means; and (4) all personnel who will have access to the information will be advised of the confidential nature of the information, the safeguards required to protect the information, and the civil and criminal sanctions for noncompliance contained in the applicable Federal and State laws.

f. *Plans for Disposition of Records:* Magnetic tapes provided by SSA will be returned to SSA upon completion of the match. Information provided to SSA by BPD will only be for those items which match and will be used by SSA only for the purpose of determining eligibility for benefits as provided in the agreement and for no other purpose. BPD will retain one copy of the information provided to SSA as its record of disclosure as required by the Privacy Act of 1974, as amended. SSA will dispose of records provided to it as provided in its records disposition schedules for the SSI benefits program. The tapes provided shall remain the property of SSA and shall be returned when the match is completed. The BPD will retain one copy of the information

provided to SSA as its record of disclosure as required by the Privacy Act of 1974.

g. *Other Comments:* No changes will be made to an individual's eligibility for benefits or payments solely on the basis of a "hit." No changes will be made to an individual's eligibility for, or amount of benefits, without SSA first providing due process to the individual concerned.

Jill E. Kent,

Assistant Secretary of the Treasury (Management).

BILLING CODE 4810-40-M

[Dept. Circ. 570, 1988 Rev., Supp. No. 5]

Surety Companies Acceptable on Federal Bonds: Integrity Mutual Insurance Co.

A Certificate of Authority as an acceptable surety on Federal bonds is hereby issued to the following company under sections 9304 to 9308, Title 31, of the United States Code. Federal bond-approving officers should annotate their reference copies of the Treasury Circular 570, 1988 Revision, on page 25066 to reflect this addition:

INTEGRITY MUTUAL INSURANCE COMPANY. Business Address: 526 West Wisconsin Avenue, Appleton, Wisconsin 54912-0539. Underwriting Limitation *b/*: *$583,000.* Surety Licenses *c/*: MN, WI. Incorporated in: Wisconsin.

Certificates of Authority expire on June 30 each year, unless revoked prior to that date. The Certificates are subject to subsequent annual renewal as long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1 in Treasury Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information.

Copies of the Circular may be obtained from the Surety Bond Branch, Finance Division, Financial Management Service, Department of the Treasury, Washington, DC 20227, telephone (202) 287-3921.

Mitchell A. Levine,

Assistant Commissioner, Comptroller, Financial Management Service.

Dated: December 10, 1988.

BILLING CODE 4810-35-M

Surety Company Application and Renewal Fees; Increase in Fees Imposed

The Department of the Treasury, Financial Management Service, will be increasing the fees imposed and collected as referred to in 31 CFR 223.22. This increase is to cover costs incurred by the Government for services performed relative to qualifying corporate sureties to write Federal business.

The new fees are effective December 31, 1988, and are determined in accordance with the Office of Management and Budget Circular A-25, as amended. The increase in fees is the result of a thorough analysis of costs associated with the Surety Bond Branch.

Revenues collected in fiscal year 1988 fell short of covering actual costs due to an increase in full-time personnel. In addition, we have projected increased expenses for fiscal year 1989 to allow for continued computerization efforts.

The new rate schedule is as follows:

(1) Examination of a company's application for a Certificate of Authority as an acceptable surety or as an acceptable reinsuring company on Federal bonds—$2,500.

(2) Determination of a company's continued qualification for annual renewal of its Certificate of Authority—$1,250.

(3) Examination of a company's application for recognition as an Admitted Reinsurer (except on excess risks running to the United States)—$600.

(4) Determination of a company's continued qualification for annual renewal of its authority as an Admitted Reinsurer—$400.

Questions concerning this notice should be directed to the Surety Bond Branch, Finance Division, Financial Management Service, Department of the Treasury, Washington, DC 20227, Telephone (202) 287-3921.

Dated: December 10, 1988.

Mitchell A. Levine,

Assistant Commissioner, Comptroller.

14 CFR Part 71

[Airspace Docket No. 87-AWA-52]

Establishment of an Airport Radar Service Area; Colorado Springs, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action designates an Airport Radar Service Area (ARSA) at the City of Colorado Springs Municipal Airport, CO. The location designated is a public airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of this ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at this location will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

EFFECTIVE DATE: 0901 u.t.c. February 9, 1989.

FOR FURTHER INFORMATION CONTACT: Betty Harrison, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9254.

SUPPLEMENTARY INFORMATION:

History

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and the procedural aspects of the air traffic control (ATC) system. The FAA published NAR Recommendation 1-2.2.1, "Replace Terminal Radar Service Areas (TRSA) with Model B Airspace and Service (Airport Radar Service Areas)," in Notice 83-9 (48 FR 34286, July 28, 1983) proposing the establishment of ARSA's at Columbus, OH, and Austin, TX. Those locations were designated ARSA's by SFAR No. 45 (48 FR 50038, October 28, 1983) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis. The original expiration dates for SFAR 45, December 22, 1984, (Austin, TX) and January 19, 1985, (Columbus, OH) were extended to June 20, 1985 (49 FR 47176, November 30, 1984).

On March 6, 1985, the FAA adopted the NAR recommendation and amended Parts 71, 91, 103 and 105 of the Federal Aviation Regulations (14 CFR Parts 71, 91, 103 and 105) to establish the general definition and operating rules for an ARSA (50 FR 9252), and designated the Austin and Columbus airports as ARSA's, as well as the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250). Thus far, the FAA has designated 125 ARSA's as published in the **Federal Register** in the implementation of this NAR recommendation.

On January 11, 1988, the FAA proposed to designate ARSA's at Baton Rouge Metro Ryan Field, LA; Charleston Yeager Airport, WV; City of Colorado Springs Municipal Airport, CO; Palm Springs Municipal Airport, CA; and Santa Barbara Municipal Airport, CA (53 FR 674). Interested parties were invited to participate in this rulemaking proceeding by submitting comments on the proposal to the FAA. Additionally, the FAA has held informal airspace meetings on the establishment of the Colorado Springs, CO, ARSA. Section 71.501 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6D, dated January 4, 1988.

Discussion of Comments

Few comments were received concerning this rulemaking action. Original concerns expressed by the Department of Defense have been resolved and are encompassed in the final ARSA design.

The Meadow Lake Airport Association requested that the cutout around Meadow Lake Airport be extended from 2 to 2½ nautical miles. The FAA finds merit in this request and has extended the cutout by using visual landmarks which are more than 2½ miles from the airport reference point.

On commenter requested the floor of the 10-mile area be raised to 8,600 feet MSL to assist general aviation pilots in transitioning the Colorado Springs area. After careful study of the requested alteration, the FAA has decided to raise the floor of the 10-mile area north of highway 94 to 8,500 feet MSL, and the southern portion to 7,500 feet MSL. The FAA believes that the floor of the ARSA, as designed, represents the optimum configuration from an aviation safety perspective.

Other comments were received concerning the geographical design of the ARSA. Portions of the boundary of the Colorado Springs ARSA are depicted by visual landmarks as well as references to the geographical center of the airport.

Regulatory Evaluation Summary

The FAA has conducted a Regulatory Evaluation of this final rule to establish this additional ARSA site. The major findings of that evaluation are summarized below, and a copy of the detailed regulatory evaluation is available in the regulatory docket.

a. Costs

Costs which potentially could result from the establishment of additional ARSA sites fall into the following categories:

(1) Air traffic controller staffing, controller training, and facility equipment costs incurred by the FAA.

(2) Costs associated with the revision of charts, notification of the public, and pilot education.

(3) Additional operating costs for circumnavigating or flying over the ARSA.

(4) Potential delay costs resulting from operations within an ARSA rather than a TRSA.

(5) The need for some operators to purchase radio transceivers.

(6) Miscellaneous costs.

It has been the FAA's experience, however, that these potential costs do not materialize to any appreciable degree, and when they do occur, they are transitional, relatively low in magnitude, or attributable to specific implementation problems that have been experienced at a very small minority of ARSA sites. The reasons for these conclusions are presented below. The FAA expects that the additional ARSA sites in this rule can be implemented without requiring additional controller personnel above currently authorized staffing levels, due to participation at these TRSA locations, which is already quite high. Moreover, the reduced separation standards permitted in ARSA's will allow controllers to absorb the slight increase in participating traffic by handling all traffic much more efficiently. Further, since controller training will be conducted during normal working hours, and existing TRSA facilities already operate the necessary radar equipment, the FAA does not expect to incur any appreciable implementation costs. Essentially, the FAA will modify its terminal radar procedures at the proposed ARSA sites in a manner that will make more efficient use of existing resources.

No additional costs are expected to be incurred because of the need to revise sectional charts to remove TRSA airspace depictions and incorporate the new ARSA airspace boundaries.

Changes of this nature are routinely made during charting cycles, and the planned effective dates for newly established ARSA's are scheduled to coincide with the regular 6-month chart publication intervals.

This rulemaking proceeding and process will satisfy most of the need to notify the public and educate pilots about ARSA operations. The informal public meeting being held at each location where an ARSA is being proposed provides pilots with the best opportunity to learn both how an ARSA works and how it will affect their local operations. The expenses associated with these public meetings are considered costs attributable to the rulemaking process; however, any public information costs following establishment of a new ARSA are strictly attributable to the ARSA. The FAA expects to distribute a Letter to Airmen to all pilots residing within 50 miles of each ARSA site, explaining the operation and configuration of the ARSA finally adopted. The FAA also has issued an Advisory Circular on ARSA's. The combined Letter to Airmen and prorated Advisory Circular costs have been estimated to be approximately $500 for each ARSA site. This cost is incurred only once upon the initial establishment of an ARSA.

Information on ARSA's following the establishment of additional sites will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues and, therefore, will not involve additional costs strictly as a result of the ARSA program. Additionally, no significant costs are expected to be incurred as a result of the follow-on user meetings that will be held at each site following implementation of the ARSA. These meetings will allow users to provide feedback to the FAA on local ARSA operations. These meetings are being held at public or other facilities which are being provided free of charge or at nominal cost. Further, because these meetings are being conducted by local FAA facility personnel, no travel, per diem, or overtime costs will be incurred by regional or headquarters personnel.

The FAA anticipates that some pilots who currently transit a TRSA without establishing radio communications or participating in radar services may choose to circumnavigate the mandatory participation airspace of an ARSA rather than participate. Some minor delay costs will be incurred by these pilots because of the additional aircraft variable operating cost and lost crew and passenger time resulting from the deviation. Other pilots may elect to overfly the ARSA, or transit below the 1,200 feet above ground level (AGL) floor between the 5- and 10-nautical-mile rings. Although this will not result in any appreciable delay, a small additional fuel burn will result from the climb portion of the altitude adjustment, which will be offset somewhat by the descent.

The FAA recognizes that the potential exists for delay to develop at some locations following the establishment of an ARSA. The additional traffic that the radar facilities will be handling as a result of the mandatory participation requirement may, in some instances, result in minor delays to aircraft operations. The FAA does not expect such delay to be appreciable. The FAA expects that the greater flexibility afforded controllers in handling traffic as a result of the reduced separation standards will keep delay problems to a minimum. Those delays that do occur will be transitional in nature, diminishing as facilities gain operating experience with ARSA's and learn how to tailor procedures and allocate resources to take fullest advantage of the increased efficiencies. This has been the experience at most of the locations where ARSA's have been in effect for the longest period of time and is the recurring trend at the locations that have been designated more recently.

The FAA does not expect that any operator will find it necessary to install radio transceivers as a result of establishing the ARSA in this rule. Aircraft operating to and from primary airports are already required to have two-way radio communications capability because of existing airport traffic areas and, therefore, will not incur any additional costs as a result of the new ARSA. Further, the FAA has made an effort to minimize these potential costs throughout the ARSA program by providing airspace exclusions, or cutouts, for satellite airports located within 5 nautical miles of the ARSA center where the ARSA would otherwise have extended down to the surface. Procedural agreements between the local ATC facility and the affected airports have also been used to avoid radio installation costs.

At some new ARSA locations, special situations might exist where the establishment of an ARSA could impose certain costs on users of that airspace. However, exclusions, cutouts, and special procedures have been used extensively throughout the ARSA program to alleviate adverse impacts on local fixed based and airport operators. Similarly, the FAA has eliminated potential adverse impacts on existing flight-training practice areas, as well as soaring, ballooning, parachuting, ultralight and banner towing activities, by developing special procedures to accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, the FAA does not expect that any such adverse impact will occur at the ARSA site in this rule.

b. Benefits

Most of the benefit that will result from ARSA's is nonquantifiable and attributable to simplification and standardization of ARSA configurations. This standardization should eliminate most of the confusion currently experienced by pilots operating in nonstandard TRSA's. Further, once experience is gained in ARSA operations, the air traffic controllers will obtain greater flexibility in handling traffic within an ARSA, which will enable them to move traffic more efficiently than under the current TRSA's. These expected savings may or may not offset the delay that some sites may experience after the initial establishment of an ARSA, but are expected to eventually provide overall time savings to all traffic, IFR as well as VFR, as both pilots and controllers become more familiar with ARSA operating procedures.

Some of the benefits of the ARSA cannot be specifically attributed to individual candidate airports, but rather will result from the overall improvements in terminal area ATC procedures realized as ARSA's are implemented throughout the country. ARSA's have the potential of reducing both near and actual midair collisions at the airports where they are established. Based upon the experience at the Austin and Columbus ARSA confirmation sites, the FAA estimates that near midair collisions may be reduced by approximately 35 to 40 percent. Further, the FAA estimates that the national implementation of the ARSA program may prevent approximately one midair collision every 1 to 2 years throughout the United States. The quantifiable benefits of preventing a midair collision can range from less than $100,000, due to the prevention of a minor, nonfatal accident between general aviation aircraft, to $300 million or more, due to the prevention of a midair collision involving a large air carrier aircraft and the numerous fatalities associated with such an incident. Establishment of an ARSA at the site in this final rule will

contribute to these improvements in safety.

c. Comparison of Costs and Benefits

A direct comparison of the costs and benefits of this rule is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, and it is difficult to specifically attribute the standardization benefits, as well as the safety benefits, to individual ARSA sites.

The FAA expects any adjustment problems that may be experienced at the ARSA location established in this rule will be only temporary, and that once established, the ARSA will result in an overall improvement in efficiency in terminal area operations. This has been the experience at the vast majority of ARSA sites that have already been implemented. In addition to these operational efficiency improvements, establishment of this ARSA site will contribute to a reduction in near and actual midair collisions. For these reasons, the FAA expects that the establishment of this ARSA site will produce long term, ongoing benefits which will far exceed their costs, which are essentially transitional in nature.

International Trade Impact Analysis

This final rule will only affect terminal airspace operating procedures at selected airports within the United States. As such, it will have no affect on the sale of foreign aviation products or services in the United States, nor will it affect the sale of United States aviation products or services in foreign countries.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. The RFA requires agencies to review rules that may have a significant economic impact on a substantial number of small entities.

The small entities that could be potentially affected by implementation of the ARSA program include fixed-base operators, flight schools, agricultural operators, and other small aviation businesses located at satellite airports within 5 nautical miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in the TRSA and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside the ARSA core. The FAA intends to exclude many satellite airports located within 5 nautical miles of the primary airport at candidate ARSA sites, to avoid any adverse impact on their operations and to simplify the coordination of ATC responsibilities between primary and satellite airports. In some cases, the same purposes will be achieved through Letters of Agreement, between ATC and the affected airports, establishing special procedures for operating to and from these airports. In this manner, the FAA expects to eliminate any adverse impact on the operations of small satellite airports that could result from the ARSA program. Similarly, the FAA expects to eliminate potentially adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures that will accommodate these activities through local agreements between ATC facilities and the affected organizations. The FAA has utilized such arrangements extensively in implementing the ARSA's that have been established to date.

Further, because the FAA expects any delay problems that may initially develop following implementation of an ARSA will be transitory, and because the airports that will be affected by the ARSA program represent only a small proportion of all the public-use airports in operation within the United States, no small entities of any type that use aircraft in the course of their business will be adversely impacted.

For these reasons, the FAA has determined that this rulemaking action is not expected to affect a substantial number of small entities. Therefore, the FAA certifies that this regulatory action will not result in a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Federalism Implications

The regulations adopted herein would not have substantial direct effects on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The Rule

This action designates an Airport Radar Service Areas (ARSA) at the City of Colorado Springs Municipal Airport, CO. The location designated is a public airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of this ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at this location will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

For the reasons discussed above, the FAA has determined that this regulation (1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Adoption of the amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. Section 71.501 is amended as follows:

Colorado Springs, CO [New]

That airspace within a 5-mile radius of the City of Colorado Springs Municipal Airport (lat. 38° 48' 31" N., long. 104° 42' 35" W.)

extending upward from the surface to and including 10,200 feet MSL; and that airspace extending upward from 8,500 feet MSL to 10,200 feet MSL between the 5- and 10-mile radius beginning at a line drawn from the 270° bearing from the airport at 5 miles direct to the 333° at 10 miles clockwise to Colorado State Highway 94, excluding that airspace east of Meridian Road and north of Garret Road, and that airspace extending upward from 7,500 feet MSL to 10,200 feet MSL from Colorado State Highway 94 clockwise to a line drawn from the 188° bearing from the airport at 10 miles direct to the 197° bearing from the airport at 5 miles.

Issued in Washington, DC, on December 8, 1988.

William C. Davis,

Acting Manager, Airspace—Rules and Aeronautical Information Division.

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

Special Research Grants Program for Fiscal Year 1989; Solicitation of Applications

Applications are invited for competitive grant awards under the Special Research Grants Program for fiscal year 1989.

The authority for this program is contained in section 2(c)(1) of the Act of August 4, 1965, Pub. L. 89–106, as amended (7 U.S.C. 450i(c)(1)). This program is administered by the Cooperative State Research Service (CSRS) of the U.S. Department of Agriculture (USDA). Under this program, and subject to the availability of funds, the Secretary may award grants for periods not to exceed five years, for the support of research projects to further the programs discussed below. Proposals may be submitted by any land-grant college or university, research foundation established by a land-grant college or university, State agricultural experiment station, and any college or university having a demonstrable capacity in food and agricultural research. Proposals from scientists at non-United States organizations will not be considered for support.

Applicable Regulations

Regulations applicable to this program include the following: (a) The Administrative Provisions governing the Special Research Grants Program, 7 CFR Part 3400 (50 FR 5498, February 8, 1985), as amended (53 FR 49640, December 8, 1988), which sets forth procedures to be followed when submitting grant proposals, rules governing the evaluation of proposals and the awarding of grants, and regulations relating to the post-award administration of grant projects; and (b) the USDA Uniform Federal Assistance Regulations, 7 CFR Part 3015. It should be noted that the weight allocated to the criteria for the evaluation of proposals has been changed by the recent amendment to 7 CFR 3400.15(a). The amended weighting system is applicable to the evaluation of proposals submitted in response to this solicitation.

Introduction to Program Description

Standard grants will be awarded to support basic studies in selected areas of (1) animal health research and (2) aquaculture research. Consideration will be given to proposals that address innovative as well as fundamental approaches to the research areas outlined below and that are consistent with the mission of USDA. The following specific program areas and guidelines are thus provided as a base from which proposals may be developed:

Program Area

1.0 Animal Health Research

CSRS Contacts: Dr. Dyarl D. King; Telephone: (202) 447–6428, Dr. Howard S. Teague; Telephone: (202) 447–3847.

Funds will be awarded to support research seeking solutions to health problems of livestock and poultry and major aquaculture species. A total of $5,408,340 is available for this program area for fiscal year 1989. Up to $150,000 will be awarded for the support of any one project under this program area, except in Aquaculture where the limit on a single award will be $80,000. A proposal will not be awarded by more than one peer panel in the Animal Health program area.
